LETTER OF SUBMITTAL

December 4, 1981

Honorable Robert T. Stafford
Chairman, Committee on Environment and Public Works
United States Senate
Washington, D.C. 20510

Dear Mr. Chairman:

The former chairman of the former Subcommittee on Resource Protection, Senator Culver, requested that CRS prepare a comprehensive legislative history for the Endangered Species Act, as passed in 1973 and then amended in 1978. Subcommittee staff subsequently requested that CRS incorporate in the legislative history actions of the 96th Congress which further amended the Act. I am pleased to submit this document in response to these several requests.

The history covers the antecedent endangered species enactments of 1966 and 1969, as well as the Endangered Species Act of 1973 and the amendments to it of 1976, 1977, 1978, 1979, and 1980. Included are principal bills, legislative reports, House and Senate debate and actions as recorded in the Congressional Record, and Executive actions. Annotated bibliographies of hearings and a section-by-section index are also included.

This legislative history was prepared by Judy L. Sheppard, a Reference Assistant with CRS at the time the history was organized (and now a Professional Wildlife Biologist with the Rocky Mountain Region of the U.S. Forest Service, Lakewood, Colorado), and by William C. Jolly, Specialist in Natural Resources Policy, in our Environment and Natural Resources Policy Division. Ms. Sheppard is responsible for the greater portion, having organized and prepared nearly all the materials relating to the 1966 through the 1978 enactments. Mr. Jolly prepared the material covering the 1979 and 1980 amendments and coordinated final preparation of copy. Bibliographic assistance in preparation of the Selected References in Part IX was provided by Adrienne Grenfell in our Library Services Division.

We hope that this legislative history will serve the needs of your committee as well as those of other committees and Members of Congress as reauthorization of the Endangered Species Act of 1973, as amended, is considered by Congress next year.

Sincerely,

Gilbert Gude

Letter of Transmittal

Dear Colleague:

The Endangered Species Act of 1973 (P.L. 93-205) is one of the most significant pieces of legislation enacted by the 93rd Congress, and indeed by all the Congresses in which I have been privileged to serve. The Act and the national policy which it enunciates have been internationally acclaimed for their vision and commitment to conservation and stewardship principles. As the nation has gained experience with the statute and with its implementation, Congress has made adjustments in its provisions.

The 1973 Act was a significant statute evolving out of simple statutes enacted in 1966 and 1969. It was subsequently amended in 1976, 1977, 1978, 1979 and 1980; most significantly in 1978 and 1979. In 1982, the authorization for appropriations under sections 6, 7, and 15 of the Endangered Species Act will expire. Accordingly, Congress will be considering the reauthorization of that appropriation authority during the second session of the 97th Congress.

In order to preserve the context in which the Act was developed, to aid interpretation of provisions finally adopted, and to assist the Congress in the reauthorization process, a detailed legislative history has been prepared by the Environmental Policy Division of the Congressional Research Service in the Library of Congress. Many of the original documents, such as committee reports, are either in limited supply or out of print. Yet, this material is widely sought after by lawyers and scholars and is essential to those who must implement the requirements of the Act. The publication of this legislative history will make all these necessary materials available in one comprehensive document, to Members of Congress, State and local officials, State attorneys general, State legislators, U.S. Attorneys, Federal officials, and the general public.

To assure the general availability of the important explanatory materials contained in this legislative history of P.L. 93-205, as amended, I have asked that it be published as a committee print for the use of the Committee on Environment and Public Works.

Sincerely yours,

Robert T. Stafford
Chairman

RTS/ssf

PREFACE

This legislative history was compiled by CRS at the direction of the Senate Committee on Environment and Public Works. It consists primarily of copy of original documents—bills, committee reports, and entries in the Congressional Record—reflecting views and judgments of their respective authors and not of the Congressional Research Service. Introductory material to each part of the compilation was prepared by CRS and sometimes includes language excerpted from Committee reports which may be judgmental or interpretive to some degree. Effort has been made to identify the source of such material for the benefit of the reader and to assure the objectivity of CRS has been maintained.

  - Further consideration of the bill (H.R. 4388) begun 1238
  - Agreement to Duncan floor amendment on the Tellico Dam and Reservoir 1238
  - House passage of H.R. 4388, with amendments, June 18, 1979 1239

Tellico Dam rider to the Energy—Continued

Senate action: Page

- H.R. 4388, as introduced in the Senate, June 20, 1979 1243
- Consideration of H.R. 4388, with amendments, begun 1244
- Consideration and passage of floor amendment to strike Tellico Dam and Reservoir provision from the bill 1245
- Senate passage of H.R. 4388, with amendments; appointment of conferees 1255

Conference committee, post-conference congressional, and executive actions:

- House conference report 96-388 (to accompany H.R. 4388 as reported by the Committee of Conference), July 25, 1979 1260
- House commences consideration of conference report on H.R. 4388 (August 1, 1979 but appears in the proceedings of the House of that day as published in the Congressional Record of August 2, 1979) 1262
- Comments of Mr. Bevill concerning Tellico Dam and Reservoir 1262
- House consideration and adoption of motion that it insist on its disagreement to the amendment of the Senate No. 30 (concerning Tellico Dam and Reservoir and which the conference committee reported in disagreement) 1263
- Senate consideration and acceptance of the conference report exclusive of amendments in disagreement, including that concerning the Tellico Dam and Reservoir—September 10, 1979 1284
- Senate consideration and adoption of a motion to recede from its Amendment No. 30 (and accept the House language), September 10, 1979 1288
- H.R. 4388, presented to President, September 13, 1979 1300
- H.R. 4388, signed into law, September 25, 1979 (Public Law 96-69) 1301

Endangered Species Act of 1973, appropriation authorization, Public Law 96-159:

- Background 1302
- Chronology—Public Law 96-159 1303
- Public Law 96-159 1304

House action:

- H.R. 2218 as introduced, February 15, 1979 1311
- H.R. 2218 as reported by the Committee on Merchant Marine and Fisheries, May 15, 1979 1313
- House Report 96-167 (to accompany H.R. 2218), May 15, 1979 1317
- House Committee on Rules cleared H.R. 2218; referred to the House Calendar 1336
- Proposed amendment to H.R. 2218, submitted by Mr. Breaux 1336
- House consideration and approval of H. Res. 417, providing for consideration of H.R. 2218 1340
- Proposed amendment by Mr. Breaux to the amendment to H.R. 2218 offered by Mr. Breaux 1347
- House consideration of H.R. 2218, October 22, 1979 1348
- Statement of Mr. Young in support of his proposed amendment to H.R. 2218, October 24, 1979 1358
- House consideration and passage of H.R. 2218, October 24, 1979 1360
- House consideration and passage of S. 1143, amended, October 24, 1979 (in lieu of H.R. 2218) 1382

Senate action:

- S. 1143, an original bill, as reported by the Committee on Environment and Public Works, May 15, 1979 1387
- Senate Report 96-151 (to accompany S. 1143), May 15, 1979 1391
- Senate consideration and passage of S. 1143, June 13, 1979 1404

Conference committee and executive action:

- House Conference Report 96-697 (to accompany S. 1143 as reported by the Committee of Conference), December 11, 1979 1431

PART I

LEGISLATIVE HISTORY OF THE ENDANGERED SPECIES ACT OF 1973

INTRODUCTION

BACKGROUND

The following material is taken from a review of fisheries and wildlife conservation legislation of the 93d Congress written by CRS and issued by the Senate Committee on Interior and Insular Affairs as a Committee Print (*See* Congress and the Nation's Environment: Environmental and Natural Resources Affairs of the 93d Congress. April 1975. Committee Print. Senate Committee on Interior and Insular Affairs, Washington, U.S. Govt. Print. Off., pp. 561–566):

> Congress first comprehensively addressed the problem of endangered species with passage of the Endangered Species Preservation Act of October 15, 1966 (Public Law 89–669). This Act caused the Secretary of the Interior to initiate and carry out program efforts to conserve, restore, and in some cases propagate certain species of indigenous fish and wildlife he determined to be in danger of extinction. The Act also consolidated and even expanded authority for the Secretary of the Interior to manage and administer the national Wildlife Refuge System. The endangered species program was expanded by the Endangered Species Act of 1969 (Public Law 91–135) which authorized the Secretary of the Interior to develop a list of species or subspecies of animals threatened with worldwide extinction and prohibited the importation from any foreign country of any such animal or any part, any product, or egg thereof. Limited exceptions for scientific, educational, zoological or propagational purposes and for certain cases of commercial "economic hardship" were allowed under strict permitting procedures. The 1969 Act also amended existing laws to prohibit throughout the United States the sale or purchase by any person of any domestically endangered species or part or product thereof which was taken in any manner in violation of the laws or regulations of a State or foreign country. Finally, the 1969 Act authorized up to $15 million to be appropriated to acquire lands for the purpose of conserving, protecting, restoring, or propagating any endangered species.
>
> Experience of the Department of the Interior with these two endangered species acts indicated they did not provide the management tools needed to act early enough to save a

vanishing species. Hearing testimony indicated remedial, stronger legislation should provide the Secretary of the Interior with considerable discretion in listing and delisting animals so that he could afford immediate protection to those species both within present danger of extinction and likely within the foreseeable future to become so endangered. Such legislation should provide protection for animals which are endangered or threatened, should amend existing law to permit Land and Water Conservation Fund Act monies to be used for habitat acquisition for endangered species conservation, and should assure the Secretary authority to acquire lands for such purposes. Testimony taken at the hearings also argued that the many efficient state management programs for the benefit of endangered species ought to be protected and not undercut by Federal legislation. In short, the hearing record indicated concern for wisely relating Federal and State efforts, for broadening the concept of "endangered species" to include threatened species not yet actually endangered or populations of species which may be in danger in part of the species range but not necessarily over all of it, and for providing strengthened means of habitat acquisition in furtherance of endangered species conservation.

[Thus the 93d Congress again addressed the subject of endangered species protection and considered several bills with the following results:]

The Administration bill (H.R. 4758), Congressman Dingell's bill (H.R. 37), and Senator Williams' bill (S. 1983) were not greatly dissimilar in their approach or content. H.R. 37 as reported . . . combined elements of the Administration and Dingell bills. Some items of note include:

(1) The administration bill contained language somewhat ambiguous so far as Federal preemption of State laws was concerned. H.R. 37 as reported made it clear that the States were to be free to adopt legislation or regulations. The only exception to State powers to regulate more restrictively or to include species not on the Federal list is in cases where specific Federal permission had been granted for or ban issued on importation, exploitation, or interstate commerce.

(2) The Administration bill did not address itself to the problems of endangered or threatened plant species while H.R. 37 did. As reported, H.R. 37 provided authority for the acquisition of critical habitat of plants in the U.S., regulation of their importation and exportation, and foreign assistance programs consistent with the purposes and policies of the Act. The question of national regulation of endangered plants was assigned to the Smithsonian Institution to study and to recommend action to the Congress within one year of the Act's taking effect.

(3) The Administration bill recommended that the expired authority provided in the earlier endangered species Act of 1966 and 1969 for acquisition of habitat be renewed and ex-

panded to allow the Secretary of the Interior to use funds from the Land and Water Conservation Fund and to use authorities under the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956, and the Fish and Wildlife Coordination Act, H.R. 37, as reported, accomplished that.

As reported, the Senate bill contained language defining the term "conservation and management" as these concepts relate to endangered species; the House bill did not. Some refinement of the definition was made in Conference, but a definition remained. The Senate bill also included an exception allowing an exclusion from the Act's protection in those cases (admittedly unlikely) where an endangered or threatened species of insect might pose an overwhelming and overriding risk to man. Thus the Secretary's hands would not be tied in this hypothetical exigency. The Senate bill also added a definition of "commercial activity" to delineate the types of activities which would qualify for special treatment under the Act. Included are trades and exchanges of animals or their products wherever they are undertaken for gain or profit.

The bill reported out of Conference assigned responsibility for the general management and regulation of marine species to the Secretary of Commerce; neither House nor Senate bills had addressed that jurisdictional problem. While both bills require the Secretary of the Interior to engage in consultation with all affected parties prior to determining the status of any given species, the Senate bill had required consultation with a special Advisory Committee created for that purpose; the House bill had no such body created. The Conference bill as reported deleted creation of such a body but required the Governor of each state within which the species under consideration is known to occur to be specially notified that a review of the species' status was underway and specifying such State was to have at least 90 days in which to respond.

The Senate bill had followed in part and differed in part from the otherwise controlling Administrative Procedures Act; the House bill did not address the subject thereby deferring to that Act. Enforcement agencies had expressed concern that the variations might complicate matters unduly so the conference bill as reported substituted language extending the period of public notice, providing for discretionary hearings, and establishing procedures for emergency, short-term action.

With respect to land acquisition, both House and Senate bills provided authority for endangered species conservation program managers to acquire habitat deemed critical to the survival of such endangered species, but the Senate bill restricted the authority to fish and wildlife habitat. The House bill extended the authority to acquire plant habitat, but restricted it to the Secretary of the Interior alone; the Conference bill included these House provisions.

So far as cooperation with the states is concerned, the House placed responsibility for establishing and overseeing an endangered species program in the Federal government in combination with development of cooperative agreements with concerned state agencies. The Senate opted for cooperative state and federal programs but gave the initial responsibility to the states. The Conference bill as reported compromised with a device to give the states fundamental roles with regard to resident species for a given period of time in hopes that strong state programs will be developed avoiding any Federal preemption. After this establishment period, the law would apply as in the House bill.

While both bills provided for a grant program to enable the states to develop systems for conserving endangered and threatened species, the Senate bill authorized a sum of $10 million over a 3½ year period and the House bill was open-ended; the Senate bill restricted unobligated grant authority to other grant programs under that section of the bill whereas the House bill authorized a larger share of assistance. The Senate version prevailed except in respect to the federal percentage of cost-sharing agreements.

Both bills authorized international endangered species programs but the Senate restricted them to countries in which counterpart funds were provided; the House stipulated that where such counterpart funds were available, they should be used in preference to appropriated funds. The House version prevailed. The House also allowed foreign assistance programs relating to plants but the Senate did not; the Senate version prevailed.

On the subject of species held in captivity or in a controlled environment as of the date of enactment, the Senate bill restricted prohibitions so as to exclude such animals; the House bill was silent thus making such prohibitions applicable. The Conference version of these bills provided alternative language positively defending certain of these noncommercial activities but placing the burden of proof on the person holding such goods or animals to show noncommercial purpose and action.

Application of and exceptions under the Act so far as Alaskan natives were concerned was a sensitive consideration. The Senate bill had extensive language providing exceptions for certain Alaskan native and nonnative residents to take threatened or endangered species for purposes of subsistence or native handicrafts; the House bill was silent on the subject. The Conference version provides for an Alaskan native exception which allows the State of Alaska to restrict native and non-native taking as a part of or separate from a state endangered species program. Natives, in this act, are considered to be as defined in the Alaska Native Land Claims Settlement Act.

Both bills provided for study of problems associated with endangered and threatened plant species, such as controls on interstate commerce. The House version prevailed, assigning the study directive to the Smithsonian Institution.

The Senate bill provided language specifying whenever a conflict between the Endangered Species Act and the Marine Mammal Protection Act might occur, the stricter of the two should prevail. The House accepted the Senate provision.

Finally, the Senate bill contained language prohibiting construction of a road through the Pioneer Weapons Hunting Area in the Daniel Boone National Forest. This provision was deleted in Conference on the grounds it was controversial enough to warrant separate hearings and Congressional consideration. There were other, relatively minor, differences between the Senate and House bills but these were largely of a technical, confronting or clarifying nature.

Thus, as enacted, Public Law 93–205 finds biological extinction is a continuing threat domestically and internationally and that it is the responsibility and intent of the Nation to conserve various species of fish and wildlife and plants both domestic and foreign, and that a key to meeting international and domestic responsibilities for fish and wildlife conservation is through financial assistance and other incentive programs which encourage States and other interested parties to develop and maintain conservation programs meeting national and international standards. The purpose of the Act is stated to be provision of "a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved, to provide a program for the conservation of such endangered species and threatened species, and to take such steps as may be appropriate to achieve the purposes of the treaties and conventions set forth" (in a subsection of the Act). The stated policy of the Congress is declared to be "that all Federal departments and agencies shall seek to conserve endangered species and threatened species and shall utilize their authorities in furtherance of the purposes of this Act."

To effect this policy in pursuit of the Act's purposes, the Act provides for the Secretaries of the Interior and Commerce to determine which species are endangered and which threatened according to any of a number of broadly worded causes and on the basis of the best scientific and commercial data, and after following specified procedures of consultation and notification of intent, to publish official lists of such species. The Act provides for the Secretaries of Commerce and of the Interior, as appropriate, to promulgate regulations designed for the conservation of such listed species. They may extend endangered and threatened species status to non-endangered or non-threatened species which resemble listed species if necessary to best assure adequate protection of the latter. Other provisions of the Act include establishment and implementation of a program by the Secretary of the Interior to conserve certain species of fish, wildlife and plants by utilizing land acquisition and other authority under the Fish and Wildlife Act of 1956, as amended, and the Migratory Bird Conservation Act, as appropriate, and by newly authorized authority to acquire lands, waters or interests therein, which authority is in addition to any other land acquisition authority the Secretary of the Interior possesses. Land and Water Conservation Fund Act of 1956 funds are made available for land acquisition as part of endangered species conservation programs. In carrying out the program authorized by the Act, the appropriate Secretary is charged to cooperate with the States to the maximum extent possible, including consultation, entry into management and administration agreements for certain areas, and entry into cooperative agreements to assist States in implementing their own "adequate and active" programs for the conservation of endangered and threatened species. The Secretary is authorized to provide financial assistance to any State with which it has entered into a cooperative agreement; the allocation of available funds is to be on the basis of specified factors or criteria; and the Federal share of program costs is to be no more than 66⅔ percent (or up to 75 percent if the joint Federal-state cooperative agreement involves two or more states).

The Endangered Species Act of 1973 also provides that in case of conflict between state laws and this law, the Federal law takes precedence unless the State law is more restrictive in provisions protecting endangered or threatened species. The Secretary is charged to review other programs under his administration and utilize them in furtherance of the purposes of the Act. All other Federal departments and agencies are to consult with the Secretary of Commerce or the Secretary of the Interior, as appropriate, and with the assistance of those Secretaries to use their authorities to carry out endangered and threatened species conservation programs, to see that actions authorized, funded or carried out by them do not have adverse effects on the survival of such species including destruction of habitat deemed critical to their survival as determined by the appropriate Secretary.

The President is authorized to use certain foreign currencies to assist any consenting foreign country in the development and management of programs in that country determined by the appropriate Secretary to be necessary or useful for the conservation of any listed species. He is also authorized, when necessary, to use appropriated funds as well as, or instead of, available foreign currencies. The Secretaries of the Interior and Commerce, certain foreign countries in the form of loaned personnel, conduct of personnel education and training programs, and conduct of law enforcement investigations and research abroad.

The Act also provides for assistance of various kinds in implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora.

There is a detailed section dealing with prohibited acts which apply to all individuals subject to U.S. jurisdiction. Listed species may not be taken, possessed, bought, sold, traded, imported, exported, delivered, carried, transported, received, etc. on penalty of fine or imprisonment or both. Similar prohibitions apply to violations of provisions of the Convention cited above.

Species held in captivity or in controlled environments for noncommercial purposes on the effective date of the Act are exempted from these prohibitions. Exemption is also provided for taking of listed species by Alaskan natives for subsistence purposes. A permit system is also established to regulate some taking and possession of endangered species for scientific purposes or to enhance propagation or survival of the affected species or for reasons of economic hardship as carefully prescribed.

Finally, civil and criminal penalties for violations are set forth, court jurisdiction is addressed, citizen suits in support of the purposes of this legislation are specifically authorized. The Smithsonian Institution is instructed to prepare a proposed list of endangered and threatened plants and to recommend methods of adequate protection of such species, including needed legislative action. Conforming amendments addressing other pertinent legislation are provided, portions of the earlier endangered species acts are repealed, appropriations are authorized, and a last section of the law provides that no provision of the Act shall take precedence over any more restrictive conflicting provision of the Marine Mammal Protection Act of 1972.

As signed into law, S. 1983 became Public Law 92-205. There follow the texts of the 1966 and 1969 Acts, and a chronology of enactment of the 1973 statute. Subsequently, the next section provides the documentary history of the 1973 Act.

Public Law 89-669
89th Congress, H. R. 9424
October 15, 1966

An Act

To provide for the conservation, protection, and propagation of native species of fish and wildlife, including migratory birds, that are threatened with extinction; to consolidate the authorities relating to the administration by the Secretary of the Interior of the National Wildlife Refuge System; and for other purposes.

Fish and wildlife.
Conservation and protection.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Congress finds and declares that one of the unfortunate consequences of growth and development in the United States has been the extermination of some native species of fish and wildlife; that serious losses in other species of native wild animals with educational, historical, recreational, and scientific value have occurred and are occurring; and that the United States has pledged itself, pursuant to migratory bird treaties with Canada and Mexico and the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, to conserve and protect, where practicable, the various species of native fish and wildlife, including game and nongame migratory birds, that are threatened with extinction. The purposes of this Act are to provide a program for the conservation, protection, restoration, and propagation of selected species of native fish and wildlife, including migratory birds, that are threatened with extinction, and to consolidate, restate, and modify the present authorities relating to administration by the Secretary of the Interior of the National Wildlife Refuge System.

39 Stat. 1702;
50 Stat. 1311.
56 Stat. 1354.

(b) It is further declared to be the policy of Congress that the Secretary of the Interior, the Secretary of Agriculture, and the Secretary of Defense, together with the heads of bureaus, agencies, and services within their departments, shall seek to protect species of native fish and wildlife, including migratory birds, that are threatened with extinction, and, insofar as is practicable and consistent with the primary purposes of such bureaus, agencies, and services, shall preserve the habitats of such threatened species on lands under their jurisdiction.

Endangered species.

(c) A species of native fish and wildlife shall be regarded as threatened with extinction whenever the Secretary of the Interior finds, after consultation with the affected States, that its existence is endangered because its habitat is threatened with destruction, drastic modification, or severe curtailment, or because of overexploitation, disease, predation, or because of other factors, and that its survival requires assistance. In addition to consulting with the States, the Secretary shall, from time to time, seek the advice and recommendations of interested persons and organizations including, but not limited to, ornithologists, ichthyologists, ecologists, herpetologists, and mammalogists. He shall publish in the Federal Register the names of the species of native fish and wildlife found to be threatened with extinction in accordance with this paragraph.

Publication in Federal Register.

SEC. 2. (a) The Secretary of the Interior shall utilize the land acquisition and other authorities of the Migratory Bird Conservation Act, as amended, the Fish and Wildlife Act of 1956, as amended, and the Fish and Wildlife Coordination Act to carry out a program in the United States of conserving, protecting, restoring, and propagating selected species of native fish and wildlife that are threatened with extinction.

45 Stat. 1222;
70 Stat. 1119;
60 Stat. 1080.
16 USC 715, 742a note, 661 note.

(b) In addition to the land acquisition authorities in such Acts the Secretary is hereby authorized to acquire by purchase, donation, or otherwise, lands or interests therein needed to carry out the purpose of this Act relating to the conservation, protection, restoration, and propagation of selected species of native fish that are threatened with extinction.

16 USC 460l-4 note.

(c) Funds made available pursuant to the Land and Water Conservation Fund Act of 1965 (78 Stat. 897) may be used for the purpose of acquiring lands, waters, or interests therein pursuant to this section that are needed for the purpose of conserving, protecting, restoring, and propagating selected species of native fish and wildlife, including migratory birds, that are threatened with extinction. Not to exceed $5,000,000 may be appropriated annually pursuant to that Act for such purpose for any fiscal year, and the total sum appropriated for such purpose shall not exceed $15,000,000: *Provided*, That the Secretary shall, to the greatest extent possible, utilize funds from the Land and Water Conservation Fund Act of 1965 for such purpose. Such sums shall remain available until expended. The Secretary shall not use more than $750,000 to acquire lands, waters, or interests therein for any one area for such purpose unless authorized by Act of Congress.

(d) The Secretary shall review other programs administered by him and, to the extent practicable, utilize such programs in furtherance of the purpose of this Act. The Secretary shall also encourage other Federal agencies to utilize, where practicable, their authorities in furtherance of the purpose of this Act and shall consult with and assist such agencies in carrying out endangered species program.

Cooperation with States.

SEC. 3. (a) In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the several States. Such cooperation shall include consultation before the acquisition of any land for the purpose of conserving, protecting, restoring, or propagating any endangered species of native fish and wildlife.

(b) The Secretary may enter into agreements with the States for the administration and management of any area established for the conservation, protection, restoration, and propagation of endangered species of native fish and wildlife. Any revenues derived from the administration of such areas under these agreements shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383), as amended (16 U.S.C. 715s).

78 Stat. 701.
"National Wildlife Refuge System."

SEC. 4. (a) For the purpose of consolidating the authorities relating to the various categories of areas that are administered by the Secretary of the Interior for the conservation of fish and wildlife, including species that are threatened with extinction, all lands, waters, and interests therein administered by the Secretary as wildlife refuges, areas for the protection and conservation of fish and wildlife that are threatened with extinction, wildlife ranges, game ranges, wildlife management areas, or waterfowl production areas are hereby designated as the "National Wildlife Refuge System" (referred to herein as the "System"), which shall be subject to the provisions of this section. Nothing contained in this Act shall restrict the authority of the Secretary to modify or revoke public land withdrawals affecting lands in the System as presently constituted, or as it may be constituted, whenever he determines that such action is consistent with the public interest.

Administration.

(b) In administering the System, the Secretary is authorized—

(1) to enter into contracts with any person or public or private agency through negotiation for the provision of public accommodations when, and in such locations, and to the extent that the

Secretary determines will not be inconsistent with the primary purpose for which the affected area was established.

(2) to accept donations of funds and to use such funds to acquire or manage lands or interests therein, and

(3) to acquire lands or interests therein by exchange (a) for acquired lands or public lands under his jurisdiction which he finds suitable for disposition, or (b) for the right to remove, in accordance with such terms and conditions as the Secretary may prescribe, products from the acquired or public lands within the System. The values of the properties so exchanged either shall be approximately equal, or if they are not approximately equal the values shall be equalized by the payment of cash to the grantor or to the Secretary as the circumstances require.

Prohibited activities.

(c) No person shall knowingly disturb, injure, cut, burn, remove, destroy, or possess any real or personal property of the United States, including natural growth, in any area of the System; or take or possess any fish, bird, mammal, or other wild vertebrate or invertebrate animals or part or nest or egg thereof within any such area; or enter, use, or otherwise occupy any such area for any purpose; unless such activities are performed by persons authorized to manage such area, or unless such activities are permitted either under subsection (d) of this section or by express provision of the law, proclamation, Executive order, or public land order establishing the area, or amendment thereof: *Provided*, That the United States mining and mineral leasing laws shall continue to apply to any lands within the System to the same extent they apply prior to the effective date of this Act unless subsequently withdrawn under other authority of law. Nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife, including endangered species thereof, on lands not within the System. The regulations permitting hunting and fishing of resident fish and wildlife within the System shall be, to the extent practicable, consistent with State fish and wildlife laws and regulations. The provisions of this Act shall not be construed as affecting the authority, jurisdiction, or responsibility of the several States to manage, control, or regulate fish and resident wildlife under State law or regulations in any area within the System.

Use of areas.

(d) The Secretary is authorized, under such regulations as he may prescribe, to—

(1) permit the use of any area within the System for any purpose, including but not limited to hunting, fishing, public recreation and accommodations, and access whenever he determines that such uses are compatible with the major purposes for which such areas were established: *Provided*, That not to exceed 40 per centum at any one time of any area that has been, or hereafter may be acquired, reserved, or set apart as an inviolate sanctuary for migratory birds, under any law, proclamation, Executive order, or public land order may be administered by the Secretary as an area within which the taking of migratory game birds may be permitted under such regulations as he may prescribe; and

(2) permit the use of, or grant easements in, over, across, upon, through, or under any areas within the System for purposes such as but not necessarily limited to, powerlines, telephone lines, canals, ditches, pipelines, and roads, including the construction, operation, and maintenance thereof, whenever he determines that such uses are compatible with the purposes for which these areas are established.

Penalties.

(e) Any person who violates or fails to comply with any of the provisions of this Act or any regulations issued thereunder shall be fined not more than $500 or be imprisoned not more than six months, or both.

Enforcement. (f) Any person authorized by the Secretary of the Interior to enforce the provisions of this Act or any regulations issued thereunder, may, without a warrant, arrest any person violating this Act or regulations in his presence or view, and may execute any warrant or other process issued by an officer or court of competent jurisdiction to enforce the provisions of this Act or regulations, and may with a search warrant search for and seize any property, fish, bird, mammal, or other wild vertebrate or invertebrate animals or part or nest or egg thereof, taken or possessed in violation of this Act or the regulations issued thereunder. Any property, fish, bird, mammal, or other wild vertebrate or invertebrate animals or part or egg thereof seized with or without a search warrant shall be held by such person or by a United States marshal, and upon conviction, shall be forfeited to the United States and disposed of by the court.

(g) Regulations applicable to areas of the System that are in effect on the date of enactment of this Act shall continue in effect until modified or rescinded.

(h) Nothing in this section shall be construed to amend, repeal, or otherwise modify the provision of the Act of September 28, 1962 (76 Stat. 653; 16 U.S.C. 460K—460K-4) which authorizes the Secretary of the Interior to administer the areas within the System for public recreation. The provisions of this section relating to recreation shall be administered in accordance with the provisions of said Act.

(i) Nothing in this Act shall constitute an express or implied claim or denial on the part of the Federal Government as to exemption from State water laws.

Definitions. Sec. 5. (a) The term "person" as used in this Act means any individual, partnership, corporation, or association.

(b) The terms "take" or "taking" or "taken" as used in this Act mean to pursue, hunt, shoot, capture, collect, kill, or attempt to pursue, hunt, shoot, capture, collect, or kill.

(c) The terms "State" and the "United States" as used in this Act mean the several States of the United States, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, and Guam.

Sec. 6. Section 4(b) of the Act of March 16, 1934 (48 Stat. 451), 72 Stat. 486. as amended (16 U.S.C. 718d(b)), is further amended by changing the colon after the word "areas" to a period and striking the provisos, which relate to hunting at certain wildlife refuges and which are now covered by section 4 of this Act.

Sec. 7. (a) Sections 4 and 12 of the Migratory Bird Conservation Act (45 Stat. 1222), as amended (16 U.S.C. 715c and 715k), are further amended by deleting the word "game" wherever it appears.

(b) Section 10 of the Migratory Bird Conservation Act (45 Stat. 1224), as amended (16 U.S.C. 715i), which relates to the administration of certain wildlife refuges, is amended to read as follows:

"Sec. 10. (a) Areas of lands, waters, or interests therein acquired or reserved pursuant to this Act shall, unless otherwise provided by law, be administered by the Secretary of the Interior under rules and regulations prescribed by him to conserve and protect migratory birds in accordance with treaty obligations with Mexico and Canada, and other species of wildlife found thereon, including species that are threatened with extinction, and to restore or develop adequate wildlife habitat.

"(b) In administering such areas, the Secretary is authorized to manage timber, range, and agricultural crops; to manage other species of animals, including but not limited to fenced range animals, with the objectives of perpetuating, distributing, and utilizing the resources; and to enter into agreements with public and private agencies."

(c) Section 11 of the Migratory Bird Conservation Act (45 Stat. 1224) (16 U.S.C. 715j) is amended by striking the period at the end thereof and adding the following: "(39 Stat. 1702) and the treaty between the United States and the United Mexican States for the protection of migratory birds and game mammals concluded February 7, 1936 (50 Stat. 1311)."

45 Stat. 1224.

(d) Sections 13 and 14 of the Migratory Bird Conservation Act (45 Stat. 1225), as amended (16 U.S.C. 715l and 715m), which provide for the enforcement of said Act and for penalties for violations thereof and which are covered by section 4 of this Act, are repealed.

Repeal.

Sec. 8. (a) Sections 302 and 303 of title III of the Act of June 15, 1935 (49 Stat. 382), as amended (16 U.S.C. 715d-1 and 715d-2), which authorize exchanges at wildlife refuges and which are covered by section 4 of this Act, are repealed.

Repeal.

(b) The last sentence of section 401(a) of the Act of June 15, 1935 (49 Stat. 383), as amended (16 U.S.C. 715s), is amended by inserting after the term "wildlife refuges", the following: "lands acquired or reserved for the protection and conservation of fish and wildlife that are threatened with extinction,".

78 Stat. 701.

Sec. 9. The first clause in section 1 of the Act of September 28, 1962 (76 Stat. 653), is amended by deleting the words "national wildlife refuges, game ranges," and inserting therein "areas within the National Wildlife Refuge System,".

16 USC 460k.

Sec. 10. (a) The first sentence in section 1 of the Act of August 22, 1957 (71 Stat. 412; 16 U.S.C. 696), is amended to read as follows:

Key deer and other wildlife, preservation.

"Sec. 1. In order to protect and preserve in the national interest the key deer and other wildlife resources in the Florida Keys, the Secretary of the Interior is authorized to acquire by purchase, lease, exchange, and donations, including the use of donated funds, such lands or interests therein in townships 65 and 66 south, ranges 28, 29, and 30 east, Monroe County, Florida, as he shall find to be suitable for the conservation and management of the said key deer and other wildlife: *Provided*, That no lands within a one thousand-foot zone adjacent to either side of United States Highway Numbered 1 in Monroe County shall be acquired for the Key Deer National Wildlife Refuge by condemnation. The Secretary, in the exercise of his exchange authority, may accept title to any non-Federal property in townships 65 and 66 south, ranges 28, 29, and 30 east, Monroe County, Florida, and in exchange therefor convey to the grantor of such property any federally owned property in the State of Florida under his jurisdiction which he classifies as suitable for exchange or other disposal. The values of the properties so exchanged either shall be approximately equal, or if they are not approximately equal the values shall be equalized by the payment of cash to the grantor or to the Secretary as the circumstances require."

71 Stat. 413.

(b) Section 3 of such Act of August 22, 1957 (16 U.S.C. 696b), is amended by striking out the second and third sentences and inserting in lieu thereof the following: "The Secretary shall not utilize more than $2,035,000 from appropriated funds for the acquisition of land and interests in land for the purposes of this Act."

Approved October 15, 1966.

Public Law 91-135
91st Congress, H. R. 11363
December 5, 1969

An Act

83 STAT. 275

To prevent the importation of endangered species of fish or wildlife into the United States; to prevent the interstate shipment of reptiles, amphibians, and other wildlife taken contrary to State law; and for other purposes.

Fish or wildlife.
Importation of endangered species, prevention.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of sections 2 through 5 of this Act, the term—

(1) "Secretary" means the Secretary of the Interior;

(2) "fish or wildlife" means any wild mammal, fish, wild bird, amphibian, reptile, mollusk, or crustacean, or any part, products, egg, or offspring thereof, or the dead body or parts thereof;

(3) "United States" includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, and Guam; and

(4) "person" means any individual, firm, corporation, association, or partnership.

Sec. 2. Except as provided in section 3 of this Act, whoever imports from any foreign country into the United States any species or subspecies of fish or wildlife which the Secretary has determined, in accordance with the provisions of section 3 of this Act, to be threatened with worldwide extinction, shall be punished in accordance with the provisions of section 4 of this Act.

Species threatened with extinction.
Determination by Interior Secretary.

Sec. 3. (a) A species or subspecies of fish or wildlife shall be deemed to be threatened with worldwide extinction whenever the Secretary determines, based on the best scientific and commercial data available to him and after consultation, in cooperation with the Secretary of State, with the foreign country or countries in which such fish or wildlife are normally found and, to the extent practicable, with interested persons and organizations and other interested Federal agencies, that the continued existence of such species or subspecies of fish or wildlife is, in the judgment of the Secretary, endangered due to any of the following factors: (1) the destruction, drastic modification, or severe curtailment, or the threatened destruction, drastic modification, or severe curtailment, of its habitat, or (2) its overutilization for commercial or sporting purposes, or (3) the effect on it of disease or predation, or (4) other natural or man-made factors affecting its continued existence. After making such determination, the Secretary shall promulgate and from time to time he may revise, by regulation, a list in the Federal Register of such fish or wildlife by scientific, common, and commercial name or names, together with his determination. The Secretary shall at least once every five years conduct a thorough review of any such list to determine what, if any, changes have occurred relative to the continued existence of the species or subspecies of fish or wildlife then on the list and to determine whether such fish or wildlife continue to be threatened with worldwide extinction. Upon completion of such review, he shall take appropriate action consistent with the purposes of this Act. The Secretary shall, upon the request of any interested person, also conduct such review of any particular listed species or subspecies at any other time if he finds and publishes his finding that such person has presented substantial evidence to warrant such a review.

Publication in Federal Register.

Economic hardship.
Filing of application.

(b) In order to minimize undue economic hardship to any person importing any species or subspecies of fish or wildlife which are determined to be threatened with worldwide extinction under this section, under any contract entered into prior to the date of publication of such determination in the Federal Register of such species or subspecies, the

Secretary, upon such person filing an application with him and upon filing such information as the Secretary may require showing, to his satisfaction, such hardship, shall permit such person to import such species or subspecies in such quantities and for such periods, not to exceed one year, as he determines to be appropriate.

Importation for educational or scientific purposes.

(c) The Secretary may permit, under such terms and conditions as he may prescribe, the importation of any species or subspecies of fish or wildlife listed in the Federal Register under this section for zoological, educational, and scientific purposes, and for the propagation of such fish or wildlife in captivity for preservation purposes, unless such importation is prohibited by any other Federal law or regulation.

(d) The provisions of section 553 of title 5 of the United States Code shall apply to any regulation issued under this section.

80 Stat. 383.

Violations, penalty provisions.

SEC. 4. (a)(1) Any person who violates any provision of section 2 or 3 of this Act or any regulation or permit issued thereunder, or any regulation issued under subsection (d) of this section, other than a violation the penalty for which is prescribed by subsection (b) of this section, shall be assessed a civil penalty by the Secretary of not more than $5,000 for each such violation. No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay the penalty assessed under this paragraph, the Secretary may request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found or resides or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. In hearing such action, the court shall have authority to review the violation and the assessment of the civil penalty de novo.

Hearing notice.

Search and seizure warrant.

(2) Any employee authorized pursuant to subsection (c) of this section to enforce the provisions of sections 2 and 3 of this Act, and any regulations or permits issued pursuant thereto or pursuant to subsection (d) of this section, shall have authority, in addition to any other authority provided by law relating to search and seizure, to execute any warrant to search for and seize any fish or wildlife or property or items taken, used, or possessed in connection with any violation of any such section, regulation, or permit with respect to which a civil penalty may be assessed pursuant to paragraph (1) of this subsection. Such fish, wildlife, property, or item so seized shall be held by any employee authorized by the Secretary or the Secretary of the Treasury pending disposition of proceedings by the Secretary involving the assessment of a civil penalty pursuant to paragraph (1) of this subsection; except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit such person to post a bond or other surety satisfactory to the Secretary. Upon the assessment of a civil penalty pursuant to paragraph (1) of this subsection for any nonwillful violation of any such section, regulation, or permit, such fish wildlife, property, or item so seized may be proceeded against in any court of competent jurisdiction and forfeited to the Secretary for disposition by him in such manner as he deems appropriate. The owner or consignee of any such fish, wildlife, property, or item so seized shall, as soon as practicable following such seizure, be notified of that fact in accordance with regulations established by the Secretary or the Secretary of the Treasury. Whenever any fish or wildlife or property or item is seized pursuant to this subsection, the Secretary shall move to dispose of the civil penalty proceedings pursuant to paragraph (1) of this subsection as expeditiously as possible. If, with respect to any such fish, wildlife, property, or item so seized no action is commenced in any court of competent jurisdiction to obtain the

Posting of bond.

Notification of seizure.

forfeiture of such fish, wildlife, property, or item within thirty days following the disposition of proceedings involving the assessment of a civil penalty, such fish, wildlife, property, or item shall be immediately returned to the owner or the consignee in accordance with regulations promulgated by the Secretary.

Penalty.

(b) Any person who willfully violates any provision of section 2 or 3 of this Act or any regulation or permit issued thereunder or any regulation issued under subsection (d) of this section shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than one year, or both.

Enforcement provisions.

(c) The provisions of sections 2 and 3 of this Act and any regulations or permits issued pursuant thereto or pursuant to subsection (d) of this section shall be enforced by either the Secretary or the Secretary of the Treasury, or both such Secretaries. Either Secretary may utilize, by agreement, the personnel, services, and facilities of any other Federal agency or any State agency. Any employee of the Department of the Interior or the Department of the Treasury authorized by the Secretary or the Secretary of the Treasury may, without a warrant, arrest any person who such employee has probable cause to believe is willfully violating, in his presence or view, any such section, or any regulation or permit issued thereunder, the penalty for which is provided under subsection (b) of this section, and may execute a warrant or other process issued by an officer or court of competent jurisdiction to enforce the provisions of such sections, regulations or permits. An employee who has made an arrest of a person in connection with any such willful violation may search such person at the time of his arrest and seize any fish or wildlife or property or items taken, used, or possessed in connection with any such violation, or any such employee shall have authority, in addition to any other authority provided by law relating to search and seizure, to execute any warrant to search for and seize any such fish, wildlife, property, or item so taken, used, or possessed. Any fish or wildlife or property or item seized shall be held by any employee authorized by the Secretary or the Secretary of the Treasury or by a United States marshal pending disposition of the case by the court, commissioner, or magistrate, except that the Secretary may, in lieu thereof, permit such person to post a bond or other surety satisfactory to him. Upon conviction, any (1) fish or wildlife seized shall be forfeited to the Secretary for disposal by him in such manner as he deems appropriate, and (2) any other property or items seized may, in the discretion of the court, commissioner, or magistrate, be forfeited to the United States or otherwise disposed of. The owner or consignee of any such fish, wildlife, property, or item so seized, shall, as soon as practicable following such seizure, be notified of that fact in accordance with regulations established by the Secretary or the Secretary of the Treasury. If no conviction results from any such alleged violation, such fish, wildlife, property or item so seized in connection therewith shall be immediately returned to the owner or consignee in accordance with regulations promulgated by the Secretary, unless the Secretary, within thirty days following the final disposition of the case involving such violation, commences proceedings under subsection (a) of this section.

Notification of seizure.

Return of property to owner.

U.S. ports of entry; designation by Secretary. Hearing notice.

(d) For the purposes of facilitating enforcement of sections 2 and 3 of this Act and reducing the costs thereof, the Secretary, with the approval of the Secretary of the Treasury, shall, after notice and an opportunity for a public hearing, from time to time designate, by regulation, any port or ports in the United States for the importation of fish and wildlife, other than shellfish and fishery products imported for commercial purposes, into the United States. The importation of

Exceptions.

such fish or wildlife into any port in the United States, except those so designated, shall be prohibited after the effective date of such designations; except that the Secretary, under such terms and conditions as he may prescribe, may permit importation at nondesignated ports for movement to designated ports of entry. Such regulations may provide other exceptions to such prohibition if the Secretary deems it appropriate and consistent with the purposes of this subsection.

Regulations, issuance.

(e) In carrying out the provisions of sections 2 through 5 of this Act, the Secretary may issue such regulations as may be appropriate.

International agreements for fish and wildlife preservation.

SEC. 5. (a) In carrying out the provisions of sections 2 and 3 of this Act, the Secretary, through the Secretary of State, shall encourage foreign countries to provide protection to species and subspecies of fish or wildlife threatened with worldwide extinction, to take measures to prevent any fish or wildlife from becoming threatened with extinction, and shall cooperate with such countries in providing technical assistance in developing and carrying out programs to provide such protection, and shall, through the Secretary of State, encourage bilateral and multilateral agreements with such countries for the protection, conservation, and propagation of fish or wildlife. The Secretary shall also encourage persons, taking directly or indirectly fish or wildlife in foreign countries for importation into the United States for commercial or other purposes, to develop and carry out, with such assistance as he may provide under any authority available to him, conservation practices designed to enhance such fish or wildlife and their habitat. The Secretary of State, in consultation with the Secretary, shall take appropriate measures to encourage the development of adequate measures, including, if appropriate, international agreements, to prevent such fish or wildlife from becoming threatened with worldwide extinction.

International conservation convention.

(b) To assure the worldwide conservation of endangered species and to prevent competitive harm to affected United States industries, the Secretary, through the Secretary of State, shall seek the convening of an international ministerial meeting on fish and wildlife prior to June 30, 1971, and included in the business of that meeting shall be the signing of a binding international convention on the conservation of endangered species.

Appropriation.

(c) There are authorized to be appropriated such sums, not to exceed $200,000, as may be necessary to carry out the provisions of subsection (b) of this section, such sums to remain available until expended.

Law administration, coordination.

26 Stat. 416;
32 Stat. 792;
76 Stat. 129;
46 Stat. 689.

SEC. 6. (a) The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act and amendments made by this Act, with the administration of the animal quarantine laws (21 U.S.C. 101 et seq., 21 U.S.C. 111, 21 U.S.C. 134 et seq.) and the Tariff Act of 1930, as amended (19 U.S.C. 1306).

(b) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations of animals and other articles and no proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture.

46 Stat. 741.

(c) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, as amended, including, without limitation, section 527 of said Act (19 U.S.C. 1527) relating to the importation of wildlife taken, killed, possessed or exported to the United States in violation of the laws or regulations of a foreign country.

SEC. 7. (a) Section 43 of title 18, United States Code, is amended to read as follows: 62 Stat. 687; 74 Stat. 754.

"§ 43. Transportation of wildlife taken in violation of State, National, or foreign laws; receipt; making false records

"(a) Any person who—

"(1) delivers, carries, transports, or ships, by any means whatever, or causes to be delivered, carried, transported, or shipped for commercial or noncommercial purposes or sells or causes to be sold any wildlife taken, transported, or sold in any manner in violation of any Act of Congress or regulation issued thereunder, or

"(2) delivers, carries, transports, or ships, by any means whatever, or causes to be delivered, carried, transported, or shipped for commercial or noncommercial purposes or sells or causes to be sold in interstate or foreign commerce any wildlife taken, transported, or sold in any manner in violation of any law or regulation of any State or foreign country; or

"(b) Any person who—

"(1) sells or causes to be sold any products manufactured, made, or processed from any wildlife taken, transported, or sold in any manner in violation of any Act of Congress or regulation issued thereunder, or

"(2) sells or causes to be sold in interstate or foreign commerce any products manufactured, made, or processed from any wildlife taken, transported, or sold in any manner in violation of any law or regulation of a State or a foreign country, or

"(3) having purchased or received wildlife imported from any foreign country or shipped, transported, or carried in interstate commerce, makes or causes to be made any false record, account, label, or identification thereof, or

"(4) receives, acquires, or purchases for commercial or noncommercial purposes any wildlife—

"(A) taken, transported, or sold in violation of any law or regulation of any State or foreign country and delivered, carried, transported, or shipped by any means or method in interstate or foreign commerce, or

"(B) taken, transported, or sold in violation of any Act of Congress or regulation issued thereunder, or

"(5) imports from Mexico to any State, or exports from any State to Mexico, any game mammal, dead or alive, or part or product thereof, except under permit or other authorization of the Secretary or, in accordance with any regulations prescribed by him, having due regard to the requirements of the Migratory Birds and Game Mammals Treaty with Mexico and the laws of the United States forbidding importation of certain live mammals injurious to agriculture and horticulture; 50 Stat. 1311.

shall be subject to the penalties prescribed in subsections (c) and (d) of this section.

Penalty.

"(c)(1) Any person who knowingly violates, or who, in the exercise of due care, should know that he is violating, any provision of subsection (a) or (b) of this section may be assessed a civil penalty by the Secretary of not more than $5,000 for each such violation. Each violation shall be a separate offense. No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay the penalty assessed under this paragraph, the Secretary may request the Attorney General to institute a civil action in a district court of the United

Hearing notice.

States for any district in which such person is found or resides or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. In hearing such action, the court shall have authority to review the violation and the assessment of the civil penalty de novo.

Search and seizure warrant.

Posting of bond.

Notification of seizure.

"(2) Any employee authorized by the Secretary to enforce the provisions of this section, or any officer of the customs, shall have authority to execute any warrant to search for and seize any wildlife, product, property, or item used or possessed in violation of this section with respect to which a civil penalty may be assessed pursuant to paragraph (1) of this subsection. Such wildlife, product, property, or item so seized shall be held by such employee pending disposition of proceedings by the Secretary involving the assessment of a civil penalty pursuant to paragraph (1) of this subsection; except that the Secretary may, in lieu of holding such wildlife, product, property, or item, permit such person to post a bond or other surety satisfactory to the Secretary. Upon the assessment of a civil penalty pursuant to paragraph (1) of this subsection for any nonwillful violation of this section, such wildlife, product, property, or item so seized may be proceeded against in any court of competent jurisdiction and forfeited to the Secretary for disposition by him in such manner as he deems appropriate. The owner or consignee of any such wildlife, product, property, or item so seized shall, as soon as practicable following such seizure, be notified of that fact in accordance with regulations established by the Secretary or the Secretary of the Treasury. Whenever any wildlife, product, property, or item is seized pursuant to this subsection, the Secretary shall move to dispose of the civil penalty proceedings pursuant to paragraph (1) of this subsection as expeditiously as possible. If, with respect to any such wildlife, product, property, or item so seized, no action is commenced in any court of competent jurisdiction to obtain the forfeiture of such wildlife, product, property, or item within thirty days following the disposition of proceedings involving the assessment of a civil penalty, such wildlife, product, property, or item shall be immediately returned to the owner or the consignee in accordance with regulations promulgated by the Secretary.

Penalty.

"(d) Any person who knowingly and willfully violates any provision of subsection (a) or (b) of this section shall, upon conviction, be fined not more than $10,000 or imprisoned for not more than one year, or both.

"(e) Any wildlife or products thereof seized in connection with any knowing and willful violation of this section with respect to which a penalty may be imposed pursuant to subsection (d) shall, upon conviction of such violation, be forfeited to the Secretary to be disposed of by him in such manner as he deems appropriate. Any other property or item so seized may upon conviction, in the discretion of the court, be forfeited to the United States or otherwise disposed of. The owner or consignee of any such wildlife, product, property, or item so seized shall, as soon as practicable following such seizure, be notified of that fact in accordance with regulations established by the Secretary or the Secretary of the Treasury. If no conviction results from any such alleged violation, such wildlife, product, property or item so seized in connection therewith shall be immediately returned to the owner or consignee in accordance with regulations promulgated by the Secretary, unless the Secretary, within thirty days following the final disposition of the case involving such violation, commences proceedings under subsection (c) of this section.

Definitions.

"(f) For the purpose of this section, the term—

"(1) 'Secretary' means the Secretary of the Interior;

"(2) 'person' means any individual, firm, corporation, association, or partnership;

"(3) 'wildlife' means any wild mammal, wild bird, amphibian, reptile, mollusk, or crustacean, or any part, egg, or offspring thereof, or the dead body or parts thereof, but does not include migratory birds for which protection is afforded under the Migratory Bird Treaty Act, as amended;

40 Stat. 755.
16 USC 710.

"(4) 'State' means the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, and Guam; and

"(5) 'taken' means captured, killed, collected, or otherwise possessed."

62 Stat. 817.

(b) Section 3054 of title 18 of the United States Code is amended to read as follows:

"§ 3054. Officers' powers involving animals and birds

63 Stat. 89.
Ante, p. 279.
62 Stat. 687.

"Any employee authorized by the Secretary of the Interior to enforce sections 42, 43, and 44 of this title, and any officer of the customs, may arrest any person who violates section 42 or 44, or who such employee or officer of the customs has probable cause to believe is knowingly and willfully violating section 43, in his presence or view, and may execute any warrant or other process issued by an officer or court of competent jurisdiction to enforce the provisions of said sections.".

62 Stat. 820.

(c) Section 3112 of title 18 of the United States Code is amended to read as follows:

"§ 3112. Search warrants for seizure of animals, birds, or eggs

"Any employee authorized by the Secretary of the Interior to enforce sections 42, 43, and 44 of this title, and any officer of the customs, shall have authority to execute any warrant to search for and seize any wildlife, product, property, or item used or possessed in connection with a violation of section 42 or 44, or in connection with a knowing and willful violation of section 43, and any such wildlife, product, property, or item so seized shall be held by him or by the United States marshal pending disposition thereof by the court.".

Marking and labeling provisions.

SEC. 8. (a) The first paragraph in section 44 of title 18, United States Code, is amended by deleting "wild animals or birds, or the dead bodies or parts thereof," and inserting "any wild mammal, wild bird, amphibian, or reptile, or any mollusk or crustacean, or the dead body or parts or eggs thereof."

(b) Section 44 of title 18, United States Code, is amended by adding at the end thereof a new paragraph to read as follows:

"In any case where the marking, labeling, or tagging of a package under this section indicating in any way the contents thereof would create a significant possibility of theft of the package or its contents, the Secretary of the Interior may, upon request of the owner thereof or his agent or by regulation, provide some other reasonable means of notifying appropriate authorities of the contents of such packages."

Black Bass Act, amendments.
61 Stat. 517.

SEC. 9. (a) Section 2 of the Black Bass Act (44 Stat. 576), as amended (16 U.S.C. 852), is amended to read as follows:

"SEC. 2. It shall be unlawful for any person—

"(1) to deliver or receive for transportation, or to transport, by any means whatsoever, in interstate or foreign commerce, any black bass and other fish, if such person knows or in the exercise of due care should know that (A) such delivery or transportation is contrary to the law of the State or any foreign country from which such black bass or other fish is found or transported, or is contrary to other applicable law, or (B) such black bass or other fish has been either caught, killed, taken, sold, purchased, possessed, or transported, at any time, contrary to the law of the State or foreign country, in which it was caught, killed, taken, sold, purchased, or possessed, or from which it was transported, or contrary to other applicable law;

"(2) to purchase or receive any such black bass or other fish, if such person knows, or in the exercise of due care should know, that such bass or fish has been transported in violation of the provisions of this Act;

"(3) receiving any shipment of black bass or other fish transported in interstate or foreign commerce to make any false record or render a false account of the contents of such shipment, if such person knows, or in the exercise of due care should know, that such record or account is false. For the purposes of this section, the provisions of section 10 of title 18, United States Code, shall apply to the term 'interstate or foreign commerce'."

62 Stat. 686.

(b) Section 3 of the Black Bass Act (46 Stat. 846), as amended (16 U.S.C. 852a), is amended by deleting the comma after "commerce" and inserting therein "or foreign commerce,".

61 Stat. 517.

(c) Section 6(a) of the Black Bass Act (46 Stat. 846), as amended (16 U.S.C. 852d(a)), is amended by adding a new sentence at the end thereof to read as follows: "The provisions of this section and any regulations issued thereunder shall be enforced by personnel of the Secretary of the Interior, and he may utilize by agreement, with or without reimbursement, personnel, services, and facilities of other Federal agencies."

(d) The first section of the Black Bass Act (46 Stat. 846), as amended (16 U.S.C. 851), is amended by inserting immediately before the period at the end thereof a comma and the following: "and the term 'State' means the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, and Guam".

Repeal.
40 Stat. 755;
49 Stat. 1556.

SEC. 10. The second paragraph of section 4 of the Migratory Bird Treaty Act, as amended (16 U.S.C. 705), is hereby repealed.

Effective date.

SEC. 11. The provisions of sections 1 through 10 of this Act shall be effective one hundred and eighty days after the date of enactment of this Act.

SEC. 12. (a) Section 1 of the Act of October 15, 1966 (80 Stat. 926; 16 U.S.C. 668aa), is amended by adding new subsection at the end thereof to read as follows:

"Fish and wildlife."

"(d) For the purpose of sections 1 through 3 of this Act, the term 'fish and wildlife' means any wild mammal, fish, wild bird, amphibian, reptile, mollusk, or crustacean."

(b) The last sentence of section 2(c) of the Act of October 15, 1966 (80 Stat. 926; 16 U.S.C. 668bb(c)), is amended by changing the "$750,000" to "$2,500,000".

(c) Section 2(d) of the Act of October 15, 1966 (80 Stat. 926; 16 U.S.C. 668bb(d)), is amended by adding a new sentence at the end thereof to read as follows: "The Secretary is authorized to acquire by purchase, donation, exchange, or otherwise any privately owned land, water, or interests therein within the boundaries of any area administered by him, for the purpose of conserving, protecting, restoring, or propagating any selected species of native fish and wildlife that are threatened with extinction and each such acquisition shall be administered in accordance with the provisions of law applicable to such area, and there is authorized to be appropriated annually for fiscal years 1970, 1971, and 1972 not to exceed $1,000,000 to carry out the provisions of this sentence."

Appropriation.

(d) The provisions of sections 1 through 5 of this Act and sections 1 through 3 of the Act of October 15, 1966 (80 Stat. 926; 16 U.S.C. 668aa–668cc), as amended by this section, shall hereinafter be cited as the "Endangered Species Conservation Act of 1969".

Citation of act.

(e) The second sentence of section 1(a) of the Act of October 15, 1966 (80 Stat. 926; 16 U.S.C. 668aa(a)), is amended by changing the comma after the word "extinction" to a period and deleting the remainder of the sentence.

(f) The provisions of sections 4 and 5 of the Act of October 15, 1966 (80 Stat. 929; 16 U.S.C. 668dd–668ee), as amended, shall hereinafter be cited as the "National Wildlife Refuge System Administration Act of 1966".

Citation of act.

Approved December 5, 1969.

An Act

87 STAT. 884

To provide for the conservation of endangered and threatened species of fish, wildlife, and plants, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Endangered Species Act of 1973".

Endangered Species Act of 1973.

Sec. 16. Effective date.
Sec. 17. Marine Mammal Protection Act of 1972.

FINDINGS, PURPOSES, AND POLICY

SEC. 2. (a) FINDINGS.—The Congress finds and declares that—

(1) various species of fish, wildlife, and plants in the United States have been rendered extinct as a consequence of economic growth and development untempered by adequate concern and conservation;

(2) other species of fish, wildlife, and plants have been so depleted in numbers that they are in danger of or threatened with extinction;

(3) these species of fish, wildlife, and plants are of esthetic, ecological, educational, historical, recreational, and scientific value to the Nation and its people;

(4) the United States has pledged itself as a sovereign state in the international community to conserve to the extent practicable the various species of fish or wildlife and plants facing extinction, pursuant to—

(A) migratory bird treaties with Canada and Mexico;

(B) the Migratory and Endangered Bird Treaty with Japan;

(C) the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere; 56 Stat. 1354.

(D) the International Convention for the Northwest Atlantic Fisheries; 1 UST 477.

(E) the International Convention for the High Seas Fisheries of the North Pacific Ocean; 4 UST 380.

(F) the Convention on International Trade in Endangered Species of Wild Fauna and Flora; and

(G) other international agreements.

(5) encouraging the States and other interested parties, through Federal financial assistance and a system of incentives, to develop and maintain conservation programs which meet national and international standards is a key to meeting the

Nation's international commitments and to better safeguarding, for the benefit of all citizens, the Nation's heritage in fish and wildlife.

(b) PURPOSES.—The purposes of this Act are to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved, to provide a program for the conservation of such endangered species and threatened species, and to take such steps as may be appropriate to achieve the purposes of the treaties and conventions set forth in subsection (a) of this section.

(c) POLICY.—It is further declared to be the policy of Congress that all Federal departments and agencies shall seek to conserve endangered species and threatened species and shall utilize their authorities in furtherance of the purposes of this Act.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) The term "commercial activity" means all activities of industry and trade, including, but not limited to, the buying or selling of commodities and activities conducted for the purpose of facilitating such buying and selling.

(2) The terms "conserve", "conserving", and "conservation" mean to use and the use of all methods and procedures which are necessary to bring any endangered species or threatened species to the point at which the measures provided pursuant to this Act are no longer necessary. Such methods and procedures include, but are not limited to, all activities associated with scientific resources management such as research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation, and, in the extraordinary case where population pressures within a given ecosystem cannot be otherwise relieved, may include regulated taking.

(3) The term "Convention" means the Convention on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973, and the appendices thereto.

(4) The term "endangered species" means any species which is in danger of extinction throughout all or a significant portion of its range other than a species of the Class Insecta determined by the Secretary to constitute a pest whose protection under the provisions of this Act would present an overwhelming and overriding risk to man.

(5) The term "fish or wildlife" means any member of the animal kingdom, including without limitation any mammal, fish, bird (including any migratory, nonmigratory, or endangered bird for which protection is also afforded by treaty or other international agreement), amphibian, reptile, mollusk, crustacean, arthropod or other invertebrate, and includes any part, product, egg, or offspring thereof, or the dead body or parts thereof.

(6) The term "foreign commerce" includes, among other things, any transaction—

(A) between persons within one foreign country;

(B) between persons in two or more foreign countries;

(C) between a person within the United States and a person in a foreign country; or

(D) between persons within the United States, where the fish and wildlife in question are moving in any country or countries outside the United States.

(7) The term "import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any

place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(8) The term "person" means an individual, corporation, partnership, trust, association, or any other private entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(9) The term "plant" means any member of the plant kingdom, including seeds, roots and other parts thereof.

(10) The term "Secretary" means, except as otherwise herein provided, the Secretary of the Interior or the Secretary of Commerce as program responsibilities are vested pursuant to the provisions of Reorganization Plan Numbered 4 of 1970; except that with respect to the enforcement of the provisions of this Act and the Convention which pertain to the importation or exportation of terrestrial plants, the term means the Secretary of Agriculture.

84 Stat. 2090.
5 USC app.

(11) The term "species" includes any subspecies of fish or wildlife or plants and any other group of fish or wildlife of the same species or smaller taxa in common spatial arrangement that interbreed when mature.

(12) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(13) The term "State agency" means the State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish or wildlife resources within a State.

(14) The term "take" means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

(15) The term "threatened species" means any species which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

(16) The term "United States", when used in a geographical context, includes all States.

DETERMINATION OF ENDANGERED SPECIES AND THREATENED SPECIES

SEC. 4. (a) GENERAL.—(1) The Secretary shall by regulation determine whether any species is an endangered species or a threatened species because of any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

(2) With respect to any species over which program responsibilities have been vested in the Secretary of Commerce pursuant to Reorganization Plan Numbered 4 of 1970—

(A) in any case in which the Secretary of Commerce determines that such species should—

(i) be listed as an endangered species or a threatened species, or

(ii) be changed in status from a threatened species to an endangered species,

he shall so inform the Secretary of the Interior, who shall list such species in accordance with this section;

(B) in any case in which the Secretary of Commerce determines that such species should—

(i) be removed from any list published pursuant to subsection (c) of this section, or

(ii) be changed in status from an endangered species to a threatened species,

he shall recommend such action to the Secretary of the Interior, and the Secretary of the Interior, if he concurs in the recommendation, shall implement such action; and

(C) the Secretary of the Interior may not list or remove from any list any such species, and may not change the status of any such species which are listed, without a prior favorable determination made pursuant to this section by the Secretary of Commerce.

(b) BASIS FOR DETERMINATIONS.—(1) The Secretary shall make determinations required by subsection (a) of this section on the basis of the best scientific and commercial data available to him and after consultation, as appropriate, with the affected States, interested persons and organizations, other interested Federal agencies, and, in cooperation with the Secretary of State, with the country or countries in which the species concerned is normally found or whose citizens harvest such species on the high seas; except that in any case in which such determinations involve resident species of fish or wildlife, the Secretary of the Interior may not add such species to, or remove such species from, any list published pursuant to subsection (c) of this section, unless the Secretary has first—

Notice, publication in Federal Register.

(A) published notice in the Federal Register and notified the Governor of each State within which such species is then known to occur that such action is contemplated;

(B) allowed each such State 90 days after notification to submit its comments and recommendations, except to the extent that such period may be shortened by agreement between the Secretary and the Governor or Governors concerned; and

(C) published in the Federal Register a summary of all comments and recommendations received by him which relate to such proposed action.

(2) In determining whether or not any species is an endangered species or a threatened species, the Secretary shall take into consideration those efforts, if any, being made by any nation or any political subdivision of any nation to protect such species, whether by predator control, protection of habitat and food supply, or other conservation practices, within any area under the jurisdiction of any such nation or political subdivision, or on the high seas.

(3) Species which have been designated as requiring protection from unrestricted commerce by any foreign country, or pursuant to any international agreement, shall receive full consideration by the Secretary to determine whether each is an endangered species or a threatened species.

Publication in Federal Register.

(c) LISTS.—(1) The Secretary of the Interior shall publish in the Federal Register, and from time to time he may by regulation revise, a list of all species determined by him or the Secretary of Commerce to be endangered species and a list of all species determined by him or the Secretary of Commerce to be threatened species. Each list shall refer to the species contained therein by scientific and common name or names, if any, and shall specify with respect to each such species over what portion of its range it is endangered or threatened.

Review.
80 Stat. 383.

(2) The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5, United States Code, conduct a review of any listed or unlisted species proposed to be removed from or added to either of the lists published pursuant to paragraph (1) of this subsection, but only if he makes and publishes a finding that such person has presented substantial evidence which in his judgment warrants such a review.

80 Stat. 926;
83 Stat. 275, 283.
16 USC 668aa note.

(3) Any list in effect on the day before the date of the enactment of this Act of species of fish or wildlife determined by the Secretary of the Interior, pursuant to the Endangered Species Conservation Act of 1969, to be threatened with extinction shall be republished to conform to the classification for endangered species or threatened species, as the case may be, provided for in this Act, but until such republication, any such species so listed shall be deemed an endangered species within the meaning of this Act. The republication of any species pursuant to this paragraph shall not require public hearing or comment under section 553 of title 5, United States Code.

Post, p. 893.

(d) PROTECTIVE REGULATIONS.—Whenever any species is listed as a threatened species pursuant to subsection (c) of this section, the Secretary shall issue such regulations as he deems necessary and advisable to provide for the conservation of such species. The Secretary may by regulation prohibit with respect to any threatened species any act prohibited under section 9(a)(1), in the case of fish or wildlife, or section 9(a)(2), in the case of plants, with respect to endangered species; except that with respect to the taking of resident species of fish or wildlife, such regulations shall apply in any State which has entered into a cooperative agreement pursuant to section 6(a) of this Act only to the extent that such regulations have also been adopted by such State.

(e) SIMILARITY OF APPEARANCE CASES.—The Secretary may, by regulation, and to the extent he deems advisable, treat any species as an endangered species or threatened species even though it is not listed pursuant to section 4 of this Act if he finds that—

(A) such species so closely resembles in appearance, at the point in question, a species which has been listed pursuant to such section that enforcement personnel would have substantial difficulty in attempting to differentiate between the listed and unlisted species;

(B) the effect of this substantial difficulty is an additional threat to an endangered or threatened species; and

(C) such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of this Act.

(f) REGULATIONS.—(1) Except as provided in paragraphs (2) and (3) of this subsection and subsection (b) of this section, the provisions of section 553 of title 5, United States Code (relating to rulemaking procedures), shall apply to any regulation promulgated to carry out the purposes of this Act.

(2)(A) In the case of any regulation proposed by the Secretary to carry out the purposes of this Act—

Notice, publication in Federal Register.

(i) the Secretary shall publish general notice of the proposed regulation (including the complete text of the regulation) in the Federal Register not less than 60 days before the effective date of the regulation; and

Hearing request.

Publication in Federal Register.

(ii) if any person who feels that he may be adversely affected by the proposed regulation files (within 45 days after the date of publication of general notice) objections thereto and requests a public hearing thereon, the Secretary may grant such request, but shall, if he denies such request, publish his reasons therefor in the Federal Register.

80 Stat. 383.

(B) Neither subparagraph (A) of this paragraph nor section 553 of title 5, United States Code, shall apply in the case of any of the following regulations and any such regulation shall, at the discretion of the Secretary, take effect immediately upon publication of the regulation in the Federal Register:

80 Stat. 926;
83 Stat. 275, 283.
16 USC 668aa note.

(i) Any regulation appropriate to carry out the purposes of this Act which was originally promulgated to carry out the Endangered Species Conservation Act of 1969.

(ii) Any regulation (including any regulation implementing section 6(g)(2)(B)(ii) of this Act) issued by the Secretary in regard to any emergency posing a significant risk to the well-being of any species of fish or wildlife, but only if (I) at the time of publication of the regulation in the Federal Register the Secretary publishes therein detailed reasons why such regulation is necessary, and (II) in the case such regulation applies to resident species of fish and wildlife, the requirements of subsection (b)(A), (B), and (C) of this section have been complied with. Any regulation promulgated under the authority of this clause (ii) shall cease to have force and effect at the close of the 120-day period following the date of publication unless, during such 120-day period, the rulemaking procedures which would apply to such regulation without regard to this subparagraph are complied with.

Statement by the Secretary.

(3) The publication in the Federal Register of any proposed or final regulation which is necessary or appropriate to carry out the purposes of this Act shall include a statement by the Secretary of the facts on which such regulation is based and the relationship of such facts to such regulation.

LAND ACQUISITION

Sec. 5. (a) Program.—The Secretary of the Interior shall establish and implement a program to conserve (A) fish or wildlife which are listed as endangered species or threatened species pursuant to section 4 of this Act; or (B) plants which are concluded in Appendices to the Convention. To carry out such program, he—

70 Stat. 1119.
16 USC 742a note.
60 Stat. 1080;
72 Stat. 563.
16 USC 661 note.

(1) shall utilize the land acquisition and other authority under the Fish and Wildlife Act of 1956, as amended, the Fish and Wildlife Coordination Act, as amended, and the Migratory Bird Conservation Act, as appropriate; and

(2) is authorized to acquire by purchase, donation, or otherwise, lands, waters, or interest therein, and such authority shall be in addition to any other land acquisition authority vested in him.

45 Stat. 1222.
16 USC 460l-4 note.

(b) Acquisitions.—Funds made available pursuant to the Land and Water Conservation Fund Act of 1965, as amended, may be used for the purpose of acquiring lands, waters, or interests therein under subsection (a) of this section.

COOPERATION WITH THE STATES

Sec. 6. (a) General.—In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the States. Such cooperation shall include consultation with the States concerned before acquiring any land or water, or interest therein, for the purpose of conserving any endangered species or threatened species.

(b) Management Agreements.—The Secretary may enter into agreements with any State for the administration and management of any area established for the conservation of endangered species or threatened species. Any revenues derived from the administration of such areas under these agreements shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383; 16 U.S.C. 715s).

78 Stat. 701.

(c) COOPERATIVE AGREEMENTS.—In furtherance of the purposes of this Act, the Secretary is authorized to enter into a cooperative agreement in accordance with this section with any State which establishes and maintains an adequate and active program for the conservation of endangered species and threatened species. Within one hundred and twenty days after the Secretary receives a certified copy of such a proposed State program, he shall make a determination whether such program is in accordance with this Act. Unless he determines, pursuant to this subsection, that the State program is not in accordance with this Act, he shall enter into a cooperative agreement with the State for the purpose of assisting in implementation of the State program. In order for a State program to be deemed an adequate and active program for the conservation of endangered species and threatened species, the Secretary must find, and annually thereafter reconfirm such finding, that under the State program—

(1) authority resides in the State agency to conserve resident species of fish or wildlife determined by the State agency or the Secretary to be endangered or threatened;

(2) the State agency has established acceptable conservation programs, consistent with the purposes and policies of this Act, for all resident species of fish or wildlife in the State which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

(3) the State agency is authorized to conduct investigations to determine the status and requirements for survival of resident species of fish and wildlife;

(4) the State agency is authorized to establish programs, including the acquisition of land or aquatic habitat or interests therein, for the conservation of resident endangered species or threatened species; and

(5) provision is made for public participation in designating resident species of fish or wildlife as endangered or threatened.

(d) ALLOCATION OF FUNDS.—(1) The Secretary is authorized to provide financial assistance to any State, through its respective State agency, which has entered into a cooperative agreement pursuant to subsection (c) of this section to assist in development of programs for the conservation of endangered and threatened species. The Secretary shall make an allocation of appropriated funds to such States based on consideration of—

(A) the international commitments of the United States to protect endangered species or threatened species;

(B) the readiness of a State to proceed with a conservation program consistent with the objectives and purposes of this Act;

(C) the number of endangered species and threatened species within a State;

(D) the potential for restoring endangered species and threatened species within a State; and

(E) the relative urgency to initiate a program to restore and protect an endangered species or threatened species in terms of survival of the species.

So much of any appropriated funds allocated for obligation to any State for any fiscal year as remains unobligated at the close thereof is authorized to be made available to that State until the close of the succeeding fiscal year. Any amount allocated to any State which is unobligated at the end of the period during which it is available for expenditure is authorized to be made available for expenditure by the Secretary in conducting programs under this section.

(2) Such cooperative agreements shall provide for (A) the actions to be taken by the Secretary and the States; (B) the benefits that are expected to be derived in connection with the conservation of endangered or threatened species; (C) the estimated cost of these actions; and (D) the share of such costs to be borne by the Federal Government and by the States; except that—

(i) the Federal share of such program costs shall not exceed 66⅔ per centum of the estimated program cost stated in the agreement; and

(ii) the Federal share may be increased to 75 per centum whenever two or more States having a common interest in one or more endangered or threatened species, the conservation of which may be enhanced by cooperation of such States, enter jointly into an agreement with the Secretary.

The Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon in the cooperative agreement. For the purposes of this section, the non-Federal share may, in the discretion of the Secretary, be in the form of money or real property, the value of which will be determined by the Secretary, whose decision shall be final.

(e) Review of State Programs.—Any action taken by the Secretary under this section shall be subject to his periodic review at no greater than annual intervals.

(f) Conflicts Between Federal and State Laws.—Any State law or regulation which applies with respect to the importation or exportation of, or interstate or foreign commerce in, endangered species or threatened species is void to the extent that it may effectively (1) permit what is prohibited by this Act or by any regulation which implements this Act, or (2) prohibit what is authorized pursuant to an exemption or permit provided for in this Act or in any regulation which implements this Act. This Act shall not otherwise be construed to void any State law or regulation which is intended to conserve migratory, resident, or introduced fish or wildlife, or to permit or prohibit sale of such fish or wildlife. Any State law or regulation respecting the taking of an endangered species or threatened species may be more restrictive than the exemptions or permits provided for in this Act or in any regulation which implements this Act but not less restrictive than the prohibitions so defined.

"Establishment period."

(g) Transition.—(1) For purposes of this subsection, the term "establishment period" means, with respect to any State, the period beginning on the date of enactment of this Act and ending on whichever of the following dates first occurs: (A) the date of the close of the 120-day period following the adjournment of the first regular session of the legislature of such State which commences after such date of enactment, or (B) the date of the close of the 15-month period following such date of enactment.

(2) The prohibitions set forth in or authorized pursuant to sections 4(d) and 9(a)(1)(B) of this Act shall not apply with respect to the taking of any resident endangered species or threatened species (other than species listed in Appendix I to the Convention or otherwise specifically covered by any other treaty or Federal law) within any State—

(A) which is then a party to a cooperative agreement with the Secretary pursuant to section 6(c) of this Act (except to the extent that the taking of any such species is contrary to the law of such State); or

(B) except for any time within the establishment period when—

(i) the Secretary applies such prohibition to such species at the request of the State, or

(ii) the Secretary applies such prohibition after he finds, and publishes his finding, that an emergency exists posing a significant risk to the well-being of such species and that the prohibition must be applied to protect such species. The Secretary's finding and publication may be made without regard to the public hearing or comment provisions of section 553 of title 5, United States Code, or any other provision of this Act; but such prohibition shall expire 90 days after the date of its imposition unless the Secretary further extends such prohibition by publishing notice and a statement of justification of such extension. 80 Stat. 383.

(h) Regulations.—The Secretary is authorized to promulgate such regulations as may be appropriate to carry out the provisions of this section relating to financial assistance to States.

(i) Appropriations.—For the purposes of this section, there is authorized to be appropriated through the fiscal year ending June 30, 1977, not to exceed $10,000,000.

INTERAGENCY COOPERATION

Sec. 7. The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded. or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

INTERNATIONAL COOPERATION

Sec. 8. (a) Financial Assistance.—As a demonstration of the commitment of the United States to the worldwide protection of endangered species and threatened species, the President may, subject to the provisions of section 1415 of the Supplemental Appropriation Act, 1953 (31 U.S.C. 724), use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistance Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and management of programs in that country which the Secretary determines to be necessary or useful for the conservation of any endangered species or threatened species listed by the Secretary pursuant to section 4 of this Act. The President shall provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, waters, or interests therein) to foreign countries under this section under such terms and conditions as he deems appropriate. Whenever foreign currencies are available for the provision of assistance

66 Stat. 662.

68 Stat. 454.
7 USC 1691.

under this section, such currencies shall be used in preference to funds appropriated under the authority of section 15 of this Act.

(b) Encouragement of Foreign Programs.—In order to carry out further the provisions of this Act, the Secretary, through the Secretary of State, shall encourage—

(1) foreign countries to provide for the conservation of fish or wildlife including endangered species and threatened species listed pursuant to section 4 of this Act;

(2) the entering into of bilateral or multilateral agreements with foreign countries to provide for such conservation; and

(3) foreign persons who directly or indirectly take fish or wildlife in foreign countries or on the high seas for importation into the United States for commercial or other purposes to develop and carry out with such assistance as he may provide, conservation practices designed to enhance such fish or wildlife and their habitat.

(c) Personnel.—After consultation with the Secretary of State, the Secretary may—

(1) assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign countries and international organizations in developing personnel resources and programs which promote the conservation of fish or wildlife; and

(2) conduct or provide financial assistance for the educational training of foreign personnel, in this country or abroad, in fish, wildlife, or plant management, research and law enforcement and to render professional assistance abroad in such matters.

(d) Investigations.—After consultation with the Secretary of State and the Secretary of the Treasury, as appropriate, the Secretary may conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the purposes of this Act.

(e) Convention Implementation.—The President is authorized and directed to designate appropriate agencies to act as the Management Authority or Authorities and the Scientific Authority or Authorities pursuant to the Convention. The agencies so designated shall thereafter be authorized to do all things assigned to them under the Convention, including the issuance of permits and certificates. The agency designated by the President to communicate with other parties to the Convention and with the Secretariat shall also be empowered, where appropriate, in consultation with the State Department, to act on behalf of and represent the United States in all regards as required by the Convention. The President shall also designate those agencies which shall act on behalf of and represent the United States in all regards as required by the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere. 56 Stat. 1354.

PROHIBITED ACTS

Sec. 9. (a) General.—(1) Except as provided in sections 6(g)(2) and 10 of this Act, with respect to any endangered species of fish or wildlife listed pursuant to section 4 of this Act it is unlawful for any person subject to the jurisdiction of the United States to—

(A) import any such species into, or export any such species from the United States;

(B) take any such species within the United States or the territorial sea of the United States;

(C) take any such species upon the high seas;

(D) possess, sell, deliver, carry, transport, or ship, by any means whatsoever, any such species taken in violation of subparagraphs (B) and (C);

(E) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity, any such species;

(F) sell or offer for sale in interstate or foreign commerce any such species; or

(G) violate any regulation pertaining to such species or to any threatened species of fish or wildlife listed pursuant to section 4 of this Act and promulgated by the Secretary pursuant to authority provided by this Act.

(2) Except as provided in sections 6(g)(2) and 10 of this Act, with respect to any endangered species of plants listed pursuant to section 4 of this Act, it is unlawful for any person subject to the jurisdiction of the United States to—

(A) import any such species into, or export any such species from, the United States;

(B) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity, any such species;

(C) sell or offer for sale in interstate or foreign commerce any such species; or

(D) violate any regulation pertaining to such species or to any threatened species of plants listed pursuant to section 4 of this Act and promulgated by the Secretary pursuant to authority provided by this Act.

(b) Species Held in Captivity or Controlled Environment.—The provisions of this section shall not apply to any fish or wildlife held in captivity or in a controlled environment on the effective date of this Act if the purposes of such holding are not contrary to the purposes of this Act; except that this subsection shall not apply in the case of any fish or wildlife held in the course of a commercial activity. With respect to any act prohibited by this section which occurs after a period of 180 days from the effective date of this Act, there shall be a rebuttable presumption that the fish or wildlife involved in such act was not held in captivity or in a controlled environment on such effective date.

(c) Violation of Convention.—(1) It is unlawful for any person subject to the jurisdiction of the United States to engage in any trade in any specimens contrary to the provisions of the Convention, or to possess any specimens traded contrary to the provisions of the Convention, including the definitions of terms in article I thereof.

(2) Any importation into the United States of fish or wildlife shall, if—

(A) such fish or wildlife is not an endangered species listed pursuant to section 4 of this Act but is listed in Appendix II to the Convention,

(B) the taking and exportation of such fish or wildlife is not contrary to the provisions of the Convention and all other applicable requirements of the Convention have been satisfied,

(C) the applicable requirements of subsections (d), (e), and (f) of this section have been satisfied, and

(D) such importation is not made in the course of a commercial activity,

be presumed to be an importation not in violation of any provision of this Act or any regulation issued pursuant to this Act.

(d) Imports and Exports.—(1) It is unlawful for any person to engage in business as an importer or exporter of fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered species or threatened species, and (B) are imported for purposes of human or animal consumption or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants without first having obtained permission from the Secretary.

Recordkeeping

(2) Any person required to obtain permission under paragraph (1) of this subsection shall—

(A) keep such records as will fully and correctly disclose each importation or exportation of fish, wildlife, or plants made by him and the subsequent disposition made by him with respect to such fish, wildlife, or plants;

(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his places of business, an opportunity to examine his inventory of imported fish, wildlife, or plants and the records required to be kept under subparagraph (A) of this paragraph, and to copy such records; and

(C) file such reports as the Secretary may require.

(3) The Secretary shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.

(e) Reports.—It is unlawful for any person importing or exporting fish or wildlife (other than shellfish and fishery products which (1) are not listed pursuant to section 4 of this Act as endangered or threatened species, and (2) are imported for purposes of human or animal consumption or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants to fail to file any declaration or report as the Secretary deems necessary to facilitate enforcement of this Act or to meet the obligations of the Convention.

(f) Designation of Ports.—(1) It is unlawful for any person subject to the jurisdiction of the United States to import into or export from the United States any fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered species or threatened species, and (B) are imported for purposes of human or animal consumption or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants, except at a port or ports designated by the Secretary of the Interior. For the purpose of facilitating enforcement of this Act and reducing the costs thereof, the Secretary of the Interior, with approval of the Secretary of the Treasury and after notice and opportunity for public hearing, may, by regulation, designate ports and change such designations. The Secretary of the Interior, under such terms and conditions as he may prescribe, may permit the importation or exportation at nondesignated ports in the interest of the health or safety of the fish or wildlife or plants, or for other reasons if, in his discretion, he deems it appropriate and consistent with the purpose of this subsection.

83 Stat. 277.
16 USC 668cc-4.

(2) Any port designated by the Secretary of the Interior under the authority of section 4(d) of the Act of December 5, 1969 (16 U.S.C. 668cc-4(d)), shall, if such designation is in effect on the day before the date of the enactment of this Act, be deemed to be a port designated by the Secretary under paragraph (1) of this subsection until such time as the Secretary otherwise provides.

(g) Violations.—It is unlawful for any person subject to the jurisdiction of the United States to attempt to commit, solicit another to commit, or cause to be committed, any offense defined in this section.

EXCEPTIONS

SEC. 10. (a) PERMITS.—The Secretary may permit, under such terms and conditions as he may prescribe, any act otherwise prohibited by section 9 of this Act for scientific purposes or to enhance the propagation or survival of the affected species.

(b) HARDSHIP EXEMPTIONS.—(1) If any person enters into a contract with respect to a species of fish or wildlife or plant before the date of the publication in the Federal Register of notice of consideration of that species as an endangered species and the subsequent listing of that species as an endangered species pursuant to section 4 of this Act will cause undue economic hardship to such person under the contract, the Secretary, in order to minimize such hardship, may exempt such person from the application of section 9(a) of this Act to the extent the Secretary deems appropriate if such person applies to him for such exemption and includes with such application such information as the Secretary may require to prove such hardship; except that (A) no such exemption shall be for a duration of more than one year from the date of publication in the Federal Register of notice of consideration of the species concerned, or shall apply to a quantity of fish or wildlife or plants in excess of that specified by the Secretary; (B) the one-year period for those species of fish or wildlife listed by the Secretary as endangered prior to the effective date of this Act shall expire in accordance with the terms of section 3 of the Act of December 5, 1969 (83 Stat. 275); and (C) no such exemption may be granted for the importation or exportation of a specimen listed in Appendix I of the Convention which is to be used in a commercial activity.

16 USC 668cc-3.

(2) As used in this subsection, the term "undue economic hardship" shall include, but not be limited to:

"Undue economic hardship."

(A) substantial economic loss resulting from inability caused by this Act to perform contracts with respect to species of fish and wildlife entered into prior to the date of publication in the Federal Register of a notice of consideration of such species as an endangered species;

(B) substantial economic loss to persons who, for the year prior to the notice of consideration of such species as an endangered species, derived a substantial portion of their income from the lawful taking of any listed species, which taking would be made unlawful under this Act; or

(C) curtailment of subsistence taking made unlawful under this Act by persons (i) not reasonably able to secure other sources of subsistence; and (ii) dependent to a substantial extent upon hunting and fishing for subsistence; and (iii) who must engage in such curtailed taking for subsistence purposes.

(3) The Secretary may make further requirements for a showing of undue economic hardship as he deems fit. Exceptions granted under this section may be limited by the Secretary in his discretion as to time, area, or other factor of applicability.

(c) NOTICE AND REVIEW.—The Secretary shall publish notice in the Federal Register of each application for an exemption or permit which is made under this subsection. Each notice shall invite the submission from interested parties, within thirty days after the date of the notice, written data, views, or arguments with respect to the application. Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.

Publication in Federal Register.

(d) PERMIT AND EXEMPTION POLICY.—The Secretary may grant exceptions under subsections (a) and (b) of this section only if he finds and publishes his finding in the Federal Register that (1) such exceptions were applied for in good faith, (2) if granted and exercised will not operate to the disadvantage of such endangered species, and (3) will be consistent with the purposes and policy set forth in section 2 of this Act.

(e) ALASKA NATIVES.—(1) Except as provided in paragraph (4) of this subsection the provisions of this Act shall not apply with respect to the taking of any endangered species or threatened species, or the importation of any such species taken pursuant to this section, by—

(A) any Indian, Aleut, or Eskimo who is an Alaskan Native who resides in Alaska; or

(B) any non-native permanent resident of an Alaskan native village;

if such taking is primarily for subsistence purposes. Non-edible byproducts of species taken pursuant to this section may be sold in interstate commerce when made into authentic native articles of handicrafts and clothing; except that the provisions of this subsection shall not apply to any non-native resident of an Alaskan native village found by the Secretary to be not primarily dependent upon the taking of fish and wildlife for consumption or for the creation and sale of authentic native articles of handicrafts and clothing.

(2) Any taking under this subsection may not be accomplished in a wasteful manner.

Definitions.

(3) As used in this subsection—

(i) The term "subsistence" includes selling any edible portion of fish or wildlife in native villages and towns in Alaska for native consumption within native villages or towns; and

(ii) The term "authentic native articles of handicrafts and clothing" means items composed wholly or in some significant respect of natural materials, and which are produced, decorated, or fashioned in the exercise of traditional native handicrafts without the use of pantographs, multiple carvers, or other mass copying devices. Traditional native handicrafts include, but are not limited to, weaving, carving, stitching, sewing, lacking, beading, drawing, and painting.

(4) Notwithstanding the provisions of paragraph (1) of this subsection, whenever the Secretary determines that any species of fish or wildlife which is subject to taking under the provisions of this subsection is an endangered species or threatened species, and that such taking materially and negatively affects the threatened or endangered species, he may prescribe regulations upon the taking of such species by any such Indian, Aleut, Eskimo, or non-Native Alaskan resident of an Alaskan native village. Such regulations may be established with reference to species, geographical description of the area included, the season for taking, or any other factors related to the reason for establishing such regulations and consistent with the policy of this Act. Such regulations shall be prescribed after a notice and hearings in the affected judicial districts of Alaska and as otherwise required by section 103 of the Marine Mammal Protection Act of 1972, and shall be removed as soon as the Secretary determines that the need for their impositions has disappeared.

86 Stat. 1033.
16 USC 1373.

PENALTIES AND ENFORCEMENT

SEC. 11. (a) CIVIL PENALTIES.—(1) Any person who knowingly violates, or who knowingly commits an act in the course of a commercial activity which violates, any provision of this Act, or any provision of any permit or certificate issued hereunder, or of any regulation issued in order to implement subsection (a)(1) (A), (B), (C), (D), (E), or (F), (a)(2) (A), (B), or (C), (c), (d) (other than regulation relating to recordkeeping or filing of reports), (f) or (g) of section 9 of this Act, may be assessed a civil penalty by the Secretary of not more than $10,000 for each violation Any person who knowingly violates, or who knowingly commits an act in the course of a commercial activity which violates, any provision of any other regulation issued under this Act may be assessed a civil penalty by the Secretary of not more than $5,000 for each such violation. Any person who otherwise violates any provision of this Act, or any regulation, permit, or certificate issued hereunder, may be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation. No penalty may be assessed under this subsection unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be remitted or mitigated by the Secretary. Upon any failure to pay a penalty assessed under this subsection, the Secretary may request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found, resides, or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. The court shall hear such action on the record made before the Secretary and shall sustain his action if it is supported by substantial evidence on the record considered as a whole.

Notice; hearing.

(2) Hearings held during proceedings for the assessment of civil penalties authorized by paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5, United States Code. The Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

80 Stat. 384.

(b) Criminal Violations.—(1) Any person who willfully commits an act which violates any provision of this Act, of any permit or certificate issued hereunder, or of any regulation issued in order to implement subsection (a)(1) (A), (B), (C), (D), (E), or (F); (a) (2) (A), (B), or (C), (c), (d) (other than a regulation relating to recordkeeping, or filing of reports), (f), or (g) of section 9 of this Act shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both. Any person who willfully commits an act which violates any provision of any other regulation issued under this Act shall, upon conviction, be fined not more than $10,000 or imprisoned for not more than six months, or both.

(2) The head of any Federal agency which has issued a lease, license, permit, or other agreement authorizing the use of Federal lands, including grazing of domestic livestock, to any person who is convicted of a criminal violation of this Act or any regulation, permit, or certificate issued hereunder may immediately modify, suspend, or revoke each lease, license, permit, or other agreement. The Secretary shall also suspend for a period of up to one year, or cancel, any Federal hunting or fishing permits or stamps issued to any person who is convicted of a criminal violation of any provision of this Act or any

regulation, permit, or certificate issued hereunder. The United States shall not be liable for the payments of any compensation, reimbursement, or damages in connection with the modification, suspension, or revocation of any leases, licenses, permits, stamps, or other agreements pursuant to this section.

65 Stat. 725; 72 Stat. 348.

(c) District Court Jurisdiction.—The several district courts of the United States, including the courts enumerated in section 460 of title 28, United States Code, shall have jurisdiction over any actions arising under this Act. For the purpose of this Act, American Samoa shall be included within the judicial district of the District Court of the United States for the District of Hawaii.

(d) Rewards.—Upon the recommendation of the Secretary, the Secretary of the Treasury is authorized to pay an amount equal to one-half of the civil penalty or fine paid, but not to exceed $2,500, to any person who furnishes information which leads to a finding of civil violation or a conviction of a criminal violation of any provision of this Act or any regulation or permit issued thereunder. Any officer or employee of the United States or of any State or local government who furnishes information or renders service in the performance of his official duties shall not be eligible for payment under this section.

(e) Enforcement.—(1) The provisions of this Act and any regulations or permits issued pursuant thereto shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all such Secretaries. Each such Secretary may utilize by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency for purposes of enforcing this Act.

Federal and State agencies, utilization.

Warrants.

(2) The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulation issued thereunder.

Package inspection.

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, to enforce this Act may detain for inspection and inspect any package, crate, or other container, including its contents, and all accompanying documents, upon importation or exportation. Such person may execute and serve any arrest warrant, search warrant, or other warrant or civil or criminal process issued by any officer or court of competent jurisdiction for enforcement of this Act. Such person so authorized may search and seize, with or without a warrant, as authorized by law. Any fish, wildlife, property or item so seized shall be held by any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, property, or item pursuant to paragraph (4) of this subsection; except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

Search and seizure, authority.

(4)(A) All fish or wildlife or plants taken, possessed, sold, purchased, offered for sale or purchase, transported, delivered, received, carried, shipped, exported, or imported contrary to the provisions of this Act, any regulation made pursuant thereto, or any permit or certificate issued hereunder shall be subject to forfeiture to the United States.

(B) All guns, traps, nets, and other equipment, vessels, vehicles, aircraft, and other means of transportation used to aid the taking, possessing, selling, purchasing, offering for sale or purchase, transporting, delivering, receiving, carrying, shipping, exporting, or importing of any fish or wildlife or plants in violation of this Act, any regulation made pursuant thereto, or any permit or certificate issued thereunder shall be subject to forfeiture to the United States upon conviction of a criminal violation pursuant to section 11(b)(1) of this Act.

(5) All provisions of law relating to the seizure, forfeiture, and condemnation of a vessel for violation of the customs laws, the disposition of such vessel or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act; except that all powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Treasury Department shall, for the purposes of this Act, be exercised or performed by the Secretary or by such persons as he may designate.

(f) REGULATIONS.—The Secretary, the Secretary of the Treasury, and the Secretary of the Department in which the Coast Guard is operating, are authorized to promulgate such regulations as may be appropriate to enforce this Act, and charge reasonable fees for expenses to the Government connected with permits or certificates authorized by this Act including processing applications and reasonable inspections, and with the transfer, board, handling, or storage of fish or wildlife or plants and evidentiary items seized and forfeited under this Act. All such fees collected pursuant to this subsection shall be deposited in the Treasury to the credit of the appropriation which is current and chargeable for the cost of furnishing the services. Appropriated funds may be expended pending reimbursement from parties in interest.

(g) CITIZEN SUITS.—(1) Except as provided in paragraph (2) of this subsection any person may commence a civil suit on his own behalf—

(A) to enjoin any person, including the United States and any other governmental instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution), who is alleged to be in violation of any provision of this Act or regulation issued under the authority thereof; or

(B) to compel the Secretary to apply, pursuant to section 6(g)(2)(B)(ii) of this Act, the prohibitions set forth in or authorized pursuant to section 4(d) or section 9(a)(1)(B) of this Act with respect to the taking of any resident endangered species or threatened species within any State.

Jurisdiction.

The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any such provision or regulation, as the case may be. In any civil suit commenced under subparagraph (B) the district court shall compel the Secretary to apply the prohibition sought if the court finds that the allegation that an emergency exists is supported by substantial evidence.

(2)(A) No action may be commenced under subparagraph (1)(A) of this section—

(i) prior to sixty days after written notice of the violation has been given to the Secretary, and to any alleged violator of any such provision or regulation;

(ii) if the Secretary has commenced action to impose a penalty pursuant to subsection (a) of this section; or

(iii) if the United States has commenced and is diligently prosecuting a criminal action in a court of the United States or a State to redress a violation of any such provision or regulation.

(B) No action may be commenced under subparagraph (1)(B) of this section—

(i) prior to sixty days after written notice has been given to the Secretary setting forth the reasons why an emergency is thought to exist with respect to an endangered species or a threatened species in the State concerned; or

(ii) if the Secretary has commenced and is diligently prosecuting action under section 6(g)(2)(B)(ii) of this Act to determine whether any such emergency exists.

(3)(A) Any suit under this subsection may be brought in the judicial district in which the violation occurs.

Intervention.

(B) In any such suit under this subsection in which the United States is not a party, the Attorney General, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

Litigation costs.

(4) The court, in issuing any final order in any suit brought pursuant to paragraph (1) of this subsection, may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

Injunctive relief.

(5) The injunctive relief provided by this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or limitation or to seek any other relief (including relief against the Secretary or a State agency).

46 Stat. 689.
19 USC 1654.

(h) COORDINATION WITH OTHER LAWS.—The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act with the administration of the animal quarantine laws (21 U.S.C. 101–105, 111–135b, and 612–614) and section 306 of the Tariff Act of 1930 (19 U.S.C. 1306). Nothing in this Act or any amendment made by this Act shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations or possession of animals and other articles and no proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture. Nothing in this Act shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, including, without limitation, section 527 of that Act (19 U.S.C. 1527), relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.

46 Stat. 741.

ENDANGERED PLANTS

SEC. 12. The Secretary of the Smithsonian Institution, in conjunction with other affected agencies, is authorized and directed to review (1) species of plants which are now or may become endangered or threatened and (2) methods of adequately conserving such species, and to report to Congress, within one year after the date of the enactment of this Act, the results of such review including recommendations for new legislation or the amendment of existing legislation.

Report to Congress.

87 STAT. 901
87 STAT. 902

CONFORMING AMENDMENTS

SEC. 13. (a) Subsection 4(c) of the Act of October 15, 1966 (80 Stat. 928, 16 U.S.C. 668dd(c)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered species and threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of that Act, nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the system."

Ante, p. 886.

(b) Subsection 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224, 16 U.S.C. 715i(a)) and subsection 401(a) of the Act of June 15, 1935 (49 Stat. 383, 16 U.S.C. 715s(a)), are each amended by striking out "threatened with extinction," and inserting in lieu thereof the following: "listed pursuant to section 4 of the Endangered Species Act of 1973 as endangered species or threatened species,".

80 Stat. 929.
80 Stat. 930.

(c) Section 7(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 460l—9(a)(1)) is amended by striking out:

78 Stat. 897;
86 Stat. 459.

> "THREATENED SPECIES.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction."

and inserting in lieu thereof the following:

> "ENDANGERED SPECIES AND THREATENED SPECIES.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5(a) of the Endangered Species Act of 1973, needed for the purpose of conserving endangered or threatened species of fish or wildlife or plants."

(d) The first sentence of section 2 of the Act of September 28, 1962, as amended (76 Stat. 653, 16 U.S.C. 460k-1), is amended to read as follows:

Conservation areas.
86 Stat. 1063.

"The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—

"(1) incidental fish and wildlife-oriented recreational development,

"(2) the protection of natural resources,

"(3) the conservation of endangered species or threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973, or

"(4) carrying out two or more of the purposes set forth in paragraphs (1) through (3) of this section, and are adjacent to, or within, the said conservation areas, except that the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps."

87 STAT. 902

87 STAT. 903

86 Stat. 1027.

(e) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) is amended—

16 USC 1362.
Ante, p. 884.

(1) by striking out "Endangered Species Conservation Act of 1969" in section 3(1)(B) thereof and inserting in lieu thereof the following: "Endangered Species Act of 1973";

16 USC 1402.

(2) by striking out "pursuant to the Endangered Species Conservation Act of 1969" in section 101(a)(3)(B) thereof and inserting in lieu thereof the following: "or threatened species pursuant to the Endangered Species Act of 1973";

(3) by striking out "endangered under the Endangered Species Conservation Act of 1969" in section 102(b)(3) thereof and inserting in lieu thereof the following: "an endangered species or threatened species pursuant to the Endangered Species Act of 1973"; and

(4) by striking out "of the Interior such revisions of the Endangered Species List, authorized by the Endangered Species Conservation Act of 1969," in section 202(a)(6) thereof and inserting in lieu thereof the following: "such revisions of the endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered Species Act of 1973".

86 Stat. 973.
7 USC 136 note.

(f) Section 2(l) of the Federal Environmental Pesticide Control Act of 1972 (Public Law 92–516) is amended by striking out the words "by the Secretary of the Interior under Public Law 91–135" and inserting in lieu thereof the words "or threatened by the Secretary pursuant to the Endangered Species Act of 1973".

REPEALER

80 Stat. 926.
83 Stat. 275.

SEC. 14. The Endangered Species Conservation Act of 1969 (sections 1 through 3 of the Act of October 15, 1966, and sections 1 through 6 of the Act of December 5, 1969; 16 U.S.C. 668aa–668cc-6), is repealed.

AUTHORIZATION OF APPROPRIATIONS

SEC. 15. Except as authorized in section 6 of this Act, there are authorized to be appropriated—

(A) not to exceed $4,000,000 for fiscal year 1974, not to exceed $8,000,000 for fiscal year 1975 and not to exceed $10,000,000 for fiscal year 1976, to enable the Department of the Interior to carry out such functions and responsibilities as it may have been given under this Act; and

(B) not to exceed $2,000,000 for fiscal year 1974, $1,500,000 for fiscal year 1975 and not to exceed $2,000,000 for fiscal year 1976, to enable the Department of Commerce to carry out such functions and responsibilities as it may have been given under this Act.

EFFECTIVE DATE

SEC. 16. This Act shall take effect on the date of its enactment.

MARINE MAMMAL PROTECTION ACT OF 1972

SEC. 17. Except as otherwise provided in this Act, no provision of this Act shall take precedence over any more restrictive conflicting provision of the Marine Mammal Protection Act of 1972.

86 Stat. 1027.
16 USC 1361 note.

Approved December 28, 1973.

93d CONGRESS
1st Session

H. R. 37

IN THE HOUSE OF REPRESENTATIVES

January 3, 1973

Mr. Dingell (for himself, Mr. Clark, Mr. Mailliard, Mr. Mosher, Mr. Downing, Mr. Ruppe, Mr. Goodling, Mr. Bray, Mr. Stubblefield, Mr. Murphy of New York, Mr. Jones of North Carolina, Mr. Biaggi, Mr. Anderson of California, Mr. Kyros, Mr. McCloskey, Mr. Steele, Mr. du Pont, Mr. Tiernan, Mr. James V. Stanton, Mr. Metcalfe, Mr. Nedzi, Mr. O'Hara, Mr. William D. Ford, Mrs. Griffiths, and Mr. Moss) introduced the following bill; which was referred to the Committee on Merchant Marine and Fisheries

---

A BILL

To provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinction, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Endangered Species Conservation Act of 1973".

FINDINGS, PURPOSES, AND POLICY

Sec. 2. (a) The Congress finds and declares that one

I

of the unfortunate consequences of growth and development in the United States and elsewhere has been the extermination of some species or subspecies of fish and wildlife; that serious losses in species of wild animals with educational, historical, recreational, and scientific value have occurred and are occurring; that the United States has pledged itself, pursuant to migratory bird treaties with Canada and Mexico, the Migratory and Endangered Bird Treaty with Japan, the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, the International Convention for the Northwest Atlantic Fisheries, the International Convention for the High Seas Fisheries of the North Pacific Ocean, and other international agreements, to conserve and protect, where practicable, the various species of fish and wildlife that are threatened with extinction; and that the conservation, protection, restoration, or propagation of such species will inure to the benefit of all citizens.

(b) The purposes of this Act are to provide a program for the conservation, protection, restoration, or propagation of species and subspecies of fish and wildlife that are threatened with extinction, or are likely within the foreseeable future to become threatened with extinction.

(c) It is further declared to be the policy of Congress that all Federal departments and agencies shall seek to protect species or subspecies of fish and wildlife that are threatened with extinction or are likely within the foreseeable future to become threatened with extinction, and, wherever practicable, shall utilize their authorities in furtherance of the purpose of this Act.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) The term "Federal lands" means all lands or interests therein over which Congress has legislative authority under article IV, section 3, clause 2 of the United States Constitution, including, without limitation, lands enumerated in section 1400 of title 43, United States Code.

(2) The term "fish" means any fish or any part, products egg, or offspring thereof, or the dead body or parts thereof.

(3) The term "import" means to bring into the territorial limits of the United States and includes, without limitation, entry into a foreign trade zone, and transshipment through any portion of the United States without customs entry.

(4) The term "person" means (A) any private person or entity, and (B) any officer, employee, agent,

department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(5) The term "Secretary" means the Secretary of the Interior and the Secretary of Commerce with respect to functions and responsibilities under this Act relating to fish and wildlife, consistent with such program responsibilities therefor as are vested pursuant to the provisions of Reorganization Plan Numbered 4 of 1970.

(6) The term "take" means (A) with respect to fish or wildlife, to threaten, harass, hunt, capture, or kill, or attempt to threaten, harass, hunt, capture, or kill; and (B) with respect to flora, to collect, sever, remove, or otherwise damage in any manner, or to attempt to collect, sever, remove, or otherwise damage in any manner.

(7) The term "United States" includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Canal Zone, the possessions of the United States, and the Trust Territory of the Pacific Islands.

(8) The term "wildlife" means any wild mammal, game or nongame migratory bird, wild bird, amphibian, reptile, mollusk, crustacean, or other animal, or any part,

products, egg, or offspring thereof, or the dead body or parts thereof, including migratory, nonmigratory and endangered birds for which protection is also afforded by treaty or other international agreement.

DETERMINATION OF ENDANGERED SPECIES

SEC. 4. (a) A species or subspecies of fish or wildlife shall be regarded as an endangered species whenever the Secretary by regulation determines, based on the best scientific and commercial data available to him and after consultation, as appropriate, with the affected States, and, in cooperation with the Secretary of State, the country or countries in which such fish and wildlife are normally found or whose citizens harvest the same on the high seas, and with interested persons and organizations, and other interested Federal agencies, that the continued existence of such species or subspecies of fish or wildlife throughout all or a significant portion of its habitat or range, is either presently threatened with extinction or will likely within the foreseeable future become threatened with extinction, due to any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

(b) The Secretary shall publish in the Federal Register not less than annually a list, by scientific and common name or names, species or subspecies determined, pursuant to this section, to be endangered, indicating as to each species or subspecies so listed whether such species or subspecies is threatened with extinction or is likely within the foreseeable future to become threatened with extinction and, in either case, over what portion of the range of such species or subspecies this condition exists. The Secretary may, from time to time, by regulation revise any such list. The endangered species lists which are effective as of the date of the enactment of this Act shall be republished to conform to the provisions of this Act, except that until such republication nothing herein shall be deemed to invalidate such endangered species lists. The provisions of section 553 of title 5, United States Code, shall apply to any regulation issued under this subsection. The Secretary shall, upon the petition of an interested person under subsection 553 (e) of title 5, United States Code, also conduct a review, on the record after opportunity for agency hearing, of any listed or unlisted species or subspecies of fish or wildlife proposed to be removed from or added to the list, but only if he finds and publishes his finding that such person has presented substantial evidence to warrant such a review.

LAND ACQUISITION AND AGENCY COMPLIANCE

SEC. 5. (a) The Secretary shall utilize the land acquisition and other authorities of the Migratory Bird Conservation Act, as amended, the Fish and Wildlife Act of 1956, as amended, and the Fish and Wildlife Coordination Act, as appropriate, to carry out a program in the United States of conserving, protecting, restoring, or propagating those species and subspecies of fish and wildlife that he lists as endangered species pursuant to section 4 of this Act.

(b) In addition to the land acquisition authorities otherwise available to him, the Secretary is hereby authorized to acquire by purchase, donation, or otherwise, lands or interests therein needed to carry out the purposes of this Act relating to the conservation, protection, restoration, or propagation of those species or subspecies of fish and wildlife that he lists as endangered species pursuant to section 4 of this Act.

(c) Funds made available pursuant to the Land and Water Conservation Fund Act of 1965 as amended may be used for the purpose of acquiring lands, waters, or interests therein pursuant to this section that are needed for the purpose of conserving, protecting, restoring, or propagating those species or subspecies of fish and wildlife, that he lists as endangered species pursuant to section 4 of this Act.

(d) The Secretary shall review other programs administered by him and, to the extent practicable, utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize, wherever practicable, their authorities in furtherance of the purposes of this Act by carrying out programs for the protection of endangered species and by taking such actions as may be necessary to insure that actions authorized, funded, regulated, or administered by them do not jeopardize the continued existence of endangered species or result in destruction or modification of critical habitat of such species.

(e) Subject to the provisions of section 1415 of the Supplemental Appropriation Act, 1953 (31 U.S.C. 724), the President is authorized, as a demonstration of the commitment of the United States to the worldwide protection of endangered species of fish and wildlife, to use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistance Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and management of programs in that country which the Secretary determines to be necessary or useful for the conservation, protection, restoration, or propagation of any species or subspecies of fish and wildlife listed by the Secretary pursuant to section 4 of this Act. The President shall provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, waters, or interests therein) to foreign countries under this section under such terms and conditions as he deems appropriate.

(f) In carrying out the provisions of this Act, the Secretary, through the Secretary of State, shall encourage foreign countries to provide protection to endangered species or subspecies of fish or wildlife, to take measures to prevent any fish or wildlife from becoming endangered, and he shall, through the Secretary of State, encourage bilateral and multilateral agreements with such countries for the conservation and propagation of fish and wildlife. The Secretary is authorized to assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign countries and international organizations in developing personnel resources and programs which promote conservation of fish or wildlife, including (1) educational training of United States and foreign personnel, here or abroad, in the subjects of fish and wildlife management, research, and law enforcement; and (2) rendering professional assistance abroad in such matters. The Secretary is also authorized to conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the obligations imposed upon him by this Act.

COOPERATION WITH THE STATES

SEC. 6. (a) In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the several States. Such cooperation shall include consultation before the acquisition of any land for the purpose of conserving, protecting, restoring, or propagating any endangered species.

(b) The Secretary may enter into agreements with the States for the administration and management of any area established for the conservation, protection, restoration, or propagation of endangered species. Any revenues derived from the administration of such areas under these agreements shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383), as amended (16 U.S.C. 715s).

(c) The Secretary may delegate to a State the authority to regulate the taking by any person of endangered species or subspecies of resident fish and wildlife when he determines that such State maintains an adequate and active program.

consistent with the policies and purposes of this Act, to manage and protect such endangered species in accordance with criteria issued by the Secretary.

(d) Any action taken by the Secretary under this section shall be subject to his periodic and continual review at no greater than annual intervals. Such review shall include the consideration of comment received from interested persons.

(e) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting the power of any State to enact legislation more restrictive than the provisions of this Act for the protection and conservation of fish and wildlife, including the regulation or prohibition of the retail sale of specimens or of products processed or manufactured from the specimens of fish and wildlife, whether such specimens are alive or dead.

(f) The Secretary of the Interior shall promptly undertake an investigation and study regarding the functions and responsibilities which the States should have with respect to the management and protection of endangered species of fish and wildlife. The Secretary of the Interior shall report the results of the investigation and study to Congress within one year after the date of the enactment of this Act, and such report may include such recommendations as he may have regarding the extent to, and manner in, which the Federal

Government should assist the States in establishing and implementing management and protection programs for endangered species.

PROHIBITED ACTS

SEC. 7. (a) Notwithstanding any other Act of Congress or regulation issued pursuant thereto, and except as otherwise provided in section 8 of this Act, any person who—

(A) imports into or exports from the United States, receives, or causes to be so imported, received, or exported; or

(B) takes or causes to be taken within the United States, the territorial sea of the United States, Federal lands, or upon the high seas; or

(C) ships, carries, or receives by any means in interstate commerce

any species or subspecies of fish or wildlife which the Secretary has listed as an endangered species threatened with extinction pursuant to section 4 of this Act shall be punished in accordance with the provisions of section 9 of this Act.

(b) Whenever the Secretary, pursuant to section 4 of this Act, lists a species or subspecies as an endangered species which is likely within the foreseeable future to become threatened with extinction, he shall issue such regulations as he deems necessary or advisable to provide for the conservation, protection, restoration, or propagation of such species or subspecies, including regulations subjecting to punishment in accordance with section 9 of this Act any person who—

(1) imports into or exports from the United States, receives, or causes to be so imported, received, or exported; or

(2) takes or causes to be taken within the United States, the territorial sea of the United States, Federal lands, or upon the high seas; or

(3) ships, carries, or receives by any means in interstate commerce

any such species or subspecies of fish or wildlife likely within the foreseeable future to become threatened with extinction.

(c) For the purpose of facilitating enforcement of this Act, the Secretary may from time to time, by regulation, extend the protection of this section, to the extent he deems it advisable, to any species or subspecies of fish or wildlife which is not listed as an endangered species, but which so closely resembles in appearance, at the point in question, a species or subspecies of fish or wildlife which has been listed as endangered, that substantial difficulty is posed to enforcement personnel in attempting to differentiate between the endangered and nonendangered species or subspecies of fish or wildlife, and this difficulty poses an additional threat to the endangered species or subspecies.

EXCEPTIONS

SEC. 8. (a) The Secretary may permit, under such terms and conditions as he may prescribe, the importation, taking, or the transportation in interstate commerce of any species or subspecies of fish or wildlife listed as an endangered species threatened with extinction for scientific purposes, and for the propagation of such fish and wildlife in captivity for preservation purposes, but only if he finds that such importation, exportation, taking, transportation in interstate commerce, or projected use will not adversely affect the regenerative capacity of such specimen or of such species or subspecies in a significant portion of its range or habitat or otherwise affect the survival of the wild population of such species.

(b) In order to minimize undue economic hardship to any person importing, exporting, taking, or transporting in interstate commerce any species or subspecies of fish or wildlife which is listed as an endangered species pursuant to section 4 of this Act under any contract entered into prior to the date of original publication of such listing in the Federal Register, the Secretary, upon such person filing an application with him and upon filing such information as the Secretary may require showing, to his satisfaction, such hardship may permit such person to import, export, take or transport such species or subspecies in such quantities and for such periods, not to exceed one year, as he determines to be appropriate.

PENALTIES AND ENFORCEMENT

SEC. 9. (a) (1) Any person who violates any provision of this Act or of any regulation or permit issued thereunder, other than a person who commits a violation the penalty for which is prescribed by subsection (b) of this section, shall be assessed a civil penalty by the Secretary of not more than $10,000 for each such violation. No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay the penalty assessed under this paragraph, the Secretary may request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found or resides or transacts business to collect the penalty, and such court shall have jurisdiction to hear and decide any such action. In the case of Guam such actions may be brought in the district court of Guam; in the case of the Virgin Islands such actions may be brought in the district court of the Virgin Islands, and in the case of American

Samoa such actions may be brought in the District Court of the United States for the District of Hawaii and such courts shall have jurisdiction of such actions. In hearing such action, the court shall sustain the Secretary's action if such action is supported by substantial evidence.

(2) Whenever any property is seized pursuant to subsection (c) of this section, the Secretary shall move to dispose of the civil penalty proceedings pursuant to paragraph (1) of this subsection as expeditiously as possible. Upon the assessment and collection of a civil penalty pursuant to paragraph (1) of this subsection, any property so seized may be proceeded against in any court of competent jurisdiction and forfeited. Fish or wildlife so forfeited shall be conveyed to the Secretary for disposition by him in such a manner as he deems appropriate. If, with respect to any such property so seized, no compromise forfeiture has been achieved or no action is commenced to obtain the forfeiture of such fish, wildlife, property, or item within thirty days following the completion of proceedings involving an assessment and collection of a civil penalty, such property shall be immediately returned to the owner or the consignee in accordance with regulations promulgated by the Secretary.

(3) Proceedings for the assessment of civil penalties pursuant to paragraph (1) of this subsection shall be com-

ducted in accordance with section 554 of title 5. The Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(b) Any person who knowingly violates any provision of this Act, or of any regulation or permit issued thereunder, shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both, and any Federal hunting or fishing licenses, permits, or stamps may be revoked or withheld for a period of up to five years. Upon conviction, (1) any fish or wildlife seized shall be forfeited to the Secretary for disposal by him in such manner as he deems appropriate, and (2) any other property seized pursuant to subsection (e) of this section may, in the discretion of the court, commissioner, or magistrate, be forfeited to the United States or otherwise disposed of. If no conviction results from any such alleged violation, such property so seized in connection therewith shall be immediately returned to the owner or consignee in accordance with regulations promulgated by the Secretary, unless the Secretary, within thirty days following the final disposition of the case involving such violation, commences proceedings under subsection (a) of this section.

(e) (1) The provisions of sections 7 and 8 of this Act and any regulations or permits issued pursuant thereto, or pursuant to subsection (d) or (e) of this section, shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all such Secretaries. Each such Secretary may utilize, by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency.

(2) Any authorized agent of the Department of the Interior, the Department of Commerce, or the Department of the Treasury may, with or without a warrant, arrest any person who such agent has probable cause to believe is knowingly violating this Act, in his presence or view, or any regulation or permit issued thereunder, the penalty for which

is provided under subsection (b) of this section. An agent who has made an arrest of a person in connection with any such violation may search such person at the time of his arrest and seize any property taken, used, or possessed in connection with any such violation.

(3) Any authorized agent of the Department of the Interior, the Department of Commerce, or the Department of the Treasury shall have authority to search and seize with or without a warrant, as provided by the customs laws and by the law relating to search and seizure. Any such officer or agent is authorized to execute warrants to search for and seize any property, including, for the purposes of this section, any fish, wildlife, aircraft, boat, or other conveyance, weapon, business records, shipping documents, or other items which have been taken, used, or possessed in connection with the violation of any section, regulation, or permit with respect to which a civil or criminal penalty may be assessed, pursuant to subsection (a) or (b) of this section. Any property seized pursuant to this section shall be held by any agent authorized by the Secretary or the Secretary of the Treasury, or by a United States marshal, pending disposition of proceedings under subsection (a) or (b) of this section; except that either Secretary may, in lieu of holding such property, either (1) permit a bond or other satisfactory surety to be posted, or (2) place the fish or wildlife in the custody of

such person as he shall designate. Upon the imposition of a civil or criminal penalty, or a forfeiture, the costs to the Government of transfer, board, and handling, including the cost of investigations at a nondesignated port of entry, shall be payable to the account of the Secretary. The owner or consignee of any property so seized shall, as soon as practicable following such seizure, be notified of the fact in accordance with regulations established by the Secretary.

(d) The Secretary may request the Attorney General to bring appropriate action to prevent threatened violations of this Act, or of any regulations or orders promulgated pursuant thereto.

(e) For the purposes of facilitating the enforcement of this Act and reducing the costs thereof, the Secretary, with the approval of the Secretary of the Treasury, shall, after notice and an opportunity for a public hearing, from time to time designate, by regulation, any port or ports in the United States for the imporation of fish and wildlife (other than shellfish and fishery products) into the United States. The importation of such fish or wildlife into any port in the United States, except those so designated, shall be prohibited after the effective date of such designations; except that the Secretary, under such terms and conditions as he may prescribe, may permit importation at nondesignated ports in the interest of the health or safety of the fish or wildlife. Such regulations may provide other exceptions to such prohibition if the Secretary, in his discretion, deems it appropriate and consistent with the purposes of this subsection.

(f) The Secretary is authorized to promulgate such regulations as may be appropriate to carry out the purposes of this Act, and the Secretaries of the Treasury and the department in which the Coast Guard is operating are authorized to promulgate such regulations as may be appropriate to the exercise of responsibilities under subsection (e) (1) of this section.

(g) (1) Any person who engages to any extent in business as an importer of fish and wildlife must register with the Secretary of the Treasury his name and the address of each place of business at which, and all trade names under which, he conducts such business.

(2) Any person required to register with the Secretary of the Treasury under paragraph (1) of this subsection shall—

(A) keep such records as will fully and correctly disclose each importation of fish and wildlife made by him and the subsequent disposition made by him with respect to such fish and wildlife; and

(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his places of business an opportunity to examine his inventory of imported fish and wildlife and the records required to be kept under subparagraph (A) of this paragraph, and to copy such records.

(3) The Secretary of the Treasury shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.

INTERNATIONAL AND INTERGOVERNMENTAL COOPERATION

SEC. 10. (a) (1) In carrying out the provisions of this Act, the Secretary, through the Secretary of State, shall encourage foreign countries to provide protection to endangered species or subspecies of fish and wildlife, to take measures to prevent any fish or wildlife from becoming endangered, and shall cooperate with such countries in providing technical assistance in developing and carrying out programs to provide such protection, and shall, through the Secretary of State, encourage bilateral and multilateral agreements with such countries for the protection, conservation, or propagation of fish and wildlife. The Secretary shall also encourage persons, taking directly or indirectly fish or wildlife in foreign countries or on the high seas for importation into the United States for commercial or other purposes, to develop and carry out, with such assistance as he may provide under any authority available to him, conservation practices designed to enhance such fish or wildlife and their habitat or range. The Secretary of State, in consultation with the Secretary, shall take appropriate measures to encourage the development of adequate measures, including, if appropriate, international agreements, to prevent such fish or wildlife from becoming threatened with extinction.

(2) To assure the worldwide conservation of endangered species and to avoid unnecessary harm to affected United States industries, the Secretary, through the Secretary of State, shall seek the convening of an international ministerial meeting on fish and wildlife prior to July 1, 1973, and included in the business of that meeting shall be the signing of a binding international convention on the conservation of endangered species.

(b) The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act and amendments made by this Act, with the administration of the animal quarantine laws (19 U.S.C. 1306; 21 U.S.C. 101–105, 111–135b, and 612–614). Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations of animals and other articles and no proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture.

(c) Whenever the Secretary determines, pursuant to this Act or any other authority vested in him, that a species or subspecies of fish or wildlife is endangered, the Secretary of Agriculture may use all authorities available to him with respect to research, investigations, conservation, development, protection, management, and enhancement of fish and wildlife, including, but not limited to, the conservation operations program, watershed protection and flood prevention programs, rural environmental assistance program, Great Plains conservation program, resource conservation and development program, forestry programs, and water bank program, in the protection, control, management, or enhancement of such species or subspecies. Recognizing the national and international interest in the protection and enhancement of such species or subspecies, the Secretary of Agriculture is authorized, notwithstanding the provisions of any other law, to bear the full cost, or any lesser amount that he, in consultation with the Secretary, may determine desirable to accomplish the objectives of the Act, of the cost of installing any practice, measure, work of improvement, facility, or other developmental, protective, or management systems on private land, the primary purpose of which is for the purpose of enabling the landowner to comply with the regulations, or other recommendations, of the Secretary pertaining to the protection, control, management, or enhancement of such species or subspecies. The Secretary of Agriculture, in carrying out the purposes of this section, shall utilize his authorities to conduct research and investigations into vegetative and structural methods and other methods and practices, measures, works of improvement, and facilities most appropriate or effective in the protection, control, management, or enhancement of such species or subspecies. If determined desirable, the Secretary and the Secretary of Agriculture shall be authorized to jointly carry out research, surveys, and investigations. The Secretary is authorized to transfer to the Secretary of Agriculture such funds as may be necessary to carry out the purposes of this subsection.

(d) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, as amended, including, without limitation, section 527 of such Act (19 U.S.C. 1527) relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.

ENDANGERED FLORA

SEC. 11. The Secretary of the Smithsonian Institution, in conjunction with other affected agencies, is authorized and directed to review (1) species and subspecies of endangered plants, trees, and other flora, and (2) methods of providing adequate protection to such species and subspecies, and to report to Congress, within one year after the date of the enactment of this Act, the results of such review. For the purposes of this section, there is authorized to be appropriated $250,000.

CONFORMING AMENDMENTS

SEC. 12. (a) Subsection 4(c) of the Act of October 15, 1966 (80 Stat. 928), as amended (16 U.S.C. 668dd (c)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered species listed by the Secretary pursuant to section 4 of the Endangered Species Conservation Act of 1972, nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the system."

(b) Subsection 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224), as amended (16 U.S.C. 715i (a)), is further amended by inserting "or likely within the foreseeable future to become threatened with" between the words "with" and "extinction".

(c) Subsection 401 (a) of the Act of June 15, 1935 (49 Stat. 383), as amended (16 U.S.C. 715s(a)), is further amended by inserting "or likely within the foreseeable future to become threatened with" between the words "with" and "extinction" in the last sentence thereof.

(d) Section 6 (a) (1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 460l—9 (a) (1)) is amended by striking out:

> "THREATENED SPECIES.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction."

and inserting in lieu thereof the following:

> "ENDANGERED SPECIES.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5 (c) of the Endangered Species Conservation Act of 1972, needed for the purpose of conserving, protecting, restoring, or propagating endangered species of fish and wildlife."

REPEALS

SEC. 13. (a) Sections 1 through 3 of the Act of October 15, 1966 (80 Stat. 926, 927), as amended (16 U.S.C. 668aa–668cc), are hereby repealed in their entirety.

(b) Sections 1 through 6 of the Act of December 5, 1969 (83 Stat. 275–279; 16 U.S.C. 668cc–1 through 668cc–6) are hereby repealed in their entirety.

[From the Congressional Record, Jan. 11, 1973]

A BILL TO STRENGTHEN THE ENDANGERED SPECIES ACT

Mr. DINGELL. Mr. Speaker, I introduced a bill on January 3 in the 93d Congress to strengthen the Endangered Species Act of 1966 and 1969.

Before discussing this legislation, I want to report that I am pleased the U.S. State Department has scheduled an international conference, as called for in the 1969 act, on fish and wildlife resources threatened with extinction. This coincides with the movement in the House of Representatives to enact the stronger Endangered Species Act of 1973.

Mr. Speaker, I have been pressing the State Department for this international conference upon many occasions and while it has been postponed by the State Department several previous times, I certainly hope this will be a successful gathering of nations this year.

I am also requesting that I be appointed as a delegate from the House to the conference to be held February 12 through March 2, 1973, in Washington, D.C. This conference will seek to establish a worldwide treaty regarding the cooperative protection of endangered species among countries.

Mr. Speaker, over 70 members of the House are cosponsoring H.R. 37, the Endangered Species Act of 1973, and related bills which have been referred to the Merchant Marine and Fisheries Committee. As chairman of the Subcommittee on Fisheries and Wildlife Conservation, I will urge early hearings to be held prior to full committee action.

This is one of the most important pieces of legislation in the new Congress and I am satisfied it will enable us to thoroughly strengthen the existing acts. Further action on the existing law is necessary if we are to conserve, protect, and propagate our threatened fish and wildlife resources which I feel are diminishing too rapidly.

Major provisions of the new bill provide for the administration of the endangered species program jointly by the Departments of Interior and Commerce, removes the distinction now existing between native and worldwide endangered species and extends present controls to reach species or subspecies not only threatened with extinction, but also those which are likely to be threatened within the near future.

The measure extends existing prohibitions to include export as well as import of listed endangered species and provides for civil and criminal penalties for violations of the act.

In some other specific points, the bill would provide additional protection to such species as the eastern timber wolf, found in Minnesota; and the Texas red wolf, found in Texas and Louisiana areas; along with the the wolverine, found in Minnesota and Idaho.

It would enable better consideration to be given to the kangaroo, found in Australia, and to the Asiatic elephant. These two species, along with the wolverine, are being heavily exploited and are in trouble, but are not yet on the brink of extinction, according to the Department of the Interior.

Protective help also would be given to the eastern cougar which is found on the eastern seaboard and which ranges from Maryland to the Carolinas and Georgia.

The Department of the Interior would have the authority to control exports of native endangered species just as it now controls the imports of foreign endangered species. This allows us to do as much for our own animals as we are doing for foreign endangered species.

Other sections of the endangered species bill would require an annual review of the endangered species list, allow States to adopt their own programs, authorize a study of State and Federal roles, restrict importation for zoos and educational purposes, and establish a separate restriction section for other importers.

Mr. Speaker, a list of the cosponsors of the Endangered Species Conservation Act of 1973 follows:

List of Cosponsors

Frank M. Clark, William S. Mailliard, Charles A. Mosher, Thomas N. Downing, Philip E. Ruppe, George A. Goodling, William G. Bray, Frank A. Stubblefield, John M. Murphy, Walter B. Jones.

Mario Biaggi, Glenn M. Anderson, Peter N. Kyros, Paul N. McCloskey, Jr., Robert H. Steele, Pierre S. du Pont, Robert O. Tiernan, James V. Stanton, Ralph H. Metcalfe, Lucien N. Nedzi.

James G. O'Hara, William D. Ford, Martha W. Griffiths, John E. Moss, James R. Grover, Robert L. Leggett, Edwin B. Forsythe, Ben B. Blackburn, Joseph P. Vigorito, Charles E. Bennett;

Jerome R. Waldie, Morris K. Udall, John Ware, Louis C. Wyman, Ken Hechler, David Obey, Gus Yatron, Clarence D. Long, Frank Annunzio, Edward I. Koch, Don Edwards, Fred B. Rooney;

Donald M. Fraser, James C. Corman, Charles J. Carney, John J. Rhodes, Jerry L. Pettis, Peter W. Rodino, Jr., Hamilton Fish, Jr., Joseph P. Addabbo, Bill Alexander, Robert H. Mollohan;

Romano L. Mazzoli, Norman F. Lent, William L. Hungate, Thaddeus J. Dulski, Joseph E. Karth, Silvio O. Conte, Mark Andrews, Bertram L. Podell, Marvin L. Esch, Henry Helstoski;

Richardson Preyer, Thomas L. Ashley, Jonathan B. Bingham, James C. Cleveland, Edward R. Boybal, Bill Frenzel, Robert H. Michel, Bella S. Abzug, Edward G. Biester, Jr., John F. Seiberling.

Union Calendar No. 194

93D CONGRESS
1ST SESSION

H. R. 37

[Report No. 93–412]

IN THE HOUSE OF REPRESENTATIVES

JANUARY 3, 1973

Mr. DINGELL (for himself, Mr. CLARK, Mr. MAILLIARD, Mr. MOSHER, Mr. DOWNING, Mr. RUPPE, Mr. GOODLING, Mr. BRAY, Mr. STUBBLEFIELD, Mr. MURPHY of New York, Mr. JONES of North Carolina, Mr. BIAGGI, Mr. ANDERSON of California, Mr. KYROS, Mr. MCCLOSKEY, Mr. STEELE, Mr. DU PONT, Mr. TIERNAN, Mr. JAMES V. STANTON, Mr. METCALFE, Mr. NEDZI, Mr. O'HARA, Mr. WILLIAM D. FORD, Mrs. GRIFFITHS, and Mr. MOSS) introduced the following bill; which was referred to the Committee on Merchant Marine and Fisheries

JULY 27, 1973

Reported with amendments, committed to the Committee of the Whole House on the State of the Union, and ordered to be printed

[Strike out all after the enacting clause and insert the part printed in italic]

A BILL

To provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinction, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, ~~That this Act may be cited as the "Endangered Species Conservation Act of 1973".~~

~~FINDINGS, PURPOSES, AND POLICY~~

~~SEC. 2. (a) The Congress finds and declares that one~~

~~of the unfortunate consequences of growth and development in the United States and elsewhere has been the extermination of some species or subspecies of fish and wildlife; that serious losses in species of wild animals with educational, historical, recreational, and scientific value have occurred and are occurring; that the United States has pledged itself, pursuant to migratory bird treaties with Canada and Mexico, the Migratory and Endangered Bird Treaty with Japan, the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, the International Convention for the Northwest Atlantic Fisheries, the International Convention for the High Seas Fisheries of the North Pacific Ocean, and other international agreements, to conserve and protect, where practicable, the various species of fish and wildlife that are threatened with extinction; and that the conservation, protection, restoration, or propagation of such species will inure to the benefit of all citizens.~~

~~(b) The purposes of this Act are to provide a program for the conservation, protection, restoration, or propagation of species and subspecies of fish and wildlife that are threatened with extinction, or are likely within the foreseeable future to become threatened with extinction.~~

~~(c) It is further declared to be the policy of Congress~~

~~that all Federal departments and agencies shall seek to protect species or subspecies of fish and wildlife that are threatened with extinction or are likely within the foreseeable future to become threatened with extinction, and, wherever practicable, shall utilize their authorities in furtherance of the purpose of this Act.~~

~~DEFINITIONS~~

~~SEC. 3. For the purposes of this Act—~~

~~(1) The term "Federal lands" means all lands or interests therein over which Congress has legislative authority under article IV, section 3, clause 2 of the United States Constitution, including, without limitation, lands enumerated in section 1400 of title 43, United States Code.~~

~~(2) The term "fish" means any fish or any part, products, egg, or offspring thereof, or the dead body or parts thereof.~~

~~(3) The term "import" means to bring into the territorial limits of the United States and includes, without limitation, entry into a foreign trade zone, and transshipment through any portion of the United States without customs entry.~~

~~(4) The term "person" means (A) any private person or entity, and (B) any officer, employee, agent,~~

~~department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.~~

~~(5) The term “Secretary” means the Secretary of the Interior and the Secretary of Commerce with respect to functions and responsibilities under this Act relating to fish and wildlife, consistent with such program responsibilities therefor as are vested pursuant to the provisions of Reorganization Plan Numbered 4 of 1970.~~

~~(6) The term “take” means (A) with respect to fish or wildlife, to threaten, harass, hunt, capture, or kill, or attempt to threaten, harass, hunt, capture, or kill; and (B) with respect to flora, to collect, sever, remove, or otherwise damage in any manner, or to attempt to collect, sever, remove, or otherwise damage in any manner.~~

~~(7) The term “United States” includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Canal Zone, the possessions of the United States, and the Trust Territory of the Pacific Islands.~~

~~(8) The term “wildlife” means any wild mammal, game or nongame migratory bird, wild bird, amphibian, reptile, mollusk, crustacean, or other animal, or any part,~~

~~products, egg, or offspring thereof, or the dead body or parts thereof, including migratory, nonmigratory and endangered birds for which protection is also afforded by treaty or other international agreement.~~

~~DETERMINATION OF ENDANGERED SPECIES~~

~~SEC. 4. (a) A species or subspecies of fish or wildlife shall be regarded as an endangered species whenever the Secretary by regulation determines, based on the best scientific and commercial data available to him and after consultation, as appropriate, with the affected States, and, in cooperation with the Secretary of State, the country or countries in which such fish and wildlife are normally found or whose citizens harvest the same on the high seas, and with interested persons and organizations, and other interested Federal agencies, that the continued existence of such species or subspecies of fish or wildlife throughout all or a significant portion of its habitat or range, is either presently threatened with extinction or will likely within the foreseeable future become threatened with extinction, due to any of the following factors:~~

~~(1) the present or threatened destruction, modification, or curtailment of its habitat or range;~~

~~(2) overutilization for commercial, sporting, scientific, or educational purposes;~~

~~species or subspecies of fish or wildlife proposed to be removed from or added to the list, but only if he finds and publishes his finding that such person has presented substantial evidence to warrant such a review.~~

~~LAND ACQUISITION AND AGENCY COMPLIANCE~~

~~SEC. 5. (a) The Secretary shall utilize the land acquisition and other authorities of the Migratory Bird Conservation Act, as amended, the Fish and Wildlife Act of 1956, as amended, and the Fish and Wildlife Coordination Act, as appropriate, to carry out a program in the United States of conserving, protecting, restoring, or propagating those species and subspecies of fish and wildlife that he lists as endangered species pursuant to section 4 of this Act.~~

~~(b) In addition to the land acquisition authorities otherwise available to him, the Secretary is hereby authorized to acquire by purchase, donation, or otherwise, lands or interests therein needed to carry out the purposes of this Act relating to the conservation, protection, restoration, or propagation of those species or subspecies of fish and wildlife that he lists as endangered species pursuant to section 4 of this Act.~~

~~(c) Funds made available pursuant to the Land and Water Conservation Fund Act of 1965 as amended may be used for the purpose of acquiring lands, waters, or interests therein pursuant to this section that are needed for~~

~~the purpose of conserving, protecting, restoring, or propagating those species or subspecies of fish and wildlife, that he lists as endangered species pursuant to section 4 of this Act.~~

~~(d) The Secretary shall review other programs administered by him and, to the extent practicable, utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize, wherever practicable, their authorities in furtherance of the purposes of this Act by carrying out programs for the protection of endangered species and by taking such actions as may be necessary to insure that actions authorized, funded, regulated, or administered by them do not jeopardize the continued existence of endangered species or result in destruction or modification of critical habitat of such species.~~

~~(e) Subject to the provisions of section 1415 of the Supplemental Appropriation Act, 1953 (31 U.S.C. 724), the President is authorized, as a demonstration of the commitment of the United States to the worldwide protection of endangered species of fish and wildlife, to use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistance Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and man-~~

~~agement of programs in that country which the Secretary determines to be necessary or useful for the conservation, protection, restoration, or propagation of any species or subspecies of fish and wildlife listed by the Secretary pursuant to section 4 of this Act. The President shall provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, waters, or interests therein) to foreign countries under this section under such terms and conditions as he deems appropriate.~~

~~(f) In carrying out the provisions of this Act, the Secretary, through the Secretary of State, shall encourage foreign countries to provide protection to endangered species or subspecies of fish or wildlife, to take measures to prevent any fish or wildlife from becoming endangered, and he shall, through the Secretary of State, encourage bilateral and multilateral agreements with such countries for the conservation and propagation of fish and wildlife. The Secretary is authorized to assign or otherwise make available any officer or employee of his department for~~ the purpose of cooperating ~~with foreign countries and international organizations in developing personnel resources and programs which promote conservation of fish or wildlife, including (1) educational training of United States and foreign personnel, here or abroad, in the subjects of fish and wildlife management, research, and law enforcement; and (2) rendering~~

~~professional assistance abroad in such matters. The Secretary is also authorized to conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the obligations imposed upon him by this Act.~~

~~COOPERATION WITH THE STATES~~

~~SEC. 6. (a) In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the several States. Such cooperation shall include consultation before the acquisition of any land for the purpose of conserving, protecting, restoring, or propagating any endangered species.~~

~~(b) The Secretary may enter into agreements with the States for the administration and management of any area established for the conservation, protection, restoration, or propagation of endangered species. Any revenues derived from the administration of such areas under these agreements shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383), as amended (16 U.S.C. 715s).~~

~~(c) The Secretary may delegate to a State the authority to regulate the taking by any person of endangered species or subspecies of resident fish and wildlife when he determines that such State maintains an adequate and active program,~~

~~consistent with the policies and purposes of this Act, to manage and protect such endangered species in accordance with criteria issued by the Secretary.~~

~~(d) Any action taken by the Secretary under this section shall be subject to his periodic and continual review at no greater than annual intervals. Such review shall include the consideration of comment received from interested persons.~~

~~(e) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting the power of any State to enact legislation more restrictive than the provisions of this Act for the protection and conservation of fish and wildlife, including the regulation or prohibition of the retail sale of specimens or of products processed or manufactured from the specimens of fish and wildlife, whether such specimens are alive or dead.~~

~~(f) The Secretary of the Interior shall promptly undertake an investigation and study regarding the functions and responsibilities which the States should have with respect to the management and protection of endangered species of fish and wildlife. The Secretary of the Interior shall report the results of the investigation and study to Congress within one year after the date of the enactment of this Act, and such report may include such recommendations as he may have regarding the extent to, and manner in, which the Federal~~

~~“Government should assist the States in establishing and implementing management and protection programs for endangered species.~~

~~PROHIBITED ACTS~~

~~Sec. 7. (a) Notwithstanding any other Act of Congress or regulation issued pursuant thereto, and except as otherwise provided in section 8 of this Act, any person who—~~

~~(A) imports into or exports from the United States, receives, or causes to be so imported, received, or exported; or~~

~~(B) takes or causes to be taken within the United States, the territorial sea of the United States, Federal lands, or upon the high seas; or~~

~~(C) ships, carries, or receives by any means in interstate commerce~~

~~any species or subspecies of fish or wildlife which the Secretary has listed as an endangered species threatened with extinction pursuant to section 4 of this Act shall be punished in accordance with the provisions of section 9 of this Act~~

~~(b) Whenever the Secretary, pursuant to section 4 of this Act, lists a species or subspecies as an endangered species which is likely within the foreseeable future to become threatened with extinction, he shall issue such regulations as he deems necessary or advisable to provide for the conservation, protection, restoration, or propagation of such~~

~~species or subspecies, including regulations subjecting to punishment in accordance with section 9 of this Act any person who—~~

~~(1) imports into or exports from the United States, receives, or causes to be so imported, received, or exported; or~~

~~(2) takes or causes to be taken within the United States, the territorial sea of the United States, Federal lands, or upon the high seas; or~~

~~(3) ships, carries, or receives by any means in interstate commerce~~

~~any such species or subspecies of fish or wildlife likely within the foreseeable future to become threatened with extinction.~~

~~(c) For the purpose of facilitating enforcement of this Act, the Secretary may from time to time, by regulation, extend the protection of this section, to the extent he deems it advisable, to any species or subspecies of fish or wildlife which is not listed as an endangered species, but which so closely resembles in appearance, at the point in question, a species or subspecies of fish or wildlife which has been listed as endangered, that substantial difficulty is posed to enforcement personnel in attempting to differentiate between the endangered and nonendangered species or subspecies of~~

~~fish or wildlife, and this difficulty poses an additional threat to the endangered species or subspecies.~~

~~EXCEPTIONS~~

~~SEC. 8. (a) The Secretary may permit, under such terms and conditions as he may prescribe, the importation, taking, or the transportation in interstate commerce of any species or subspecies of fish or wildlife listed as an endangered species threatened with extinction for scientific purposes, and for the propagation of such fish and wildlife in captivity for preservation purposes, but only if he finds that such importation, exportation, taking, transportation in interstate commerce, or projected use will not adversely affect the regenerative capacity of such specimen or of such species or subspecies in a significant portion of its range or habitat or otherwise affect the survival of the wild population of such species.~~

~~(b) In order to minimize undue economic hardship to any person importing, exporting, taking, or transporting in interstate commerce any species or subspecies of fish or wildlife which is listed as an endangered species pursuant to section 4 of this Act under any contract entered into prior to the date of original publication of such listing in the Federal Register, the Secretary, upon such person filing an application with him and upon filing such information as the Secretary may require showing, to his satisfaction, such~~

~~hardship, may permit such person to import, export, take or transport such species or subspecies in such quantities and for such periods, not to exceed one year, as he determines to be appropriate.~~

~~PENALTIES AND ENFORCEMENT~~

~~SEC. 9. (a) (1) Any person who violates any provision of this Act or of any regulation or permit issued thereunder, other than a person who commits a violation the penalty for which is prescribed by subsection (b) of this section, shall be assessed a civil penalty by the Secretary of not more than $10,000 for each such violation. No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay the penalty assessed under this paragraph, the Secretary may request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found or resides or transacts business to collect the penalty, and such court shall have jurisdiction to hear and decide any such action. In the case of Guam such actions may be brought in the district court of Guam; in the case of the Virgin Islands such actions may be brought in the district court of the Virgin Islands, and in the case of American~~

~~Samoa such actions may be brought in the District Court of the United States for the District of Hawaii and such courts shall have jurisdiction of such actions. In hearing such action, the court shall sustain the Secretary's action if such action is supported by substantial evidence.~~

~~(2) Whenever any property is seized pursuant to subsection (e) of this section, the Secretary shall move to dispose of the civil penalty proceedings pursuant to paragraph (1) of this subsection as expeditiously as possible. Upon the assessment and collection of a civil penalty pursuant to paragraph (1) of this subsection, any property so seized may be proceeded against in any court of competent jurisdiction and forfeited. Fish or wildlife so forfeited shall be conveyed to the Secretary for disposition by him in such a manner as he deems appropriate. If, with respect to any such property so seized, no compromise forfeiture has been achieved or no action is commenced to obtain the forfeiture of such fish, wildlife, property, or item within thirty days following the completion of proceedings involving an assessment and collection of a civil penalty, such property shall be immediately returned to the owner or the consignee in accordance with regulations promulgated by the Secretary.~~

~~(3) Proceedings for the assessment of civil penalties pursuant to paragraph (1) of this subsection shall be con-~~

~~ducted in accordance with section 554 of title 5. The Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.~~

~~(b) Any person who knowingly violates any provision of this Act, or of any regulation or permit issued thereunder, shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both, and any Federal hunting or fishing licenses, permits, or stamps may be revoked or withheld for a period of up to five years. Upon conviction, (1) any fish or wildlife seized shall be forfeited to the Secretary for disposal by him in such manner as he deems appropriate, and (2) any other property seized~~

~~pursuant to subsection (e) of this section may, in the discretion of the court, commissioner, or magistrate, be forfeited to the United States or otherwise disposed of. If no conviction results from any such alleged violation, such property so seized in connection therewith shall be immediately returned to the owner or consignee in accordance with regulations promulgated by the Secretary, unless the Secretary, within thirty days following the final disposition of the case involving such violation, commences proceedings under subsection (a) of this section~~.

~~(c) (1) The provisions of sections 7 and 8 of this Act and any regulations or permits issued pursuant thereto, or pursuant to subsection (d) or (e) of this section, shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all such Secretaries. Each such Secretary may utilize, by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency~~.

~~(2) Any authorized agent of the Department of the Interior, the Department of Commerce, or the Department of the Treasury may, with or without a warrant, arrest any person who such agent has probable cause to believe is knowingly violating this Act, in his presence or view, or any regulation or permit issued thereunder, the penalty for which~~

~~is provided under subsection (b) of this section. An agent who has made an arrest of a person in connection with any such violation may search such person at the time of his arrest and seize any property taken, used, or possessed in connection with any such violation.~~

~~(3) Any authorized agent of the Department of the Interior, the Department of Commerce, or the Department of the Treasury shall have authority to search and seize with or without a warrant, as provided by the customs laws and by the law relating to search and seizure. Any such officer or agent is authorized to execute warrants to search for and seize any property, including, for the purposes of this section, any fish, wildlife, aircraft, boat, or other conveyance, weapon, business records, shipping documents, or other items which have been taken, used, or possessed in connection with the violation of any section, regulation, or permit with respect to which a civil or criminal penalty may be assessed, pursuant to subsection (a) or (b) of this section. Any property seized pursuant to this section shall be held by any agent authorized by the Secretary or the Secretary of the Treasury, or by a United States marshal, pending disposition of proceedings under subsection (a) or (b) of this section; except that either Secretary may, in lieu of holding such property, either (1) permit a bond or other satisfactory surety to be posted, or (2) place the fish or wildlife in the custody of~~

~~such person as he shall designate. Upon the imposition of a civil or criminal penalty, or a forfeiture, the costs to the Government of transfer, board, and handling, including the cost of investigations at a nondesignated port of entry, shall be payable to the account of the Secretary. The owner or consignee of any property so seized shall, as soon as practicable following such seizure, be notified of the fact in accordance with regulations established by the Secretary~~.

~~(d) The Secretary may request the Attorney General to bring appropriate action to prevent threatened violations of this Act, or of any regulations or orders promulgated pursuant thereto.~~

~~(e) For the purposes of facilitating the enforcement of this Act and reducing the costs thereof, the Secretary, with the approval of the Secretary of the Treasury, shall, after notice and an opportunity for a public hearing, from time to time designate, by regulation, any port or ports in the United States for the imporation of fish and wildlife (other than shellfish and fishery products) into the United States. The importation of such fish or wildlife into any port in the United States, except those so designated, shall be prohibited after the effective date of such designations; except that the Secretary, under such terms and conditions as he may prescribe, may permit importation at nondesignated ports in the interest of the health or~~

~~safety of the fish or wildlife. Such regulations may provide other exceptions to such prohibition if the Secretary, in his discretion, deems it appropriate and consistent with the purposes of this subsection.~~

~~(f) The Secretary is authorized to promulgate such regulations as may be appropriate to carry out the purposes of this Act, and the Secretaries of the Treasury and the department in which the Coast Guard is operating are authorized to promulgate such regulations as may be appropriate to the exercise of responsibilities under subsection (e) (1) of this section.~~

~~(g) (1) Any person who engages to any extent in business as an importer of fish and wildlife must register with the Secretary of the Treasury his name and the address of each place of business at which, and all trade names under which, he conducts such business.~~

~~(2) Any person required to register with the Secretary of the Treasury under paragraph (1) of this subsection shall—~~

~~(A) keep such records as will fully and correctly disclose each importation of fish and wildlife made by him and the subsequent disposition made by him with respect to such fish and wildlife; and~~

~~(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such~~

~~representative access to his places of business an opportunity to examine his inventory of imported fish and wildlife and the records required to be kept under subparagraph (A) of this paragraph, and to copy such records.~~

~~(3) The Secretary of the Treasury shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.~~

~~INTERNATIONAL AND INTERGOVERNMENTAL COOPERATION~~

~~SEC. 10. (a) (1) In carrying out the provisions of this Act, the Secretary, through the Secretary of State, shall encourage foreign countries to provide protection to endangered species or subspecies of fish and wildlife, to take measures to prevent any fish or wildlife from becoming endangered, and shall cooperate with such countries in providing technical assistance in developing and carrying out programs to provide such protection, and shall, through the Secretary of State, encourage bilateral and multilateral agreements with such countries for the protection, conservation, or propagation of fish and wildlife. The Secretary shall also encourage persons, taking directly or indirectly fish or wildlife in foreign countries or on the high seas for importation into the United States for commercial or other purposes, to develop and carry out, with such assistance as he may provide under any authority available to him, conservation practices~~

~~designed to enhance such fish or wildlife and their habitat or range. The Secretary of State, in consultation with the Secretary, shall take appropriate measures to encourage the development of adequate measures, including, if appropriate, international agreements, to prevent such fish or wildlife from becoming threatened with extinction.~~

~~(2) To assure the worldwide conservation of endangered species and to avoid unnecessary harm to affected United States industries, the Secretary, through the Secretary of State, shall seek the convening of an international ministerial meeting on fish and wildlife prior to July 1, 1973, and included in the business of that meeting shall be the signing of a binding international convention on the conservation of endangered species.~~

~~(b) The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act and amendments made by this Act, with the administration of the animal quarantine laws (19 U.S.C. 1306; 21 U.S.C. 101-105, 111-135b, and 612-614)~~. ~~Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations of animals and other articles and no proceeding or determination under this Act shall preclude any proceeding or be~~

~~considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture.~~

~~(e) Whenever the Secretary determines, pursuant to this Act or any other authority vested in him, that a species or subspecies of fish or wildlife is endangered, the Secretary of Agriculture may use all authorities available to him with respect to research, investigations, conservation, development, protection, management, and enhancement of fish and wildlife, including, but not limited to, the conservation operations program, watershed protection and flood prevention programs, rural environmental assistance program, Great Plains conservation program, resource conservation and development program, forestry programs, and water bank program, in the protection, control, management, or enhancement of such species or subspecies. Recognizing the national and international interest in the protection and enhancement of such species or subspecies, the Secretary of Agriculture is authorized, notwithstanding the provisions of any other law, to bear the full cost, or any lesser amount that he, in consultation with the Secretary, may determine desirable to accomplish the objectives of the Act, of the cost of installing any practice, measure, work of improvement, facility, or other developmental, protective, or management systems on private land, the primary purpose of which is~~

~~for the purpose of enabling the landowner to comply with the regulations, or other recommendations, of the Secretary pertaining to the protection, control, management, or enhancement of such species or subspecies. The Secretary of Agriculture, in carrying out the purposes of this section, shall utilize his authorities to conduct research and investigations into vegetative and structural methods and other methods and practices, measures, works of improvement, and facilities most appropriate or effective in the protection, control, management, or enhancement of such species or subspecies. If determined desirable, the Secretary and the Secretary of Agriculture shall be authorized to jointly carry out research, surveys, and investigations. The Secretary is authorized to transfer to the Secretary of Agriculture such funds as may be necessary to carry out the purposes of this subsection~~.

~~(d) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, as amended, including, without limitation, section 527 of such Act (16 U.S.C. 1527) relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country~~.

~~ENDANGERED FLORA~~

~~SEC. 11. The Secretary of the Smithsonian Institution, in conjunction with other affected agencies, is authorized and directed to review (1) species and subspecies of endangered plants, trees, and other flora, and (2) methods of providing adequate protection to such species and subspecies, and to report to Congress, within one year after the date of the enactment of this Act, the results of such review. For the purposes of this section, there is authorized to be appropriated $250,000.~~

~~CONFORMING AMENDMENTS~~

~~SEC. 12. (a) Subsection 4(c) of the Act of October 15, 1966 (80 Stat. 928), as amended (16 U.S.C. 668dd (c)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered species listed by the Secretary pursuant to section 4 of the Endangered Species Conservation Act of 1972, nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the system."~~

~~(b) Subsection 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224), as amended (16 U.S.C. 715i (a)), is further amended by inserting "or likely within the foreseeable future to become threatened with" between the words "with" and "extinction".~~

~~(c) Subsection 401(a) of the Act of June 15, 1935 (49 Stat. 383), as amended (16 U.S.C. 715s(a)), is further amended by inserting "or likely within the foreseeable future to become threatened with" between the words "with" and "extinction" in the last sentence thereof.~~

~~(d) Section 6(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 460l–9(a)(1)) is amended by striking out:~~

> ~~"THREATENED SPECIES.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction."~~

~~and inserting in lieu thereof the following:~~

> ~~"ENDANGERED SPECIES.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5(c) of the Endangered Species Conservation Act of 1972, needed for the purpose of conserving, protecting, restoring, or propagating endangered species of fish and wildlife."~~

~~REPEALS~~

~~SEC. 13. (a) Sections 1 through 3 of the Act of October 15, 1966 (80 Stat. 926, 927), as amended (16 U.S.C. 668aa–668cc), are hereby repealed in their entirety.~~

~~(b) Sections 1 through 6 of the Act of December 5, 1969 (83 Stat. 275–279; 16 U.S.C. 668cc–1 through 668c–6) are hereby repealed in their entirety.~~

That this Act, with the following table of contents, may be cited as the "Endangered and Threatened Species Conservation Act of 1973".

FINDINGS, PURPOSES, AND POLICY

SEC. 2. (a) The Congress finds and declares that one of the unfortunate consequences of growth and development in the United States and elsewhere has been the extermination of some species or subspecies of fish, wildlife, and plants; that serious losses in species of wild animals with educational, historical, recreational, and scientific value have occurred and are occurring; that the United States has pledged itself, pursuant to migratory bird treaties with Canada and Mexico, the Migratory and Endangered Bird Treaty with Japan, the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, the International Convention for the Northwest Atlantic Fisheries, the International Convention for the High Seas Fisheries of the

North Pacific Ocean, the Convention on International Trade in Endangered Species of Wild Fauna and Flora, and other international agreements, to conserve and protect, where practicable, the various species of fish, wildlife, and plants facing extinction; that a key to more effective protection and management of native fish and wildlife that are endangered or threatened is to encourage and assist the States in developing programs for such fish and wildlife; and that the conservation, protection, restoration, or propagation of such species will inure to the benefit of all citizens.

(b) The purposes of this Act are to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved, protected, or restored, to provide a program for the conservation, protection, restoration, or propagation of such endangered species and threatened species, and to take such steps as may be appropriate to achieve the purposes of the treaties and conventions set forth in subsection (a) of this section.

(c) It is further declared to be the policy of Congress that all Federal departments and agencies shall seek to protect endangered species and threatened species and shall utilize their authorities in furtherance of the purposes of this Act.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) The term "Convention" means the Convention

on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973, and the appendices thereto.

(2) The term "endangered species" means any species of fish or wildlife which is in danger of extinction throughout all or a significant portion of its range.

(3) The term "fish or wildlife" means any wild member of the animal kingdom, whether or not raised in captivity, including without limitation, any mammal, fish, bird (including any migratory, nonmigratory, or endangered bird for which protection is also afforded by treaty or other international agreement), amphibian, reptile, mollusk, or crustacean, and includes any part, product, egg, or offspring thereof, or the dead body or parts thereof.

(4) The term "foreign commerce" includes, among other things, any transaction—

(A) between persons within one foreign country;

(B) between persons in two or more foreign countries;

(C) between a person within the United States and a person in a foreign country; or

(D) between persons within the United States, where the fish and wildlife in question are moving

in any country or countries outside the United States.

(5) The term "import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(6) The term "person" means (A) any private person or entity, and (B) any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(7) The term "plant" means any member of the plant kingdom, including seeds, roots and other parts thereof.

(8) The term "Secretary" means, except as otherwise herein provided, the Secretary of the Interior or the Secretary of Commerce as program responsibilities are vested pursuant to the provisions of Reorganization Plan Numbered 4 of 1970; except that with respect to the enforcement of the provisions of this Act and the Convention which pertain to the importation or exporta-

tion of terrestrial plants, the term means the Secretary of Agriculture.

(9) The term "species" includes any subspecies of fish or wildlife or plants and any other group of fish or wildlife of the same species or smaller taxa in common spatial arrangement that interbreed when mature.

(10) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(11) The term "take" means to harass, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to harass, pursue, hunt, shoot, wound, kill, trap, capture, or collect.

(12) The term "threatened species" means any species of fish or wildlife which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

(13) The term "United States", when used in a geographical context, includes all States.

DETERMINATION OF ENDANGERED SPECIES AND THREATENED SPECIES

SEC. 4. (a) The Secretary shall by regulation determine whether any fish or wildlife is an endangered species or a threatened species because of any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

(b)(1) The Secretary shall make determinations required by subsection (a) of this section on the basis of the best scientific and commercial data available to him and after consultation, as appropriate, with the affected States, interested persons and organizations, other interested Federal agencies, and, in cooperation with the Secretary of State, with the country or countries in which the fish or wildlife concerned is normally found or whose citizens harvest such fish or wildlife on the high seas; except that in any case in which such determinations involve native species of fish or wildlife, the Secretary shall consult with and consider the recommendations of each State concerned before adding such species to, or removing such species from, any list published pursuant to subsection (c) of this section.

(2) In determining whether or not any fish or wildlife is an endangered species or a threatened species, the Sec-

retary shall take into consideration those efforts, if any, being made by any nation or any political subdivision of any nation to protect such fish or wildlife, whether by predator control, protection of habitat and food supply, or other fish or wildlife conservation or management practices, within any area under the jurisdiction of any such nation or political subdivision.

(3) The Secretary shall give full consideration regarding whether or not fish or wildlife which have been designated by any foreign country, or pursuant to any international agreement, as requiring protection from unrestricted commerce are endangered species or threatened species.

(c)(1) The Secretary shall publish in the Federal Register, and from time to time he may by regulation revise, a list of all fish or wildlife determined by him to be endangered species and a list of all fish or wildlife determined by him to be threatened species. Each list shall refer to the species contained therein by scientific and common name or names and shall specify with respect to each such species over what portion of its range it is endangered or threatened.

(2) The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5, United States Code, also conduct a review of any listed or unlisted species of fish or wildlife proposed to be removed from or added to

either of the lists published pursuant to paragraph (1) of this subsection, but only when he finds and publishes his finding that, to his satisfaction, such person has presented substantial evidence to warrant such a review.

(3) Any list in effect on the day before the date of the enactment of this Act of species of fish or wildlife determined by the Secretary of the Interior, pursuant to the Endangered Species Conservation Act of 1969, to be threatened with extinction shall be republished to conform to the classification for endangered species or threatened species, as the case may be, provided for in this Act, but until such republication, any such species so listed shall be deemed an endangered species within the meaning of this Act. The republication of any species pursuant to this paragraph shall not require public hearing or comment under section 553 of title 5, United States Code.

(d) Whenever the Secretary lists a species of fish or wildlife as an endangered species or a threatened species pursuant to subsection (a) of this section, he shall issue such regulations as he deems necessary and advisable to provide for the conservation, protection, restoration, or propagation of such species. The Secretary may by regulation prohibit with respect to any threatened species any act prohibited under section 9(a) of this Act with respect to endangered

species; except that with respect to native species of fish or wildlife, such regulations shall apply in any State which has entered into a cooperative agreement pursuant to section 6(c) of this Act only to the extent that such regulations have also been adopted by such State.

(e) For the purpose of facilitating the enforcement of this Act, the Secretary may from time to time, by regulation, treat, to the extent he deems it advisable, any species of fish or wildlife or of any plant which is not listed pursuant to section 4 of this Act as an endangered species or threatened species, if such species so closely resembles in appearance, at the point in question, a species of fish or wildlife or plant which has been so listed that substantial difficulty is posed to enforcement personnel in attempting to differentiate between listed and unlisted species or subspecies of fish or wildlife or plants, and this difficulty poses an additional threat to an endangered species or threatened species.

(f) Section 553 of title 5, United States Code, shall apply with respect to any regulation issued pursuant to this Act.

LAND ACQUISITION

SEC. 5. (a) The Secretary shall establish and implement a program to conserve, protect, restore, or propagate (A) fish or wildlife which are listed as endangered species *or threatened species pursuant to section 4 of this Act or (B) plants which are included in Appendices to the Convention. To carry out such program, the Secretary—*

(1) shall utilize the land acquisition and other authority under the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956, as amended, and the Fish and Wildlife Coordination Act, as appropriate; and

(2) is authorized to acquire by purchase, donation, or otherwise, lands, waters, or interest therein, and such authority shall be in addition to any other land acquisition authority vested in him.

(b) Funds made available pursuant to the Land and Water Conservation Fund Act of 1965, as amended, may be used for the purpose of acquiring lands, waters, or interests therein under subsection (a) of this section.

COOPERATION WITH THE STATES

SEC. 6. (a) In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the States. Such cooperation shall include consultation with the States concerned before acquiring any land or water, or interest therein, for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species.

(b) The Secretary may enter into agreements with any State for the administration and management of any area established for the conservation, protection, restoration, or propagation of endangered or threatened species. Any revenues derived from the administration of such areas under these agreements shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383; 16 U.S.C. 715s).

(c) In furtherance of the purposes of this Act, the Secretary is authorized to enter into cooperative agreements to provide financial assistance to States, through their respective fish and wildlife agencies, which maintain or establish adequate and active programs to manage and protect endangered and threatened species. In order for any State to qualify for assistance under this subsection, the Secretary must find annually that under the State program—

(1) authority resides in the State fish and wildlife agency to manage and protect native species of fish or wildlife determined by the State agency or the Secretary to be endangered or threatened;

(2) the State fish and wildlife agency has established acceptable management programs, consistent with the purposes and policies of this Act, for all species of fish or wildlife indigenous to the State which are deemed by the Secretary to be endangered or threatened;

(3) the State fish and wildlife agency is authorized to conduct investigations to determine the status and requirements for survival of indigenous species or subspecies of fish and wildlife;

(4) the State fish and wildlife agency is authorized to establish programs, including the acquisition of land or aquatic habitat or interests therein, for protection and management of endangered or threatened species; and

(5) provision is made in such programs for public participation in designating indigenous species or subspecies of fish or wildlife as endangered or threatened.

(d)(1) Funds appropriated annually for purposes of assistance under subsection (c) shall be available to the Secretary for allocation to the States under cooperative agreements to assist in development by States of programs for management and protection of endangered and threatened species of fish or wildlife including research, censusing, law enforcement, and habitat acquisition or improvement. The Secretary shall make an allocation of appropriated funds to the States based on consideration of—

(A) the international obligations of the United States to protect a species;

(B) the national significance of a species found to be endangered or threatened within a State; and

(C) the potential for preventing extinction of a species and restoring such species to nonendangered or nonthreatened status.

So much of any appropriated funds allocated for obligation to any State for any fiscal year as remains unobligated at the close thereof is authorized to be made available to that State until the close of the succeeding fiscal year. Any amount allocated to any State which is unobligated at the end of the period during which it is available for expenditure is authorized to be made available for expenditure by the Secretary in conducting programs under this Act.

(2) Such cooperative agreements shall provide for (A) the actions to be taken by the Secretary and the States; (B) the benefits that are expected to be derived in connection with preservation and restoration of endangered or threatened species; (C) the estimated cost of these actions; and (D) the share of such costs to be borne by the Federal Government and by the States; except that—

(i) the Federal share of such program costs shall not exceed 66⅔ per centum of the estimated program costs stated in the agreement; and

(ii) the Federal share may be increased to 75 per centum whenever two or more States, having a common interest in a program that the Secretary deems

to meet the criteria of paragraph (1), enter jointly into an agreement with the Secretary.

The Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon in the cooperative agreement.

(e) Any action taken by the Secretary under this section shall be subject to his periodic review at no greater than annual intervals.

(f) Any State law or regulation which applies with respect to the importation or exportation of, or interstate or foreign commerce in, endangered or threatened species is void to the extent that it may effectively (1) permit what is prohibited by this Act or by any regulation which implements this Act or (2) prohibit what is authorized pursuant to an exemption or permit provided for in this Act or in any regulation which implements this Act. This Act shall not otherwise be construed to void any State law or regulation which is intended to conserve and manage migratory, resident, or introduced fish or wildlife, or to permit or prohibit sale of such fish or wildlife. Any State law or regulation respecting the taking of an endangered or threatened species may be more restrictive than the exemptions or permits provided for in this Act or in any regulation which implements

this Act, but not less restrictive than the prohibitions so defined.

(g) The Secretary is authorized to promulgate such regulations as may be appropriate to carry out the provisions of this section relating to financial assistance to States.

(h) There are hereby authorized to be appropriated for the fiscal years 1974, 1975, and 1976 such sums as may be necessary to carry out the purposes of this section.

INTERAGENCY COOPERATION

SEC. 7. (a) The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purpose of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the protection of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

(b) The Secretary of Agriculture is authorized, notwithstanding the provisions of any other law, to bear

the full cost, or any lesser amount that he, in consultation with the Secretary, may determine desirable to accomplish the objectives of the Act, of the cost of installing any practice, measure, work of improvement, facility, or other developmental, protective, or management systems on private land, the primary purpose of which is to enable landowners to comply with the regulations, or other recommendations, of the Secretary pertaining to the conservation, protection, restoration, or propagation of such species. The Secretary of Agriculture, in carrying out the purposes of this subsection, shall utilize his authorities to conduct research and investigations into vegetative and structural methods and other methods and practices, measures, works of improvement, and facilities most appropriate or effective in the protection, control, management, or enhancement of such species. If determined desirable, the Secretary and the Secretary of Agriculture may jointly carry out such research and investigations. The Secretary may transfer to the Secretary of Agriculture such funds as may be necessary to carry out the purposes of this subsection.

INTERNATIONAL COOPERATION

SEC. 8. (a) As a demonstration of the commitment of the United States to the worldwide protection of endangered species and threatened species, the President may, subject to the provisions of section 1415 of the Supplemental Appro-

priation Act, 1953 (31 U.S.C. 724), use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistance Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and management of programs in that country which the Secretary determines to be necessary or useful for the conservation, protection, restoration, or propagation of any endangered species or threatened species listed by the Secretary pursuant to section 4 of this Act. The President shall provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, waters, or interests therein) to foreign countries under this section under such terms and conditions as he deems appropriate. Whenever foreign currencies are available for the provision of assistance under this section, such currencies shall be used in preference to funds appropriated under the authority of section 15 of this Act.

(b) In order to carry out further the provisions of this Act, the Secretary, through the Secretary of State, shall encourage—

(1) foreign countries to provide for the protection, conservation, restoration, or propagation of fish or wildlife including endangered species and threatened species listed pursuant to section 4 of this Act;

(2) the entering into of bilateral or multilateral

agreements with foreign countries to provide for such protection, conservation, restoration, or propagation; and

(3) foreign persons who directly or indirectly take fish or wildlife and plants in foreign countries or on the high seas for importation into the United States for commercial or other purposes to develop and carry out, with such assistance as he may provide, conservation practices designed to enhance such fish or wildlife and plants and their habitat.

(c) After consultation with the Secretary of State, the Secretary may—

(1) assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign countries and international organizations in developing personnel resources and programs which promote the protection, conservation, restoration, or propagation of fish or wildlife and plants; and

(2) conduct or provide financial assistance for the educational training of foreign personnel, in this country or abroad, in fish, wildlife and plant management, research and law enforcement and to render professional assistance abroad in such matters.

(d) After consultation with the Secretary of State and the Secretary of the Treasury, as appropriate, the Secretary

may conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the purposes of this Act.

(e) The President is authorized and directed to designate appropriate agencies to act as the Management Authority or Authorities and the Scientific Authority or Authorities pursuant to the Convention. The agencies so designated shall thereafter be authorized to do all things assigned to them under the Convention, including the issuance of permits and certificates. The agency designated by the President to communicate with other parties to the Convention and with the Secretariat shall also be empowered, where appropriate, in consultation with the State Department, to act on behalf of and represent the United States in all regards as required by the Convention. The President shall also designate those agencies which shall act on behalf of and represent the United States in all regards as required by the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere.

PROHIBITED ACTS

SEC. 9. (a) Except as provided in section 10 of this Act, it is unlawful for any person subject to the jurisdiction of the United States to—

(1) import into, or export from, the United States

any endangered species listed pursuant to section 4 of this Act;

(2) take any such species within the United States or the territorial sea of the United States, upon the high seas, or in any foreign country, except that this paragraph shall apply within any State which has entered into a cooperative agreement pursuant to section 6(c) of this Act only to the extent that the taking of any such species is contrary to the law of such State;

(3) possess, sell, deliver, carry, transport, or ship, by any means whatsoever, any such species taken in violation of paragraph (2);

(4) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and for commercial purposes, any such species:

(5) sell or offer for sale in interstate or foreign commerce any such species; or

(6) violate any regulation promulgated by the Secretary pursuant to section 4(d) of this Act.

(b)(1) It is unlawful for any person subject to the jurisdiction of the United States to engage in any trade in any specimens contrary to the provisions of the Convention, or to possess any specimens traded contrary to the provisions of the Convention, including the definitions of terms in article I thereof.

(2) Any importation into the United States of fish or wildlife shall, if—

(A) such fish or wildlife is not an endangered species listed pursuant to section 4 of this Act but is listed in Appendix II to the Convention,

(B) the taking and exportation of such fish or wildlife is not contrary to the provisions of the Convention and all other applicable requirements of the Convention have been satisfied, and

(C) the applicable requirements of subsections (d) and (e) of this section have been satisfied,

be presumed to be an importation not in violation of any provision of this Act or any regulation issued pursuant to this Act.

(c)(1) It is unlawful for any person to engage in business as an importer or exporter of fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered or threatened species, and (B) are imported for commercial purposes or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants without first having obtained a permit from the Secretary.

(2) Any person required to obtain a permit under paragraph (1) of this subsection shall—

(A) keep such records as will fully and correctly

disclose each importation or exportation of fish, wildlife, or plants made by him and the subsequent disposition made by him with respect to such fish, wildlife, or plants;

(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his places of business, an opportunity to examine his inventory of imported fish, wildlife, or plants and the records required to be kept under subparagraph (A) of this paragraph, and to copy such records; and

(C) file such reports as the Secretary may require.

(3) The Secretary shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.

(d) It is unlawful for any person importing or exporting fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered or threatened species, and (B) are imported for commercial purposes or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants to fail to file any declaration or report as the Secretary deems necessary to facilitate enforcement of this Act or to meet the obligations of the Convention.

(e)(1) It is unlawful for any person subject to the

jurisdiction of the United States to import into or export from the United States any fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered species or threatened species, and (B) are imported for commercial purposes or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants, except at a port or ports designated by the Secretary. For the purpose of facilitating enforcement of this Act and reducing the costs thereof, the Secretary, with approval of the Secretary of the Treasury and after notice and opportunity for public hearing, may, by regulation, designate ports and change such designations. The Secretary, under such terms and conditions as he may prescribe, may permit the importation or exportation at nondesignated ports in the interest of the health or safety of the fish or wildlife or plants, or for other reasons if, in his discretion, he deems it appropriate and consistent with the purpose of this subsection.

(2) Any port designated by the Secretary of the Interior under the authority of section 4(d) of the Act of December 5, 1969 (16 U.S.C. 666cc–4(d)), shall, if such designation is in effect on the day before the date of the enactment of this Act, be deemed to be a port designated by the Secretary under paragraph (1) of this subsection until such time as the Secretary otherwise provides.

(f) It is unlawful for any person subject to the jurisdiction of the United States to attempt or conspire to commit, or cause to be committed, any offense defined in this section.

EXCEPTIONS

SEC. 10. (a) The Secretary may permit, under such terms and conditions as he may prescribe, any act otherwise prohibited by section 9 of this Act for scientific purposes or to enhance the propagation or survival of the affected species.

(b)(1) If any person enters into a contract with respect to a species or subspecies of fish or wildlife or plant before the date of the publication in the Federal Register of notice of a proposed listing of that species as an endangered species and the subsequent listing of that species as an endangered species pursuant to section 4 of this Act will cause undue economic hardship to such person under the contract, the Secretary, in order to minimize such hardship, may exempt such person from the application of section 9 (a) of this Act to the extent the Secretary deems appropriate if such person applies to him for such exemption and includes with such application such information as the Secretary may require to prove such hardship; except that (A) no such exemption shall be for a duration of more than one year from the date of publication in the Federal Register of notice of a proposed listing of the species or subspecies concerned, or shall apply to a quantity of fish or wildlife or plants

in excess of that specified by the Secretary; (B) the one-year period for those species or subspecies of fish or wildlife listed by the Secretary as endangered prior to the effective date of this Act shall expire in accordance with the terms of section 3 of the Act of December 5, 1969 (83 Stat. 275); and (C) no such exemption may be granted for the importation or exportation of a specimen listed in Appendix I of the Convention which is to be used for primarily commercial purposes.

(2) The Secretary shall publish notice in the Federal Register of each application for an exemption which is made under this subsection. Each notice shall invite the submission from interested parties, within thirty days after the date of the notice, written data, views, or arguments with respect to the application. Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.

(c) The Secretary may grant exceptions under subsections (a) and (b) of this section only if he finds and publishes his finding that (1) such exceptions were applied for in good faith, (2) if granted and exercised will not operate to the disadvantage of such endangered species, and (3) will be consistent with the purposes and policy set forth in section 2 of this Act.

(d) Any taking by an Indian, Aleut, or Eskimo of any

marine mammal (as defined in section 2(5) of the Marine Mammal Protection Act of 1972) which is listed pursuant to section 4(a) of this Act as an endangered species or threatened species shall not be deemed to be in violation of this Act or any regulation issued pursuant thereto if such taking is lawful under section 101(1) of the Marine Mammal Protection Act of 1972.

PENALTIES AND ENFORCEMENT

SEC. 11. (a)(1) Any person who violates any provision of this Act, of any permit or certificate issued hereunder, or of any regulation issued in order to implement subsection (a) (1), (2), (3), (4), or (5), (b), (c) (other than a regulation relating to recordkeeping or filing of reports), (e), or (f) of section 9 of this Act may be assessed a civil penalty by the Secretary of not more than $10,000 for each such violation. Any person who knowingly violates any provision of any other regulation issued under this Act may be assessed a civil penalty by the Secretary of not more than $5,000 for each such violation. No penalty may be assessed under this subsection unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be remitted or mitigated by the Secretary. Upon any failure to pay a penalty assessed under this subsection, the Secretary may request the Attorney General to institute a civil ac-

tion in a district court of the United States for any district in which such person is found, resides, or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. The court shall hear such action on the record made before the Secretary and shall sustain his action if it is supported by substantial evidence on the record considered as a whole.

(2) Hearings held during proceedings for the assessment of civil penalties authorized by paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5, United States Code. The Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(b)(1) Any person who knowingly commits an act which violates any provision of this Act, of any permit or certificate issued hereunder, or of any regulation issued in order to implement subsection (a) (1), (2), (3), (4), or (5), (b), (c) (other than a regulation relating to recordkeeping or filing of reports), (e), or (f) of section 9 of this Act shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both. Any person who knowingly commits an act which violates any provision of any other regulation issued under this Act shall, upon conviction, be fined not more than $10,000 or imprisoned for not more than six months, or both. Upon the recommendation of the Secretary, the Secretary of the Treasury is authorized to pay an amount equal to one-half of the fine incurred but not to exceed $2,500 to any person who furnishes information which leads to a conviction for a criminal violation of any provision of this Act or any regulation or permit issued thereunder. Any officer or employee of the United States or of any State or local government who furnishes information or renders service in the performance of his official duties shall not be eligible for payment under this section.

(2) The head of any Federal agency which has issued a lease, license, permit, or other agreement authorizing the use of Federal lands, including grazing of domestic livestock,

to any person who is convicted of a criminal violation of this Act or any regulation, permit, or certificate issued hereunder may immediately modify, suspend, or revoke each lease, license, permit, or other agreement. The Secretary shall also suspend for a period of up to one year, or cancel, any Federal hunting or fishing permits or stamps issued to any person who is convicted of a criminal violation of any provision of this Act or any regulation, permit, or certificate issued hereunder. The United States shall not be liable for the payments of any compensation, reimbursement, or damages in connection with the modification, suspension or revocation of any leases, licenses, permits, stamps, or other agreements pursuant to this section.

(c) The several district courts of the United States, including the courts enumerated in section 460 of title 28, United States Code, shall have jurisdiction over any actions arising under this Act. For the purpose of this Act, American Samoa shall be included within the judicial district of the District Court of the United States for the District of Hawaii.

(d)(1) The provisions of this Act and any regulations or permits issued pursuant thereto shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all such Secretaries. Each such Secretary may utilize by agreement, with or without reimbursement, the personnel,

services, and facilities of any other Federal agency or any State agency for purposes of enforcing this Act.

(2) The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulation issued thereunder.

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, to enforce this Act may detain for inspection and inspect any package, crate, or other container, including its contents, and all accompanying documents, upon importation or exportation. Such person may execute and serve any arrest warrant, search warrant, or other warrant or civil or criminal process issued by any officer or court of competent jurisdiction for enforcement of this Act. Such person so authorized may search and seize, with or without a warrant, as authorized by law. Any fish, wildlife, property, or item so seized shall be held by any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, property, or item pursuant to paragraph

(4) of this subsection; except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

(4)(A) All fish or wildlife or plants taken, possessed, sold, purchased, offered for sale or purchase, transported, delivered, received, carried, shipped, exported, or imported contrary to the provisions of this Act, any regulation made pursuant thereto, or any permit or certificate issued hereunder shall be subject to forfeiture to the United States.

(B) All guns, traps, nets, and other equipment, vessels, vehicles, aircraft, and other means of transportation used to aid the taking, possessing, selling, purchasing, offering for sale or purchase, transporting, delivering, receiving, carrying, shipping, exporting, or importing of any fish or wildlife or plants in violation of this Act, any regulation made pursuant thereto, or any permit or certificate issued thereunder shall be subject to forfeiture to the United States upon conviction of a criminal violation pursuant to section 11(b)(1) of this Act.

(5) All provisions of law relating to the seizure, forfeiture, and condemnation of a vessel for violation of the customs laws, the disposition of such vessel or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or

alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act; except that all powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Treasury Department shall, for the purposes of this Act, be exercised or performed by the Secretary or by such persons as he may designate.

(e) The Secretary, the Secretary of the Treasury, and the Secretary of the Department in which the Coast Guard is operating, are authorized to promulgate such regulations as may be appropriate to enforce this Act, and charge reasonable fees for expenses to the Government connected with permits or certificates authorized by this Act, including processing applications and reasonable inspections, and with the transfer, board, handling, or storage of fish or wildlife or plants and evidentary items seized and forfeited under this Act. All such fees collected pursuant to this subsection shall be deposited in the Treasury to the credit of the appropriation which is current and chargeable for the cost of furnishing the services. Appropriated funds may be expended pending reimbursement from parties in interest.

(f)(1) Except as provided in paragraph (2) of this subsection any person may commence a civil suit on his own behalf to enjoin any person, including the United States and

any other governmental instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution), who is alleged to be in violation of any provision of this Act or regulation issued under the authority thereof. The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any such provision or regulation, as the case may be.

(2) No action may be commenced—

(A) prior to sixty days after written notice of the violation has been given to the Secretary, and to any alleged violator of any such provision or regulation;

(B) if the Secretary has commenced action to impose a penalty pursuant to subsection (a) of this section; or

(C) if the United States has commenced and is diligently prosecuting a criminal action in a court of the United States or a State to redress a violation of any such provision or regulation.

(3)(A) Any suit under this subsection may be brought in the judicial district in which the violation occurs.

(B) In any such suit under this subsection in which the United States is not a party, the Attorney General, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

(4) The court, in issuing any final order in any suit

brought pursuant to paragraph (1) of this subsection, may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(5) The injunctive relief provided by this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or limitation or to seek any other relief (including relief against the Secretary or a State agency).

(g) The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act with the administration of the animal quarantine laws (21 U.S.C. 101–105, 111–135b, and 612–614) and section 306 of the Tariff Act of 1930 (19 U.S.C. 1306). Nothing in this Act or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations or possession of animals and other articles and no proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture.

(h) Nothing in this Act shall be construed as supersed-

ing or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, including, without limitation, section 527 of that Act (19 U.S.C. 1527), relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.

ENDANGERED PLANTS

SEC. 12. The Secretary of the Smithsonian Institution, in conjunction with other affected agencies, is authorized and directed to review (1) species of plants which are now or may become endangered or threatened and (2) methods of providing adequate protection to such species, and to report to Congress, within one year after the date of the enactment of this Act, the results of such review including recommendations for new legislation or the amendment of existing legislation.

CONFORMING AMENDMENTS

SEC. 13. (a) Subsection 4(c) of the Act of October 15, 1966 (80 Stat. 928, 16 U.S.C. 668dd(c)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered species and threatened species listed by the Secretary pursuant to section 4 of the Endangered and Threatened Species Conservation Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of that Act, nothing in this Act shall be construed to authorize the Secretary to *control or regulate hunting or fishing of resident fish and wildlife on lands not within the system."*

(b) Subsection 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224, 16 U.S.C. 715i(a)) and subsection 401(a) of the Act of June 15, 1935 (49 Stat. 383, 16 U.S.C. 715s(a)), are each amended by striking out "threatened with extinction," and inserting in lieu thereof the following: "listed pursuant to section 4 of the Endangered and Threatened Species Act of 1973 as endangered species or threatened species,".

(c) Section 7(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 460l—9(a)(1)) is amended by striking out:

> *"THREATENED SPECIES.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction."*

and inserting in lieu thereof the following:

> *"ENDANGERED SPECIES AND THREATENED SPECIES.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5(a) of the Endangered and Threatened Species Conservation Act of 1973, needed for the purpose of conserving, protecting, restoring, or propagating endangered species of fish or wildlife or plants."*

(d) The first sentence of section 2 of the Act of September 28, 1962, as amended (76 Stat. 653, 16 U.S.C. 460k-1), is amended to read as follows:

"The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—

"(1) incidental fish and wildlife-oriented recreational development,

"(2) the protection of natural resources,

"(3) the protection of endangered species or threatened species listed by the Secretary pursuant to section 4 of the Endangered and Threatened Species Conservation Act of 1973, or

"(4) carrying out two or more of the purposes set forth in paragraphs (1) through (3) of this section,

and are adjacent to, or within, the said conservation areas, except that the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps."

(e) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407) is amended—

(1) by striking out "Endangered Species Conservation Act of 1969" in section 3(1)(B) thereof and

inserting in lieu thereof the following: "Endangered and Threatened Species Conservation Act of 1973";

(2) by striking out "pursuant to the Endangered Species Conservation Act of 1969" in section 101(a)(3)(B) thereof and inserting in lieu thereof the following: "or threatened species pursuant to the Endangered and Threatened Species Conservation Act of 1973";

(3) by striking out "endangered under the Endangered Species Conservation Act of 1969" in section 102(b)(3) thereof and inserting in lieu thereof the following: "an endangered species or threatened species pursuant to the Endangered and Threatened Species Conservation Act of 1973"; and

(4) by striking out "Endangered Species List, authorized by the Endangered Species Conservation Act of 1969," in section 202(a)(6) thereof and inserting in lieu thereof the following: "endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered and Threatened Species Conservation Act of 1973".

REPEALER

SEC. 14. The Endangered Species Conservation Act of 1969 (sections 1 through 3 of the Act of October 15, 1966, and sections 1 through 6 of the Act of December 5, 1969; 16 U.S.C. 668aa—668cc-6), is repealed.

AUTHORIZATION OF APPROPRIATIONS

Sec. 15. Except as authorized in section 6 of this Act, there are authorized to be appropriated—

(A) not to exceed $6,000,000 for fiscal year 1974, not to exceed $8,000,000 for fiscal year 1975 and not to exceed $10,000,000 for fiscal year 1976, to enable the Department of the Interior to carry out such functions and responsibilities as it may have been given under this Act; and

(B) not to exceed $1,500,000 for fiscal year 1975 and not to exceed $2,000,000 for fiscal year 1976, to enable the Department of Commerce to carry out such functions and responsibilities as it may have been given under this Act.

EFFECTIVE DATE

Sec. 16. This Act shall take effect on the date of its enactment.

Amend the title so as to read: "A bill to provide for the conservation, protection, restoration, or propagation of endangered and threatened species of fish, wildlife, and plants, and for other purposes."

Union Calendar No. 194

93D CONGRESS
1ST SESSION

H. R. 37

[Report No. 93-412]

A BILL

To provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinction, and for other purposes.

By Mr. DINGELL, Mr. CLARK, Mr. MAILLIARD, Mr. MOSHER, Mr. DOWNING, Mr. RUPPE, Mr. GOODLING, Mr. BRAY, Mr. STUBBLEFIELD, Mr. MURPHY of New York, Mr. JONES of North Carolina, Mr. BIAGGI, Mr. ANDERSON of California, Mr. KYROS, Mr. MCCLOSKEY, Mr. STEELE, Mr. DU PONT, Mr. TIERNAN, Mr. JAMES V. STANTON, Mr. METCALFE, Mr. NEDZI, Mr. O'HARA, Mr. WILLIAM D. FORD, Mrs. GRIFFITHS, and Mr. MOSS

JANUARY 3, 1973

Referred to the Committee on Merchant Marine and Fisheries

JULY 27, 1973

Reported with amendments, committed to the Committee of the Whole House on the State of the Union, and ordered to be printed

93D CONGRESS } HOUSE OF REPRESENTATIVES { REPORT
1st Session } { No. 93-412

ENDANGERED AND THREATENED SPECIES CONSERVATION ACT OF 1973

JULY 27, 1973.—Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

---

Mrs. SULLIVAN, from the Committee on Merchant Marine and Fisheries, submitted the following

REPORT

[To accompany H.R. 37]

The Committee on Merchant Marine and Fisheries, to whom was referred the bill (H.R. 37) to provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinction, and for other purposes, having considered the same, report favorably thereon with amendments and recommend that the bill as amended do pass.

The amendment to the text of the bill strikes out all after the enacting clause and inserts in lieu thereof a substitute which appears in the reported bill in italic type.

The other amendment modifies the title of the bill to make it conform to the changes made by the amendment to the text.

PURPOSE OF THE LEGISLATION

There is presently in effect a series of Federal laws designed to protect species of fish and wildlife which may face extinction without that protection. The first of these laws was passed in 1966 and the second in 1969; at the time they were enacted, they were adequate to meet the demands as they then existed.

Subsequent events, however, have demonstrated the need for greater flexibility in endangered species legislation, more closely designed to meet their needs. In response to this need, legislation was proposed in the last Congress, but failed of passage. The Congress is now in a position to move in this critical area.

H.R. 37, as amended, combines features of the Administration bill (H.R. 4758), and the original H.R. 37. It is designed to widen the protection which can be provided to endangered species under the laws now on the books.

The principal changes to be effected by the new legislation include:

1. It extends protection to animals which may become endangered, as well as to those which are now endangered.
2. It permits protection of animals which are in trouble in any significant portion of their range, rather than threatened with worldwide extinction.
3. It makes taking of such animals a Federal offense.
4. It eliminates existing dollar ceilings ($15 million, already consumed) on acquisition of critical habitat areas.
5. It gives management authority for marine species to the Department of Commerce.
6. It authorizes the use of counterpart funds, where proper.
7. It allows states to adopt more restrictive legislation than the Federal laws.
8. It clarifies and extends the authorities of the Department of Agriculture to assist landowners to carry out the purposes of the Act.
9. It directs a study of the problems involved in the domestic regulation of trade in endangered plants.

A recent international Convention produced a draft treaty which responds to the needs of endangered species and imposes a worldwide pattern of restrictions upon the unfettered trade in species of animals and plants which may face extinction. The legislation considered and reported by the Committee attempts to work into this framework those steps which may be necessary or desirable to accomplish this purpose as well.

LEGISLATIVE BACKGROUND

According to the Department of the Interior, there may be more than 100 species of fish and wildlife which are presently threatened with extinction within the United States. The recently concluded international Convention on International Trade in Endangered Species of Wild Fauna and Flora listed 375 species of animals as imminently threatened with extinction throughout the world and another 239 species of animals as not yet threatened with extinction but requiring additional controls over their trade.

The threat to animals may arise from a variety of sources; principally pollution, destruction of habitat and the pressures of trade. For the most part, United States executive and legislative attention in recent years has concentrated upon the latter factor in attempting to enforce legislation designed to reduce or eliminate the financial incentives to trading in endangered species of fish and wildlife.

Prior to enactment of endangered species legislation, United States efforts to protect fish and wildlife were concentrated on enforcement of the Lacey and Black Bass Acts, which made it illegal for any person to transport in interstate commerce any fish or wildlife taken in violation of national, state or foreign laws. These Acts are still on the books, and some conservationists feel that they are even now inadequately utilized in the interests of protecting endangered species.

In 1966 the Congress adopted the first "Endangered Species Preservation Act" (P.L. 89–699). This Act directed the Secretary of the Interior to carry out a program to conserve and encourage the growth of replacements for selective species of *native* fish and wildlife that he found to be threatened with extinction. Addressing itself to the issue of habitat protection, the Act also consolidated and expanded the authority of the Secretary of the Interior relating to the administration of the National Wildlife Refuge System.

The next step took place when the 91st Congress enacted the Endangered Species Conservation Act of 1969 (P.L. 91-135). This Act expanded the 1966 Act in several ways:

(1) It authorized the establishment of a list of fish and wildlife threatened with extinction and prohibited the importation from foreign countries of any such species. Exceptions were provided to allow importations for scientific, educational, zoological, and/or propagational purposes and to allow one-year economic hardship exemptions in specified cases.

(2) It made it unlawful to buy or sell any animal taken in violation of the laws of any State or foreign country.

(3) It increased the authorization for funds to a limit of $2.5 million per area, or $5 million per year, with a total overall ceiling of $15 million.

(4) It designated certain ports of entry for the importation of fish and wildlife and their products.

In the years since 1969, the need for further amendment of the domestic endangered species legislation has become clear. Accordingly, the Administration proposed a bill for this purpose in the 2nd Session of the 92nd Congress (H.R. 13081), to substitute a new and more comprehensive endangered species act for those enacted in 1966 and 1969. Hearings were held on that legislation, but due to lack of time neither body acted upon it.

The Administration bill was reoffered early this year as Executive Communication No. 442 and introduced by Mr. Dingell for himself and several other members as H.R. 4758. Mr. Dingell had earlier introduced, for himself and others, an alternative form of legislation based on the 1972 hearings (H.R. 37). These bills, and a number of similar and identical bills, were before the Committee when it held hearings on this question on March 15, 26 and 27, 1973.

These hearings were held on the heels of an international meeting of technical experts and national representatives in Washington on these and similar questions in February and March. This meeting was a direct outgrowth of earlier U.S. endangered species legislation, which had mandated such an international ministerial meeting for the purpose of developing effective international controls on the unrestricted trade in endangered species. The result of that meeting was the Convention on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973—a Convention which has been widely acclaimed as eminently successful in devising forceful and practical mechanisms for controlling these problems.

Essentially, the Convention requires creation of 3 types of endangered species lists:

Appendix I lists species of animals and plants imminently threatened with extinction which are or may be affected by trade and which therefore may be traded only upon approval by the countries of both import and export, when not to be used for commercial purposes.

Appendix II lists species of plants and animals which are not yet necessarily threatened with extinction but which may become so unless subjected to strict regulation. Export permits only will be required for trade in species on Appendix II.

Appendix III is provided as a means for countries to list species protected within their jurisdiction for the purpose of preventing or restricting their exploitation, whether or not these species are threatened with extinction. These will also require an export permit, once listed.

Because of the short interval between the conclusion of the Convention and the consideration of this legislation, it was not possible to develop a complete consensus on the additional steps that might and should be taken to implement the Convention. Technically, of course, it is unnecessary to do this since the Convention has not yet been ratified and is not yet effective. It was and is the Committee's view, however, that it would be proper for this country to take every appropriate step at this time to bring our own laws into conformity with the Convention procedures, so that no further legislation will be necessary to implement it, once it has become effective.

BACKGROUND AND NEED FOR THE LEGISLATION

Throughout the history of the world, as we know it, species of animals and plants have appeared, changed, and disappeared. The disappearance of a species is by no means a current phenomenon, nor is it an occasion for terror or panic.

It is however, at the same time an occasion for caution, for self-searching and for understanding. Man's presence on the Earth is relatively recent, and his effective domination over the world's life support systems has taken place within a few short generations. Our ability to destroy, or almost destroy, all intelligent life on the planet became apparent only in this generation. A certain humility, and a sense of urgency, seem indicated.

From all evidence available to us, it appears that the pace of disappearance of species is accelerating. As we homogenize the habitats in which these plants and animals evolved, and as we increase the pressure for products that they are in a position to supply (usually unwillingly) we threaten their—and our own—genetic heritage.

The value of this genetic heritage is, quite literally, incalculable. The blue whale evolved over a long period of time and the combination of factors in its background has produced a certain code, found in its genes, which enables it to reproduce itself, rather than producing sperm whales, dolphins or goldfish. If the blue whale, the largest animal in the history of this world, were to disappear, it would not be possible to replace it—it would simply be gone. Irretrievably. Forever.

One might analogize the case to one in which one copy of all the books ever printed were gathered together in one huge building. The position in which we find ourselves today is that of custodians of this building, and our choice is between exercising our responsibilities and ignoring them. If these theoretical custodians were to permit a madman to enter, build a bonfire and throw in at random any volume he selected, one might with justification suggest that others be found, or at least that they be censored and told to be more careful in the future. So it is with mankind. Like it or not, we are our brothers' keepers, and we are also keepers of the rest of the house.

From the most narrow possible point of view, it is in the best interests of mankind to minimize the losses of genetic variations. The reason is simple: they are potential resources. They are keys to puzzles which we cannot solve, and may provide answers to questions which we have not yet learned to ask.

To take a homely, but apt, example: one of the critical chemicals in the regulation of ovulation in humans was found in a common plant. Once discovered, and analyzed, humans could duplicate it synthetically, but had it never existed—or had it been driven out of existence before we knew its potentialities—we would never have tried to synthesize it in the first place.

Who knows, or can say, what potential cures for cancer or other scourges, present or future, may lie locked up in the structures of plants which may yet be undiscovered, much less analyzed? More to the point, who is prepared to risk being those potential cures by eliminating those plants for all time? Sheer self-interest impels us to be cautious.

The institutionalization of that caution lies at the heart of H.R. 37, as ordered reported to the Congress. Several scores of nations have similarly endorsed the need for comparable legislation within their own countries by signing the recent Convention which takes a giant step in this direction.

Man can threaten the existence of species of plants and animals in any of a number of ways, by excessive use, by unrestricted trade, by pollution or by other destruction of their habitat or range. The most significant of those has proven also to be the most difficult to control: the destruction of critical habitat.

Clearly it is beyond our capability to acquire all the habitat which is important to those species of plants and animals which are endangered today, without at the same time dismantling our own civilization. On the other hand, there are certain areas which are critical which can and should be set aside. It is the intent and purpose of this legislation to see that our ability to do so, at least within this country, is maintained. H.R. 37 articulates and enhances this purpose and ability.

Restrictions upon the otherwise unfettered trade in these plants and animals are a significant weapon in the arsenal of those who are interested in the protection of these species. The recent international Convention on International Trade in Endangered Species of Wild Fauna and Flora was directed primarily at this problem: most of the provisions of H.R. 37 are also designed to deal with the problem in one way or another.

It is paradoxical that the scarcer an animal may be, the more people may be willing to pay to acquire it. The great whales may be said to have been involuntary beneficiaries of such an equation; the same is true of the so-called "spotted cats"—tigers, jaguars, cheetahs and others—whose skins have been sought by furriers and hunters around the world. The inevitable effect of this popularity has been to make them scarce, and perhaps to endanger their survival.

Their very scarcity and value, however, may be used as a lever to promote their protection. If the countries in which these and other valuable animals may be found are sufficiently alert and enlightened, this should encourage them to maintain healthy and viable stocks of these animals as a resource. The nurture and protection of these resources may ultimately prove to be the greatest incentive for their protection. H.R. 37 encourages such programs in a number of ways.

Honesty compels us to admit that steps taken by H.R. 37 to close the U.S. market to trade in endangered and threatened species may not be sufficient, in and of themselves, to remove pressure and thus to allow these species to recover. Passage of this legislation is, however, of importance—both because the United States is an important market, and because of the precedent that it will create. The Convention was especially significant in this respect; it was built upon the model that had already been created in this country, and it exerts a strong pressure upon other countries to follow suit.

Existing United States legislation was, when first proposed and adopted, adequate to meet the pressures upon endangered species at the time. Changing patterns of trade and exploitation have, however, created a situation in which this legislation is no longer entirely adequate. At times, present laws are too broad, and at others, they are too narrow and restrictive.

The events of the past few years have shown the critical nature of the interrelationships of plants and animals between themselves and with their environment. Another word for the study of these interrelationships is "ecology." The hearings proved (if proof is still necessary) that the ecologists' shorthand phrase "everything is connected to everything else" is nothing more than cold, hard fact.

In practically every circumstance endangered species are at the outer selves pushed out of that environment, harried and hunted by those edges of the circumstances in which they evolved. They find themselves pushed out of that environment, harried and hunted by those who would use them for their own advantage. Any program for the protection of endangered species must necessarily concern itself with more than a simple "hands-off" attitude toward the animals and plants themselves.

Such an attitude lies at the heart of the legislation here presented to the House. The basic purpose of the Act is clearly stated in the legislation; to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved, protected or restored. In furtherance of this purpose, the bill declares a policy that Federal agencies are to use the authorities that are available to them in carrying out the objectives of the bill.

During the hearings on the legislation, it became apparent that there was little controversy as to the need for a bill of the types before the Committee. Both H.R. 37 and H.R. 4758, the Administration bill, followed essentially the same pattern; and as reported by the Committee, H.R. 37 adopts elements of both.

The principal areas of discussion during the hearings and in markup of the legislation centered on the proper role of the state and Federal governments with regard to endangered species programs, and the protection of plants. As regards both of these issues, there is fairly general agreement on the nature of the problem, but there was no clear agreement as to the best course to follow.

STATE AND FEDERAL RELATIONSHIPS

Any bill which is designed to deal with the complicated issues involved in protection of endangered species must do so in the light of at least two competing considerations: first, protection of endangered species is not a matter that can be handled in the absence of coherent national and international policies: the results of a series of unconnected and disorganized policies and programs by various states might well be confusion compounded. Second, however, the states are far better equipped to handle the problems of day-to-day management and enforcement of laws and regulations for the protection of endangered species than is the Federal government. It is true, and indeed desirable, that there are more fish and game enforcement agents in the state system than there are in the Federal government. Any reasonable and responsible program designed to protect these species must necessarily take account of this fact.

Balancing these two factors produced the legislation in the form in which it is presented to the Congress. The bill places the essential responsibility for establishment of the lists of endangered species, and amendment of these lists, in the Secretary. At the same time it is expected and required that there be good faith consultation between the Secretary and the states, as well as with other interested and knowledgeable parties. The states have no veto over the listing or delisting of endangered species, but they do have the power to discuss the problems and to make recommendations as to their resolution.

Regulatory jurisdiction is given to the Federal government under this legislation, and if a cooperative agreement is successfully negotiated and signed, to the states as well. The subject of cooperative agreements was discussed extensively within the Committee and with other knowledgeable people. It was and is contemplated that representatives of the state and Federal governments, who would in any case be working together, would negotiate these agreements. These might or might not include financial incentives to assist in the operation of endangered species programs.

Where a cooperative agreement has been put into effect, the bill allows concurrent jurisdiction over the species affected in both the state and Federal judicial systems. The ultimate approval or disapproval of these cooperative agreements lies within the discretion of the Secretary, who has been given broad powers of review, together with the authority to intervene and to suspend any such agreement in the interests of the species affected, if he feels that the agreement is not being properly carried out or if he feels that new circumstances require additional steps to be taken that had not been contemplated at the time the original agreement had been prepared.

The question of preemption of state laws was of great interest during the hearings, due in part to the fact that the language in the Administration bill was susceptible of alternative interpretations. Accordingly, the Committee rewrote the language of the Administration bill to make it clear that the states would and should be free to adopt legislation or regulations that might be more restrictive than that of the Federal government and to enforce the legislation. The only exception to this would be in cases where there was a specific Federal permission for or a ban on importation, exploitation or interstate commerce; in any such case the State could not override the Federal action. In every other respect, the State powers to regulate in a more restrictive fashion or to include additional species remain unimpaired.

Because the State roles with regard to endangered species are so significant, the Committee felt it desirable to incorporate a program allowing fiancial assistance for those programs. Any such program might be a part of, or independent from, arrangements under which the states would agree to manage and protect such species on the Federal list as might be found within their borders. The Committee provided a separate authorization in this regard, to make it clear that any funds to be paid to the states under this section should come from that specific authorization, rather than from the general authorization contained in Section 15 of the bill.

PLANTS

The hearings demonstrated that the protection of plants must also be a matter of urgent concern. The Administration bill did not address itself to the problem, while H.R. 37, as introduced, treated plants in like manner as animals. There were vigorous objections to this approach by some, to the effect that the circumstances and the regulatory mechanisms respecting animals were not and should not be the same for plants.

It must be recognized that plant species and subspecies are even more vulnerable to man's intervention than are animals, since they cannot move to more hospitable circumstances when necessary. Until recent times, it should also be pointed out, most species of plants were not under the same kinds of heavy pressures that affect animals. Variations in plant species typically occur in areas where land development pressures were traditionally least intense: variations in grasses found at the eastern and western fringes of the American Great Plains before the advent of the white man would be almost insignificant, whereas plant communities in high mountain valleys, on the other hand, might vary significantly within a few miles of each other. It has only been in the past few years that these more remote areas have come under intense development pressures, and so it is that plant protection has become correspondingly more urgent.

The Secretary of Agriculture presently exercises considerable authority in the regulation of the importation and exportation of plants, and it appears that these authorities can be used and adequate enforcement mechanisms devised for the purposes of the Act without significantly changing existing programs. This was preserved in H.R. 37. Further, the recent Convention laid upon signatory members a responsibility for devising adequate programs to control the importation and exportation of both plants and animals that might be or become endangered. At the same time, however, the question of regulation of interstate commerce in species of plants raises a number of unresolved issues which, with justification, might be termed thorny.

The Committee resolved the issue by rewriting the legislation to provide authority for the acquisition of critical habitat of plants in the U.S., the regulation of their importation and exportation, and foreign assistance programs consistent with the purposes and policies of the Act. The additional questions of national regulation of endangered species of plants were assigned to the Smithsonian Institution, which was directed to study the problems of management on a national scale, and to prepare lists of present and potential endangered species of plants. It was also directed to report back on the results of its study within one year of the effective date of the legislation. It is expected that at that time, the Committee will be in a position to consider the matter and to recommend any further amendments to his legislation that may appear appropriate and desirable.

LAND ACQUISITION

The protection of the habitat of endangered species is clearly a critical function of any legislation in this area. The earlier Acts of the Congress in 1966 and 1969 provided an ultimate authorization of fifteen million dollars for the protection of habitat. That fifteen million dollars has now been used up, and the authority no longer exists. The Administration recommended that this authority be expanded to allow the Secretary to use funds from the Land and Water Conservation Fund without specific authorizations, and to use authorities under this legislation, under the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956, and the Fish and Wildlife Coordination Act. The Committee agreed with this approach, and the bill so provides.

IMPLEMENTATION OF CONVENTION

The International Convention was signed on March 3; it has not yet been formally ratified by any country. Notwithstanding that fact, however, the Committee felt strongly that it was desirable to take any steps that might be appropriate at this time, so that when the Convention does come into force, as it almost certainly will, no further legislation will be needed at that time to implement it.

OTHER LEGISLATION

As reported, H.R. 37 provides ample authority for the Secretary of the Interior—authority which the Committee expects him to exercise—to provide protection for species such as the Everglades Kite and the pupfish. These species are already listed as endangered, but require additional protection in the form of habitat acquisition and/or the enforcement of strict regulations. In this way, the bill will render unnecessary other legislation presently pending before the Committee which deals specifically with these species.

SECTION-BY-SECTION ANALYSIS

SHORT TITLE

Sec. 1. This Act may be cited as the "Endangered and Threatened Species Act of 1973."

FINDINGS, PURPOSES AND POLICY

Sec. 2. (a) The findings by Congress are to the effect that the decline and disappearance of species and subspecies is a matter of national and international concern, and that it is necessary to take steps for the benefit of all people to halt and, if possible, to reverse this decline.

(b) The essential purpose of the Act is to provide a means for protecting the ecosystems upon which we and other species depend. Another, allied purpose is to provide a specific program for the protection of endangered species,[1] and a third allied purpose is to take the necessary steps to implement international conventions and treaties which bear upon this objective.

(c) The policy of the legislation is to state a national purpose that all federal agencies and instrumentalities will take steps within their authorities to protect endangered species.

DEFINITIONS

Sec. 3. (1) "Convention" means the recently concluded Convention on International Trade in Endangered Species of Wild Fauna and Flora.

(2) The term "Endangered Species" means any species of fish or wildlife which is in danger of extinction throughout its entire range, or any portion of its range. This definition is a significant shift in the definition in existing law, which considers a species to be endangered only when it is threatened with worldwide extinction. It includes the possibility of declaring a species endangered within the United States where its principal range is in another country, such as Canada or Mexico, and members of that species are only found in this country insofar as they exist on the periphery of their range.

(3) The term "fish or wildlife" means all wild animals, whether or not raised in captivity. Thus, in addition to controlling trade in captive animals, the bill makes it clear that an animal which has been raised in captivity and released, or which escaped, would be subject to protection under the provisions of this Act. The term also includes any parts or products of these animals.

(4) "Foreign commerce" is defined quite broadly and evidences a clear intent of the Congress to reach acts committed beyond the boundaries of the United States, including those on the high seas and in foreign countries, if those actions were taken by persons subject to U.S. jurisdiction.

(5) "Import" means any introduction into areas subject to U.S. jurisdiction, or attempt to introduce into those areas, regardless of whether this constitutes an importation under Custom laws.

(6) "Person" is defined broadly enough to cover any person or entity, including employees of state or Federal agencies.

(7) "Plant" means any member of an endangered or threatened species within the plant kingdom, or any part of such plant.

(8) "Secretary" incorporates the split in jurisdiction contained in the 1970 Reorganization Plan, which had the effect of assigning management authority for certain animals to the Department of the Interior and for certain other animals to the Department of Commerce. That reorganization did not purport to change responsibilities specifically assigned to the Secretary of the Interior with regard to the listing of endangered species, and those responsibilities are not affected by this bill. "Secretary" means the Secretary of Agriculture with regard to the importation or exportation of terrestrial plants:

---

[1] In this discussion the words "endangered species" will be taken, in the interests of space and time, to include threatened species unless the context clearly indicates otherwise.

marine plants would be a matter of concern to the Secretary of Commerce.

(9) "Species" is defined broadly enough to include any subspecies of fish or wildlife or plants, or any population of such species.

(10) "State" means any state, territory or possession.

(11) "Take" is defined broadly. It includes harassment, whether intentional or not. This would allow, for example, the Secretary to regulate or prohibit the activities of birdwatchers where the effect of those activities might disturb the birds and make it difficult for them to hatch or raise their young.

(12) "Threatened species" means any species which may become endangered. It would certainly include those species which are presently on the decline and those which have achieved a stabilized position, or even were on the increase, so long as the Secretary was satisfied that a measurable risk to those species could be said to exist.

A species could be determined to be "threatened," even in cases where it is commercially harvested at the time the determination is made, if inadequately regulated harvesting has resulted in a serious decline of population stocks throughout all or a significant portion of its range and the Secretary determines that regulations controlling activities affecting the species would serve to conserve, protect, or restore the species concerned in accordance with the purposes of the Act set forth in section 2(b).

(13) "United States" includes all states as defined in the Act.

DETERMINATION OF ENDANGERED OR THREATENED SPECIES

Sec. 4. (a) This paragraph gives to the Secretary the authority to determine whether any fish or wildlife species is endangered because of any of a combination of several listed events. The section is drawn broadly to allow the Secretary to declare endangered or threatened any species for any legitimate reason.

(b) This section requires the Secretary to make determinations of endangered status on the basis of the best available evidence, after consultation with individuals, organizations, states or foreign countries, as appropriate. Where any such species exists within the boundaries of a given state, the Secretary is required to consult with the appropriate agencies within that state before making a final determination. The section requires the Secretary to give full consideration to efforts being currently made by any foreign country to protect fish or wildlife species within that country, in making a determination as to whether or not those species are endangered or threatened. There is provided ample authority and direction to the Secretary to consider the efforts of such countries in encouraging the maintenance of stocks of animals for purposes such as trophy hunting. If, on the other hand, the Secretary feels that inadequate measures are being taken by those countries, he is authorized and expected to take any steps necessary to discourage activities which might be inimical to those species by persons subject to U.S. jurisdiction. The Secretary is also required to consider, in establishing such lists, any animal which has been designated by any foreign country, or pursuant to any international convention, as requiring protection from unrestricted commerce.

(c) The Secretary is required to publish lists of endangered species and threatened species in the Federal Register. If any person proposes that a species be listed or delisted, the Secretary must review the status of that species when he determines in good faith that substantial evidence has been presented in support of the proposed action. The Committee intends, by this section, to require that the discretion of the Secretary be exercised so as to provide adequate protection to any species of fish or wildlife which is or which might become endangered. The section preserves designations under current law by requiring republication of existing lists. Until such republication, those species continue to be protected; there will be no hiatus pending such republication.

(d) The Secretary is authorized to issue appropriate regulations to protect endangered or threatened species; he may also make specifically applicable any of the prohibitions with regard to threatened species that have been listed in section 9(a) as are prohibited with regard to endangered species. Once an animai is on the threatened list, the Secretary has an almost infinite number of options available to him with regard to the permitted activities for those species. He may, for example, permit taking, but not importation of such species, or he may choose to forbid both taking and importation but allow the transportation of such species.

With regard to theatened species, the section goes on to indicate that, if a cooperative agreement has been reached, the Federal enforcement powers will thereafter be coextensive and concurrent with the state powers of enforcement. This will allow both state and Federal management officials to seek enforcement through both state and Federal courts—whichever seems most appropriate in the circumstances of a given case. The element of concurrent jurisdiction with regard to threatened species, and, as will later appear, with regard to endangered species, is a vital element of the protective scheme contemplated under this Act.

(e) This paragraph provides authority to the Secretary to regulate species which resemble, either in the natural state or in the form in which they enter the country, species which are listed under the authority of section 4. If the enforcement agencies are confronted by a situation in which they cannot adequately distinguish between listed and nonlisted species of animals, they are authorized to ban the importation of the "look-alikes." It is not the intention of the Committee to grant absolutely unrestricted authority to the Secretary in this regard, but if there is a legitimate problem and the Secretary is confronted by those who claim that the product in question does not derive from an endangered species, he may act to resolve the uncertainty by listing the species.

(f) This section requires that the rule-making procedures of the Administrative Procedures Act shall be applied to regulations adopted under this Act.

LAND ACQUISITION

Sec. 5. This section allows the Secretary to use broad authorities under this Act, the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956 and the Fish and Wildlife Coordination Act for the purpose of acquiring lands, waters and partial or total interests therein in order to establish programs contemplated under the Act or international Convention. The section authorizes the Secretary to use funds available to him under the Land and Water Conservation Act without regard to the appropriation ceilings provided elsewhere.

The Department of the Interior, which will be exercising primary authorities with regard to the use of these Land and Water Conservation Fund moneys, was unable to provide a specific set of figures as to anticipated habitat acquisition under this section, but indicated that its present expectations were that the funds requested would not exceed $1.4 million in fiscal year 1974, $8.5 million in fiscal 1975 and $12.5 million in fiscal 1976.

COOPERATION WITH THE STATES

SEC. 6. (a) This subsection requires the Secretary to consult with the affected States in carrying out any program authorized under the Act. That consultation includes discussions before acquiring lands or any other action taken under the authority of this Act.

(b) The Secretary is authorized to enter into agreements with any State regarding the administration and management of lands acquired for purposes of this Act. Revenues received are subject to existing legislation concerning state participation in revenues from the National Wildlife Refuge System.

(c) The Secretary is given authority and direction to enter into cooperative agreements, which may involve financial assistance regarding the management of endangered species, with those state jurisdictions. Any such cooperative agreement must be pursuant to a finding by the Secretary that the state has adequate statutory and regulatory authority in its fish or game agencies, or the combined agency, as the case may be, to maintain a program; that the programs are in fact consistent with the purposes of the Act and are acceptable; that the agency has sufficient authority to perform necessary investigations on the status of endangered species or their requirements; that the state agency is authorized to establish programs, including land acquisition programs, to carry out the provisions of this Act; and that there is adequate provision for public participation in state endangered species programs.

(d) The Secretary is authorized to allocate funds for financial assistance to the states to assist state programs. With regard to the moneys authorized under the Act, the Secretary is required to consider several listed factors in determining which state gets how much money. Any funds allocated which are unobligated as of the end of the fiscal year may be expended until the end of the next fiscal year; lapsed funds may be reallocated by the Secretary pursuant to the Act. Any cooperative agreements executed pursuant to this authority must describe the responsibilities of the parties, the benefits expected to be derived, the costs of the programs and the state and Federal share of those costs. Under no circumstances may the Federal share exceed ⅔ of the total program costs, except that the Federal government may assume ¾ of the program costs if two or more states develop a joint or regional program which is acceptable to the Secretary. He is given authority to advance funds to the state on a reimbursable basis.

(e) The Secretary is required to review any such cooperative and cost-sharing agreements at least annually. This authority would allow the Secretary to intervene at any time if the circumstances were so changed as to render it imperative in his judgment that the cooperative agreement be terminated or that a new agreement be negotiated. The Committee expects the Secretary to provide reasonable notice to the states and other affected parties, wherever possible, of his intentions in making any such modification.

(f) This paragraph indicates that the states are to be free to develop regulatory mechanisms which are more stringent or more restrictive than those of the Federal government. Existing state endangered species programs would, for example, be in a position to include species which were not on the Federal list. The only exception to this is contained in the language which expressly prohibits the state from voiding actions specifically permitted by Federal agencies or from permitting specific actions forbidden by Federal agencies. In all other regards, the state law is not pre-empted, but is merely subject to the Federal "floor" of regulations under the Act. Thus, laws already passed in States such as New York, California and Hawaii, which list additional species or prohibit such activities as sales within their jurisdiction would reman unaffected.

(g) This paragraph authorizes the Secretary to promulgate any appropriate regulations to carry out the section regarding financial assistance.

(h) This paragraph authorizes the Secretary such funds as may be necesary to carry out the purposes of the section. It is not anticipated that such funds will exceed $10 million any fiscal year.

INTERAGENCY COOPERATION

Sec. 7. (a) This subsection requires the Secretary and the heads of all other Federal departments and agencies to use their authorities in order to carry out programs for the protection of endangered species, and it further requires that those agencies take the necessary action that will not jeopardize the continuing existence of endangered species or result in the destruction of critical habitat of those species. To the extent that those actions involve the protection of habitat, the states must be consulted. Under the authority of this paragraph, for example, the Director of the Park Service would be required to conform the practices of his agency to the need for protecting the rapidly dwindling stock of grizzly bears within Yellowstone Park. These bears, which may be endangered, and are undeniably threatened, should at least be protected by supplying them with carcasses from excess elk within the park, by curtailing the destruction of habitat by clearcutting National Forests surrounding the Park, and by preventing hunting until their numbers have recovered sufficiently to withstand these pressures.

(b) This paragraph authorizes the Secretary of Agriculture to carry the full cost, or any portion thereof, of any program which is considered desirable to carry out the purposes of this Act and which involves installation of any facility or program on private lands. Any such program must be directed at assisting private land owners to take actions consistent with the preservation and protection of endangered species where the landowners wish to do so. The Secretary of Agriculture is also authorized to conduct research programs in order to further the purposes of this Act. Any such research may be carried on jointly by the appropriate Secretary and the Secretary of Agriculture.

INTERNATIONAL COOPERATION

Sec. 8. (a) This paragraph authorizes the use of counterpart funds in foreign countries, where those countries are agreeable, to provide assistance in the development and management of programs which the Secretary finds to be important to endangered species. The President, under the appropriate provision of law, is authorized to do anything that is mutually considered as desirable. There is a restriction on the use of counterpart funds, however, which indicates that in a case where counterpart funds are available, they will be used in preference to those authorized under section 15 of this Act.

(b) The Secretary is authorized and directed to encourage foreign countries to develop adequate programs for the protection of endangered species, to encourage the development of bilateral and multilateral agreements for the protection of endangered species and to encourage foreign persons who take endangerd species of plants or animals for importation to use such practices as will encourage appropriate conservation practices and protection of endangered species.

(c) After consultation with the Secretary of State, the Secretary is authorized to use Federal employees to develop personnel programs relating to endangered species, and to provide training for foreign personnel in this country or elsewhere, in the management of endangered species.

(d) The Secretary is authorized, in cooperation with the Secretary of the Treasury, to develop programs for law enforcement and research, as necessary to carry out the purposes of the Act.

(e) This section authorizes the establishment of appropriate management and scientific authorities as required pursuant to the terms of the International Convention, when it becomes effective. It also requires appropriate action under the Convention on Nature Protection in the Western Hemisphere. It is anticipated that the agencies designated under this section will perform appropriate functions necessary to assure effective administration of the responsibilities of the United States under the Convention and to advise the public of export and import controls and the species subject to controls under the Convention.

PROHIBITED ACTS

Sec. 9. (a) Subparagraphs (1) through (5) of this paragraph spell out a number of activities which are specifically prohibited with respect to endangered (not threatened) species for persons subject to the jurisdiction of the United States. It includes, in the broadest possible terms, restrictions on the taking, importation and exportation, and transportation of such species, as well as other specified acts. Concurrent jurisdiction with states is provided for, where the taking of such species violates the provisions of an existing cooperative agreement. Subparagraph (6) makes it unlawful for any person to violate any regulation promulgated by the Secretary with respect to a threatened species. In this respect the Secretary is given authority to prohibit activities with respect to threatened species which have specifically been prohibited with respect to endangered species.

(b) It is unlawful for any person subject to the jurisdiction of the United States to do anything which would result in a violation of the international Convention. The reference to the definitions in the Convention is required because a number of terms used in that Convention, such as "specimen" and "introduction from the sea", were defined with special care in that Convention and have highly specific meanings. This paragraph provides that an export permit covering the shipment of nonendangered species on Appendix II of the Convention will be presumed to be valid and issued in good faith, unless the Secretary has reliable evidence to offset the presumption of validity. In all other respects, of course, the requirements and regulations of the Act, including the requirement that such goods be brought in through designated ports of entry, accompanied by appropriate documentation, must be followed by the importer; the purpose of paragraph (b) (2) is to allow the Secretary to look behind an export permit only where he has evidence that it does not correctly reflect the situation in the country in which the animal or plant was originally taken, or that the permit itself is not valid.

(c) It is illegal to engage in business as an importer or exporter of fish or wildlife without a permit; this category includes zones, brokers, forwarders and taxidermists. The only exception to this requirement is provided in the case of businessmen dealing in nonendangered and nonthreatened species of shellfish and fish which are imported for commercial purposes or taken in U.S. waters or on the high seas for recreational purposes. Permit holders or licensees under this section are required to keep adequate records, permit inspection of these records and their premises by the Secretary, and file all required reports. The Secretary is also authorized to prescribe regulations under which these requirements are to be carried out.

(d) It is illegal for anyone (except in the specified conditions of the proviso), whether a businessman or otherwise, to fail to file declarations or reports required by the Secretary in conjunction with the enforcement of this Act or of the Convention. The filing of a false or misleading report would be a violation of this section.

The subsection is designed to provide the Secretary with the information which he must have on the wildlife shipments which presently cross U.S. borders in order for this country to participate effectively in the Convention, which requires a workable system of worldwide information in this area.

(e) This paragraph makes it illegal for anyone (except in the specified conditions of the proviso), whether a businessman or otherwise, to bring in fish or wildlife or plants in any port other than one designated by the Secretary. The requirement can we waived or modified at the discretion of the Secretary. Ports already designated under existing law will continue to be designated in the future, except as specifically changed.

(f) It is illegal to conspire to commit, or to attempt to commit, a violation of the Act.

EXCEPTIONS

SEC. 10. (a) The Secretary is allowed to issue permits for actions otherwise prohibited for scientific purposes or for the purpose of enhancing the propagation or survival of the species affected. The restrictions upon the discretion of the Secretary lie in the requirements of subsection (c), as later described. Any such activities to encourage propagation or survival may take place in captivity, in a controlled habitat or even in an uncontrolled habitat so long as this is found to provide the most practicable and realistic opportunity to encourage the development of the species concerned. They might even, in extraordinary circumstances, include the power to cull excess members of a species where the carrying capacity of its environment is in danger of being overwhelmed.

(b) This paragraph provides the so-called "hardship exemption", authorizing the Secretary to exempt for a period of not to exceed one year from the date that a species is first proposed for inclusion on the list persons who can show that the listing of that species will create an undue economic hardship for them. Like subsection (a), exemptions to be provided under this subsection would be subject to the overall policy requirements of subsection (c) of this section. The paragraph does not prevent or forestall existing hardship exemptions under the Act; it does, however, require that no economic hardship exemption be granted covering an animal which is on Appendix I of the Convention if the use of the animal is for primarily commercial purposes. The Secretary is authorized to obtain any information necessary for him to decide whether or not the issuance of such an exemption is justified, and any information so received is to be a matter of public record. If the applicant concludes that this will result in the public release of information which he would prefer to remain private, he may of course, decide not to submit his application or to attempt to persuade the Secretary not to require that information.

(c) This paragraph prescribes the circumstances under which the Secretary may grant exemptions under subsections (a) and (b) of this section. It provides overall policy guidance, requiring that the Secretary find and publish his finding that the exemption application was applied for in good faith (and is not for the purpose of stockpiling animals or products), is not to the disadvantage of the species, and will be consistent with the purposes and policies stated in Section 2.

The effect of this subsection is to limit substantially the number of exemptions that may be granted under the act, but given that these exemptions apply to species which are in danger of extinction, the restrictions imposed by this paragraph seem entirely reasonable.

(d) This subsection extends the exception provided in the Marine Mammal Protection Act of 1972 (P.L. 92-522) regarding taking of endangered species by Alaskan natives. Under that Act, certain types of taking of endangered species of animals are permitted subject to the overriding power of the Secretary to intervene and restrict or prohibit further taking in the interests of protecting the species or stocks of those animals. The same powers of intervention are thus preserved by this Act. While any such taking would not be a violation of either the Marine Mammal Protection Act or this Act, the taking would still be subject to whatever stricter state regulations apply to the taking of the animals concerned.

PENALTIES AND ENFORCEMENT

Sec. 11. (a) Civil penalties are provided for anyone who violates any provision of the Act, or permits or certificates issued pursuant to the Act, or regulations.

All violations prescribed by statute, including those of Section 9(a)(6), are punishable by a $10,000 fine, as are all violations of any permit or certificate. It should be noted, however, that only violations of 9(a)(6) regulations are punishable to this extent insofar as they implement or parallel restrictions specifically enumerated in section 9(a)(1–5), 9(b), 9(c), 9(e) or 9(f). Violations of any other regulations, if knowingly committed, are punishable by a $5,000 penalty.

The subsection is subject to the requirement that violators be given an opportunity for a hearing and requires the Secretary to sue in a Federal district court to collect any penalties assessed. Penalties may be remitted or mitigated by the Secretary upon finding of proper cause. Hearings by the Secretary are required to be conducted subject to the existing adjudicatory hearing requirements of the Administrative Procedures Act and the Secretary is given authority to issue subpoenas and other process necessary to determine the facts of the case.

(b) Criminal penalties are also provided for any acts which are knowingly taken and which violate the provisions of the Act, or of any permit or certificate. Violation of certain regulations will carry the full penalty, as in the case of civil penalties, and violations of other regulations will carry lesser penalties. The section incorporates a "finders' fee provision", authorizing payment of a portion of the criminal fines to any person who furnishes information, not in the course of his Federal or state employment, which leads to conviction under this subsection.

The subsection also authorizes Federal officials to terminate or modify any outstanding Federal grazing lease or other agreement allowing the use of Federal lands upon conviction of a violation under this Act. It makes mandatory the cancellation of any Federal fish or game permit in similar circumstances for up to one year from the date of conviction.

(c) Jurisdiction over offenses and violations under this Act is vested in United States District Courts. Under the principle of concurrent jurisdiction, set out earlier, state courts may also be vested with proper jurisdiction in some cases.

(d) This paragraph authorizes Federal agencies to issue enforcement regulations and allows the use of other Federal personnel and facilities, with or without reimbursement. It authorizes U.S. judges and magistrates to issue warrants for violations of the Act, and allows authorized agents to open packages, serve warrants, and sieze and hold goods pending their disposal of the case in the courts. If the Secretary permits it, bonds or other sureties may be posted to permit recovery of property so seized.

This subsection changes existing law by providing an *in rem* procedure under which the Secretary may seek forfeiture of the goods at any time, or in lieu of a civil penalty. This is required, for example, by cases in which no consignee could be found within the United States, or the item was received as a "gift", without constituting a formal importation.

The section provides for forfeiture of illegal goods, which may, but need not, take place in conjunction with civil or criminal proceedings. It is expected that goods properly seized and forfeited would not be returned if the Secretary concludes that the Act has been violated. Goods other than the prohibited fish or wildlife may also be forfeited, in the discretion of the court, upon a criminal conviction for violation of the Act or any regulations under the Act. It also preserves existing customs laws regarding seizures.

(e) The appropriate agency heads are authorized to promulgate enforcement regulations and to charge reasonable fees for expenses properly incurred under the Act. Any such fees are to be covered into the General Treasury to the credit of the appropriation covering such activity.

(f) This subsection authorizes citizen actions to enforce the provisions of the Act. It allows any person, including a Federal official, to seek remedies involving injunctive relief for violations or potential violations of the Act. The language is parallel to that contained in the recent Marine Protection, Research and Sanctuaries Act of 1972, and is to be interpreted in the same fashion.

(g) The Secretaries are directed to coordinate their activities with those of the Secretary of Agriculture to provide for enforcement of the Animal Quarantine and Tariff Acts. In no respect is the authority so provided intended to limit the authorities otherwise available to the Secretary of Agriculture.

(h) The Act specifically disclaims any intent to interfere with the responsibilities of the Secretary under the Tariff Act relating to importation of contraband animals, which may or may not also be endangered.

ENDANGERED PLANTS

Sec. 12. This section authorizes the Secretary of the Smithsonian, together with any other interested agencies of the state or Federal government, public or private, to review plant species which are or may become endangered or threatened and possible regulatory programs. The results of this study are to be communicated to the Congress at the time, and we will then be in a position to consider the necessity for further amendments to this legislation.

CONFORMING AMENDMENTS

Sec. 13. For the most part, the amendments in this section simply conform existing laws to the provisions of this Act, as reported. The Committee has made a conscientious effort to find all references to the existing laws, and to correct them to refer to the new Endangered and Threatened Species Act of 1973. It is presumed that any references to older legislation which have not been so conformed would continue to refer to this Act.

Subsection (d) of this section handles a housekeeping change which was brought to the attention of the Committee after enactment of PL 92–534 last year, dealing with the acquisition of lands in national conservation and recreation areas. As amended, the legislation will permit the acquisition of lands within the boundaries of such areas, as well as those adjacent to them.

As to the recent Marine Mammal Protection Act of 1972, a number of changes are made to conform the reference to this Act. There is no intention whatever to repeal any portion of that Act, and it is intended that the more restrictive provisions of each law will prevail, to the extent that any conflict may later appear.

REPEALER

Sec. 14. This section repeals the existing 1966 and 1969 endangered species acts, which have been superseded by this bill.

AUTHORIZATIONS

Sec. 15. This section authorizes certain sums to the Interior and Commerce Departments for the current and next two fiscal years. The sums authorized are in line with the agency projections of program needs for the years in question, and provide a total of $27.5 million for these three years.

EFFECTIVE DATE

Sec. 16. The effective date of the legislation is the date of its enactment.

Cost of the Legislation

In the event that this legislation is enacted into law, the Committee estimates the maximum costs to the Federal Government, on the basis of information supplied by the Executive Branch, to be as follows:

> The Departments of the Interior and Commerce estimate their three year costs to be $69.9 million, as represented by the following table:

[In millions of dollars]

	Fiscal year—		
	1974	1975	1976
Habitat acquisition (sec. 5b): Interior	1.4	8.5	12.5
State grants-in-aid (sec. 6): Interior		10.0	10.0
Program costs (sec. 15):			
Interior	6.0	8.0	10.0
Commerce		1.5	2.0
Total	7.4	28.0	34.5

It is to be noted the Department of the Interior anticipates habitat acquisition costs will be provided by the Land and Water Conservation Fund. The Smithsonian Institution and the Department of Agriculture anticipate any cost to their agencies in implementing the legislation will be borne by existing program authorizations.

After reviewing the foregoing estimate of costs with respect to this legislation, the Committee has concluded that these costs are reasonable and that the costs incurred in carrying out this legislation will be consistent with those estimates.

DEPARTMENTAL REPORTS

The departmental reports on H.R. 37, H.R. 4758, and similar and identical bills, upon which the hearings were held, along with Executive Communication No. 442 follow herewith:

[Executive Communication No. 442]

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., February 15, 1973.

Hon. CARL ALBERT,
Speaker of the House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: There is enclosed a draft bill "To provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are presently threatened with extinction or likely within the foreseeable future to become threatened with extinction; and for other purposes."

We recommend that this bill, a part of the environmental program announced today by President Nixon, in his Environmental and Natural Resources State of the Union Message, be referred to the appropriate committee for consideration, and that it be enacted.

This proposal addresses the need to identify those species or subspecies which, though not yet threatened with extinction, are likely within the foreseeable future to become so threatened. We are convinced that it is far more sound to take the steps necessary to keep a species or subspecies from becoming endangered than to attempt to save it after it has reached that critical point. Therefore, the bill defines "endangered" (Section 2 (c)(1) as meaning any species or subspecies which is either presently threatened with extinction or likely within the foreseeable future to become threatened with extinction. To assure protection of all endangered species commensurate with the threat to their continued existence, we propose to (1) remove the current ceiling imposed by law on acquisition of essential wildlife habitat; (2) prohibit unauthorized import or export, taking, possession, sale, delivery, and transport of species presently threatened with extinction; (3) clarify authorities pertaining to warrantless searches and forfeiture of seized property; and, (4) allow importation at other than designated ports of entry "in the interest of health or safety of fish and wildlife."

The bill follows closely the precedent established by the Congress in 1966 and1967, when it enacted the first legislation to provide protection for fish and wildlife determined to be threatened with extinction in the United States abroad. This proposal retains those provisions of the earlier Acts which laid the foundation for this Department's effort to protect endanger species and adds to them the authorities which, as demonstrated by experience, are needed to cope with a continuing decimation of the world's wildlife resources. It provides authority for a new program to be administered jointly by this Department and the Department of Commerce, pursuant to the allocation of responsibilities established by Reorganization Plan No. 4 of 1970.

We urge the Congress to take this further step forward for the protection of our diminishing wildlife resources. The Office of Management and Budget has advised that this legislation is in accord with the President's program.

Sincerely yours,

ROGERS C. B. MORTON,
Secretary of the Interior.

Enclosure.

(The text of the bill enclosed with this executive communication was introduced as H.R. 4758)

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., March 23, 1973.

Hon. LEONOR (MRS. JOHN B.) SULLIVAN,
Chairman, Committee on Merchant Marine and Fisheries,
House of Representatives,
Washington, D.C.

DEAR MADAM CHAIRMAN: Your Committee has requested the views of this Department on H.R. 37, a bill "To provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinction, and for other purposes," and H.R. 2169, a bill "To implement the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, and for other purposes." We note that there is also pending before your Committee H.R. 4758, the Administration's proposed bill, "To provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are presently threatened with extinction or likely within the foreseeable future to become threatened with extinction; and for other purposes." In addition our comments will be directed to H.R. 3310, H.R. 3691 and H.R. 3795, bills identical to H.R. 37 and similar bills H.R. 470, H.R. 471, H.R. 1461, H.R. 1511, H.R. 2669 and H.R. 4755.

We recommend the enactment of H.R. 4758, the Administration's proposed "Endangered Species Conservation Act of 1973."

Each of these bills, except H.R. 2169, would, in some way, amend the existing laws regarding the protection and conservation of endangered species of fish and wildlife. Pursuant to these earlier laws, which have been codified as the Endangered Species Conservation Act of 1969 (16 U.S.C. 668aa–668cc; 668cc–1 through 668cc–5), and related Acts, the Secretary of the Interior has authority to promulgate separate lists of native species threatened with extinction and of foreign species threatened with worldwide extinction; to regulate the interstate transportation of native species taken contrary to State laws, and to restrict the importation of foreign species which he determines to be threatened with worldwide extinction. In addition, the Secretary has exercised authority to acquire endangered species habitat within funding limits established by Congress.

The Bureau of Sport Fisheries and Wildlife of this Department has made significant progress under existing authorities, and it can be said with assurance that enactment of endangered species legislation was a milestone in the Nation's attempt to preserve its natural environment. There exists no precise measure of our success, due primarily to a lack of technical information. Nearly 400 species are currently listed as endangered, either in the United States or worldwide, and there are example or species which, thought once threatened with extinction, are now thought to have been rescued from ultimate destruction. The threat remains, however, and can be expected to grow in intensity as habitat is converted to human use and the environment is despoiled.

These bills would, among other things, expand the existing program for the conservation and protection of fish and wildlife resources by providing earlier identification of threatened species, authorizing necessary protective measures, prohibiting the taking of endangered species, and expanding the prohibition against trafficking in such species. Under the bills, the development and administration of the new program would be the joint responsibility of the Department of the Interior and the Department of Commerce, pursuant to the allocation of responsibilities by Reorganization Plan No. 4 of 1970.

For the sake of convenience we will summarize the provisions of H.R. 4758 and explain the most significant differences between it and the other bills.

H.R. 4758 addresses the need to identify those species or subspecies which, though not yet threatened with extinction, are likely within the foreseeable future to become so threatened. In so doing, it provides the means for taking the steps necessary to keep a species or subspecies from becoming endangered rather than attempting to have it after it has reached that critical point. Therefore, the bill defines "endangered" (Section 2(c)(1)) as meaning any species or subspecies which is either presently threatened with extinction or likely within the foreseeable future to become threatened with extinction. To assure protection of all endangered species commensurate with the threat to their continued existence, H.R. 4758 would (1) remove the current ceiling imposed by law on acquisition of essential wildlife habitat; (2) prohibit unauthorized import or export, taking, possession, sale, delivery, and transport of species presently threatened with extinction; (3) clarify authorities pertaining to warrantless searches and forfeiture of seized property, and (4) allow importation at other than designated ports of entry "in the interest of health or safety of fish and wildlife." H.R. 4758 also provides authority for this program to be administered jointly by this Department and the Department of Commerce, pursuant to the allocation of responsibilities established by Reorganization Plan No. 4 of 1970. For those species or subspecies likely within the foreseeable future to become threatened with extinction, H.R. 4758 would provide discretionary authority to the Secretary to regulate the import, taking, and interstate transportation of those animals. The type and degree of control exercised in this latter instance would depend on the circumstances of each species and could include a complete or partial ban if deemed appropriate.

H.R. 37, and the other bills identical to it, are in many instances similar to H.R. 4758. However, while we support the general purposes of these bills we prefer H.R. 4758 for the following reasons:

1. We believe it desirable to include, within the definition of "take" the terms "pursue," "shoot," "wound," "trap," and "collect."

2. We believe that the separate definitions of "fish" and "wildlife" could raise ambiguities as to what animals are included under each term. Another problem is that the definition of "wildlife" in H.R. 37 includes the nebulous reference to any "other animal". It is uncertain as to what this term is meant to include. Consequently, we believe the term used in H.R. 4758, "fish and/or wildlife" defined to mean "any wild animals, whether or not raised in captivity, including without limitation, any mammal, fish, bird, amphibian, reptile, mollusk, or crustacean, including any part, product, egg, or offspring thereof, or the dead body or parts thereof", is more appropriate.

3. Under Subsection 4(b) of these bills, we anticipate a potential legal problem relating to the phrase "not less than annually". This language would appear to require the Secretary to establish a new list or reestablish the existing list, assuming that no changes were appropriate at that time, at least once every year. It is not inconceivable then, that if, through some circumstances, the Secretary failed to republish a list for which no changes were appropriate, a defendant in a civil or criminal proceeding under this Act would claim the defense that the list had legally lapsed. This problem would be avoided under H.R. 4758 which stipulates that the Secretary publish a list and allow him to revise such list "from time to time".

4. While we concur with the prohibition of acts specified under Subsection 7(a) of H.R. 37 applying to species or subspecies presently threatened, and those referred to under Subsection 7(b) applying to species or subspecies, likely within the foreseeable future to become threatened, we believe that certain additional acts should be specifically prohibited. Accordingly, we favor the more comprehensive language in Sections 4(a) and 4(b), of H.R. 4758.

5. Within the definitions section of H.R. 37, Section 3, we note the inclusion of the term "Federal lands". Considering that the prohibitions apply to taking "within the United States", we do not see the need for a separate definition of "Federal lands."

6. We note that under Subsection 10(a)(2) of H.R. 37, the Secretary is directed to convene, through the Secretary of State, an international ministerial meeting for the purpose of signing an international convention on the conservation of endangered species. Since an international meeting, recently held in Washington, D.C., resulted in agreement on a draft treaty prepared in conjunction with the State Department, we do not believe such a provision is appropriate.

7. We do not believe that Section 11 of these bills is necessary or desirable since the Smithsonian Institution already has authority to conduct this kind of a review and the authorization of a specific appropriation merely serves to put a ceiling on the amount of funds to be expended for this purpose. The recently concluded "Convention on International Trade on Endangered Species of Wild Fauna and Flora", signed on March 3, 1973, in Washington, D.C., recognizes the critical role of flora in our total ecosystem. This Department, the Departments of Commerce and Agriculture, and the Smithsonian Institution are cooperating to develop a conservation program to preserve endangered flora pursuant to that Convention.

The above comments on H.R. 37, and the other bills identical to it, also pertain to H.R. 470, H.R. 471, and H.R. 2669, and to H.R. 1511 and H.R. 2735, H.R. 1461 and H.R. 4755, identical bills, are different from H.R. 37. However, these bills are identical to the endangered species bill developed last year and introduced in the 92nd Congress as H.R. 13081. While H.R. 1461 and H.R. 4755 are, therefore, quite similar to the current Administration proposal discussed above, H.R. 4758, we believe that the refinements make H.R. 4758 preferable to the earlier version. Consequently, we recommend against enactment of either H.R. 1461 or H.R. 4755.

H.R. 2169 would implement the Convention on Nature Protection and Wildlife Preservation in the eWstern Hemisphere and amend the original 1966 Endangered Species Act. This bill would prohibit any person within any place subject to the jurisdiction of the United States from hunting, capturing, killing, taking, transporting, selling, or purchasing any fish or wildlife listed in the Annex to the Convention. H.R. 2169 also provides that in submitting the list of species for the Annex, the Secretary of the Interior shall include the species found by him to be rare or endangered under the terms of the 1966 Endangered Species Act. While this Department subscribes to the objectives of H.R. 2169, we believe that it offers only a partial solution to the problems associated with the preservation and conservation of endangered wildlife. We therefore, recommend the enactment of H.R. 4758 as a comprehensive approach to the protection, preservation and conservation of these animals.

The Office of Management and Budget advises that there is no objection to the presentation of this report and that enactment of H.R. 4758 would be in accord with the program of the President.

Sincerely yours,

DOUGLAS P. WHEELER,
Acting Assistant Secretary of the Interior.

DEPARTMENT OF STATE,
Washington, D.C., March 23, 1973.

Hon. LEONOR K. SULLIVAN,
Chairman, Committee on Merchant Marine and Fisheries, House of Representatives, Washington, D.C.

DEAR MADAM CHAIRMAN: Thank you for your letters of February 7, March 5 and March 7, 1973, affording this Department the opportunity to comment on H.R. 37, H.R. 2735, H.R. 4755 and H.R. 4758, bills to provide for the conservation, protection and propagation of species or subspecies of fish and wildlife that are presently threatened with extinction or likely within the foreseeable future to become threatened with extinction; and for other purposes.

The Department favors the enactment of H.R. 4758, which was transmitted to the Congress in conjunction with the President's State of the Union Message on Natural Resources and Environment of February 15, 1973. This bill has the following advantages over the other bills cited above.

Sec. 10(a)(2) of H.R. 37 and Section 10(a)(1) of H.R. 2735 call for the Secretary through the Secretary of State to convene an international meeting on fish and wildlife. The meeting took place in February; H.R. 4758 in effect takes note of this by not calling for it to be convened.

Sec. 7 of H.R. 37 and H.R. 2735 and Sec. 5 of H.R. 4755 prohibit the taking of endangered species upon the high seas. This prohibition should be limited to persons subject to the jurisdiction of the United States and in H.R. 4758 it is so limited.

The last sentence of Section 5(f) in both HR 37 and HR 2735 states: "The Secretary is also authorized to conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the obligations imposed upon him by this Act." Investigations and research abroad may only be undertaken with the cooperation and specific consent of the interested sovereign nation. Furthermore, activities of U.S. representatives abroad must be coordinated in the light of United States foreign policy objectives. The Administration's bill would solve this problem by including in Section 7, which covers the same subject, the phrase "in consultation with the Department of State."

There is an additional problem in connection with HR 37. Section 9(g) would require any person who engages to any extent in business as an importer of fish and wildlife to register with the Secretary of the Treasury and to keep detailed records of each import of fish and wildlife and of the subsequent disposition made of such imports. The records presumably would have to cover all imports of commercial fish and fish products, many leather articles, such as shoes and bags, and clothing made of or trimmed with fur or leather. In the view of the Department of State, the detailed records required would place a costly burden on normal commercial trade. Since this requirement is only applicable to importers and not to domestic wholesalers, trappers, or manufacturers dealing in wildlife specimens, it could be considered inconsistent with Article III of the General Agreement on Tariffs and Trade. This article requires that imported products shall be accorded treatment no less favorable than that accorded to "like products of national origin in respect of all laws, regulations and requirements affecting their internal sale, offering for sale, purchase, transportation, distribution or use."

The difficulties outlined above are eased in the Administration bill, HR 4758. Section 6(e) of this bill covers the essentials of the above paragraph by allowing the Secretary to require persons importing or exporting fish and wildlife to file declarations with information which he deems necessary. However, the discretionary powers would limit the burdens which would be placed on normal commercial trade.

The Office of Management and Budget advises that there is no objection to the submission of this report and that enactment of HR 4758 would be in accord with the program of the President.

Sincerely,

MARSHALL WRIGHT,
Acting Assistant Secretary
for Congressional Relations.

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., March 23, 1973.

Hon. LEONOR K. SULLIVAN,
Chairman, Committee on Merchant Marines and Fisheries,
House of Representatives.

DEAR MADAM CHAIRMAN: This is in response to your request for a report on H.R. 37, H.R. 2735, and H.R. 4758 bills "To provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinction; and for other purposes."

The Department of Agriculture recommends that H.R. 4758, the Administration's proposed "Endangered Species Conservation Act of 1973", be enacted in lieu of H.R. 37 or H.R. 2735.

In general, the bills follow closely the provisions of the Endangered Species Conservation Act of 1969 (16 U.S.C. 668aa–668cc; 668cc–1 through 668cc–5). They would strengthen the earlier legislation in part by broadening the definition of endangered species to include species or subspecies of fish or wildlife that may within the foreseeable future be likely to become threatened with extinction; and by prohibiting the exporting, taking, possession, sale, and interstate transportation of endangered species.

The Department of Agriculture strongly supports the objectives of the bills to protect endangered fish and wildlife. In furtherance of the existing Endangered Species Conservation Act, the Forest Service of this Department is continuing to develop management plans that would protect and enhance identified areas of endangered species habitat located on lands within the National Forest System.

Although many of the provisions of the three bills are quite similar, we recommend that H.R. 4758 be enacted. We believe the penalties and enforcement provisions of H.R. 4758 are more comprehensive and stronger than the related provisions of the other two bills. Further, we believe that it would not be appropriate for the Secretary of Agriculture to initiate a program of direct assistance to private landowners as provided by section 10(c) of H.R. 37 and H.R. 2735. If a need to assist private landowners is identified, we believe such programs could be better accomplished by strengthening the role of the States in this area.

The Office of Management and Budget advises that there is no objection to the presentation of this report, and that enactment of H.R. 4758 would be in accord with the President's program.

Sincerely,

J. PHIL CAMPBELL,
Under Secretary.

DEPARTMENT OF JUSTICE,
Washington, D.C., June 6, 1973.

Hon. LEONOR K. SULLIVAN,
Chairman, Committee on Merchant Marine and Fisheries,
House of Representatives,
Washington, D.C.

DEAR MADAM CHAIRMAN: This is in response to your request for the views of the Department of Justice on several bills before your Committee regarding "Endangered Species" namely H.R. 4758, H.R. 37, H.R. 2735 and H.R. 4755.

The Department is of the opinion that the Administration's bill H.R. 4758 incorporates all of the significant issues of the other three bills. H.R. 4758 "provides for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are presently threatened with extinction or likely within the foreseeable future to become threatened with extinction . . ."

We would strongly urge prompt consideration of this legislation which is consistent with the President's message on Natural Resources and the Environment (February 15, 1973).

The Office of Management and Budget has advised that there is no objection to the submission of this report, and that enactment of H.R. 4758 would be in accord with the President's program.

Sincerely,

MIKE MCKEVITT,
Assistant Attorney General.

THE GENERAL COUNSEL OF THE TREASURY,
Washington, D.C., March 23, 1973.

Hon. LEONOR K SULLIVAN,
Chairman, Committee on Merchant Marine and Fisheries,
House of Representatives,
Washington, D.C.

DEAR MADAM CHAIRMAN: Reference is made to your requests for the views of this Department on H.R. 37, H.R. 2735, H.R. 4755 and H.R. 4758, similar bills, "To provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are presently threatened with extinction or likely within the foreseeable future to become threatened with extinction; and for other purposes."

The President, in his State of the Union Message of February 15, 1973, on Natural Resources and the Environment, stated that the limited scope of existing laws requires new authority to identify and protect endangered species before they are so depleted that it is too late and that he would ask the 93rd Congress to direct its attention to this problem. The Administration's proposal is contained in H.R. 4758.

In view of the foregoing, the Department recommends the enactment of H.R. 4758 in lieu of further consideration of H.R. 37, H.R. 2735 and H.R. 4755.

The Department has been advised by the Office of Management and Budget that there is no objection to the submission of this report to your Committee and that enactment of H.R. 4758 would be in accord with the program of the President.

Sincerely yours,

DONALD L. E. RITGER,
Acting General Counsel.

SMITHSONIAN INSTITUTION,
Washington, D.C., April 23, 1973.

Hon. LEONOR K. SULLIVAN,
Chairman, Committee on Merchant Marine and Fisheries,
U.S. House of Representatives,
Washington, D.C.

DEAR MADAM CHAIRMAN: Thank you for the opportunity to comment on H.R. 37, a bill "To provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinction, and for other purposes."

H.R. 37 is substantially the same as H.R. 4758, the latter of which the Smithsonian Institution already has reported on favorably to your Committee. For the reasons set forth in that Report, the Institution endorses the purposes and objectives of H.R. 37, which it is believed will improve substantially the ability of the United States to protect and preserve threatened species or subspecies of fish and wildlife.

The principal provision in H.R. 37 which deviates from H.R. 4758, and in which the Smithsonian Institution has a direct interest, is Section 11, entitled "Endangered Flora." This section provides that:

"The Secretary of the Smithsonian Institution, in conjunction with other affected agencies, is authorized and directed to review (1) species and subspecies of endangered plants, trees, and other flora, and (2) methods of providing adequate protection to such species and subspecies, and to report to Congress, within one year after the date of the enactment of this Act, the results of such review. For the purposes of this section, there is authorized to be appropriated $250,000."

It is believed that the Smithsonian Institution already has general authority to accomplish these objectives without specific legislation. Also, it may be of interest to the Committee to know that the Smithsonian Institution has been conducting, on a limited basis, research on endangered flora with a view to compiling a list of domestically and internationally endangered flora.

The Smithsonian Institution hopes that the Committee will act favorably on legislation to give greater protection throughout the world to species threatened with extinction, or which are likely within the foreseeable future to become so threatened. The principles embodied in the pending legislation demonstrate the increased awareness of the American public in the need to treat the future existence of other living creatures, which so often depends on human decisions, with care, respect, and foresight.

The Office of Management and Budget has advised that there is no objection to the presentation of this report to the Congress.

Sincerely yours,

S. Dillon Ripley, *Secretary.*

Changes in Existing Law Made by the Bill, as Reported

In compliance with clause 3 of Rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italics, existing law in which no change is proposed is shown in roman):

SECTION 4(c) OF THE ACT OF OCTOBER 15, 1966

Sec. 4. (a) * * *

* * * * * * *

(c) No person shall knowingly disturb, injure, cut, burn, remove, destroy, or possess any real or personal property of the United States including natural growth, in any area of the System; or take or possess any fish, bird, mammal, or other wild vertebrate or invertebrate animals or part or nest or egg thereof within any such area; or enter, use, or otherwise occupy any such area for any purpose; unless such activities are performed by persons authorized to manage such area, or unless such activities are permitted either under subsection (d) of this section or by express provision of the law, proclamation, Executive order, or public land order establishing the area, or amendment thereof: *Provided*, That the United States mining and mineral leasing laws shall continue to apply to any lands within the System to the same extent they apply prior to the effective date of this Act unless subsequently withdrawn under other authority of law. **[**Nothing**]** *With the exception of endangered species and threatened species listed by the Secretary pursuant to section 4 of the Endangered and Threatened Species Conservation Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of that Act, nothing* in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife **[**, including endangered species thereof,**]** on lands not within the System. The regulations permitting hunting and fishing of resident fish and wildlife within the System shall be, to the extent practicable, consistent with State fish and wildlife laws and regulations. The provisions of this Act shall not be construed as affecting the authority, jurisdiction, or responsibility of the several States to manage, control, or regulate fish and resident wildlife under State law or regulations in any area within the System.

SECTION 10(a) OF THE MIGRATORY BIRD CONSERVATION ACT

SEC. 10. (a) Areas of lands, waters, or interests therein acquired or reserved pursuant to this Act shall, unless otherwise provided by law, be administered by the Secretary of the Interior under rules and regulations prescribed by him to conserve and protect migratory birds in accordance with treaty obligations with Mexico and Canada, and other species of wildlife found thereon, including species that are **[**threatened with extinction**]** *listed pursuant to section 4 of the Endangered and Threatened Species Act of 1973 as endangered species or threatend species*, and to restore or develop adequate wildlife habitat.

SECTION 401(a) OF THE ACT OF JUNE 15, 1935

SEC. 401. (a) Beginning with the next full fiscal year and for each fiscal year thereafter, all revenues received by the Secretary of the Interior from the sale or other disposition of animals, timber, hay, grass, or other products of the soil, minerals, shells, sand, or gravel, from other privileges, or from leases for public accommodations or facilities incidental to but not in conflict with the basic purposes for which those areas of the National Wildlife Refuge System were established, during each fiscal year in connection with the operation and management of those areas of the National Wildlife Refuge System that are solely or primarily administered by him, through the United

States Fish and Wildlife Service, shall be covered into the United States Treasury and be reserved in a separate fund for disposition as hereafter prescribed. Amounts in the fund shall remain available until expended, and may be expended by the Secretary without further appropriation in the manner hereafter prescribed. The National Wildlife Refuge System (hereafter referred to as the "System") includes those lands and waters administered by the Secretary as wildlife refuges, lands acquired or reserved for the protection and conservation of fish and wildlife that are [threatened with extinction] *listed pursuant to section 4 of the Endangered and Threatened Species Act of 1973 as endangered species or threatened species*, wildlife ranges, game ranges, wildlife management areas, and waterfowl production areas established under any law, proclamation, Executive, or public land order.

SECTION 7(a)(1) OF THE LAND AND WATER CONSERVATION FUND ACT OF 1965

ALLOCATION OF MONEYS FOR FEDERAL PURPOSES

SEC. 7. (a) Moneys appropriated from the fund for Federal purposes shall, unless otherwise allotted in the appropriation Act making them available, be allotted by the President to the following purposes and subpurposes:

(1) For the acquisition for land, waters, or interests in land or waters as follows:

NATIONAL PARK SYSTEM; RECREATION AREAS.—Within the exterior boundaries of areas of the national park system now or hereafter authorized or established and of areas now or hereafter authorized to be administered by the Secretary of the Interior for outdoor recreation purposes.

NATIONAL FOREST SYSTEM.—Inholdings within (a) wilderness areas of the National Forest System, and (b) other areas of national forests as the boundaries of those forests exist on the effective date of this Act which other areas are primarily of value for outdoor recreation purposes: *Provided*, That lands outside of but adjacent to an existing national forest boundary, not to exceed five hundred acres in the case of any one forest, which would comprise an integral part of a forest recreational management area may also be acquired with moneys appropriated from this fund: *Provided further*, That not more than 15 per centum of the acreage added to the National Forest System pursuant to this section shall be west of the 100th meridian.

[THREATENED SPECIES.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction.]

ENDANGERED SPECIES AND THREATENED SPECIES.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5(a) of the Endangered and Threatened Species Conservation Act of 1973, needed for the purpose of conserving, protecting, restoring, or propagating endangered species of fish or wildlife or plants.

RECREATION AT REFUGES.—For the incidental recreation purposes of section 2 of the Act of September 28, 1962 (76 Stat. 653; 16 U.S.C. 460k–1); and

---

SECTION 2 OF THE ACT OF SEPTEMBER 28, 1962

Sec. 2. [The Secretary is authorized to acquire areas of land which are suitable for—

[(1) fish and wildlife-oriented recreational development, or

[(2) the protection of natural resources,

and are adjacent to the said conservation areas; except that the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps.] *The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—*

(1) incidental fish and wildlife-oriented recreational development,

(2) the protection of natural resources,

(3) the protection of endangered species or threatened species listed by the Secretary pursuant to section 4 of the Endangered and Threatened Species Conservation Act of 1973, or

(4) carrying out two or more of the purposes set forth in paragraphs (1) through (3) of this section,

and are adjacent to, or within, the said conservation areas, except that the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps. Lands acquired pursuant to this section shall become a part of the particular conservation area to which they are adjacent.

THE MARINE MAMMAL PROTECTION ACT OF 1972

* * * * * * *

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) The term "depletion" or "depleted" means any case in which the Secretary, after consultation with the Marine Mammal Commission and the Committee of Scientific Advisors on Marine Mammals established under title II of this Act, determines that the number of individuals within a species or population stock—

(A) has declined to a significant degree over a period of years;

(B) has otherwise declined and that if such decline continues, or is likely to resume, such species would be subject to the provisions of the Endangered *and* Threatened Species Conservation Act of [1969] *1973*; or

(C) is below the optimum carrying capacity for the species or stock within its environment.

* * * * * * *

TITLE I—CONSERVATION AND PROTECTION OF MARINE MAMMALS

MORATORIUM AND EXCEPTIONS

SEC. 101. (a) There shall be a moratorium on the taking and importation of marine mammals and marine mammal products, commencing on the effective date of this Act, during which time no permit may be issued for the taking of any marine mammal and no marine mammal or marine mammal products may be imported into the United States except in the following cases:

(1) Permits may be issued by the Secretary for taking and importation for purposes of scientific research and for public display if—

(A) the taking proposed in the application for any such permit, or

(B) the importation proposed to be made,

is first reviewed by the Marine Mammal Commission and the Committee of Scientific Advisors on Marine Mammals established under title II of this Act. The Commission and Committee shall recommend any proposed taking or importation which is consistent with the purposes and policies of section 2 of this Act. The Secretary shall, if he grants approval for importation, issue to the importer concerned a certificate to that effect which shall be in such form as the Secretary of the Treasury prescribes and such importation may be made upon presentation of the certificate to the customs officer concerned.

* * * * * * *

(3) (A) * * *

(B) Except for scientific research purposes as provided for in paragraph (1) of this subsection, during the moratorium no permit may be issued for the taking of any marine mammal which is classified as belonging to an endangered species *or threatened species* pursuant to the Endangered *and Threatened* Species Conservation Act of [1969] *1973* or has been designated by the Secretary as depleted, and no importation may be made of any mammal.

* * * * * * *

PROHIBITIONS

SEC. 102. (a) * * *

* * * * * * *

(b) Except pursuant to a permit for scientific research issued under section 104(c) of this title, it is unlawful to import into the United States any marine mammal if such mammal was—

(1) pregnant at the time of taking;

(2) nursing at the time of taking, or less than eight months old, whichever occurs later;

(3) taken from a species or population stock which the Secretary has, by regulation published in the Federal Register, designated as a depleted species or stock or which has been listed as [endangered under the Endangered Species Conservation Act of 1969] *an endangered species or threatened species pursuant to the Endangered and Threatened Species Conservation Act of 1973*; or

(4) taken in a manner deemed inhumane by the Secretary.

* * * * * * *

TITLE II—MARINE MAMMAL COMMISSION

* * * * * * *

DUTIES OF COMMISSION

Sec. 202. (a) The Commission shall—

(1) * * *

* * * * * * *

(6) recommend to the Secretary of the Interior such revisions of the [Endangered Species List, authorized by the Endangered Species Conservation Act of 1969] *endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered and Threatened Species Conservation Act of 1973*, as may be appropriate with regard to marine mammals; and

(7) recommend to the Secretary, other appropriate Federal officials, and Congress such additional measures as it deems necessary or desirable to further the policies of this Act, including provisions for the protection of the Indians, Eskimos, and Aleuts whose livelihood may be adversely affected by actions taken pursuant to this Act.

* * * * * * *

THE ENDANGERED SPECIES CONSERVATION ACT OF 1969 (SECTIONS 1-3 OF THE ACT OF OCTOBER 15, 1966)

[That (a) the Congress finds and declares that one of the unfortunate consequences of growth and development in the United States has been the extermination of some native species of fish and wildlife; that serious losses in other species of native wild animals with educational, historical, recreational, and scientific value have occurred and are occurring; and that the United States has pledged itself, pursuant to migratory bird treaties with Canada and Mexico and the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, to conserve and protect, where practicable, the various species of native fish and wildlife, including game and nongame migratory birds, that are threatened with extinction. The purposes of this Act are to provide a program for the conservation, protection, restoration, and propagation of selected species of native fish and wildlife, including migratory birds, that are threatened with extinction.

[(b) It is further declared to be the policy of Congress that the Secretary of the Interior, the Secretary of Agriculture, and the Secretary of Defense, together with the heads of bureaus, agencies, and services within their departments, shall seek to protect species of native fish and wildlife, including migratory birds, that are threatened with extinction, and, insofar as is practicable and consistent with the primary purposes of such bureaus, agencies, and services, shall preserve the habitats of such threatened species on lands under their jurisdiction.

[(c) A species of native fish and wildlife shall be regarded as threatened with extinction whenever the Secretary of the Interior finds, after consultation with the affected States, that its existence is endangered because its habitat is threatened with destruction, drastic modification, or severe curtailment, or because of overexploitation, disease, predation, or because of other factors, and that its survival requires assistance. In addition to consulting with the States, the Secretary shall, from time to time, seek the advice and recommendations of interested persons and organizations including, but not limited to, ornithologists, ichthyologists, ecologists, herpetologists, and mammalogists. He shall publish in the Federal Register the names of the species of native fish and wildlife found to be threatened with extinction in accordance with this paragraph.

[(d) For the purpose of sections 1 through 3 of this Act, the term 'fish and wildlife' means any wild mammal, fish, wild bird, amphibian, reptile, mollusk, or crustacean.

[SEC. 2. (a) The Secretary of the Interior shall utilize the land acquisition and other authorities of the Migratory Bird Conservation Act, as amended, the Fish and Wildlife Act of 1956, as amended, and the Fish and Wildlife Coordination Act to carry out a program in the United States of conserving, protecting, restoring, and propagating selected species of native fish and wildlife that are threatened with extinction.

[(b) In addition to the land acquisition authorities in such Acts, the Secretary is hereby authorized to acquire by purchase, donation, or otherwise, lands or interests therein needed to carry out the purpose of this Act relating to the conservation, protection, restoration, and propagation of selected species of native fish that are threatened with extinction.

[(c) Funds made available pursuant to the Land and Water Conservation Fund Act of 1965 (78 Stat. 897) may be used for the purpose of acquiring lands, waters, or interests therein pursuant to this section that are needed for the purpose of conserving, protecting, restoring, and propagating selected species of native fish and wildlife, including migratory birds, that are threatened with extinction. Not to exceed $5,000,000 may be appropriated annually pursuant to that Act for such purpose for any fiscal year, and the total sum appropriated for such purpose shall not exceed $15,000,000: *Provided*, That the Secretary shall, to the greatest extent possible, utilize fund from the Land and Water Conservation Fund Act of 1965 for such purpose. Such sums shall remain available until expended. The Secretary shall not use more than $2,500,000 to acquire lands, waters, or interests therein for any one area for such purpose unless authorized by Act of Congress.

[(d) The Secretary shall review other programs administered by him and, to the extent practicable, utilize such programs in furtherance of the purpose of this Act. The Secretary shall also encourage other Federal agencies to utilize, where practicable, their authorities in furtherance of the purpose of this Act and shall consult with and assist such agencies in carrying out endangered species program. The

Secretary is authorized to acquire by purchase, donation, exchange, or otherwise any privately owned land, water, or interests therein within the boundaries of any area administered by him, for the purpose of conserving, protecting, restoring, or propagating any selected species of native fish and wildlife that are threatened with extinction and each such acquisition shall be administered in accordance with the provisions of law applicable to such area, and there is authorized to be appropriated annually for fiscal years 1970, 1971, and 1972 not to exceed $1,000,000 to carry out the provisions of this sentence.

[SEC. 3. (a) In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the several States. Such cooperation shall include consultation before the acquisition of any land for the purpose of conserving, protecting, restoring, or propagating any endangered species of native fish and wildlife.

[(b) The Secretary may enter into agreements with the States for the administration and management of any area established for the conservation, protection, restoration, and propagation of endangered species of native fish and wildlife. Any revenues derived from the administration of such areas under these agreements shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383), as amended (16 U.S.C. 715s).]

(Sections 1–6 of the Act of December 5, 1969)

[That, for the purposes of sections 2 through 5 of this Act, the term—

[(1) "Secretary" means the Secretary of the Interior;

[(2) "fish or wildlife" means any wild mammal, fish, wild bird, amphibian, reptile, mollusk, or crustacean, or any part, products, egg, or offspring thereof, or the dead body or parts thereof;

[(3) "United States" includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, and Guam: and

[(4) "person" means any individual, firm, corporation, association, or partnership.

[SEC. 2. Except as provided in section 3 of this Act, whoever imports from any foreign country into the United States any species or subspecies of fish or wildlife which the Secretary has determined, in accordance with the provisions of section 3 of this Act, to be threatened with worldwide extinction, shall be punished in accordance with the provisions of section 4 of this Act.

[SEC. 3. (a) A species or subspecies of fish or wildlife shall be deemed to be threatened with worldwide extinction whenever the Secretary determines, based on the best scientific and commercial data available to him and after consultation, in cooperation with the Secretary of State, with the foreign country or countries in which such fish or wildlife are normally found and, to the extent practicable, with interested persons and organizations and other interested Federal agencies, that the continued existence of such species or subspecies of fish or wildlife is, in the judgment of the Secretary, endangered due to any of the following factors: (1) the destruction, drastic modification, or severe curtailment, or the threatened destruction, drastic modification, or severe curtailment, of its habitat, or (2) its overutilization for commercial or sporting purposes, or (3) the effect on it of disease or predation, or (4) other natural or man-made factors affecting its continued existence. After making such determination, the Secretary shall promulgate and from time to time he may revise, by regulation, a list in the Federal Register of such fish or wildlife by scientific, common, and commercial name or names, together with his determination. The Secretary shall at least once every five years conduct a thorough review of any such list to determine what, if any, changes have occurred relative to the continued existence of the species or subspecies of fish or wildlife then on the list and to determine whether such fish or wildlife continue to be threatened with worldwide extinction. Upon completion of such review, he shall take appropriate action consistent with the purposes of this Act. The Secretary shall, upon the request of any interested person, also conduct such review of any particular listed species or subspecies at any other time if he finds and publishes his finding that such person has presented substantial evidence to warrant such a review.

(b) In order to minimize undue economic hardship to any person importing any species or subspecies of fish or wildlife which are determined to be threatened with worldwide extinction under this section, under any contract entered into prior to the date of publication of such determination in the Federal Register of such species or subspecies, the Secretary, upon such person filing an application with him and upon filing such information as the Secretary may require showing, to his satisfaction, such hardship, shall permit such person to import such species or subspecies in such quantities and for such periods, not to exceed one year, as he determines to be appropriate.

[(c) The Secretary may permit, under such terms and conditions as he may prescribe, the importation of any species or subspecies of fish or wildlife listed in the Federal Register under this section for zoological, educational, and scientific purposes, and for the propagation of such fish or wildlife in captivity for preservation purposes, unless such importation is prohibited by any other Federal law or regulation.

[(d) The provisions of section 553 of title 5 of the United States Code shall apply to any regulation issued under this section.

[SEC. 4. (a) (1) Any person who violates any provision of section 2 or 3 of this Act or any regulation or permit issued thereunder, or any regulation issued under subsection (d) of this section, other than a violation the penalty for which is prescribed by subsection (b) of this section, shall be assessed a civil penalty by the Secretary of not more than $5,000 for each such violation. No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay the penalty assessed under this paragraph, the Secretary may request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found or resides or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. In hearing such action, the court shall have authority to review the violation and the assessment of the civil penalty de novo.

[(2) Any employee authorized pursuant to subsection (c) of this section to enforce the provisions of sections 2 and 3 of this Act, and any regulations or permits issued pursuant thereto or pursuant to subsection (d) of this section, shall have authority, in addition to any other authority provided by law relating to search and seizure, to execute any warrant to search for and seize any fish or wildlife or property or items taken, used, or possessed in connection with any violation of any such section, regulation, or permit with respect to which a civil penalty may be assessed pursuant to paragraph (1) of this subsection. Such fish, wildlife, property, or item so seized shall be held by any employee authorized by the Secretary or the Secretary of the Treasury pending disposition of proceedings by the Secretary involving the assessment of a civil penalty pursuant to paragraph (1) of this subsection; except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit such person to post a bond or other surety satisfactory to the Secretary. Upon the assessment of a civil penalty pursuant to paragraph (1) of this subsection for any nonwillful violation of any such section, regulation, or permit, such fish, wildlife, property, or item so seized may be proceeded against in any court of competent jurisdiction and forfeited to the Secretary for disposition by him in such manner as he deems appropriate. The owner or consignee of any such fish, wildlife, property, or item so seized shall, as soon as practicable following such seizure, be notified of that fact in accordance with regulations established by the Secretary or the Secretary of the Treasury. Whenever any fish or wildlife or property or item is seized pursuant to this subsection, the Secretary shall move to dispose of the civil penalty proceedings pursuant to paragraph (1) of this subsection as expeditiously as possible. If, with respect to any such fish, wildlife, property, or item so seized no action is commenced in any court of competent jurisdiction to obtain the forfeiture of such fish, wildlife, property, or item within thirty days following the disposition of proceedings involving the assessment of a civil penalty, such fish, wildlife, property, or item shall be immediately returned to the owner or the consignee in accordance with regulations promulgated by the Secretary.

[(b) Any person who willfully violates any provision of section 2 or 3 of this Act or any regulation or permit issued thereunder or any regulation issued under subsection (d) of this section shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than one year, or both.

[(c) The provisions of sections 2 and 3 of this Act and any regulations or permits issued pursuant thereto or pursuant to subsection (d) of this section shall be enforced by either the Secretary or the Secretary of the Treasury, or both such Secretaries. Either Secretary may utilize, by agreement, the personnel, services, and facilities of any other Federal agency or any State agency. Any employee of the Department of the Interior or the Department of the Treasury authorized by the Secretary or the Secretary of the Treasury may, without a warrant, arrest any person who such employee has probable cause to believe is willfully violating, in his presence or view, any such section, or any regulation or permit issued thereunder, the penalty for which is provided under subsection (b) of this section, and may execute a warrant or other process issued by an officer or court of competent jurisdiction to enforce the provisions of such sections, regulations or permits. An employee who has made an arrest of a person in connection with any such willful violation may search such person at the time of his arrest and seize any fish or wildlife or property or items taken, used, or possessed in connection with any such violation, or any such employee shall have authority, in addition to any other authority provided by law relating to search and seizure, to execute any warrant to search for and seize any such fish, wildlife, property, or item so taken, used, or possessed. Any fish or wildlife or property or item seized shall be held by any employee authorized by the Secretary or the Secretary of the Treasury or by a United States marshal pending disposition of the case by the court, commissioner, or magistrate, except that the Secretary may, in lieu thereof, permit such person to post a bond or other surety satisfactory to him. Upon conviction, any (1) fish or wildlife seized shall be forfeited to the Secretary for disposal by him in such manner as he deems appropriate, and (2) any other property or items seized may, in the discretion of the court, commissioner, or magistrate, be forfeited to the United States or otherwise disposed of. The owner or consignee of any such fish, wildlife, property, or item so seized, shall, as soon as practicable following such seizure, be notified of that fact in accordance with regulations established by the Secretary or the Secretary of the Treasury. If no conviction results from any such alleged violation, such fish, wildlife, property or item so seized in connection therewith shall be immediately returned to the owner or consignee in accordance with regulations promulgated by the Secretary, unless the Secretary, within thirty days following the final disposition of the case involving such violation, commences proceedings under subsection (a) of this section.

[(d) For the purposes of facilitating enforcement of sections 2 and 3 of this Act and reducing the costs thereof, the Secretary, with the approval of the Secretary of the Treasury, shall, after notice and an opportunity for a public hearing, from time to time designate, by regulation, any port or ports in the United States for the importation of fish and wildlife, other than shellfish and fishery products imported for commercial purposes, into the United States. The importation of such fish or wildlife into any port in the United States, except those so designated, shall be prohibited after the effective date of such designations; except that the Secretary, under such terms and conditions as he may prescribe, may permit importation at nondesignated ports for movement to designated ports of entry. Such regulations may provide other exceptions to such prohibition if the Secretary deems it appropriate and consistent with the purposes of this subsection.

[(e) In carrying out the provisions of sections 2 through 5 of this Act, the Secretary may issue such regulations as may be appropriate.

[SEC. 5. (a) In carrying out the provisions of sections 2 and 3 of this Act, the Secretary, through the Secretary of State, shall encourage foreign countries to provide protection to species and subspecies of fish or wildlife threatened with worldwide extinction, to take measures to prevent any fish or wildlife from becoming threatened with extinction, and shall cooperate with such countries in providing technical assistance in developing and carrying out programs to provide such protection, and shall, through the Secretary of State, encourage bilateral and multilateral agreements with such countries for the protection, conservation, and propagation of fish or wildlife.

The Secretary shall also encourage persons, taking directly or indirectly fish or wildlife in foreign countries for importation into the United States for commercial or other purposes, to develop and carry out, with such assistance as he may provide under any authority available to him, conservation practices designed to enhance such fish or wildlife and their habitat. The Secretary of State, in consultation with the Secretary, shall take appropriate measures to encourage the development of adequate measures, including, if appropriate, international agreements, to prevent such fish or wildlife from becoming threatened with worldwide extinction.

[(b) To assure the worldwide conservation of endangered species and to prevent competitive harm to affected United States industries, the Secretary, through the Secretary of State, shall seek the convening of an international ministerial meeting on fish and wildlife prior to June 30, 1971, and included in the business of that meeting shall be the signing of a binding international convention on the conservation of endangered species.

[(c) There are authorized to be appropriated such sums, not to exceed $200,000, as may be necessary to carry out the provisions of subsection (b) of this section, such sums to remain available until expended.

[SEC. 6. (a) The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act and amendments made by this Act, with the administration of the animal quarantine laws (21 U.S.C. 101 et seq., 21 U.S.C. 111, 21, U.S.C. 134 et seq.) and the Tariff Act of 1930, as amended (19 U.S.C. 1306).

[(b) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations of animals and other articles and no proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture.

[(c) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, as amended, including, without limitation, section 527 of said Act (19 U.S.C. 1527) relating to the importation of wildlife taken, killed, possessed or exported to the United States in violation of the laws or regulations of a foreign country.]

[From the Congressional Record, Sept. 18, 1973]

House Consideration and Passage of H.R. 37, With Amendments

ENDANGERED AND THREATENED SPECIES CONSERVATION ACT OF 1973

Mr. **Dingell**. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 37) to provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinction, and for other purposes, as amended.

The Clerk read as follows:

H.R. 37

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act, with the following table of contents, may be cited as the "Endangered and Threatened Species Conservation Act of 1973".

TABLE OF CONTENTS

Sec. 2. Findings, purposes, and policy.
Sec. 3. Definitions.
Sec. 4. Determination of endangered species and threatened species.
Sec. 5. Land acquisition.
Sec. 6. Cooperation with the States.
Sec. 7. Interagency cooperation.
Sec. 8. International cooperation.
Sec. 9. Prohibited acts.
Sec. 10. Exceptions.
Sec. 11. Penalties and enforcement.
Sec. 12. Endangered plants.
Sec. 13. Conforming amendments.
Sec. 14. Repealer.
Sec. 15. Authorization of appropriations.
Sec. 16. Effective date.

FINDINGS, PURPOSE, AND POLICY

Sec. 2. (a) The Congress finds and declares that one of the unfortunate consequences of growth and development in the United States and elsewhere has been the extermination of some species or subspecies of fish, wildlife, and plants; that serious losses in species of wild animals with educational, historical, recreational, and scientific value have occurred and are occurring; that the United States has pledged itself, pursuant to migratory bird treaties with Canada and Mexico, the Migratory and Endangered Bird Treaty with Japan, the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, the International Convention for the Northwest Atlantic Fisheries, the International Convention for the High Seas Fisheries of the North Pacific Ocean, the Convention on International Trade in Endangered Species of Wild Fauna and Flora, and other international agreements, to conserve and protect, where practicable, the various species of fish, wildlife, and plants facing extinction; that a key to more effective protection and management of native fish and wildlife that are endangered or threatened is to encourage and assist the States in developing programs for such fish and wildlife; and that the conservation, protection, restoration, or propagation of such species will inure to the benefit of all citizens.

(b) The purposes of this Act are to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved, protected, or restored, to provide a program for the conservation, protection, restoration, or propagation of such endangered species and threatened species, and to take such steps as may be appropriate to achieve the purposes of the treaties and conventions set forth in subsection (a) of this section.

(c) It is further declared to be the policy of Congress that all Federal departments and agencies shall seek to protect endangered species and threatened species and shall utilize their authorities in furtherance of the purposes of this Act.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) The term "Convention" means the Convention on International Trade in Endangered Species of Wild Fauna and Flora signed on March 3, 1973, and the appendices thereto.

(2) The term "endangered species" means any species of fish or wildlife which is in danger of extinction throughout all or a significant portion of its range.

(3) The term "fish or wildlife" means any wild member of the animal kingdom, whether or not raised in captivity, including without limitation, any mammal, fish, bird (including any migratory, nonmigratory, or endangered bird for which protection is also afforded by treaty or other international agreement) amphibian, reptile, molusk, or crustacean, and includes any part, product, egg, or offspring thereof, or the dead body or parts thereof.

(4) The term "foreign commerce" includes, among other things, any transaction—

(A) between persons within one foreign country;

(B) between persons in two or more foreign countries;

(C) between a person within the United States and a person in a foreign country; or

(D) between persons within the United States, where the fish and wildlife in question are moving in any country or countries outside the United States.

(5) The term "import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(6) The term "person" means (A) any private person or entity, and (B) any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(7) The term "plant" means any member of the plant kingdom, including seeds, roots and other parts thereof.

(8) The term "Secretary" means, except as otherwise herein provided, the Secretary of the Interior or the Secretary of Commerce as program responsibilities are vested pursuant to the provisions of Reorganization Plan Numbered 4 of 1970: except that with respect to the enforcement of the provisions of this Act and the Convention which pertain to the importation or exportation of terrestrial plants, the term means the Secretary of Agriculture.

(9) The term "species" includes any subspecies of fish or wildlife or plants and any other group of fish or wildlife of the same species or smaller taxa in common spatial arrangement that interbreed when mature.

(10) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(11) The term "take" means to harass, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to harass, pursue, hunt, shoot, wound, kill, trap, capture or collect.

(12) The term "threatened species" means any species of fish or wildlife which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

(13) The term "United States", when used in a geographical context, includes all States.

DETERMINATION OF ENDANGERED SPECIES AND THREATENED SPECIES

SEC. 4. (a) The Secretary shall by regulation determine whether any fish or wildlife is an endangered species or a threatened species because of any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease of predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

(b) (1) The Secretary shall make determinations required by subsection (a) of this section on the basis of the best scientific and commercial data available to him and after consultation, as appropriate, with the affected States, interested persons and organizations, other interested Federal agencies, and, in cooperation with the Secretary of State, with the country or countries in which the fish or wildlife concerned is normally found or whose citizens harvest such fish or wildlife on the high seas; except that in any case in which such determinations involve native species of fish or wildlife, the Secretary shall consult with and consider the recommendations of each State concerned before adding such species to, or removing such species from, any list published pursuant to subsection (c) of this section.

(2) In determining whether or not any fish or wildlife is an endangered species or a threatened species, the Secretary shall take into consideration those efforts, if any, being made by any nation or any political subdivision of any nation to protect such fish or wildlife, whether by predator control, protection of habitat and food supply, or other fish or wildlife conservation or management practices, within any area under the jurisdiction of any such nation or political subdivision.

(3) The Secretary shall give full consideration regarding whether or not fish or wildlife which have been designated by any foreign country, or pursuant to any international agreement, as requiring protection from unrestricted commerce are endangered species or threatened species.

(c)(1) The Secretary shall publish in the Federal Register, and from time to time he may by regulation revise, a list of all fish or wildlife determined by him to be endangered species and a list of all fish or wildlife determined by him to be threatened species. Each list shall refer to the species contained therein by scientific and common name or names and shall specify with respect to each such species over what portion of its range it is endangered or threatened.

(2) The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5, United States Code, also conduct a review of any listed or unlisted species of fish or wildlife proposed to be removed from or added to either of the lists published pursuant to paragraph (1) of this subsection, but only when he finds and publishes his finding that, to his satisfaction, such person has presented substantial evidence to warrant such a review.

(3) Any list in effect on the day before the date of the enactment of this Act of species of fish or wildlife determined by the Secretary of the Interior, pursuant to the Endangered Species Conservation Act of 1969 to be threatened with extinction shall be republished to conform to the classification for endangered species or threatened species, as the case may be, provided for in this Act, but until such republication, any such species so listed shall be deemed an endangered species within the meaning of this Act. The republication of any species pursuant to this paragraph shall not require public hearing or comment under section 553 of title 5, United States Code.

(d) Whenever the Secretary lists a species of fish or wildlife as an endangered species or a threatened species pursuant to subsection (a) of this section, he shall issue such regulations as he deems necessary and advisable to provide for the conservation, protection, restoration, or propagation of such species. The Secretary may by regulation prohibit with respect to any threatened species any act prohibited under section 9(a) of this Act with respect to endangered species; except that with respect to native species of fish or wildlife, such regulations shall apply in any State which has entered into a cooperative agreement pursuant to section 6(c) of this Act only to the extent that such regulations have also been adopted by such State.

(e) For the purpose of facilitating the enforcement of this Act, the Secretary may from time to time, by regulation, treat, to the extent he deems it advisable, any species of fish or wildlife or of any plant which is not listed pursuant to section 4 of this Act as an endangered species or threatened species, if such species so closely resembles in appearance, at the point in question, a species of fish or wildlife or plant which has been so listed that substantial difficulty is posed to enforcement personnel in attempting to differentiate between listed and unlisted species or subspecies of fish or wildlife or plants, and this difficulty poses an additional threat to an endangered species or threatened species.

(f) Section 553 of title 5, United States Code, shall apply with respect to any regulation issued pursuant to this Act.

LAND ACQUISITION

SEC. 5. (a) The Secretary shall establish and implement a program to conserve, protect, restore, or propagate (A) fish or wildlife which are listed as endangered species or threatened species pursuant to section 4 of this Act or (B) plants which are included in Appendices to the Convention. To carry out such program, the Secretary—

(1) shall utilize the land acquisition and other authority under the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956, as amended, and the Fish and Wildlife Coordination Act, as appropriate; and

(2) is authorized to acquire by purchase, donation, or otherwise, lands, waters, or interest therein, and such authority shall be in addition to any other land acquisition authority vested in him.

(b) Funds made available pursuant to the Land and Water Conservation Fund Act of 1965, as amended, may be used for the purpose of acquiring lands, waters, or interests therein under subsection (a) of this section.

COOPERATION WITH THE STATES

SEC. 6. (a) In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the States. Such cooperatioin shall include consultation with the States concerned before acquiring any land or water, or interest therein, for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species.

(b) The Secretary may enter into agreements with any State for the administration and management of any area established for the conservation, protection, restoration, or propagation of endangered or threatened species. Any revenues derived from the administration of such areas under these agreements shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383; 16 U.S.C. 715s).

(c) In furtherance of the purposes of this Act, the Secretary is authorized to enter into cooperative agreements to provide financial assistance to States, through their respective fish and wildlife agencies, which maintain or establish adequate and active programs to manage and protect endangered and threatened species. In order for any State to qualify for assistance under this subsection, the Secretary must find annually that under the State program—

(1) authority resides in the State fish and wildlife agency to manage and protect native species of fish or wildlife determined by the State agency or the Secretary to be endangered or threatened;

(2) the State fish and wildlife agency has established acceptable management programs, consistent with the purposes and policies of this Act, for all species of fish or wildlife indigenous to the State which are deemed by the Secretary to be endangered or threatened;

(3) the State fish and wildlife agency is authorized to conduct investigations to determine the status and requirements for survival of indigenous species or subspecies of fish and wildlife;

(4) the State fish and wildlife agency is authorized to establish programs, including the acquisition of land or aquatic habitat or interests therein, for protection and management of endangered or threatened species; and

(5) provision is made in such programs for public participation in designating indigenous species or subspecies of fish or wildlife as endangered or threatened.

(d)(1) Funds appropriated annually for purposes of assistance under subsection (c) shall be available to the Secretary for allocation to the States under cooperative agreements to assist in development by States of programs for management and protection of endangered and threatened species of fish or wildlife including research, censusing, law, enforcement, and habitat acquisition or improvement. The Secretary shall make an allocation of appropriated funds to the States based on consideration of—

(A) the international obligations of the United States to protect a species;

(B) the national significance of a species found to be endangered or threatened within a State; and

(C) the potential for preventing extinction of a species and restoring such species to nonendangered or nonthreatened status.

So much of any appropriated funds allocated for obligation to any State for any fiscal year as remains unobligated at the close thereof is authorized to be made available to that State until the close of the succeeding fiscal year. Any amount allocated to any State which is unobligated at the end of the period during which it is available for expenditure is authorized to be made available for expenditure by the Secretary in conducting programs under this Act.

(2) Such cooperative agreements shall provide for (A) the actions to be taken by the Secretary and the States; (B) the benefits that are expected to be de-

rived in connection with preservation and restoration of endangered or threatened species; (C) the estimated cost of these actions; and (D) the share of such costs to be borne by the Federal Government and by the States; except that—

(i) the Federal share of such program costs shall not exceed 66⅔ per centum of the estimated program costs stated in the agreement; and

(ii) the Federal share may be increased to 75 per centum whenever two or more States, having a common interest in a program that the Secretary deems to meet the criteria of paragraph (1), enter jointly into an agreement with the Secretary.

The Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon in the cooperative agreement.

(e) Any action taken by the Secretary under this section shall be subject to his periodic review at no greater than annual intervals.

(f) Any State law or regulation which applies with respect to the importation or exportation of, or interstate or foreign commerce in, endangered or threatened species is void to the extent that it may effectively (1) permit what is prohibited by this Act or by any regulation which implements this Act or (2) prohibit what is authorized pursuant to an exemption or permit provided for in this Act or in any regulation which implements this Act. This Act shall not otherwise be construed to void any State law or regulation which is intended to conserve and manage migratory, resident, or introduced fish or wildlife, or to permit or prohibit sale of such fish or wildlife. Any State law or regulation respecting the taking of an endangered or threatened species may be more restrictive than the exemptions or permits provided for in this Act or in any regulation which implements this Act, but not less restrictive than the prohibitions so defined.

(g) The Secretary is authorized to promulgate such regulations as may be appropriate to carry out the provisions of this section relating to financial assistance to States.

(h) There are hereby authorized to be appropriated for the fiscal years 1974, 1975, and 1976 such sums as may be necessary to carry out the purposes of this section.

INTERAGENCY COOPERATION

SEC. 7. (a) The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purpose of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the protection of endangered species and threatened species lised pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

(b) The Secretary of Agriculture is authorized, not withstanding the provisions of any other law, to bear the full cost, or any lesser amount that he, in consultation with the Secretary, may determine desirable to accomplish the objectives of the Act, of the cost of installing any practice, measure, work of improvement, facility, or other developmental, protective, or management systems on private land, the primary purpose of which is to enable landowners to comply with the regulations, or other recommendations, of the Secretary pertaining to the conservation, protection, restoration, or propagation of such species. The Secretary of Agriculture, in carrying out the purposes of this subsection, shall utilize his authorities to conduct research and investigations into vegetative and structural methods and other methods and practices, measures, works of improvement, and facilities most appropriate or effective in the protection, control, management, or enhancement of such species. If determined desirable, the Secretary and the Secretary of Agriculture may jointly carry out such research and investigations. The Secretary may transfer to the Secretary of Agriculture such funds as may be necessary to carry out the purposes of this subsection.

INTERNATIONAL COOPERATION

SEC. 8. (a) As a demonstration of the commitment of the United States to the worldwide protection of endangered species and threatened species, the President may, subject to the provisions of section 1415 of the Supplemental Appropriation Act, 1953 (31 U.S.C. 724), use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistant Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and management of programs in that country which the Secretary determines to be necessary or useful for the conservation, protection, restoration, or propagation of any endangered species or threatened species listed by the Secretary pursuant to section 4 of this Act. The President shall provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, waters, or interests therein) to foreign countries under this section under such terms and conditions as he deems appropriate. Whenever foreign currencies are available for the provision of assistance under this section, such currencies shall be used in preference to funds appropriated under the authority of section 15 of this Act.

(b) In order to carry out further the provisions of this Act, the Secretary, through the Secretary of State, shall encourage—

(1) foreign countries to provide for the protection, conservation, restoration, or propagation of fish or wildlife including endangered species and threatened species listed pursuant to section 4 of this Act;

(2) the entering into bilateral or multilateral agreements with foreign countries to provide for such protection, conservation, restoration, or propagation; and

(3) foreign persons who directly or indirectly take fish or wildlife and plants in foreign countries or on the high seas for importation into the United States for commercial or other purposes to develop and carry out, with such assistance as he may provide, conservation practices designed to enhance such fish or wildlife and plants and their habitat.

(c) After consultation with the Secretary of State, the Secretary may—

(1) assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign countries and international organizations in developing personnel resources and programs which promote the protection, conservation, restoration, or propagation of fish or wildlife and plants; and

(2) conduct or provide financial assistance for the educational training of foreign personnel, in this country or abroad, in fish, wildlife and plant management, research and law enforcement and to render professional assistance abroad in such matters.

(d) After consultation with the Secretary of State and the Secretary of the Treasury, as appropriate, the Secretary may conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the purposes of this Act.

(e) The President is authorized and directed to designate appropriate agencies to act as the Management Authority or Authorities and the Scientific Authority or Authorities pursuant to the Convention. The agencies so designated shall thereafter be authorized to do all things assigned to them under the Convention, including the issuance of permits and certificates. The agency designated by the President to communicate with other parties to the Convention and with the Secretariat shall also be empowered, where appropriate, in consultation with the State Department, to act on behalf of and represent the United States in all regards as required by the Convention. The President shall also designate those agencies which shall act on behalf of and represent the United States in all regards as required by the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere.

PROHIBITED ACTS

SEC. 9. (a) Except as provided in section 10 of this Act, it is unlawful for any person subject to the jurisdiction of the United States to—

(1) import into, or export from, the United States any endangered species listed pursuant to section 4 of this Act;

(2) take any such species within the United States or the territorial sea of the United States, upon the high seas, or in any foreign country, except that this paragraph shall apply within any State which has entered into a cooperative agreement pursuant to section 6(c) of this Act only to the extent that the taking of any such species is contrary to the law of such State;

(3) possess, sell, deliver, carry, transport, or ship, by any means whatsoever, any such species taken in violation of paragraph (2);

(4) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and for commercial purposes, any such species;

(5) sell or offer for sale in interstate or foreign commerce any such species; or

(6) violate any regulation promulgated by the Secretary pursuant to section 4(d) of this Act.

(b)(1) It is unlawful for any person subject to the jurisdiction of the United States to engage in any trade in any specimens contrary to the provisions of the Convention, or to possess any specimens traded contrary to the provisions of the Convention, including the definitions of terms in article I thereof.

(2) Any importation into the United States of fish or wildlife shall, if—

(A) such fish or wildlife is not an endangered species listed pursuant to section 4 of this Act but is listed in Appendix II to the Convention.

(B) the taking and exportation of such fish or wildlife is not contrary to the provisions of the Convention and all other applicable requirements of the Convention have been satisfied, and

(C) the applicable requirements of subsections (d) and (e) of this section have been satisfied,

be presumed to be an importation not in violation of any provision of this Act or any regulation issued pursuant to this Act.

(c)(1) It is unlawful for any person to engage in business as an importer or exporter of fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered or threatened species, and (B) are imported for commercial purposes or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants without first having obtained a permit from the Secretary.

(2) Any person required to obtain a permit under paragraph (1) of this subsection shall—

(A) keep such records as will fully and correctly disclose each importation or exportation of fish, wildlife, or plants made by him and the subsequent disposition made by him with respect to such fish, wildlife, or plants;

(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his place of business, an opportunity to examine his inventory of imported fish, wildlife, or plants and the records required to be kept under subparagraph (A) of this paragraph, and to copy such records; and

(C) file such reports as the Secretary may require.

(3) The Secretary shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.

(d) It is unlawful for any person importing or exporting fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered or threatened species, and (B) are imported for commercial purposes or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants to fail to file any declaration or report as the Secretary deems necessary to facilitate enforcement of this Act or to meet the obligations of the Convention.

(e)(1) It is unlawful for any person subject to the jurisdiction of the United States to import into or export from the United States any fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered species or threatened species, and (B) are imported for commercial purposes or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants, except at a port or ports designated by the Secretary. For the purpose of facilitating enforcement of this Act and reducing the costs thereof, the Secretary, with approval of the Secretary of the Treasury and after notice and opportunity for public hearing, may, by regulation, designate ports and change such designations. The Secretary, under such terms and conditions as he may prescribe, may permit the importation or exportation at nondesignated ports in the interest of the health or safety of the fish or wildlife or plants, or for other reasons if, in his discretion, he deems it appropriate and consistent with the purpose of this subsection.

(2) Any port designated by the Secretary of the Interior under the authority of section 4(d) of the Act of December 5, 1969 (16 U.S.C. 666cc–4(d)), shall, if such designation is in effect on the day before the date of the enactment of this Act, be deemed to be a port designated by the Secretary under paragraph (1) of this subsection until such time as the Secretary otherwise provides.

(f) It is unlawful for any person subject to the jurisdiction of the United States to attempt or conspire to commit, or cause to be committed, any offense defined in this section.

EXCEPTIONS

SEC. 10. (a) The Secretary may permit, under such terms and conditions as he may prescribe, any act otherwise prohibited by section 9 of this Act for scientific purposes or to enhance the propagation or survival of the affected species.

(b)(1) If any person enters into a contract with respect to a species or subspecies of fish or wildlife or plant before the date of the publication in the Federal Register of notice of proposed listing of that species as an endangered species and the subsequent listing of that species as an endangered species pursuant to section 4 of this Act will cause undue economic hardship to such person under the contract, the Secretary, in order to minimize such hardship, may exempt such person from the application of section 9(a) of this Act to the extent the Secretary deems appropriate if such person applies to him for such exemption and includes with such application such information as the Secretary may require to prove such hardship; except that (A) no such exemption shall be for a duration of more than one year from the date of publication in the Federal Register of notice of a proposed listing of the species or subspecies concerned, or shall apply to a quantity of fish or wildlife or plants in excess of that specified by the Secretary; (B) the one-year period for those species or subspecies of fish or wildlife listed by the Secretary as endangered prior to the effective date of this Act shall expire in accordance with the terms of section 3 of the Act of December 5, 1969 (83 Stat. 275); and (C) no such exemption may be granted for the importation or exportation of a specimen listed in Appendix I of the Convention which is to be used for primarily commercial purposes.

(2) The Secretary shall publish notice in the Federal Register of each application for an exemption which is made under this subsection. Each notice shall invite the submission from interested parties, within thirty days after the date of the notice, written data, views, or arguments with respect to the application. Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.

(c) The Secretary may grant exemptions under subsections (a) and (b) of this section only if he finds and publishes his finding that (1) such exceptions were applied for in good faith, (2) if granted and exercised will not operate to the disadvantage of such endangered species, and (3) will be consistent with the purposes and policy set forth in section 2 of this Act.

(d) Any taking by an Indian, Aleut, or Eskimo of any marine mammal (as defined in section 2(5) of the Marine Mammal Protection Act of 1972) which is listed pursuant to section 4(a) of this Act as an endangered species or threatened species shall not be deemed to be in violation of this Act or any regulation issued pursuant thereto if such taking is lawful under section 101(1) of the Marine Mammal Protection Act of 1972.

PENALTIES AND ENFORCEMENT

SEC. 11. (a)(1) Any person who violates any provisions of this Act, of any permit or certificate issued hereunder, or of any regulation issued in order to implement subsection (a) (1), (2), (3), (4), or (5), (b), (c) (other than a regulation relating to recordkeeping or filing of reports), (e), or (f) of section 9 of this Act may be assessed a civil penalty by the Secretary of not more than $10,000 for each such violation. Any person who knowingly violates any provision of any other regulation issued under this Act may be assessed a civil penalty by the Secretary of not more than $5,000 for each such violation. No penalty may be assessed under this subsection unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be remitted or mitigated by the Secretary. Upon any failure to pay a penalty asssessed under this subsection, the Secretary may request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found, resides, or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. The court shall hear such action on the record made before the Secretary and shall sustain his action if it supported by substantial evidence on the record considered as a whole.

(2) Hearings held during proceedings for the assessment of civil penalties authorized by paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5, United States Code. The Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(b) (1) Any person who knowingly commits an act which violates any provision of this Act, of any permit or certificate issued hereunder, or of any regulation issued in order to implement subsection (a) (1), (2), (3), (4), or (5), (b), (c) (other than a regulation relating to recordkeeping or filing of reports, (e), or (f) of section 9 of this Act shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both. Any person who knowingly commits an act which violates any provision of any other regulation issued under this Act shall, upon conviction, be fined not more than $10,000 or imprisoned for not more than six months, or both. Upon the recommendation of the Secretary, the Secretary of the Treasury is authorized to pay an amount equal to one-half of the fine incurred but not to exceed $2,500 to any person who furnishes information which leads to a conviction for a criminal violation of any provision of this Act or any regulation or permit issued thereunder. Any officer or employee of the United States or of any State or local government who furnishes information or renders service in the performance of his official duties shall not be eligible for payment under this section.

(2) The head of any Federal agency which has issued a lease, license, permit, or other agreement authorizing the use of Federal lands, including grazing of domestic livestock, to any person who is convicted of a criminal violation of this Act or any regulation, permit, or certificate issued hereunder may immediately modify, suspend, or revoke each lease, license, permit, or other agreement. The Secretary shall also suspend for a period of up to one year, or cancel, any Federal hunting or fishing permits or stamps issued to any person who is convicted of a criminal violation of any provision of this Act, or any regulation, permit or certificate issued hereunder. The United States shall not be liable for the payments of any compensation, reimbursement, or damages in connection with the modification, suspension or revocation of any leases, licenses, permits, stamps, or other agreements pursuant to this section.

(c) The several district courts of the United States including the courts enumerated in section 460 of title 28, United States Code, shall have jurisdiction over any actions arising under this Act. For the purpose of this Act, American Samoa shall be included within the judicial district of the District Court of the United States for the District of Hawaii.

(d) (1) The provisions of this Act and any regulations or permits issued pursuant thereto shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all such Secretaries. Each such Secretary may utilize by agreement, with or without reimbursement, the personnel services, and facilities of any other Federal agency or any State agency for purposes of enforcing this Act.

(2) The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as

(d) (1) The provisions of this Act and any regulations or permits issued thereunder.

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, to enforce this Act may detain for inspection and inspect any package, crate, or other container, including its contents, and all accompanying documents, upon importation or exportation. Such person may execute and serve any arrest warrant, search warrant, or other warrant or civil or criminal process issued by any officer or court of competent jurisdiction for enforcement of this Act.

Such person so authorized may search and seize, with or without a warrant, as authorized by law. Any fish, wildlife, property, or item so seized shall be held by any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, property, or item pursuant to paragraph (4) of this subsection; except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

(4)(A) All fish or wildlife or plants taken, possessed, sold, purchased, offered for sale or purchase, transported, delivered, received, carried, shipped, exported, or imported contrary to the provisions of this Act, any regulation made pursuant thereto, or any permit or certificate issued hereunder shall be subject to forfeiture to the United States.

(B) All guns, traps, nets, and other equipment, vessels, vehicles, aircraft, and other means of transportation used to aid the taking, possessing, selling, purchasing, offering for sale or purchase, transporting, delivering, receiving, carrying, shipping, exporting, or importing of any fish or wildlife or plants in violation of this Act, any regulation made pursuant thereto, or any permit or certificate issued thereunder shall be subject to forfeiture to the United States upon conviction of a criminal violation pursuant to section 11(b)(1) of this Act.

(5) All provisions of law relating to the seizure, forfeiture, and condemnation of a vessel for violation of the customs law, the disposition of such vessel or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act; except that all powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Treasury Department shall, for the purposes of this Act, be exercised or performed by the Secretary or by such persons as he may designate.

(e) The Secretary, the Secretary of the Treasury, and the Secretary of the Department in which the Coast Guard is operating, are authorized to promulgate such regulations as may be appropriate to enforce this Act, and charge reasonable fees for expenses to the Government connected with permits or certificates authorized by this Act, including processing applications and reasonable inspections, and with the transfer, board, handling, or storage of fish or wildlife or plants and evidentiary items seized and forfeited under this Act. All such fees collected pursuant to this subsection shall be deposited in the Treasury to the credit of the appropriation which is current and chargeable for the cost of furnishing the services. Appropriated funds may be expended pending reimbursement from parties in interest.

(f)(1) Except as provided in paragraph (2) of this subsection any person may commence a civil suit on his own behalf to enjoin any person, including the United States and any other governmental instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution), who is alleged to be in violation of any provision of this Act or regulation issued under the authority thereof. The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any such provision or regulation, as the case may be.

(2) No action may be commenced—

(A) prior to sixty days after written notice of the violation has been given to the Secretary, and to any alleged violator of any such provision or regulation;

(B) if the Secretary has commenced action to impose a penalty pursuant to subsection (a) of this section; or

(C) if the United States has commenced and is diligently prosecuting a criminal action in a court of the United States or a State to redress a violation of any such provision or regulation.

(3)(A) Any suit under this subsection may be brought in the judicial district in which the violation occurs.

(B) In any such suit under this subsection in which the United States is not a party, the Attorney General, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

(4) The court, in issuing any final order in any suit brought pursuant to paragraph (1) of this subsection, may award costs of litigation (including reasonable

attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(5) The injunctive relief provided by this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or limitation or to seek any other relief (including relief against the Secretary or a State agency).

(g) The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act with the administration of the animal quarantine laws (21 U.S.C. 101–105, 111–135b, and 612–614) and section 306 of the Tariff Act of 1930 (19 U.S.C. 1306). Nothing in this Act or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations or possession of animals and other articles and no proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture.

(h) Nothing in this Act shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, including, without limitation, section 527 of that Act (19 U.S.C. 1527), relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.

ENDANGERED PLANTS

SEC. 12. The Secretary of the Smithsonian Institution, in conjunction with other affected agencies, is authorized and directed to review (1) species of plants which are now or may become endangered or threatened and (2) methods of providing adequate protection to such species, and to report to Congress, within one year after the date of the enactment of this Act, the results of such review including recommendations for new legislation or the amendment of existing legislation.

CONFORMING AMENDMENTS

SEC. 13. (a) Subsection 4(c) of the Act of October 15, 1966 (80 Stat. 928, 16 U.S.C. 668dd(c)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered species and threatened species listed by the Secretary pursuant to section 4 of the Endangered and Threatened Species Conservation Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of that Act, nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the system."

(b) Subsection 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224, 16 U.S.C. 715i(a)) and subsection 401(a) of the Act of June 15, 1935 (49 Stat. 383, 16 U.S.C. 715s(a)), are each amended by striking out "threatened with extinction," and inserting in lieu thereof the following: "listed pursuant to section 4 of the Endangered and Threatened Species Act of 1973 as endangered species or threatened species,".

(c) Section 7(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601–9(a)(1)) is amended by striking out:

"THREATENED SPECIES.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction." and inserting in lieu thereof the following:

"ENDANGERED SPECIES AND THREATENED SPECIES.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5(a) of the Endangered and Threatened Species Conservation Act of 1973, needed for the purpose of conserving, protecting, restoring, or propagating endangered species of fish or wildlife or plants."

(d) The first sentence of section 2 of the Act of September 28, 1962, as amended (76 Stat. 653, 16 U.S.C. 460k–1), is amended to read as follows:

"The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—

"(1) incidental fish and wildlife-oriented recreational development,

"(2) the protection of natural resources,

"(3) the protection of endangered species or threatened species listed by the Secretary pursuant to section 4 of the Endangered and Threatened Species Conservation Act of 1973, or

"(4) carrying out two or more of the purposes set forth in paragraphs (1) through (3) of this section, and are adjacent to, or within, the said conservation areas, except that the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps."

(e) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) is amended—

(1) by striking out "Endangered Species Conservation Act of 1960" in section 3(1)(B) thereof and inserting in lieu thereof the following "Endangered and Threatened Species Conservation Act of 1973";

(2) by striking out "pursuant to the Endangered Species Conservation Act of 1969" in section 101(a)(3)(B) thereof and inserting in lieu thereof the following: "or threatened species pursuant to the Endangered and Threatened Species Conservation Act of 1973";

(3) by striking out "endangered under the Endangered Species Conservation Act of 1973";

(3) by striking out "endangered under the Endangered Species Conservation Act of 1969" in section 102(b)(3) thereof and inserting in lieu thereof the following: "an endangered species or threatened species pursuant to the Endnagered and Threatened Species Conservation Act of 1973"; and

(4) by striking out "Endangered Species List, authorized by the Endangered Species Conservation Act of 1969," in section 202(a)(6) thereof and inserting in lieu thereof the following: "endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered and Threatened Species Conservation Act of 1973".

REPEALER

Sec. 14. The Endangered Species Conservation Act of 1969 (section 1 through 3 of the Act of October 15, 1966, and sections 1 through 6 of the Act of December 5, 1969; 16 U.S.C. 668aa—668cc-6), is repealed.

AUTHORIZATION OF APPROPRIATIONS

Sec. 15. Except as authorized in section 6 of this Act, there are authorized to be appropriated—

(A) not to exceed $6,000,000 for fiscal year 1974, not to exceed $8,000,000 for fiscal year 1975 and not to exceed $10,000,000 for fiscal year 1976, to enable the Department of the Interior to carry out such functions and responsibilities as it may have been given under this Act; and

(B) not to exceed $1,500,000 for fiscal year 1975 and not to exceed $2,000,000 for fiscal year 1976, to enable the Department of Commerce to carry out such functions and responsibilities as it may have been given under this Act.

EFFECTIVE DATE

Sec. 16. This Act shall take effect on the date of its enactment.

The Speaker. Is a second demanded?

Mr. Goodling. Mr. Speaker, I demand a second.

The Speaker. Without objection, a second will be considered as ordered.

There was no objection.

The Speaker. The gentleman from Michigan and the gentleman from Pennsylvania will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Michigan.

Mr. Dingell. Mr. Speaker, I yield to the distinguished chairman of the Committee on Merchant Marine and Fisheries, the gentlewoman from Missouri, such time as she may require.

Mrs. Sullivan. Mr. Speaker, H.R. 37 should be enacted at the earliest possible moment. It represents hours of intense committee consideration and of painstaking analysis by members and staff of the committee.

H.R. 37 revises and extends existing law—law which was proposed by this committee in earlier years. As far as it went, the earlier legislation has been valuable—even invaluable—but that law did not go far enough. That defect we hope to remedy today.

H.R. 37 comes on the heels of and implements, an important international convention, which produced a treaty providing for the protection and preservation of endangered species of plants and animals. That Convention, signed by the United States on March 3 of this year, has been submitted to the Congress for approval by the Senate and was in fact approved 5 months later. That is pretty fast action and I would hope that we can reciprocate by moving promptly on H.R. 37 today.

That additional protection for endangered species of plants and animals is necessary is indisputable. Within the past few years, it was necessary for the Department of the Interior to place eight species of whales on that list, and as many species of "spotted cats": leopards, tigers, cheetahs, et cetera.

For the most part, the principal threat to animals stems from the destruction of their habitat. The destruction may be intentional, as would be the case in clearing of fields and forests for development of resource extraction, or it may be unintentional, as in the case of the spread of pesticides beyond their target area. Whether it is intentional or not, however, the result is unfortunate for the species of animals that depend on that habitat, most of whom are already living on the edge of survival. H.R. 37 will meet this problem by providing funds for acquisition of critical habitat through the use of the land and water conservation fund. It will also enable the Department of Agriculture to cooperate with willing landowners who desire to assist in the protection of endangered species, but who are understandably unwilling to do so at excessive cost to themselves.

Another hazard to endangered species arises from those who would capture or kill them for pleasure or profit. There is no way that the Congress can make it less pleasurable for a person to take an animal, but we can certainly make it less profitable for them to do so. H.R. 37 makes it a Federal offense to violate the act or regulations published pursuant to the act, and prescribes penalties and fines of up to $20,000 for persons convicted of violations.

I should point out, however, that in our desire to create unpleasant consequences for those who violate the act, we have at the same time been very aware of the need to assure due process for anyone accused of violating the act. There are requirements for public hearings on violations, with a full opportunity for the defendants to review the evidence against them, and judicial review of decisions which are felt to be unjust.

Protection of endangered species is, as the gentleman from Michigan has already indicated, far more than a matter of esthetics. As our report on the bill points out, endangered species of plants and animals possess genetic characteristics which cannot be replaced or artificially reproduced. Once the passenger pigeon disappeared, it was gone. It will not, and cannot, ever be back. The loss of the passenger pigeon is unfortunate; it may or may not be tragic. The loss of the blue whale, on the other hand, might very well be tragic: It is possibly the largest mammal ever to have existed on the face of the Earth, and it may be the most efficient harvester of tiny marine life that exists today. In a protein-hungry world, the loss of huge potential sources of food is not an occasion which can be lightly considered.

When we threaten endangered species, we tinker with our own futures. We run risks whose magnitude we understand dimly, if at all. And we do so, for the most part, for reasons that can be described most charitably as trivial.

The purpose and intent of the bill before you is to bring into focus the costs of further endangering the plants and animals of this world. I believe that we have achieved this objective, and I support the bill strongly, and urge the support of my colleagues.

Mr. DINGELL. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, I strongly urge enactment of H.R. 37, a bill to protect and encourage endangered and threatened species of fish and wildlife. This bill has been considered at length by our committee in the course of hearings during this and the previous Congress. It has been unanimously endorsed by members of our subcommittee and by members of the full Committee on Merchant Marine and Fisheries. It should be enacted today.

H.R. 37 amends and extends laws now on the books: Endangered species legislation enacted in 1966 and 1969. The existing laws are sound, as far as they go, but later events have shown that they do not go far enough. Present laws need to be made more flexible, to adapt themselves to the needs of the animals themselves and to deal with problems which did not exist until a few years ago.

There is a further need, which enactment of this legislation will meet. In March of this year, representatives of 80 nations met in Washington, in response to an earlier congressional directive, and negotiated a comprehensive convention for the protection of endangered species of plants and animals. On August 3, that convention was approved by the Senate, making this country the first to approve the convention. That it will ultimately be in force—which will take place after the 10th ratification takes place—is not questioned by anyone. Enactment of H.R. 37 will take all the steps which must be taken by this country in order to fully implement the requirements of this convention. It will place us in the forefront of the nations of the world that have expressed interest and concern for this problem.

The principal changes to be effected by passage of H.R. 37 are:

First, it extends protection to animals which may become endangered, as well as to those which are now endangered.

Second, it extends protection to animals which are in trouble in any significant portion of their range, rather than threatened, and they must now be, with worldwide extinction.

Third, it makes taking of such animals a Federal offense.

Fourth, it eliminates existing dollar ceilings on acquisition of critical habitat for such species. The present ceiling, which has been almost exhausted, is $15 million.

Fifth, it gives to the Department of Commerce the authority to manage endangered and threatened species which were transferred to them under Reorganization Plan No. 4 of 1970.

Sixth, it authorizes the use of counterpart funds for programs involving foreign countries, wherever this is appropriate.

Seventh, it authorizes and encourages the State governments to adopt and enforce laws and regulations which are consistent with those adopted by the Federal Government.

Eighth, it clarifies and extends the authority of the Department of Agriculture to assist landowners, wherever they are willing to carry out the purposes of the act.

Ninth, it directs that a study be made of the problems associated with the domestic regulation of trade in endangered species of plants.

For a more extended discussion of these and other changes which will be accomplished by passage of this bill, I invite the attention of the House to our committee's report on H.R. 37 (H. Rept. 93-412).

I would like to address for a few moments the issue of the relationship of the State and Federal governments under this act. Let me begin by putting to rest one story that has circulated from time to time: H.R. 37 does not preempt the States from enacting endangered species legislation.

Rather it declares a national policy that endangered species should be protected, and prescribes what amounts to a Federal floor to regulate the taking of such species. The States are free, just as they are now, to adopt stricter rules except to the extent that these contravene specific Federal permits or prohibitions, and to enforce these.

The bill goes further and provides a mechanism whereby the State and Federal governments may develop cooperative agreements governing the research, management and/or enforcement of regulations involving endangered or threatened species. The bill also provides for the Federal Government to contribute to the financial costs of State endangered species programs on a matching basis.

I might say that we have given this troublesome question of State and Federal relationships a great deal of thought and consideration. On the basis of this review, I am satisfied that the formula which we have developed is the best and most workable possible. I do not feel that it would be proper or desirable to place a heavy burden upon the Federal agencies to make findings that State programs are not consistent with the Federal plan before allowing that plan to be instituted. I say this principally because I am aware, as we all are, that there is considerable inertia involved in getting Government agencies and agency programs moving, and I feel that that inertia should not operate to the detriment of the species of animals with which this legislation is concerned. It makes far more sense, in my view, to provide an existing framework of rules and then to encourage the States to work cooperatively with the Federal Government in developing regulatory procedures which are consistent with that framework.

It may well be that some States have laws and regulations on their books that will allow them to negotiate and sign cooperative agreements soon after this bill becomes law. This is certainly to be encouraged, and I have received firm assurances from the agencies concerned that there will be prompt and good faith consultations at an early date to see that such agreements are rapidly developed. It is not our intention to encourage a long and dragged-out process of bureaucratic review and delay and we do not feel that H.R. 37 can be used in this fashion.

As a further inducement to the development of such agreements we have also provided for the furnishing of financial assistance to state wildlife agencies to assist their carrying out endangered species programs along the lines of the act. There is an open-ended authorization for this purpose in the act, and we have been informed that under no circumstances would the funds requested under this authorization exceed $10 million in any year.

H.R. 37 has been attacked by some as a anti-hunter bill; it has been attacked by others as a prohunter bill. In reality, it is neither—it is a bill which has been carefully drafted to encourage State and foreign governments to develop healthy stocks of animals occurring naturally within their borders. If these animals are considered valuable as trophy animals, and are not endangered, they should be regarded as a potential source of revenue to the managing agency and they should be encouraged to develop to the maximum extent compatible with the ecosystem upon which they depend.

I have been informed by the Department of the Interior that they will carefully review the status of animal stocks in foreign countries and that where nonendangered trophy animals are being managed in such a way as to assure their continued and healthy existence, no barriers will be placed upon the continued harvesting of those animals by the government. This is as it should be, because it is only in the understanding that these animals have a real and measurable value that many of the less developed countries will agree to take steps to assure their continued existence.

There is language in the legislation which incorporates a presumption of validity as to export permits issued by governments of foreign countries for animals which are not on appendix I of the international endangered species convention. This will allow persons subject to U.S. jurisdiction to accept export permits from these countries for animals which have legitimately been taken as trophies without the fear that the U.S. Government will arbitrarily refuse to accept those permits as valid.

We are assured by representatives of the Government that this is what they would do in any case, but we felt it best to spell out just what could and should be done at this time, in order to avoid future misunderstandings.

After the question of State versus Federal responsibilities, I would say that the most troublesome issue which confronted the committee was that of the best way to deal with endangered species of plants. This is a subject that has caused a considerable degree of concern among botanists, to which too little attention has been devoted in the past. Plants and plant species are particularly sensitive to variations in habitat; for the most part, the small and peculiar species of plants are that way because of particular variations in the habitat and range in which they have evolved. Our interest in preserving these species is more than esthetic: they may hold answers to questions which we have not yet learned to ask, and to lose these answers for all time involves a decision which should be made only upon careful consideration of all the facts.

We had great trouble in attempting to spell out the implications of national control over these species of plants. Internationally, the convention requires such control and it is not difficult to develop a scheme to screen plants as they enter the country; as a matter of fact, such a system is already in effect, involving inspections by agents of the Department of Agriculture. The problem area involves interstate regulation of transit, sale, and taking—and here there are no mechanisms to deal with the problem. Ultimately, the committee concluded that the best approach would be to designate and independent agency to study the problem and to report back to the Congress within a year with suggestions on the proper ways to deal with it. We selected the Smithsonian Institution as the best agency to handle this issue, principally on the basis of its independence and lack of commitment on ways of handling such questions. It is not at all unlikely that the Smithsonian will contract out for part of this study to the Agriculture Department, since that Department has much of the expertise and experience that must be developed in order to achieve an understanding of the problem. We felt, however, that since that Department has an interest in the matter, and since there are strong indications that it has made some prejudgments on the question, it would be better not to have them in charge of the study.

Mr. Speaker, the bill before the House, H.R. 37, represents considerable effort on the part of the committee, and considerable imagination in dealing with a number of complex and highly charged emotional issues. It is supported by most major conservation organizations, sportsmen's organizations, and environmental groups. The bill and the report (H. Rept. 93–412) has been available for review for over a month and I have yet to hear a whisper of opposition to its passage at the earliest opportunity. A similar bill has passed the Senate and is now on the Speaker's table. We are ready to go to conference, and hopeful that a good bill can be produced and sent to the President quite soon.

I urge that H.R. 37 be enacted.

Mr. Goodling. Mr. Speaker, I rise in support of H.R. 37, a bill designed to strengthen and improve the existing Endangered Species Act of 1969. H.R. 37, as reported out by the committee unanimously, embodies the vast majority of the proposals of the administration in H.R. 4758 and is somewhat similar to the version which passed in the other body on July 24, 1973, by a vote of 92 to 0.

The first Endangered Species Act became law in 1966 and authorized the Department of the Interior to establish a conservation program of native species threatened with extinction and expanded its authorities under the National Wildlife Refuge System.

This basic act was amended extensively in 1969 by requiring the publication of an endangered species list by prohibiting the importation of species on that list, permitting selected taking of such species for scientific and educational purposes, providing for a 1-year economic hardship exemption from the prohibitions, prohibiting the sale or purchase of such endangered species by U.S. citizens, and increasing the authorization levels for land acquisitions designed to conserve such species.

Since 1969, the lessons learned from implementation of the act on a Federal and State level have prompted the need for basic and comprehensive revisions. Experience has taught us that, under existing laws, the Federal Government was unable to adequately provide conservation and protection measures to those species which had not yet met the legal and technical definition of "extinct", but due to a variety of factors were closely approaching that population level. H.R. 37 broadens the concept of "endangered species" by vesting authority in the Secretary to list those species which are "likely within the foreseeable future to become threatened with extinction". Thus, both Federal and State authorities can regulate trade, prevent taking, and provide for habitat acquisition for those species before they actually become extinct. The bill contemplates the promulgation of two lists; one designating actually endangered or extinct species, and the other listing those which are threatened. Regulations would be promulgated to protect the species based upon their individual status. Greater flexibility is provided while at the same time additional means of protection, conservation, and management is permitted and required.

The bill also implements the recently signed Convention on International Trade in Endangered Species of Wild Fauna and Flora, requires the Smithsonian to study methods to protect endangered plants, vests agency responsibility for plants in the Department of Agriculture, establishes a closely-woven Federal/State relationship in the form of financial assistance programs to the States to assist in the management and conservation of such species, provides for cooperative agreements between the Federal Government and the States, and permits the States to enact laws which may be more restrictive than the Federal law. The measure also recognizes the important environmental role of the Department of Commerce in protecting marine plants and species, eliminates existing dollar ceilings on acquisition of critical habitat areas, and makes the taking of such species a Federal offense punishable both on a civil and criminal basis.

There is urgent need for enactment of this legislation. In the United States alone, there are 109 species listed as endangered. On the foreign list, there are over 300 species. The list of those species which are threatened but not yet actually extinct is even longer. We are dealing with the future of many species of fish and wildlife, species which are or may become extinct due to carelessness, lack of human concern, inadequate Federal, State, and local laws, and loss of habitat areas, These animals are part of our natural resources, our history and heritage, and deserve the favorable action of this body.

It is my understanding that the administration does not oppose enactment of H.R. 37, for it embodies to a great degree provisions of the administration's bill, H.R. 4758.

The SPEAKER. Does the gentleman have further requests for time?

Mr. GOODLING. Mr. Speaker, I yield 3 minutes to the gentleman from Alaska (Mr. Young).

Mr. YOUNG of Alaska. Mr. Speaker, I should like to address a question to the gentleman from Michigan primarily because he has been kind enough to come to our State and hold hearings concerning a bill that is similar to this. There is a provision in the Marine Mammal Protection Act that has caused some confusion and misunderstanding. It is due to the Department of Commerce's regulations rather than to the act itself. It was discussed at some length in the subcommittee hearings recently held at Anchorage and across the State.

I should like to ask the gentleman from Michigan if he can explain and clarify the situation as I see it today.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Michigan.

Mr. DINGELL. I would say to the gentleman that we did discuss this question in the course of our recent oversight hearings in Alaska. I do not read the Marine Mammal Protection Act as specifically requiring that subsistence hunters meet the requirements which relate to native handicrafts. I do think that the Secretary of Commerce has the authority which he needs to assure that those who claim to be subsistence hunters are in fact subsistence hunters, but those requirements cannot and should not be unreasonable.

We heard, for example, of cases in which sealskins taken from animals killed for their meat and blubber were left to rot on the beach instead of being sent to commercial tanners for processing. In my view, this makes no sense at all, and it does not conform to the Marine Mammal Protection Act.

I am, further, happy to note that the Department of Commerce has finally chosen to allow the processing of skins by tanners. This allows the processing of skins by tanners which are taken by hunters under the subsistence section of the act.

I would repeat, however, that the Secretaries of Commerce and Interior clearly have adequate authority to regulate subsistence hunters to the extent that such regulation is reasonably necessary to determine whether that hunting is taking place for subsistence purposes, and not as a subterfuge for other purposes.

If the gentleman will yield further, I will observe that there is an interrelation between this statute and the Marine Mammal Protection Act in that where actions which are allowed under the Marine Mammal Protection Act are not inconsistent with the purposes of this proposed statute, then they may be engaged in under this statute. If I recall correctly that was the amendment offered by the gentleman from Alaska.

Mr. YOUNG of Alaska. I thank the gentleman from his interest and clarification of this matter.

I want to point out that I am sure that at any hearings on this bill, if there are any questions, they will be clarified.

Mr. Speaker, in regard to this provision in section 10(d) which pertains to the taking of marine mammals by Alaska Natives in accordance with the provisions of Marine Mammals Protection Act of 1972; it has come to my attention that there has been a distinct difference between the intent of section 101(1) of the Marine Mammal Protection Act of 1972, and the interpretation of this section by the Department of Commerce as promulgated in the regulations printed in the Federal Register, volume 38, number 158, dated August 16, 1973, page 22136, section 216.23(b)(1).

Section 101(1) of the act appears to place no restriction on how the subsistence taker may use or dispose of the skins of such animals as were taken for human consumption, whereas section 216.23(b)(1) of the regulations of the Department of Commerce clearly places unintended conditions upon such use and disposition.

This issue was considered during the course of hearings recently conducted by the Subcommittee on Fisheries and Wildlife Conservation in Anchorage, Alaska.

This situation has been interpreted counter to the best interest of those people the act intended to protect, and has worked a distinct hardship upon them.

I would like to solicit further comment upon this situation by the gentleman from Michigan and I thank the gentleman from Michigan for yielding his time.

The SPEAKER. Does the gentleman from Michigan have further requests for time?

Mr. GOODLING. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. Grover).

Mr. GROVER. Mr. Speaker, I rise in support of passage of H.R. 37 and wish to associate myself with the remarks of the gentleman from Michigan (Mr. Dingell) and the gentleman from Pennsylvania (Mr. Goodling), the ranking minority members of the subcommittee.

This committee has had under consideration major revisions of the existing Endangered Species Act of 1969, as amended, since the last Congress. H.R. 37 and similar bills were introduced at the beginning of this Congress and represented the committee's efforts and findings up to that date. After extensive and lengthy hearings on the administration's bill and others, during which significant testimony and amendments were proposed by wildlife and environmental organizations, State agencies, and Federal agencies affected, the committee amended H.R. 37 accordingly.

Endangered species occupy the total spectrum of the Earth's habitats from the Arctic regions to the equator, including all the eco-types from alpine to marine. Enactment of H.R. 37 will prevent or regulate the taking of species found on the endangered and threatened lists. It will permit administrative, economic, and legal actions designed to increase the population levels of these affected species wherever they may live and restore them to a meaningful role in their and our environment.

When one realizes that half of the recorded extinctions of animals over the past 2,000 years have occurred in the most recent 50-year period, it may well be that we are too little, too late, in terms of adequate enforcement mechanisms and actual appropriations for acquisition of habitat for species preservation purposes.

There are two key elements in this bill which I would like to emphasize.

First, the United States appears to have been the determining factor in conveying and obtaining worldwide agreement on a new international convention designed to more strictly prohibit and control international trade in endangered and threatened species. This bill updates our Federal laws on the basis of our own past experience for such need and in recognition of the U.S. actions and signature to this new international convention, currently pending ratification in the other body.

Second, we have adequately protected legitimate State interests, powers, and authorities, in H.R. 37 by providing for concurrent Federal/State jurisdiction and permitting the States to enact their own, more restrictive laws, if so desired. Such fine acts as New York State's Mason Act, which prohibits the sale of some species not on the Federal list, will not be superseded by this bill to the extent that such State laws are more restrictive. It is imperative to realize, as the committee did, that the greater bulk of the enforcement capability concerning endangered species lies in the hands of the State fish and game agencies, and not the Federal Government. It is on a State level that most of the game agents are located; it is on the State level that habitat areas will be located; it is on a State level that this new Federal law will be implemented, subject to overall Federal criteria and guidelines. For those States which have taken a strong and active role in the protection and conservation of endangered species, I commend them and say that their interests and activities are well preserved. For those States which have been lax in assisting the Federal Government in meeting the national goals in prior laws on endangered species, the bill provides for State financial assistance under cooperative agreements once specified Federal criteria are met. If a cooperative program for species management does not exist in a State, the State law will be void and Federal law, rules and regulations shall apply. Thus, we have provided for a strong incentive to the States to assist the Federal Government in protecting endangered species, while, at the same time, recognizing legitimate State interests and authorities.

I know of no opposition to H.R. 37 and urge its immediate passage. As the House is aware, the other body has already taken action on this subject by passing S. 1983, with amendments, by an overwhelmingly favorable margin.

Mr. PRICE of Illinois. Mr. Speaker, the life cycle is the most natural and most inevitable of happenings. Without this cycle there could be no change, and without change the world would not be as we know it today.

This never-ending cycle, then, is a good thing for man, but unfortunately man has taken this natural situation and twisted it so that nature would not recognize it. Man has disturbed the balance of nature killing directly or indirectly hundreds of species of plants and animals, and continues to do so heedlessly. Though we see what this senseless slaughter is doing to the balance of nature—exterminating animals and destroying valuable resources—still we are doing little to voluntarily stop while there is still a chance to recoup our losses.

To protect man from himself is the main thrust of H.R. 37, the Endangered and Threatened Species Conservation Act of 1973. This bill provides for the extension of protection to animals threatened with the danger of extinction, as well as those already on the way to extinction. In addition, H.R. 37, would protect species threatened in any significant portion of their range, rather than only those threatened with worldwide destruction, and makes the taking of these animals a Federal offense.

More and more species of animals are on the way to extinction, as living conditions for them deteriorate. Pollution is driving animals out of their natural ranges, and those that have not yet been threatened by impure air and water face increasing danger from those entrepreneurs who find a profit in trapping and selling endangered animals.

In Illinois, there are numerous species of animals threatened. According to some experts, as many as 100 kinds of mammals, birds, fish, reptiles, and amphibians indigenous to the State may be considered endangered. In my district, the 23d, a species of black heron is nearly gone, in addition to many other species of birds and reptiles.

I am sure that my colleagues will agree that we cannot allow the balance of nature to continue to be upset in the way we have done.

The world is not as large as our fathers thought. We know now that there are limits even to the bounty of this Nation—and that we are rapidly approaching the bounds of those limits. If the slaughter of species continues, we will have no one to blame but ourselves, and I am sure that we here are not prepared to take the responsibility of jeopardizing future generations with a come-what-may attitude.

For these reasons I would like to take this opportunity to extend my support to the passage of H.R. 37, and to urge other Members concerned with the future of this country and the world at large to do likewise.

Mr. Leggett. Mr. Speaker, the bill we are considering today represents another step forward in our continuing efforts to preserve the natural character of the world we inhabit. Members are no doubt aware of our previous actions in this area in the 89th and 91st Congresses which have served as models for the rest of the world in wildlife protection. This previously passed legislation was also directly responsible for the very successful international meeting here in Washington which resulted in the Convention on International Trade in Endangered Species of Wild Fauna and Flora, which was signed on March 3 of this year.

While the acts of 1966 and 1969 laid the framework for an increasingly effective program for conservation of endangered species, our efforts have progressed to the point where existing law just does not provide the kind of management tools we need to act early enough to save a vanishing species. For that reason we must act here today to expand our previous efforts.

A few things in this bill should be pointed out as being worthy of more than passing interest. First, the bill addresses the fact that some States have already recognized the need for active conservation programs and have acted to meet that need. It provides that no State laws in this area will be superseded where they are more restrictive than the provisions of this bill. Furthermore, States are free at any time in the future to adopt more stringent regulations than we are enacting. What we are discussing here are minimum standards to be met in conserving endangered plant and animal resources.

Another item I would like to point out is the authorization in the bill for the use of the land and water conservation fund to acquire habitat areas of endangered species. You may recall that in his initial budget, the President asked for an appropriation of only $55,223,000 of the $338,500,000 available in the fund. I felt at that time, and I still feel, that there are legitimate, important uses for the money in that trust fund, and that we should use as much of it as possible for its intended purposes. This bill gives us a constructive outlet for those moneys, and makes much less justifiable any future attempts at a raid on this most valuable trust fund.

This farsighted legislation also contains a continued mandate for international cooperation which has proved invaluable in our efforts at conservation. It not only provides for implementation of the recently signed convention, but also authorizes and directs the Secretary to encourage international collaboration in efforts to preserve endangered species. Here again we have a chance to assure our continued leadership in this area of evergrowing concern.

There is no objection that I know of to the aims of this bill. It is the product of some very good mutual cooperation between the administration and our committee, and deserves the favorable consideration of every Member of the House.

Mr. BIAGGI. Mr. Speaker, I want to express my support for H.R. 37 and strongly urge its passage.

The need for this bill is manifest; our hearings in the Merchant Marine and Fisheries Committee clearly established the serious danger to many species in our environment.

But I also want to recommend the bill, which I cosponsored with many of my colleagues on the committee, for another reason: It represents a sound approach to tackling environmental problems. We are doing three things in this bill which are important and which should be models for future environmental legislation.

First, we are defining the problem as broadly as possible. Instead of merely protecting those species which are now in danger, we are developing a concept of protection which will have continuous force. We are including those species which, at some future date, might become endangered. This is a long range and comprehensive approach to the problem of environmental protection, and this is as it should be. The seriousness of the problem amply justifies such action.

Second, we are making the killing of animals in the protected class a Federal offense. This approach is also fundamentally important. If we are going to have effective environmental legislation we must write tough penalties for violation of the law. Again, no other approach does justice to the seriousness of the problem.

Third, the bill eliminates existing dollar ceilings on the acquisition by the Federal Government of critical habitat areas. This provision represents an important philosophy in environmental legislation—namely, that if we are serious about preserving our environment we are going to have to spend some real money. It is not a question of saying that cost is no object, but of determining that unwise cost restriction now may do damage that will later cost far more, and may not be correctable at all.

Mr. Speaker, I urge all my colleagues to support this bill. What it does is right, and the way it does it is right. And so is the time.

Mr. HARRINGTON. Mr. Speaker, by polluting the air and water, destroying natural habitats, and catering to commercial demands for items like rare furs, man unnaturally interferes in the natural process of evolution. H.R. 37, the Endangered and Threatened Species Act of 1973, is designed to rectify the harm that has been done.

The legislation changes and enlarges the scope of existing conservation law by extending protection to animals which may become endangered, as well as those now endangered; by making the killing of such animals a Federal offense; by eliminating existing limitations on the acquisition of critical habitat area; by allowing States to adopt more restrictive legislation than the Federal Government if they wish; and by mandating the Secretary of the Smithsonian Institution to study any plant species in possible danger of extinction, with the objective of recommending further action that Congress should take to protect endangered plant life.

It seems to me that man may lose more than he thinks, if he does not act to correct his interference with nature. A particular animal or plant species contributes much more to the world than general esthetic pleasure; it contributes to that much-used but little-understood phrase "the balance of nature." If man is going to grow sufficient food for himself; find cures for the diseases that plague him, and expand his understanding of how his own body functions, he will have to derive much of the needed knowledge from his fellow species.

In his effort to guard the Earth from his own awesome technological capacity, man has yet to learn that an instinct for self-preservation is not enough. He must direct both his intellect and ability to plan for the future toward insuring his self-preservation, as well. H.R. 37 represents recognition of this imperative.

Mr. ANNUNZIO. Mr. Speaker, H.R. 37—legislation for which I am a cosponsor. Passage of this measure today will be one more significant step toward righting a serious wrong. Simply stated—many of the thousands of animal species which have disappeared from the face of the Earth have gone because of the interference of mankind. Nearly a thousand species are endangered today because of man's interference with natural habitats, because of his greed, and because he fouls the air and the waters. We have filled the Red Book of the International Union for the Conservation of Nature with mammals, birds and fishes who are running out of places to go to escape human carelessness.

Historically the evolution of new species and the decline of others was a natural process—the result of various natural forces. However, as man emerged as a more dominant life form, things began to change. Our powerful technologies and our blind desire for "progress" enabled us to interrupt the rhythm of nature.

In the name of fashion, we have stalked our big cats and birds with showy plumage until they are gone forever from the face of the Earth—or threatened with extinction. In the name of science and education, we have shipped—and killed through poor and unregulated shipping regulations—countless animals.

Each year our growing world population places greater and greater stress on wilderness areas and national parks. We have crowded many species to the point where their numbers are too slight to insure survival in their natural habitat. Often, that habitat is threatened by land development.

We have mistreated our wildlife—one of nature's greatest gifts—and we are paying a high price. We have made attempts to stop the ravage of wild animals, but unless we do more, the price we pay will be still higher. Already we have denied our children and all generations that follow the wonder of some of our animals. We must not, as an international people, hesitate any longer, or we will seal the fate of grizzly and polar bears, spotted cats and so on. The balance of nature, on which we depend for our survival, depends on the survival of our wildlife.

Any action we take now will, unfortunately, be too late to save some species presently on the list. But we still have a chance to save thousands and thousands of species. We can still cut the Red Book list back drastically and increase our own well-being at the same time. Not all, but certainly some of the wrongs man has perpetrated on wildlife, can still be righted. I think the measures which we are considering today can help in that direction.

The United States has long been a leader in the effort to protect our animals. Enactment in 1969 of an important Endangered Species Act led the way to a more sane approach to caring for our living resources. But it has not proved to be enough.

We were, as a Nation, eager to participate in the Convention on International Trade in Endangered Species of Wild Fauna and Flora held in February of this year. That convention represents a significant turning point in the history of endangered species conservation, and especially in international cooperation to achieve protection for threatened animals. The measure we are considering today would speed formal U.S. participation in that convention.

H.R. 37 would extend maximum protection to the animals of this Nation which are endangered, or are likely to become endangered. It will assure active participation, by the States, in programs responsive to the needs of endangered animals found within the State.

One of our greatest needs is the acquisition of essential wildlife habitat. Our experience in wildlife management has taught us that the availability of habitat is a key factor in protection and restoration. H.R. 37 would remove the current ceiling imposed by law for the acquisition of essential wildlife habitat with land and water conservation fund moneys.

H.R. 37 would strengthen the protection afforded to endangered species by restricting import and export of endangered species.

There are many other provisions of H.R. 37 which are vital to the protection of endangered and threatened wildlife the world over. Those provisions have been carefully studied by conservationists, hunters, preservationists, ecologists, and by Members of the House and Senate. Strong support has come from all circles. As a cosponsor of this measure, I urge prompt passage of H.R. 37 and early enactment of an effective Endangered Species Act of 1973.

Mr. DON H. CLAUSEN. Mr. Speaker, I rise in support of H.R. 37, the Endangered and Threatened Species Conservation Act of 1973.

The need for this legislation is overwhelming. Current laws designed to protect species of fish and wildlife are no longer adequate to meet today's expanded needs. Recent research and studies have indicated that the pace of disappearance of species is rapidly accelerating and threatening the world's ecological balance. At present, the Department of the Interior recognizes more than 100 species of fish and wildlife which are threatened with extinction within the United States alone. The number threatened in the world as a whole reaches more than 400.

In addition to expanding our efforts to protect and conserve species which are already endangered, this legislation goes one step further. The most important feature of the bill is the provision extending protection to animals and plants which may become endangered within the foreseeable future.

In the past, little action was taken until the situation became critical and the species was dangerously close to total extinction. This legislation provides us with the means for preventive action.

As I am certain everyone will agree, it is far wiser to take such preventive steps to keep a species or subspecies from reaching this critical point than to stand idly by until emergency action is necessary which may not in every case be successful.

In my opinion, this bill is a milestone in this Nation's attempt to preserve its natural environment by altering slightly the philosophy we have adopted to protect and perpetuate our natural heritage.

I hope, Mr. Speaker, that H.R. 37 will be speedily enacted into law.

Mr. GILMAN. Mr. Speaker, I rise in support of H.R. 37, the Endangered and Threatened Species Conservation Act under consideration today.

Fish and wildlife are extremely sensitive to any environmental changes. With our rapidly advancing technology causing topographic and climate changes, we must not be insensitive to the potentially damaging effect those changes may have upon wildlife.

We have begun to recognize the delicate balance between wildlife and its habitat. In 1970, while I served in New York State Assembly, we made some gains in protecting wildlife by legislating New York State's first endangered species bill. In 1971, we improved upon that legislation by strengthening existing regulations.

Today we are involved in a similar process. The original Federal endangered species law needs to be tightened. The measure now before us, H.R. 37, puts some teeth in our efforts to provide a program for the conservation and protection of endangered wildlife.

A particularly important provision in this measure is our State grant program. By offering an incentive to those States making serious efforts at formulating endangered species legislation, we will be encouraging our States to take worthwhile action in this often neglected area. We should not have to forever compensate for environmental changes resulting from excessive pollution, poor farming and forestry practices and other technologically destructive occurances. Having begun the battle in this area, let us continue to move forward.

H.R. 37 also includes provisions for extensively expanding our endangered species listings. In approving this legislation, we will be giving authority for the inclusion of those species which are not presently endangered but which might be threatened by extinction in the near future.

Such foresight will help avoid the regrettable plight of repairing damages already incurred. By heeding the warnings of possible extinction today, we will prevent tomorrow's crisis.

Accordingly, I urge and join with my colleagues in resoundingly adopting this measure so that we may begin to implement the provisions of this important conservation measure, the Endangered and Threatened Species Conservation Act.

The SPEAKER. The question is on the motion offered by the gentleman from Michigan (Mr. DINGELL) that the House suspend the rules and pass the bill H.R. 37, as amended.

The question was taken.

Mr. GROVER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 390, nays 12, not voting 32, as follows:

So (two-thirds having voted in favor thereof), the rules were suspended and the bill as amended was passed.

The Clerk announced the following pairs:

Mr. O'Neill with Mr. Anderson of Illinois.
Mr. Burleson of Texas with Mr. James V. Stanton.
Mr. Rostenkowski with Mr. Teague of Texas.
Mr. Hanna with Mr. Archer.
Mr. Chappell with Mr. Buchanan.
Mr. Jones of Tennessee with Mr. Lujan.
Mr. Young of Texas with Mr. Sandman.
Mr. Patman with Mr. Burke of Florida.
Mr. Culver with Mr. Hogan.
Mr. Symington with Mr. Nix.
Mr. Davis of Georgia with Mr. Mizell.
Mr. Gettys with Mr. Zion.
Mr. Steelman with Mr. McCloskey.

[From the Congressional Record, Sept. 18, 1973]

House Consideration and Passage of S. 1983, as Amended

Mr. Dingell. Mr. Speaker, I ask unanimous consent to take from the Speaker's table a similar Senate bill (S. 1983) to provide for the conservation, protection, restoration, and propagation of threatened and endangered species of fish, wildlife, and plants, and for other purposes, and ask for immediate consideration of the Senate bill.

The Clerk read the title of the Senate bill.

The Speaker. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1983

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Endangered Species Act of 1973".

DECLARATION OF POLICY

Sec. 2. (a) Findings.—The Congress finds and declares that—

(1) various species of fish, wildlife, and plants in the United States have been rendered extinct as a consequence of economic growth and development untempered by adequate concern and conservation;

(2) other species of fish, wildlife and plants have been so depleted in numbers that they are in danger of or threatened with extinction;

(3) these species of fish, wildlife and plants are of esthetic, ecological, educational, historical, recreational, and scientific value to the Nation and its people;

(4) the United States has pledged itself as a sovereign state in the international community to conserve and protect to the extent practicable the various species of fish or wildlife and plants facing extinction, pursuant to—

(A) migratory bird treaties with Canada and Mexico;

(B) the Migratory and Endangered Bird Treaty with Japan;

(C) the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere;

(D) the International Convention for the Northwest Atlantic Fisheries;

(E) the International Convention for the High Seas Fisheries of the North Pacific Ocean;

(F) the Convention on International Trade in Endangered Species of Wild Fauna and Flora; and

(G) other international agreements.

(5) encouraging the States and other interested parties, through Federal financial assistance and a system of incentives, to develop and maintain conservation, protection, restoration, and propagation programs which meet national and international standards is a key to meeting the Nation's international commitments and to better safeguarding, for the benefit of all citizens, the Nation's heritage in fish and wildlife.

(b) Purposes.—The Congress hereby declares that the purposes and policy of this Act are to—

(1) provide an effective means to conserve, protect, and restore the ecosystems upon which endangered and threatened species of fish or wildlife depend;

(2) provide a viable program for the conservation, protection, restoration, and propagation of endangered and threatened species;

(3) take all appropriate steps to implement the Nation's international commitments with respect to endangered and threatened fish or wildlife; and

(4) insure that all departments, agencies, and instrumentalities of the United States seek, within the scope of their authority and administrative jurisdiction, to protect endangered and threatened species.

DEFINITIONS

Sec. 3. As used in this Act—

(1) "Conservation" and "management" mean the collection and application of biological information for the purposes of increasing and maintaining the number of animals within species and populations of endangered and threatened species at the optimum carrying capacity of their habitat. Such terms include the entire scope of activities that constitute a modern scientific resources program, including, but not limited to research, census, law enforcement, and habitat acquisition and improvement. Also included within these terms, when and where appropriate, is the protection, propagation, conservation and restoration of such species, including regulation and taking necessary to these ends.

(2) "Convention" means the Convention on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973, and the appendices thereto.

(3) "Endangered species" means any species of fish or wildlife which is in danger of extinction throughout all or a significant portion of its range, other

than a species of the order insectica determined by the Secretary to constitute a pest whose protection under the provisions of this Act would present an overwhelming and overriding risk to man.

(4) "Fish or wildlife" means any living member of the animal kingdom and the remains of any dead member of the animal kingdom, including, but not limited to, any mammal, fish, bird, amphibian, reptile, mollusks, crustaceon, arthropod or other invertebrate, or any part, egg, or offspring of any such member, or any product produced from any part or parts of the remains of any such member.

(5) "Foreign commerce" includes any transaction—

(A) between persons within one foreign country;

(B) between persons in two or more foreign countries;

(C) between a person within the United States and a person in a foreign country; or

(D) between persons within the United States, where the fish or wildlife involved are moving in any country or countries outside the United States.

(6) "Import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(7) "Optimum carrying capacity" means the ability of a given habitat to support the optimum sustainable population of an endangered or threatened species in a healthy state without diminishing the ability of the habitat to continue that function.

(8) "Optimum sustainable population" means, with respect to any of endangered or threatened species, the number of such species will result in the maximum productivity of the species, keeping in mind the optimum carrying capacity of the habitat and the health of the ecosystem of which they form a constituent part.

(9) "Person" means an individual, corporation, partnership, trust, association, or any other private entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(10) "Plant" means any member of the plant kingdom, including seeds, roots, or other parts of any such member.

(11) "Secretary" means, except as otherwise provided, the Secretary of the Interior or the Secretary of Commerce in the same manner in which program responsibilities are vested under Reorganization Plan Numbered 4 of 1970. With respect to enforcement of the provisions of this Act and of the Convention, which pertain to the importation of plants, the term means the Secretary of Agriculture.

(12) "Species" includes any subspecies or other group of fish or wildlife of the same species or lesser taxa in common spatial arrangement that interbreed when mature.

(13) "State" means any State, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(14) "State agency" means the State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish and wildlife resources within a State.

(15) "Take" means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

(16) "Threatened species" means any species of fish or wildlife which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

(17) "United States", when used in a geographical sense, includes all States.

DETERMINATION OF ENDANGERED OR THREATENED SPECIES

SEC. 4. (a) GENERAL.—The Secretary shall by regulation determine whether any fish or wildlife is an endangered or threatened species as a result of any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

(b) BASIS FOR DETERMINATIONS.—(1) The determinations required by this section shall be made on the basis of the best scientific and commercial data available to the Secretary, including any recommendations that have been made by the Advisory Committee established under subsection (d) of this section and after consultation, as appropriate, with all interested persons and organizations, including affected or knowledgeable Federal, State, and foreign government agencies. In any case in which such determinations involve an indigenous species, the Secretary shall consult with and consider the recommendations of each State involved. In any case in which determinations involve a species which is normally found on the high seas, in lakes, or other waters off the coast of a State of which are customarily harvested by citizens of such a State, the Secretary shall consult with and consider the recommendations of each State involved. In any case in which such determinations involve a species which is normally found in a foreign country or countries or which is harvested from the ocean by citizens of such country or countries, the Secretary shall (where practicable) with the assistance of the Secretary of State, consult with and consider the recommendations of such country or countries.

(2) Fish or wildlife which have been designated as requiring protection from unrestricted commerce by any foreign country, or pursuant to any international agreement, shall receive special and full consideration by the Secretary to determine whether each is an endangered or a threatened species.

(c) LISTS.—(1) The Secretary shall publish in the Federal Register a list of all fish or wildlife determined by him by regulation to be endangered species and a list of all fish or wildlife determined by him by regulation to be threatened species. Such lists may be amended, modified, or revised periodically by regulation. Each list shall refer to each species of fish or wildlife named therein by scientific name and common name or names and shall specify the portion of its range over which it is endangered or threatened.

(2) The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5, United States Code, conduct a review of any listed or unlisted species of fish or wildlife proposed to be removed from or added to either of the lists published pursuant to paragraph (1) of this subsection, but only if he makes and publishes a finding that such person has presented substantial evidence which in his judgment warrants such a review.

(3) Any list of species of fish or wildlife determined to be threatened with extinction, by the Secretary of the Interior pursuant to the Endangered Species Conservation Act of 1969, which is in effect the day before the date of enactment of this Act shall be republished to conform to the appropriate classifications under this Act. Pending reclassification as endangered species or threatened species and republication, any species listed pursuant to the Act of 1969 shall be deemed an endangered species within the meaning of this Act. Such reclassification and republication shall not require a public hearing or comment under section 553 of title 5, United States Code.

(d) ADVISORY COMMITTEE.—(1) The Secretaries shall establish an Advisory Committee on Endangered and Threatened Species to consult with, advise, and make recommendations to him and to the States. The Advisory Committee shall consist of not more than eleven members including a Chairman who shall be appointed by the Secretary from lists of qualified individuals submitted by State fish and wildlife agency administrators, universities, nongovernmental organizations concerned with conservation, and scientific societies. Five of the members shall be regularly employed by State governments or political subdivisions thereof. The terms of office shall be so arranged by the Secretary that each year at least three new members shall be appointed to fill vacancies caused by the expiration of terms of office.

(2) The Advisory Committee shall periodically, but not less than once each year, make recommendations to the Secretary with respect to removal from, addition to, or reclassification within the list maintained pursuant to subsection (a) of this section, and may, with the approval of the Secretary, perform other functions in furtherance of the purposes of this Act. A member of the Advisory Committee who is not otherwise a Government employee may, in the discretion of the Secretary, receive not more than $150 per diem when engaged in the actual performance of his duties. Each member may receive reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of his duties.

(e) **Protective Regulations.**—Whenever the Secretary lists a species of fish or wildlife as a threatened species, pursuant to subsection (a) of this section, he shall issue such regulations as he deems necessary and advisable to provide for the conservation and management of such species. With respect to any threatened species, the Secretary may by regulation prohibit any act prohibited with respect to an endangered species under section 10(a) of this Act.

LAND ACQUISITION

Sec. 5. The Secretary shall establish and implement a program to conserve, protect, restore, and propagate fish or wildlife which are listed as endangered or threatened species pursuant to section 4 of this Act. To carry out such programs, the Secretary—

(a) shall utilize as appropriate the land acquisition and other authorities conferred upon him under the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956, and the Fish and Wildlife Coordination Act;

(b) may acquire by purchase, donation, or otherwise any lands, waters or interests therein necessary for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species. Such authority shall be in addition to any other land acquisition authority vested in him; and

(c) may use funds made available under the Land and Water Conservation Fund Act of 1965 or under this Act to acquire such lands, waters, or interests therein.

COOPERATION WITH THE STATES

Sec. 6. (a) **General.**—In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the States. In addition to all other obligations, the Secretary shall consult with the affected State before the acquisition of any lands, waters, or interests therein for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species.

(b) **Management Agreements.**—The Secretary may enter into an agreement or agreements with any State for the administration and management of any area established for the conservation and management of an endangered or a threatened species. Any revenues derived from the administration of such areas under such agreements shall be subject to section 401 of the Act of June 15, 1935 (16 U.S.C. 715s).

(c) **Financial Assistance.**—The Secretary is authorized to enter into a cooperative agreement in accordance with this subsection to provide financial assistance to any State establishes and maintains an adequate and active program for the conservation and management of endangered and threatened species. Before the Secretary may enter into or renew such a cooperative agreement to provide financial assistance to a State, he shall make, justify, and publish in the Federal Register a finding that such agreement would further the policy of this Act and that such State has a program under which—

(1) the State agency has statutory and regulatory authority and administrative jurisdiction to manage and protect any species of fish or wildlife which is determined by such agency or the Secretary to be endangered or threatened;

(2) the State has established a State plan, including a management program under the State agency, for all species of resident fish or wildlife which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

(3) the State agency during the first year of the existence of such agreement—

(A) will issue protective regulations;

(B) will employ sufficient trained and qualified personnel; and

(C) will maintain investigation, enforcement, and public education programs,

which are adequate, in the Secretary's judgment, for the conservation and management of species of endangered and threatened fish or wildlife;

(4) the State agency is authorized and plans to conduct studies to determine the status and requirements for survival of species of resident fish or wildlife and agrees to transmit a copy of the findings of such studies to the Secretary;

(5) the State agency is authorized and plans to establish programs, including the acquisition of lands, waters, or interests therein, for the conservation and management of endangered and threatened species; and

(6) provision is made for public participation in designating species of resident fish or wildlife as endangered or threatened.

(d) ALLOCATION OF FUNDS.—(1) Funds appropriated for financial assistance pursuant to subsection (c) of this section shall be available to the Secretary for allocation to the States under cooperative agreements. The purposes for which such funds may be used include, but are not limited to, conservation and management. The Secretary shall allocate appropriated funds to such States upon the basis of—

(A) the international commitments of the United States to protect endangered or threatened species;

(B) the readiness of a State to proceed with a conservation and management program consistent with the objectives and purposes of this Act;

(C) the number of endangered and threatened species within a State;

(D) the potential for restoring endangered and threatened species within a State; and

(E) the relative urgency to initiate a program to restore and protect an endangered or threatened species in terms of the survival of the species.

Funds allocated to a State but unexpended or unobligated at the close of the fiscal year shall remain available for expenditure by such State until the close of the succeeding fiscal year. Any funds remaining obligated or unexpended at the close of the second fiscal year shall remain available to the Secretary for the purpose of this section.

(2) Each cooperative agreement between a State and the Secretary shall provide for—

(A) the actions to be taken by the Secretary and the State;

(B) the benefits that are expected to be derived in connection with preservation and restoration of endangered or threatened species;

(C) the estimated cost of these actions; and

(D) the share of such costs to be borne by the Federal Government and by the States, except that—

(i) the Federal share of such program costs shall not exceed 50 per centum of the estimated program costs stated in the agreement; and

(ii) the Federal share may be increased to 66⅔ per centum whenever two or more States, having a common interest in a program that the Secretary deems to meet the criteria of paragraph (1) of this subsection, enter jointly into an agreement with the Secretary.

The Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon in the cooperative agreement. For the purposes of this section, the non-Federal share may, in the discretion of the Secretary, be in the form of real or personal property, the value of which will be determined by the Secretary, as well as money.

(3) The Secretary is authorized to issue such regulations as may be appropriate to carry out the provisions of this section with respect to financial assistance to States.

(4) For the purposes of this section, there is authorized to be appropriated through the fiscal year ending June 30, 1977, not to exceed $10,000,000.

(e) PERIODIC REVIEW.—The finding made under subsection (c) of this section and any action taken by the Secretary under this section shall be subject to his periodic review, including the consideration of comment from interested persons, at no greater than annual intervals. Upon ninety days' notice in writing to the affected State, the Secretary may terminate in his discretion any cooperative agreement entered into under this section.

(f) STATE ACTION PERMITTED.—Nothing in this Act shall be construed as superseding or limiting the power of any State or political subdivision thereof to enact legislation or regulations more restrictive than or consistent with the provisions of this Act with respect to an endangered or a threatened species: *Provided*, That any State law or regulation regarding the import or export of or the interstate or foreign commerce in an endangered species listed pursuant to section 4 of this Act is void to the extent that it may effectively permit what is prohibited by this Act or its implementing regulations, or prohibit what is authorized pursuant to an exemption or permit provided for in this Act or its implementing regulations. This Act shall not otherwise be construed to void any State law or regulation which is intended to conserve and manage migratory, resident, or introduced fish or wildlife, or to permit or prohibit sale of such fish or wildlife.

INTERAGENCY COOPERATION

SEC. 7. The Secretary shall review all programs administered by him and utilize such programs in furtherance of the policy of this Act. All other departments, agencies, and instrumentalities of the Federal Government shall, in consultation with and with the assistance of the Secretary—

(a) carry out such programs as are practicable for the protection of species listed, pursuant to section 4 of this Act, as endangered or threatened;

(b) take such action as is necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of any endangered or threatened species, or results in the destruction or modification of any habitat of such species which is determined by the Secretary, after consultation to the extent appropriate and necessary with affected States, to be a critical habitat of such species.

INTERNATIONAL COOPERATION

SEC. 8. (a) FINANCIAL ASSISTANCE.—As a demonstration of the commitment of the United States to the worldwide protection of endangered and threatened species, the President may, subject to the provisions of section 1415 of the Supplemental Appropriation Act, 1953 (31 U.S.C. 724), use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistance Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and management of programs in that country which the Secretary determines to be necessary or useful for the conservation, protection, restoration, or propagation of any endangered or threatened species listed by the Secretary pursuant to section 4 of this Act: *Provided*, That no funds other than foreign currencies available for expenditure only within such foreign country shall be used pursuant to this section. The President shall provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, waters, or interests therein) to foreign countries under this section upon such terms and conditions as he deems appropriate.

(b) ENCOURAGEMENT.—In order to carry out further the provisions of this Act, the Secretary, with the assistance of the Secretary of State, shall encourage—

(1) foreign countries to provide for the protection, conservation, restoration, or propagation of fish or wildlife, including endangered and threatened species listed pursuant to section 4 of this Act;

(2) the entering into of bilateral or multilateral agreements for foreign countries to provide for such protection, conservation, restoration, or propagation; and

(3) foreign persons, who directly or indirectly take fish or wildlife in foreign countries or on the high sea for importation into the United States for commercial or other purposes, to develop and carry out, with such assistance as he may provide, conservation practices designed to enhance such fish, wildlife and plants and their habitat.

(c) PERSONNEL.—After consultation with the Secretary of State, the Secretary may—

(1) assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign countries and international organizations in developing personnel resources and programs which promote the protection, conservation, restoration, or propagation of fish or wildlife; and

(2) conduct or provide financial assistance for the educational training of foreign personnel, in this country or abroad, in fish, wildlife or plant management, research, and law enforcement, and to render professional assistance abroad in such matters.

(d) INVESTIGATIONS.—After consultation with the Secretary of State and the Secretary of the Treasury, as appropriate, the Secretary may conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the purposes of this Act.

(e) **Convention Implementation.**—The President is authorized and directed to designate appropriate agencies to act as the Management Authority or Authorities and the Scientific Authority or Authorities pursuant to the Convention. The agencies so designated shall thereafter be authorized to do all things assigned to them under the Convention, including the issuance of permits and certificates. The agency designated by the President to communicate with other parties to the Convention and with the Secretariat shall also be empowered, in consultation with the State Department, to act on behalf of and represent the United States in all regards as required by the Convention.

REGULATIONS, PROCEDURE, AND JUDICIAL REVIEW

Sec. 9. (a) **Regulations.**—The Secretary shall publish any regulations proposed under this Act in the Federal Register at least sixty days prior to the time when such regulations shall become final, except that in case of an emergency the Secretary may publish such regulations not less than thirty days prior to the time when such regulations shall become final if at the same time he publishes in the Federal Register detailed reasons why emergency action is necessary. The Secretary shall also publish in the Federal Register a notice of all petitions received pursuant to this Act and, if such petition is denied, his reasons therefor. Such notice shall identify the purpose of the petition and include a statement of the availability of any data submitted in support of such petition. If any person adversely affected by a proposed regulation files objections and requests a public hearing within forty-five days of the date of publication of the proposed regulation, the Secretary shall grant such request. If such public hearing is held, final regulations shall not be promulgated by the Secretary until after the conclusion of such hearing. All public hearings authorized by this subsection shall consist of the oral and written presentation of data or arguments in accordance with such conditions or limitations as the Secretary may make application thereto. Proposed and final regulations issued under this Act shall set forth findings of fact on which the regulations are based and shall state the relationship of such findings to the regulations issued.

(b) **Procedure.**—Except as expressly modified by this section, the provisions of the Administrative Procedure Act (5 U.S.C. 551 et seq.) shall apply to proceedings conducted by the Secretary under this Act: *Provided*, That the provisions of this section shall not apply to the extent necessary to permit emergency action by the Secretary. Notice of and reasons for such action shall be published prior to such action in the Federal Register.

(c) **Judicial Review.**—(1) Any judicial review of final regulations promulgated under this Act and final actions under section 5(c) of this Act shall be in accordance with sections 701–706 of title 5, United States Code, except that—

(A) with respect to regulations promulgated under section 4 or 6 of this Act, the findings of the Secretary as to the facts shall be sustained if based upon substantial evidence on the record considered as a whole; and

(B) with respect to relief pending review, no stay of an action may be granted unless the reviewing court determines that the party seeking such stay—

(i) is likely to prevail on the merits in the review proceeding, and

(ii) will suffer irreparable harm pending such proceeding.

(2) If the party seeking judicial review applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court either that—

(A) the information is material and was not available at the time of the proceeding before the Secretary; or

(B) failure to include such evidence in the proceeding was an arbitrary or capricious act of the Secretary, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Secretary, and to be adduced upon the hearing, in such manner and upon such terms and conditions as the court may deem proper. The Secretary may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file with the court such modified or new findings and his recommendations, if any, for the modification or setting aside of his original order.

(d) **Audit.**—(1) Each recipient of Federal assistance under this Act, pursuant to grants, subgrants, contracts, subcontracts, loans, or other arrangements, entered into other than by formal advertising, and which are otherwise authorized by this Act, shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, the amount of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall, until the expiration of three years after completion of the project or undertaking referred to in paragraph (1) of this subsection of this section, have access for the purpose of audit and examination to any books, documents, papers, and records of such recipients which in the opinion of the Secretary or the Comptroller General may be related or pertinent to the grants, subgrants, contracts, subcontracts, loans or other arrangements referred to in subsection (a).

UNLAWFUL CONDUCT

Sec. 10. (a) Prohibited Acts.—Except as provided in section 11 of this Act, it is unlawful for any person subject to the jurisdiction of the United States to—

(1) import into, or export from, the United States any endangered species which has been listed pursuant to section 4 of this Act;

(2) take any such species within the United States or in the territorial sea of the United States or upon the high seas;

(3) possess, sell, deliver, carry, transport, ship, or receive, by any means whatever, any such species which are taken in violation of paragraph (2) of this subsection;

(4) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and for commercial purposes, any such species;

(5) sell, distribute, or offer for sale in foreign commerce, interstate commerce, or activity affecting interstate commerce any endangered species of fish or wildlife;

(6) attempt to commit, solicit another to commit, or cause to be committed, any act prohibited by paragraphs (1) through (5) of this subsection;

(7) engage in any trade in any specimens of fish, wildlife, or plants, contrary to the provisions of the Convention, or possess any specimen traded contrary to the provisions of the Convention, including the definitions in article I therein;

(8) violate any regulations which is promulgated by the Secretary pursuant to section 4(e) of this Act; or

(9) import into or export from the United States except at a port or ports designated by the Secretary, any fish or wildlife, except nonendangered and nonthreatened shellfish and fishery products which are imported or exported for human or animal consumption, or fish or wildlife taken for recreational purposes pursuant to applicable Federal or State laws and regulations in waters under United States jurisdiction or on the high seas. To facilitate enforcement of this paragraph and to reduce the costs of enforcements, the Secretary, with the approval of the Secretary of the Treasury and after notice, and opportunity for public hearing, may, by regulation, designate ports and change such designations. Upon such terms and conditions as he may prescribe, the Secretary may permit such importation at nondesignated ports in the interest of the health or safety of the fish or wildlife or for any other reasons he deems appropriate. Any port designated by the Secretary of the Interior under the authority of section 4(d) of the Act of December 5, 1969 (16 U.S.C. 666cc–4(d)), shall, if such designation is in effect on the day before the date of the enactment of this Act, be deemed to be a port designated by the Secretary under this paragraph until such time as the Secretary otherwise provides.

(b) Similarity of Appearance Cases.—The Secretary may, by regulation, and to the extent he deems advisable, treat any species of fish or wildlife as an endangered or threatened species even though it is not listed pursuant to section 4 of this Act if he finds that—

(A) such species so closely resembles in appearance, at the point in question, a species which has been listed pursuant to such section that enforcement personnel would have substantial difficulty in attempting to differentiate between the listed and unlisted species;

(B) the effect of this substantial difficulty is an additional threat to an endangered or threatened species; and

(C) such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of this Act.

(c) SPECIES HELD IN CAPTIVITY OR CONTROLLED ENVIRONMENT.—The provisions of this section shall not apply to any species held in captivity or in a controlled environment on the effective date of this Act if the purposes of such holding are not contrary to the purposes of this Act.

EXCEPTIONS

SEC. 11. (a) GENERAL.—Upon a finding that the excepted conduct will not adversely affect the regenerative capacity of the involved species in a significant portion of its range or habitat or otherwise affect the survival of the wild population of such species, and upon such terms and conditions as he may prescribe, the Secretary may issue permits authorizing the importation, exportation, taking, or transportation, by persons found to be qualified, of any fish or wildlife which is listed as an endangered or threatened species pursuant to section 4 of this Act for—

(1) for scientific purposes in furtherance of the purposes of this Act; or

(2) to enhance the propagation or survival of the affected species including the propagation of such species in captivity or in a controlled habitat.

(b)(1) HARDSHIP.—The Secretary may except from the application of section 10(a) of this Act any person if the failure to grant such exception will cause undue economic hardship: *Provided*, That such exception shall be granted any non-Native resident of an Alaska Native village unless such resident is found by the Secretary not to be primarily dependent upon the taking of fish and wildlife for consumption or use in a Native community or for creating and selling authentic Native articles or handicrafts. The extent and duration of such exception shall be such as the Secretary deems appropriate: *Provided*, No such exception shall be for a duration of more than one year from the date of publication in the Federal Register of notice of proposed listing of the involved species. No exception shall apply to a quantity of fish or wildlife in excess of that specified by the Secretary. No such exception shall be granted unless such person, except non-Native residents of Alaska Native villages who are primarily dependent upon the taking of fish and wildlife for subsistence purposes, applies to the Secretary in writing and furnishes with such application such information as the Secretary may require to prove hardship. The one year period for those species of fish or wildlife which were listed by the Secretary as endangered prior to the effective date of this Act shall expire in accordance with the terms of section 3 of the Act of December 5, 1969 (83 Stat. 275). No such exemption may be granted for the importation or exportation of a specimen listed in appendix I of the Convention which is to be used for primarily commercial purposes.

(2) As used in this subsection, the term "undue economic hardship" shall include, but not be limited to:

(A) Substantial economic loss resulting from inability caused by this Act to perform contracts with respect to species of fish and wildlife entered into prior to the date of publication in the Federal Register of a notice of a proposed listing of such species as an endangered or threatened species.

(B) Substantial economic loss to persons who, for the year prior to the listing of a species under this Act derived a substantial portion of their income from the lawful taking of any listed species which taking would be made unlawful under this Act; or

(C) Curtailment of subsistence taking made unlawful under this Act by persons (i) not reasonably able to secure other sources of subsistence; and (ii) dependent to a substantial extent upon hunting and fishing for subsistence; and (iii) who must engage in such curtailed taking for subsistence purposes.

(3) The Secretary may make further requirements for a showing of undue economic hardship as he deems fit. Exceptions granted under this section may be limited by the Secretary in his discretion as to time, area, or other factor of applicability.

(c) PROCEDURE.—(1) The Secretary shall publish a notice in the Federal Register of each application for an exception. Each notice shall invite the submission from interested parties, within thirty days after the date of the notice, of written data, views, or arguments with respect to the application. Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.

(2) The Secretary may grant exceptions under subsections (a) and (b) of this section only if he finds, and publishes such finding in the Federal Register, that such exceptions were applied for in good faith and if granted and exercised will not operate to the disadvantage of such endangered or threatened species and will be consistent with the policy of this Act.

(d) ALASKA NATIVES.—(1) The provisions of this Act shall not apply with respect to the taking of any endangered or threatened species by any Indian, Aleut, or Eskimo who is an Alaskan Native who resides in Alaska if such taking is for the purpose of consumption or use in a native community for the purpose of selling or creating for sale in interstate commerce authentic native articles or handicrafts and clothing: *Provided*, That in each case such taking is not accomplished in a wasteful manner. As used in this paragraph—

(A) "consumption or use in a native community" includes selling any edible portion of fish or wildlife in native villages and towns in Alaska for native consumption within native village or towns; and

(B) "authentic native articles of handicrafts and clothing" means items composed wholly or in some significant respect of natural materials, and which are produced, decorated, or fashioned in the exercise of traditional native handicrafts without the use of pantographs, multiple carvers, or other mass copying devices. Traditional native handicrafts include, but are not limited to, weaving, carving, stitching, sewing, lacing, beading, drawing, and painting.

(2) Notwithstanding the provisions of paragraph (1) of this subsection, whenever the Secretary determines that any species of fish or wildlife which is subject to taking by Indians, Aleuts, or Eskimos is an endangered or threatened species and that such taking materially and negatively affects the threatened and endangered species, he may prescribe regulations upon the taking of such species by any such Indian, Aleut, or Eskimo. Such regulations may be established with reference to species, geographical description of the area included, the season for taking, or any other factors related to the reason for establishing such regulations and consistent with the policy of this Act. Such regulations shall be prescribed after a notice and hearings in the affected judicial districts of Alaska and as otherwise required by section 103 of the Marine Mammal Protection Act of 1972, and shall be removed as soon as the Secretary determines that the need for their imposition has disappeared: *Provided*, That no such regulation shall be established which is in contravention of any provision of the Marine Mammal Protection Act of 1972.

PENALTIES AND ENFORCEMENT

SEC. 12. (a) CIVIL PENALTY.—(1) Any person who—

(A) knowingly violates any provision of this Act or any regulation or permit issued under this Act, which prohibits the taking, importing, exporting, shipping, receiving, or otherwise moving in interstate or foreign commerce of any endangered or threatened species of fish or wildlife, or commits any act made unlawful under section 10(a) of this Act, may be assessed a civil penalty by the Secretary of not more than $10,000 for each violation;

(B) commits any act made unlawful under section 10(a) of this Act, or violates any other provision of this Act, or any regulation or permit issued under this Act, may be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation. No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each prohibited act is a separate violation. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay a penalty assessed under this subsection, the Secretary may by his own attorneys institute a civil action in a district court of the United States for any district in which such person is found, resides, or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. The court shall hear such action solely on the record made before the Secretary and shall sustain his action if it is supported by substantial evidence on the record considered as a whole.

(2) Hearings held during proceedings for the assessment of civil penalties authorized by paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5, United States Code. The Secretary may issue subpenas

for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(b) Criminal Violations.—(1) Any person who knowingly and willfully violates any provision of this Act, or of any regulation or permit issued thereunder, shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both.

(2) The head of any Federal agency which has issued a lease, license, permit, or other agreement authorizing the use of Federal lands, including grazing of domestic livestock, to any person who is convicted under paragraph (1) of this subsection may immediately modify, suspend, or revoke such lease, license, permit, or other agreement. The Secretary may suspend, cancel, or refuse to issue for a period of up to one year Federal hunting or fishing permits or stamps with respect to any person who is convicted under paragraph (1) of this subsection. The United States shall not be liable to pay any compensation, reimbursement, or damages in connection with any such modification, suspension, or revocation made pursuant to this section of any lease, license, permit, stamp, or other agreement.

(c) Rewards.—Upon the recommendation of the Secretary, the Secretary of the Treasury is authorized to pay an amount equal to one-half of the civil penalty or fine paid, but not to exced $2,500, to any person who furnishes information which leads to a finding of civil violation or a conviction of a criminal violation of any provision of this Act or any regulation or permit issued thereunder. Any officer or employee of the United States or of any State or local government who furnishes information or renders service in the performance of his official duties shall not be eligible for payment under this section.

(d) Enforcement.—(1) The provisions of this Act and any regulations or permits issued under this Act shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all Secretaries. Each such Secretary may utilize, by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency for purposes of enforcing this Act.

(2) The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulation issued thereunder.

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, in furtherance of the enforcement of this Act may execute and serve any arrest warrant, search warrant, or other warrant of civil or criminal process issued by any officer or court of competent jurisdiction. A person so authorized may search and seize, with or without a warrant, to the extent authorized by law. Any fish, wildlife, property, or item so seized shall be held by any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, property, or item pursuant to paragraph (4) of this subsection, except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

(4) All fish or wildlife, or plants taken, possessed, sold, purchased, offered for sale or purchase, transported, delivered, received, carried, shipped, exported or imported contrary to the provisions of this Act, any regulation issued under this Act, or any permit issued thereunder, and all guns, traps, nets, and other equipment, vessels, vehicles, aircraft, and other means of transportation used to aid the taking, possessing, selling, purchasing, offering for sale or purchase, transporting, delivering, receiving, carrying, shipping, exporting or importing of any fish or wildlife, or plants in violation of this Act, any regulation made pursuant thereto, or any permit issued thereunder shall be subject to forfeiture to the United States.

(5) All provisions of law relating to the seizure, forfeiture, and condemnation of a vessel for violation of the customs laws, the disposition of such vessel or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act. The powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Treasury Department shall, for purposes of this Act, be exercised or performed by the Secretary or by such persons as he may designate.

(e) Registration.—(1) Any person who engages to any extent in business as an importer of fish or wildlife must register with the Secretary of the Treasury his name and the address of each place of business at which, and all trade names under which, he conducts such business.

(2) Any person required to register with the Secretary of the Treasury under paragraph (1) of this subsection shall—

(A) keep such records as will fully and correctly disclose each importation or exportation of fish or wildlife except nonendangered and nonthreatened shell fish or fishery products which are imported or exported for human or animal consumption or recreational purposes, made by him and the subsequent disposition made by him with respect to such fish or wildlife and

(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his places of business, an opportunity to examine his inventory of imported fish or wildlife and the records required to be kept under subparagraph (A) of this paragraph and to copy such records.

(3) The Secretary of the Treasury, after consultation with the Secretary, shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.

(f) Enforcement Regulations.—(1) The Secretary, the Secretary of the Treasury, and the Secretary of the Department in which the Coast Guard is operating, are authorized to promulgate such regulations as may be appropriate to enforce this Act, and to charge reasonable fees for expenses to the Government connected with permits authorized by this Act, including processing applications and reasonable inspections, and the transfer, board, handling, or storage of fish, wildlife, or plants and evidentiary items seized and forfeited under this Act. All fees collected pursuant to this subsection shall be deposited in the Treasury to the credit of the appropriation which is current and chargeable for the cost of furnishing the services. Appropriated funds may be expended pending reimbursement from parties in interest.

(g) Citizen Suits.—(1) Except as provided in paragraph (2) of this subsection, any person may commence a civil suit on his own behalf to enjoin any person, including the United States and any other governmental instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution), who is alleged to be in violation of any provision of this Act or regulation issued under the authority thereof. The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any such provision or regulation, as the case may be.

(2) No action may be commenced—

(A) prior to sixty days after written notice of the violation has been given to the Secretary, and to any alleged violator of any such provision or regulation;

(B) if the Secretary has commenced action to impose a penalty pursuant to subsection (a) of this section; or

(C) if the United States has commenced and is diligently prosecuting a criminal action in a court of the United States or a State to redress a violation of any such provision or regulation.

(3)(A) Any suit under this subsection may be brought in the judicial district in which the violation occurs.

(B) In any such suit under this subsection in which the United States is not a party, the Attorney General, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

(4) The court, in issuing any final order in any suit brought pursuant to paragraph (1) of this subsection may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(5) The injunctive relief provided by this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or limitation or to seek any other relief (including relief against the Secretary or a State agency).

(h) COORDINATION.—The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act with the administration of the animal quarantine laws (21 U.S.C. 101–105, 111–135b, and 612–614) and section 306 of the Tariff Act of 1930 (19 U.S.C. 1306). Nothing in this Act or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations or possession of animals and other articles. No proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture. Nothing in this Act shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, including, but not limited to, section 527 of such Act (19 U.S.C. 1527), relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.

ENDANGERED PLANTS

SEC. 13. The Secretary of Agriculture, in conjunction with other affected agencies, is authorized and directed to review species of plants which are endangered or threatened, and methods of providing adequate protection including legislation for such species. He shall report the results of such review to Congress, not later than one year after the date of enactment of this Act. For purposes of this section, there is authorized to be appropriated not to exceed $250,000.

CONFORMING AMENDMENTS

SEC. 14. (a) Section 4(c) of the Act of October 15, 1966 (80 Stat. 928, 16 U.S.C. 668dd(c)), is further amended by revising the section sentence thereof to read as follows: "With the exception of endangered and threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of such Act nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the System."

(b) Section 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224, 16 U.S.C. 715i(a)) and section 401(a) of the Act of June 15, 1935 (49 Stat. 383, 16 U.S.C. 715s(a)) are each amended by striking out "threatened with extinction," and inserting in lieu thereof the following: "listed pursuant to section 4 of the Endangered Species Act of 1973 as endangered or threatened species,".

(c) Section 6(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601–9(a)(1)) is amended by striking out:

> "THREATENED SPECIES.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction."

and inserting in lieu thereof the following:

> "ENDANGERED AND THREATENED SPECIES.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5 of the Endangered Species Act of 1973, needed for the purpose of conserving, protecting, restoring, or propagating endangered or threatened species of fish, wildlife, or plants."

(d) The first sentence of section 2 of the Act of September 28, 1962 (76 Stat. 653; 16 U.S.C. 460k–1), is amended to read as follows:

"SEC. 2. The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—

> "(1) incidental fish- and wildlife-oriented recreational development,
>
> "(2) the protection of natural resources,
>
> "(3) the conservation of endangered or threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973, or
>
> "(4) carrying out two or more of the purposes set forth in paragraphs (1) through (3) of this section, and are adjacent to, or within, the said conservation areas, except that the acquisition of any land or interest therein

pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps."

(e) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407) is amended—

(1) by striking out "Endangered Species Conservation Act of 1969" in section (1)(B) thereof and inserting in lieu thereof the following: "Endangered Species Act of 1973";

(2) by striking out "pursuant to the Endangered Species Conservation Act of 1969" in section 101(a)(3)(B) thereof and inserting in lieu thereof the following: "or threatened species pursuant to the Endangered Species Act of 1973";

(3) by striking out "endangered under the Endangered Species Conservation Act of 1969" in section 102(b)(3) thereof and inserting in lieu thereof the following: "an endangered or a threatened species pursuant to the Endangered Species Act of 1973"; and

(4) by striking out "Endangered Species List, authorized by the Endangered Species Conservation Act of 1969," in section 202(a)(6) thereof and inserting in lieu thereof the following: "endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered Species Act of 1973."

(f) Section 2(1) of the Federal Environmental Pesticide Control Act of 1972 (Public Law 92-516) is amended by striking out the words "by the Secretary of the Interior under Public Law 91-135" and inserting in lieu thereof the words "or threatened by the Secretary pursuant to the Endangered Species Act of 1973."

REPEALER

SEC. 15. The Endangered Species Conservation Act of 1969 (sections 1 through 3 of the Act of October 15, 1966, and sections 1 through 6 of the Act of December 5, 1969; 16 U.S.C. 668aa—668cc-6) is repealed.

APPLICABILITY WITHIN STATES

SEC. 16. (a) STATE PLAN.—By the end of the first year after the date of enactment of this Act, a State may establish a plan for endangered and threatened species in accordance with this Act. A plan is in accordance with this Act if it meets or exceeds the requirements set forth in section 6(c) of this Act and represents an effective response to the Nation's need to conserve, protect, restore, and propagate endangered and threatened species of fish or wildlife. Upon the establishment of such a plan, the Governor or the head of the State agency shall promptly transmit a certified copy to the Secretary.

(b) DETERMINATION BY SECRETARY.—Within ninety days after the Secretary receives a certified copy of a State plan established under subsection (a) or subsection (d) of this section, the Secretary shall make a determination whether such State has established a plan for endangered and threatened species in accordance with this Act. Unless the Secretary determines, pursuant to this section, that a State plan is not in accordance with this Act, the plan shall go into effect in such State on the date designated in this plan. In no event shall such State plan go into effect in such State on the date designated in the plan. In no event shall such State plan go into effect less than three months or more than nine months after the date of its establishment.

(c) PERIODIC REVIEW.—The Secretary shall periodically, but not less than once every three years, review each State plan for endangered and threatened species which has been approved under subsection (b) of this section and for which there is experience. to determine whether such plan is still in accordance with this Act and to evaluate the success of such plan in terms of the policy of this Act. To facilitate such review, the Governor or the head of the State agency in each such State shall submit to the Secretary periodically all information relevant and requested by the Secretary. The Secretary shall report to the President and Congress simultaneously each year on the results of such reviews, including any recommendations for legislation.

(d) NO STATE PLAN.—Except as species listed in Appendix I of the Convention, the provisions of this Act regarding the management and taking of any

State's resident species shall become applicable in their entirety within a State fifteen months after the date of enactment of this Act unless, prior to such date, the Secretary has made a determination under subsection (b) of this section that such State has established a plan for endangered and threatened species in accordance with this Act: *Provided*, That if, within fifteen months of the date of enactment of this Act, the Secretary finds that a State which does not prevent the taking of a species listed by him as endangered does not provide adequate protection for that species, he may by regulation implement the provisions of subsection 10(a) of this Act with respect to that species in that State. If, at any time thereafter, the Secretary upon petition makes a determination, pursuant to subsection (b) of this section, that a State has established a plan for endangered and threatened species in accordance with this Act, such plan shall go into effect and the provisions of this Act regarding the conservation and management of any species shall cease to be applicable or in effect within such State on a date to be designated by the Secretary. If, after a State plan in accordance with this Act is in effect within a State, the Secretary makes a determination, pursuant to subsection (c) of this section, that such plan is no longer in accordance with this Act, the provision of this Act regarding the management and taking of any species shall go into effect within such State and such plan shall cease to be in effect on a date to be designated by the Secretary.

(e) PROCEDURE.—(1) Before making any determination under this section, the Secretary shall publish a notice in the Federal Register and afford the State and all interested parties a reasonable opportunity to present their views by oral and written submission.

(2) The Secretary shall notify in writing the Governor of the affected State of any determinations made under this section and shall publish these determinations with reasons therefor in the Federal Register.

(3) Any determinations made by the Secretary under this section shall be subject to judicial review in accordance with chapter V of title 5, United States Code, in the United States court of appeals for the circuit in which is located the State whose plan is the subject of such determination or in the United States Court of Appeals for the District of Columbia Circuit. Any such review shall be instituted within sixty days from the date on which the determination made by the Secretary is published in the Federal Register.

(f) EFFECTIVE DATE.—Except as otherwise provided in this section, the provisions of this Act shall become effective in their entirety upon the date of enactment of this Act.

MARINE MAMMALS ACT

SEC. 17. CONFLICTS.—Except as otherwise provided in this Act, no provision of this Act shall take precedence over any more restrictive conflicting provision of the Marine Mammal Protection Act of 1972.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 18. For purposes of this Act, other than section 6 and section 13 of this Act, there are authorized to be appropriated such sums as are necessary, not to exceed $3,960,000 for the fiscal year ending June 30, 1974; not to exceed $6,660,000 for the fiscal year ending June 30, 1975; and not to exceed $8,870,000 for the fiscal year ending June 30, 1976.

SEC. 19. (a) That, in accordance with section 3(b) of the Wilderness Act (78 Stat. 892: 16 U.S.C. 1132(b)), those lands in the Daniel Boone National Forest, Kentucky, comprising the Pioneer Weapons Hunting Area and consisting of approximately seven thousand three hundred acres, are hereby designated as wilderness.

(b) As soon as practicable after this Act takes effect, a map of the wilderness area and a description of its boundaries shall be filed with the Interior and Insular Affairs Committee of the United States Senate and House of Representatives and such map and description shall have the same force and effect as if included in this Act: *Provided, however*, That correction of clerical and typographical errors in such legal description and map be made. A copy of such map and description shall be on file and available for public inspection in the offices of the Chief, Forest Service, United States Department of Agriculture.

(c) The wilderness area designated by this Act shall be known as the Cave Run Wilderness and shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness areas, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

(d) Nothing in this Act or the Wilderness Act shall be construed as precluding the construction of a Zilpo recreation site access road generally on a route extending northward from Forest Development Road Numbered 129 generally skirting the eastern boundary of the Pioneer Weapons Hunting Area, or as affecting or modifying in any manner the 1962 Cooperative Management Plan between the Department of Fish and Wildlife Resources of the State of Kentucky and the Department of Agriculture involving the designation of the Pioneer Weapons Hunting Area within the Daniel Boone National Forest.

MOTION OFFERED BY MR. DINGELL

Mr. DINGELL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Dingell moves to strike out all after the enacting clause of S. 1983 and insert in lieu thereof the provisions of H.R. 37, as passed.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to provide for the conservation, protection, restoration, or propagation of endangered and threatened species of fish, wildlife, and plants, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 37) was laid on the table.

APPOINTMENT OF CONFEREES ON S. 1983, ENDANGERED AND THREATENED SPECIES CONSERVATION ACT OF 1973

Mr. DINGELL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1983) to provide for the conservation, protection, restoration, and propagation of threatened and endangered species of fish, wildlife, and plants, and for other purposes, with House amendments thereto, insist on the House amendments, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Michigan? The Chair hears none and appoints the following conferees: Mrs. Sullivan and Messrs. Dingell and Goodling.

Calendar No. 289

93D CONGRESS
1ST SESSION

S. 1983

[Report No. 93–307]

IN THE SENATE OF THE UNITED STATES

JUNE 12, 1973

Mr. WILLIAMS introduced the following bill; which was read twice and referred to the Committee on Commerce

JULY 1, 1973

Reported, under the authority of the order of the Senate of June 30, 1973, by Mr. MAGNUSON, with amendments

[Strike out all after the enacting clause and insert the part printed in italic]

A BILL

To provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinction, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, ~~That this Act may be cited as the "Endangered Species Conservation Act of 1973".~~

~~FINDINGS AND POLICY~~

~~SEC. 2. (a) The Congress finds and declares that one of the unfortunate consequences of growth and development in the United States and elsewhere has been the extermina-~~

~~tion of some species or subspecies of fish and wildlife and flora; that serious losses in other species of wild animals with educational, historical, recreational, and scientific value have occurred and are occurring; that the United States has pledged itself, pursuant to migratory bird treaties with Canada and Mexico, the migratory and endangered bird treaty with Japan, the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, the International Convention for the Northwest Atlantic Fisheries, the International Convention for the High Seas Fisheries of the North Pacific Ocean, and other international agreements, to conserve and protect, where practicable, the various species of fish and wildlife and flora that are threatened with extinction; and that the conservation, protection, restoration, or propagation of such species will inure to the benefit of all citizens. The purposes of this Act are to provide a program for the conservation, protection, restoration, or propagation of species and subspecies of fish and wildlife and flora that are threatened with extinction, or are likely within the foreseeable future to become threatened with extinction.~~

~~(b) It is further declared to be the policy of Congress that all Federal departments and agencies shall seek to protect species or subspecies of fish and wildlife, and flora that are threatened with extinction or are likely within the foresee-~~

~~able future to become threatened with extinction, and wherever practicable, shall utilize their authorities in furtherance of the purpose of this Act.~~

~~DEFINITIONS~~

~~SEC. 3. For the purposes of this Act:~~

~~(1) The term "Federal lands" means all lands or interests therein over which Congress has legislative authority under article IV, section 3, clause 2 of the United States Constitution, including, without limitation, lands enumerated in section 1400 of title 43, United States Code.~~

~~(2) The term "fish" means any fish or any part, products, eggs, or offspring thereof, or the dead body or parts thereof.~~

~~(3) The term "import" means to bring into the territorial limits of the United States and includes, without limitation, entry into a foreign trade zone, and transshipment through any portion of the United States without customs entry.~~

~~(4) The term "person" means (A) any private person or entity, and (B) any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.~~

~~(5) The term "Secretary" means the Secretary of~~

~~the Interior with respect to functions and responsibilities under this Act relating to fish and wildlife, and the Secretary of Agriculture with respect to functions and responsibilities under this Act relating to flora~~.

~~(6) The term "take" means (A) with respect to fish or wildlife, to threaten, harass, hunt, capture, or kill, or attempt to threaten, harass, hunt, capture, or kill; or the destruction, modification, or curtailment of its habitat or range; and (B) with respect to flora, to collect, sever, remove, or otherwise damage in any manner, or to attempt to collect, sever, remove, or otherwise damage in any manner.~~

~~(7) The term "United States" includes the several States, the District of Columbia, and the Commonwealth of Puerto Rico, the Canal Zone, the possessions of the United States, and the Trust Territory of the Pacific Islands~~.

~~(8) The term "wildlife" means any wild mammal, game or nongame migratory bird, wild bird, amphibian, reptile, mollusk or crustacean, or other animal, or any part, products, egg, or offspring thereof, or the dead body or parts thereof, including migratory, nonmigratory, and endangered birds for which protection is also afforded by treaty or other international agreement.~~

~~DETERMINATION OF ENDANGERED SPECIES~~

~~SEC. 4. (a) A species or subspecies of fish or wildlife or flora shall be regarded as an endangered species, whenever—~~

~~(1) the appropriate Secretary by regulation determines, based on the best scientific and commercial data available to him and after consultation, as appropriate, with the affected States, and, in cooperation with the Secretary of State, the country or countries in which such fish and wildlife are normally found or whose citizens harvest the same on the high seas, and with interested persons and organizations, and other interested Federal agencies, that the continued existence of such species or subspecies of fish or wildlife or flora, throughout all or a significant portion of its habitat or range, is either presently threatened with extinction or will likely within the foreseeable future become threatened with extinction, due to any of the following factors:~~

~~(A) the present or threatened destruction, modification, or curtailment of its habitat or range;~~

~~(B) overutilization for commercial, sporting, scientific, or educational purposes;~~

~~(C) disease or predation;~~

~~(D) the inadequacy of existing regulatory mechanisms; or~~

~~(E) other natural or manmade factors affecting its continued existence; or,~~

~~(2) the status of such species or subspecies is unknown.~~

~~(b) The appropriate Secretary shall publish in the Federal Register, not less than annually, a list, by scientific and common name or names, of species or subspecies determined, pursuant to this section, to be endangered, indicating as to each species or subspecies so listed whether such species or subspecies is threatened with extinction or is likely within the foreseeable future to become threatened with extinction or whether its status is unknown and, in either case, over what portion of the range of such species or subspecies this condition exists. The appropriate Secretary may, from time to time, by regulation revise any such list. The endangered species lists which are effective as of the date of enactment of this Act shall be republished to conform to the provisions of this Act: *Provided, however*, That until such republication nothing herein shall be deemed to invalidate such endangered species lists. The provisions of section 553 of title 5, United States Code, shall apply to any regulation issued under this subsection. The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5,~~

~~United States Code, also conduct a review, on the record, after opportunity for agency hearing of any listed or unlisted species of fish or wildlife proposed to be removed from or added to the list, but only if he finds and publishes his findings that such person has presented substantial evidence to warrant such review.~~

~~LAND ACQUISITION AND AGENCY COMPLIANCE~~

~~SEC. 5. (a) The Secretary shall utilize the land acquisition and other authorities of the Migratory Bird Conservation Act, as amended, the Fish and Wildlife Act of 1956, as amended, and the Fish and Wildlife Coordination Act, as appropriate, to carry out a program in the United States of conserving, protecting, restoring, or propagating those species and subspecies of fish and wildlife that he lists as endangered species pursuant to section 2 of this Act.~~

~~(b) In addition to the land acquisition authorities otherwise available to him, the appropriate Secretary is hereby authorized to acquire by purchase, donation, or otherwise, lands or interests therein needed to carry out the purpose of this Act relating to the conservation, protection, restoration, and propagation of those species or subspecies of fish and wildlife and flora that he lists as endangered species pursuant to section 4 of this Act.~~

~~(c) Funds made available pursuant to the Land and Water Conservation Fund Act of 1965, as amended, may~~

~~be used for the purpose of acquiring lands, waters, or interests therein pursuant to this section that are needed for the purpose of conserving, protecting, restoring, or propagating those species or subspecies of fish and wildlife and flora that he lists as endangered species pursuant to section 4 of this Act.~~

~~(d) The appropriate Secretary shall review other programs administered by him and, to the extent practicable utilize such programs in furtherance of the purpose of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize, wherever practicable, their authorities in furtherance of the purpose of this Act by carrying out programs for the protection of endangered species of fish or wildlife or flora and by taking such actions as may be necessary to insure that actions authorized, funded, regulated, or administered by them do not jeopardize the continued existence of endangered species or result in destruction or modification of critical habitat of such species.~~

~~(f) In carrying out the provisions of this Act, the Secretary, through the Secretary of State, shall encourage foreign countries to provide protection to species or subspecies of fish or wildlife threatened with extinction, to take measures to prevent any fish or wildlife from becoming threatened with extinction, and he shall, through the Secre-~~

~~tary of State, encourage bilateral and multilateral agreements with such countries for the conservation and propagation of fish and wildlife. The Secretary is authorized to assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign countries and international organizations in developing personnel resources and programs which promote conservation of fish or wildlife, including (1) educational training of United States and foreign personnel, here or abroad, in the subjects of fish and wildlife management, research, and law enforcement; and (2) rendering professional assistance abroad in such matters. The Secretary is also authorized to conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the obligations imposed upon him by this Act.~~

~~COOPERATION WITH THE STATES~~

~~SEC. 6. (a) In carrying out the program authorized by this Act, the appropriate Secretary shall cooperate to the maximum extent practicable with the several States. Such cooperation shall include consultation before the acquisition of any land for the purpose of conserving, protecting, restoring, or propagating any endangered species.~~

~~(b) The Secretary may enter into agreements with the States for the administration and management of any area~~

~~established for the conservation, protection, restoration, or propagation of endangered species. Any revenues derived from the administration of such areas under these agreements shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383), as amended (16 U.S.C. 715s).~~

~~(c) The Secretary may delegate to a State the authority to regulate the taking by any person of endangered species or subspecies of resident fish and wildlife when he determines that such State maintains an adequate and active program, consistent with the policies and purposes of this Act, to manage and protect such endangered species in accordance with criteria issued by the Secretary.~~

~~(d) Any action taken by the Secretary under this section shall be subject to his periodic and continual review at no greater than annual intervals. Such review shall include the consideration of comment received from interested persons.~~

~~(e) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting the power of any State to enact legislation more restrictive than the provisions of this Act for the protection and conservation of wildlife, including the regulation or prohibition of the retail sale of specimens or of products processed or manufactured from the specimens of wildlife, whether such specimens are alive or dead.~~

~~(f) The Secretary of the Interior shall promptly undertake an investigation and study regarding the functions and responsibilities which the States should have with respect to the management and protection of endangered species of fish and wildlife. The Secretary shall report the results of the investigation and study to Congress within one year after the date of the enactment of this Act, and such report may include such recommendations as the Secretary may have regarding the extent to, and manner in, which the Federal Government should assist the States in establishing and implementing management and protection programs for endangered species.~~

~~PROHIBITED ACTS~~

~~SEC. 7. (a) Notwithstanding any other Act of Congress or regulation issued pursuant thereto, and except as hereinafter provided, any person who—~~

~~(A) imports into or exports from the United States, receives, or causes to be so imported, received, or exported; or~~

~~(B) takes or causes to be taken within the United States, the territorial sea of the United States, Federal lands, or upon the high seas; or~~

~~(C) ships, carries, or receives by any means in interstate commerce~~

~~any species or subspecies of fish or wildlife or flora which~~

~~the Secretary has listed as an endangered species threatened with extinction pursuant to section 4 of this Act, shall be punished in accordance with the provisions of section 9 of this Act.~~

~~(b) Whenever the Secretary, pursuant to section 4 of this Act, lists a species or subspecies as an endangered species which is likely within the foreseeable future to become threatened with extinction, he shall issue such regulations as he deems necessary or advisable to provide for the conservation, protection, restoration, or propagation of such species or subspecies, including regulations subjecting to punishment in accordance with section 9 of this Act any person who—~~

~~(1) imports into or exports from the United States, receives, or causes to be so imported, received, or exported; or~~

~~(2) takes or causes to be taken within the United States, the territorial sea of the United States, Federal lands or upon the high seas; or~~

~~(3) ships, carries, or receives by any means in interstate commerce~~

~~any such species or subspecies of fish or wildlife or flora likely within the foreseeable future to become threatened with extinction.~~

~~(c) The Secretary shall allow taking of an endangered~~

~~species which is likely within the foreseeable future to become threatened only (1) when it can clearly be shown that such taking will not damage the population, or (2) in emergency cases involving human health and safety.~~

~~(d) For the purpose of facilitating enforcement of this Act the Secretary may from time to time, by regulation, extend the protection of this section, to the extent he deems it advisable, to any species or subspecies of fish or wildlife or flora which is not listed as an endangered species, but which so closely resembles in appearance, at that point in question, a species or subspecies of fish or wildlife or flora which has been listed as endangered, that substantial difficulty is posed to enforcement personnel in attempting to differentiate between the endangered and nonendangered species of subspecies of fish or wildlife or flora, and this difficulty poses an additional threat to the endangered species or subspecies.~~

~~EXCEPTIONS~~

~~SEC. 8. (a) The Secretary may permit, under such terms and conditions as he may prescribe, the importation, taking, or the transportation in interstate commerce of any species or subspecies of fish or wildlife or flora listed as an endangered species threatened with extinction for scientific purposes, and for the propagation of such fish and wildlife in captivity for preservation purposes, but only if he finds that such importation, taking, or transportation in interstate~~

~~commerce, or projected use will not adversely affect the regenerative capacity of such specimen or of such species or subspecies in a significant portion of its range or habitat or otherwise affect the survival of the wild population of such species.~~

~~(b) In order to minimize undue economic hardship to any person importing, exporting, taking, or transporting in interstate commerce any species or subspecies of fish or wildlife or flora which is listed as an endangered species pursuant to section 4 of this Act under any contract entered into prior to the date of original publication of such listing in the Federal Register, the Secretary, upon such person filing an application with him and upon filing such information as the Secretary may require showing, to his satisfaction, such hardship, may permit such person to import, export, take, or transport such species or subspecies in such quantities and for a period not to exceed one year, as he determines to be appropriate.~~

~~PENALTIES AND ENFORCEMENT~~

~~SEC. 9. (a) (1) Any person who violates any provision of this Act or any regulation or permit issued thereunder, other than a person who commits a violation the penalty for which is prescribed by subsection (b) of this section, shall be assessed a civil penalty by the appropriate Secretary of not more than $10,000 for each such violation.~~

~~No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be compromised by the appropriate Secretary. Upon any failure to pay the penalty assessed under this paragraph, the appropriate Secretary may request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found or resides or transacts business to collect the penalty, and such court shall have jurisdiction to hear and decide any such action. In the case of Guam such actions may be brought in the District Court of Guam; in the case of the Virgin Islands such actions may be brought in the District Court of the Virgin Islands; and in the case of American Samoa such actions may be brought in the District Court of the United States for the district of Hawaii and such courts shall have jurisdiction of such actions. In hearing such action, the court shall sustain the Secretary's action if such action is supported by substantial evidence.~~

~~(2) Whenever any property is seized pursuant to subsection (e) of this section, the appropriate Secretary shall move to dispose of the civil penalty proceedings pursuant to paragraph (1) of this subsection as expeditiously as possible. Upon the assessment and collection of a civil penalty pursuant to paragraph (1) of this subsection, any property so~~

~~seized may be proceeded against in any court of competent jurisdiction and forfeited. Fish or wildlife or flora so forfeited shall be conveyed to the appropriate Secretary for disposition by him in such a manner as he deems appropriate. If, with respect to any such property so seized, no compromise forfeiture has been achieved or no action is commenced to obtain the forfeiture of such fish, wildlife, flora, property, or item within thirty days following the completion of a civil ceedings involving an assessment and collection of a civil penalty, such property shall be immediately returned to the owner or the consignee in accordance with regulations promulgated by the Secretary.~~

~~(3) Proceedings for the assessment of civil penalties pursuant to paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5. The appropriate Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to~~

~~issue an order requiring such person to appear and give testimony before the appropriate Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.~~

~~(b) Any person who knowingly violates any provision of this Act, or any regulation or permit issued thereunder, shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both, and any Federal hunting or fishing licenses, permits, or stamps may be revoked or withheld for a period of up to five years. Upon conviction, (1) any fish or wildlife or flora seized shall be forfeited to the Secretary for disposal by him in such manner as he deems appropriate, and (2) any other property seized pursuant to subsection (c) of this section may, in the discretion of the court, commissioner, or magistrate, be forfeited to the United States or otherwise disposed of. If no conviction results from any such alleged violation, such property so seized in connection therewith shall be immediately returned to the owner or consignee in accordance with regulations promulgated by the appropriate Secretary, unless the Secretary, within thirty days following the final disposition of the case involving such violations, commences proceedings under subsection (a) of this section.~~

~~(c) (1) The provisions of sections 7 and 8 of this Act~~

~~and any regulations or permits issued pursuant thereto, or pursuant to subsection (d) or (e) of this section, shall be enforced by the appropriate Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all such Secretaries. Each such Secretary may utilize, by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency.~~

~~(2) Any authorized agent of the Departments of the Interior, of Commerce, of Agriculture, or of the Treasury may, with or without a warrant, arrest any person who such agent has probable cause to believe is knowingly violating this Act, in his presence or view, or any regulation or permit issued thereunder, the penalty for which is provided under subsection (b) of this section. An agent who has made an arrest of a person in connection with any such willful violation may search such person at the time of his arrest and seize any property taken, used, or possessed in connection with any such violation.~~

~~(3) Any authorized agent of the Departments of the Interior, of Commerce, of Agriculture, or of the Treasury shall have authority to search and seize with or without a warrant, as provided by the customs laws and by the law relating to search and seizure. Any such officer or agent is authorized to execute warrants to search for and seize any~~

~~property, including, for the purposes of this section, any fish, wildlife, flora, aircraft, boat, or other conveyance, weapon, business records, shipping documents, or other items which have been taken, used, or possessed in connection with the violation of any section, regulation, or permit with respect to which a civil or criminal penalty may be assessed, pursuant to subsection (a) or (b) of this section. Any property seized pursuant to this section shall be held by any agent authorized by the Secretary or the Secretary of the Treasury, or by a United States marshal, pending disposition of proceedings under subsection (a) or (b) of this section; except that either Secretary may, in lieu of holding such property, either (1) permit a bond or other satisfactory surety to be posted, or (2) place the fish or wildlife or flora in the custody of such person as he shall designate. Upon the imposition of a civil or criminal penalty, or a forfeiture, the costs to the Government of transfer, board, and handling, including the cost of investigations at a nondesignated port of entry, shall be payable to the account of the Secretary. The owner or consignee of any property so seized shall, as soon as practicable following such seizure, be notified of the fact in accordance with regulations established by the Secretary~~.

~~(d) The Secretary may request the Attorney General to bring appropriate action to prevent threatened violations~~

~~of this Act, or of any regulations or orders promulgated pursuant thereto~~.

~~(e) For the purposes of facilitating enforcement of this Act and reducing the costs thereof, the Secretary, with the approval of the Secretary of the Treasury, shall, after notice and an opportunity for a public hearing, from time to time designate, by regulation, any port or ports in the United States for the importation of fish and wildlife (other than shellfish and fishery products) or flora into the United States. The importation of such fish or wildlife or flora into any port in the United States, except those so designated, shall be prohibited after the effective date of such designations; except that the Secretary, under such terms and conditions as he may prescribe, may permit importation at nondesignated ports in the interest of the health or safety of the fish or wildlife. Such regulations may provide other exceptions to such prohibition if the Secretary, in his discretion, deems it appropriate and consistent with the purposes of this subsection~~.

~~(f) The Secretary is authorized to promulgate such regulations as may be appropriate to carry out the purposes of this Act, and the Secretaries of the Treasury and the Department in which the Coast Guard is operating are authorized to promulgate such regulations as may be appropriate to the exercise of responsibilities under subsection (e) (1) of this section.~~

~~(g) (1) Any person who engages to any extent in business as an importer of fish and wildlife must register with the Secretary of the Treasury his name and the address of each place of business at which, and all trade names under which, he conducts such business.~~

~~(2) Any person required to register with the Secretary of the Treasury under paragraph (1) of this subsection shall—~~

~~(A) keep such records as will fully and correctly disclose each importation of fish and wildlife made by him and the subsequent disposition made by him with respect to such fish and wildlife; and~~

~~(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his places of business and opportunity to examine his inventory of imported fish and wildlife and the records required to be kept under subparagraph (A) of this paragraph, and to copy such records.~~

~~(3) The Secretary of the Treasury shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.~~

~~INTERNATIONAL AND INTERGOVERNMENTAL COOPERATION~~

~~SEC. 10. (a) (1) In carrying out the provisions of this Act, the Secretary, through the Secretary of State, shall encourage foreign countries to provide protection to~~

~~species or subspecies of fish and wildlife or flora threatened with extinction, to take measures to prevent any fish or wildlife from becoming threatened with extinction, and shall cooperate with such countries in providing technical assistance in developing and carrying out programs to provide such protection, and shall, through the Secretary of State, encourage bilateral and multilateral agreements with such countries for the protection, conservation, or propagation of fish and wildlife or flora. The Secretary shall also encourage persons, taking directly or indirectly fish or wildlife or flora in foreign countries or on the high seas for importation into the United States for commercial or other purposes, to develop and carry out, with such assistance as he may provide under any authority available to him, conservation practices designed to enhance such fish or wildlife or flora and their habitat or range. The Secretary of State, in consultation with the Secretary, shall take appropriate measures to encourage the development of adequate measures, including, if appropriate, international agreements, to prevent such fish or wildlife or flora from becoming threatened with extinction.~~

~~(2) To assure the worldwide conservation of endangered species and to avoid unnecessary harm to affected United States industries, the Secretary, through the Secretary of State, shall seek the convening of an international ministerial meeting on fish and wildlife prior to November 1,~~

~~1973, and included in the business of that meeting shall be the signing of a binding international convention on the conservation of endangered species.~~

~~(b) The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act and amendments made by this Act, with the administration of the animal quarantine laws (19 U.S.C. 1306; 21 U.S.C. 101-105, 111-135b, and 612-614). Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations of animals and other articles and no proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture.~~

~~(c) Whenever the Secretary determines pursuant to this Act or any other authority vested in him, that a species of fish or wildlife is an endangered species, and publishes regulations pertaining to the protection, control, management, or enhancement of such endangered species, the Secretary of Agriculture may use all authorities available to him with respect to research, investigations, conservation, development, protection, management, and enhancement of fish~~

~~and wildlife, including, but not limited to, the conservation operations program, watershed protection and flood prevention programs, rural environmental assistance program, Great Plains conservation program, resource conservation and development program, forestry programs, and water bank program, in the protection, control, management, or enhancement of such endangered species. Recognizing the national and international interest in the protection and enhancement of such endangered species, the Secretary of Agriculture is authorized, notwithstanding the provisions of any other law, to bear the full cost, or any lesser amount that he, in consultation with the Secretary may determine desirable to accomplish the objectives of the Act, of the cost of installing any practice, measure, work of improvement, facility, or other developmental, protective, or management systems on private land, the primary purpose of which is for the purpose of enabling the landowner to comply with the regulations, or other recommendations, of the Secretary pertaining to the protection, control, management, or enhancement of such endangered species. The Secretary of Agriculture, in carrying out the purposes of this section, shall utilize his authorities to conduct research and investigations into vegetative and structural methods and other methods and practices, measures, works of improvement, and facilities most appropriate or effective in the protection, control, man-~~

~~agement, or enhancement of such endangered species. If determined desirable, the Secretary and the Secretary of Agriculture shall be authorized to jointly carry out research, surveys, and investigations. The Secretary is authorized to transfer to the Secretary of Agriculture such funds as may be necessary to carry out the purposes of this subsection.~~

~~(d) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, as amended, including, without limitation, section 527 of such Act relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.~~

~~CONFORMING AMENDMENTS~~

~~SEC. 11. (a) Subsection 4(c) of the Act of October 15, 1966 (80 Stat. 928), as amended (16 U.S.C. 668dd (c)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered species listed by the secretary pursuant to section 4 of the Endangered Species Conservation Act of 1973, nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the system."~~

~~(b) Subsection 10(a) of the Migratory Bird Conser-~~

~~vation Act (45 Stat. 1224), as amended (16 U.S.C. 715 i(a)), is further amended by inserting "or likely within the foreseeable future to become threatened with" between the words "with" and "extinction".~~

~~(c) Subsection 401(a) of the Act of June 15, 1935 (49 Stat. 383), as amended (16 U.S.C. 715s(a)), is further amended by inserting "or likely within the foreseeable future to become threatened with" between the words "with" and "extinction" in the last sentence thereof.~~

~~(d) Subsection 6(a)(1) of the Land and Water Conservation Fund Act of 1965 (78 Stat. 903), as amended (16 U.S.C. 4601-9(a)(1)), is further amended by inserting "or likely within the foreseeable future to become threatened with" between the words "with" and "extinction".~~

~~REPEALS~~

~~SEC. 12. (a) Sections 1 through 3 of the Act of October 15, 1966 (80 Stat. 926, 927), as amended (16 U.S.C. 668aa-668cc), are hereby repealed in their entirety.~~

~~(b) Sections 1 through 6 of the Act of December 5, 1969 (83 Stat. 275-279; 16 U.S.C. 668cc-1 through 668cc-6) are hereby repealed in their entirety.~~

That this Act may be cited as the "Endangered Species Act of 1973".

DECLARATION OF POLICY

Sec. 2. (a) Findings.—The Congress finds and declares that—

(1) various species of fish, wildlife, and plants in the United States have been rendered extinct as a consequence of economic growth and development untempered by adequate concern and conservation;

(2) other species of fish, wildlife and plants have been so depleted in numbers that they are in danger of or threatened with extinction;

(3) these species of fish, wildlife and plants are of educational, historical, recreational, and scientific value to the Nation and its people;.

(4) the United States has pledged itself as a sovereign state in the international community to conserve and protect to the extent practicable the various species of fish or wildlife and plants facing extinction, pursuant to—

(A) migratory bird treaties with Canada and Mexico;

(B) the Migratory and Endangered Bird Treaty with Japan;

(C) the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere;

(D) the International Convention for the Northwest Atlantic Fisheries;

(E) the International Convention for the High Seas Fisheries of the North Pacific Ocean;

(F) the Convention on International Trade in Endangered Species of Wild Fauna and Flora; and

(G) other international agreements.

(5) encouraging the States, through Federal financial assistance and a system of incentives, to develop and maintain conservation, protection, restoration, and propagation programs which meet national and international standards is a key to meeting the Nation's international commitments and to better safeguarding, for the benefit of all citizens, the Nation's heritage in fish and wildlife.

(b) PURPOSES.—The Congress hereby declares that the purposes and policy of this Act are to—

(1) provide an effective means to conserve, protect, and restore the ecosystems upon which endangered and threatened species of fish or wildlife depend;

(2) provide a viable program for the conservation, protection, restoration, and propagation of endangered and threatened species;

(3) take all appropriate steps to implement the

Nation's international commitments with respect to endangered and threatened fish or wildlife; and

(4) insure that all departments, agencies, and instrumentalities of the United States seek, within the scope of their authority and administrative jurisdiction, to protect endangered and threatened species.

DEFINITIONS

Sec. 3. As used in this Act—

(1) "Convention" means the Convention on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973, and the appendices thereto.

(2) "Endangered species" means any species of fish or wildlife which is in danger of extinction throughout all or a significant portion of its range.

(3) "Fish or wildlife" means any living member of the animal kingdom and the remains of any dead member of the animal kingdom, including, but not limited to, any mammal, fish, bird, amphibian, reptile, mollusk, crustacean, arthropod or other invertebrate, or any part, egg, or offspring of any such member, or any product produced from any part or parts of the remains of any such member.

(4) "Foreign commerce" includes any transaction—

(A) between persons within one foreign country;

(B) between persons in two or more foreign countries;

(C) between a person within the United States and a person in a foreign country; or

(D) between persons within the United States, where the fish or wildlife involved are moving in any country or countries outside the United States.

(5) "Import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(6) "Person" means an individual, corporation, partnership, trust, association, or any other private entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(7) "Plant" means any member of the plant kingdom, including seeds, roots, or other parts of any such member.

(8) "Secretary" means, except as otherwise pro-

vided, the Secretary of the Interior or the Secretary of Commerce in the same manner in which program responsibilities are vested under Reorganization Plan Numbered 4 of 1970. With respect to enforcement of the provisions of this Act and of the Convention, which pertain to the importation of terrestrial plants, the term means the Secretary of Agriculture.

(9) "Species" includes any subspecies or other group of fish or wildlife of the same species or lesser taxa in common spatial arrangement that interbreed when mature.

(10) "State" means any State, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(11) "State agency" means the State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish and wildlife resources within a State.

(12) "Take" means to harass, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

(13) "Threatened species" means any species of fish or wildlife which is likely to become an endangered

species within the foreseeable future throughout all or a significant portion of its range.

(14) "United States", when used in a geographical sense, includes all States.

DETERMINATION OF ENDANGERED OR THREATENED SPECIES

SEC. 4. (a) GENERAL.—The Secretary shall by regulation determine whether any fish or wildlife is an endangered or threatened species as a result of any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

(b) BASIS FOR DETERMINATIONS.—(1) The determinations required by this section shall be made on the basis of the best scientific and commercial data available to the Secretary, including any recommendations that have been made by the Advisory Committee established under subsection (d) of this section and after consultation, as appropriate,

with all interested persons and organizations, including affected or knowledgeable Federal, State, and foreign government agencies. In any case in which such determinations involve an indigenous species, the Secretary shall consult with and consider the recommendations of each State involved. In any case in which determinations involve a species which is normally found on the high seas, in lakes, or other waters off the coast of a State of which are customarily harvested by citizens of such a State, the Secretary shall consult with and consider the recommendations of each State involved. In any case in which such determinations involve a species which is normally found in a foreign country or countries or which is harvested from the ocean by citizens of such country or countries, the Secretary shall (where practicable) with the assistance of the Secretary of State, consult with and consider the recommendations of such country or countries.

(2) In determining whether or not any fish or wildlife is an endangered or a threatened species, the Secretary shall take into consideration those efforts, if any, being made by any nation or any political subdivision of any nation to protect within any area under its jurisdiction such fish or wildlife, whether by predator control, protection of habitat and food supply, or other conservation or management practices.

(3) Fish or wildlife which have been designated as requiring protection from unrestricted commerce by any for-

eign country, or pursuant to any international agreement, shall receive special and full consideration by the Secretary to determine whether each is an endangered or a threatened species.

(c) LISTS.—(1) The Secretary shall publish in the Federal Register a list of all fish or wildlife determined by him by regulation to be endangered species and a list of all fish or wildlife determined by him by regulation to be threatened species. Such lists may be amended, modified, or revised periodically by regulation. Each list shall refer to each species of fish or wildlife named therein by scientific name and common name or names and shall specify the portion of its range over which it is endangered or threatened.

(2) The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5, United States Code, conduct a review of any listed or unlisted species of fish or wildlife proposed to be removed from or added to either of the lists published pursuant to paragraph (1) of this subsection, but only if he makes and publishes a finding that such person has presented substantial evidence which in his judgment warrants such a review.

(3) Any list of species of fish or wildlife determined to be threatened with extinction, by the Secretary of the Interior pursuant to the Endangered Species Conservation Act of 1969, which is in effect the day before the date of

enactment of this Act shall be republished to conform to the appropriate classifications under this Act. Pending reclassification as endangered species or threatened species and republication, any species listed pursuant to the Act of 1969 shall be deemed an endangered species within the meaning of this Act. Such reclassification and republication shall not require a public hearing or comment under section 553 of title 5, United States Code.

(d) ADVISORY COMMITTEE.—(1) The Secretary shall establish an Advisory Committee on Endangered and Threatened Species to consult with, advise, and make recommendations to him and to the States. The Advisory Committee shall consist of not more than eleven members including a Chairman who shall be appointed by the Secretary from lists of qualified individuals submitted by State fish and wildlife agency administrators, universities, nongovernmental organizations concerned with conservation, and scientific societies. Five of the members shall be regularly employed by State governments or political subdivisions thereof. The terms of office shall be so arranged by the Secretary that each year at least three new members shall be appointed to fill vacancies caused by the expiration of terms of office.

(2) The Advisory Committee shall periodically, but not less than once each year, make recommendations to the Secretary with respect to removal from, addition to, or reclassi-

fication within the lists maintained pursuant to subsection (a) of this section, and may, with the approval of the Secretary, perform other functions in furtherance of the purposes of this Act. A member of the Advisory Committee who is not otherwise a Government employee may, in the discretion of the Secretary, receive not more than $150 per diem when engaged in the actual performance of his duties. Each member may receive reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of his duties.

(e) PROTECTIVE REGULATIONS.—Whenever the Secretary lists a species of fish or wildlife as a threatened species, pursuant to subsection (a) of this section, he shall issue such regulations as he deems necessary and advisable to provide for the conservation, protection, restoration, or propagation of such species. With respect to any endangered or threatened species, the Secretary may by regulation prohibit any act prohibited with respect to an endangered species under section 10(a) of this Act.

LAND ACQUISITION

SEC. 5. The Secretary shall establish and implement a program to conserve, protect, restore, and propagate fish or wildlife which are listed as endangered or threatened species pursuant to section 4 of this Act. To carry out such programs, the Secretary—

(a) shall utilize as appropriate the land acquisition

and other authorities conferred upon him under the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956, and the Fish and Wildlife Coordination Act;

(b) may acquire by purchase, donation, or otherwise any lands, waters, or interests therein necessary for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species. Such authority shall be in addition to any other land acquisition authority vested in him; and

(c) may use funds made available under the Land and Water Conservation Fund Act of 1965 or under this Act to acquire such lands, waters, or interests therein.

COOPERATION WITH THE STATES

SEC. 6. (a) GENERAL.—In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the States. In addition to all other obligations, the Secretary shall consult with the affected State before the acquisition of any lands, waters, or interests therein for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species.

(b) MANAGEMENT AGREEMENTS.—The Secretary may enter into an agreement or agreements with any State

for the administration and management of any area established for the conservation, protection, restoration, or propagation of an endangered or a threatened species. Any revenues derived from the administration of such areas under such agreements shall be subject to section 401 of the Act of June 15, 1935 (16 U.S.C. 715s).

(c) FINANCIAL ASSISTANCE.—The Secretary is authorized to enter into a cooperative agreement in accordance with this subsection to provide financial assistance to any State which establishes and maintains an adequate and active program for the management, conservation, protection, and restoration of endangered and threatened species. Before the Secretary may enter into or renew such a cooperative agreement to provide financial assistance to a State, he shall make, justify, and publish in the Federal Register a finding that such agreement would further the policy of this Act and that such State has a program under which—

(1) the State agency has authority and administrative jurisdiction to manage and protect any species of fish or wildlife which is determined by such agency or the Secretary to be endangered or threatened;

(2) the State has established a State plan, including a management program under the State agency, for all species of resident fish or wildlife which are deemed by the Secretary to be endangered or threatened, and has

furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

(3) the State agency during the first year of the existence of such agreement—

(A) will issue protective regulations;

(B) will employ sufficient trained and qualified personnel; and

(C) will maintain investigation, enforcement, and public education programs,

which are adequate, in the Secretary's judgment, for the conservation, protection, restoration, and propagation of species of fish or wildlife facing extinction;

(4) the State agency is authorized and plans to conduct studies to determine the status and requirements for survival of species of resident fish or wildlife and agrees to transmit a copy of the findings of such studies to the Secretary;

(5) the State agency is authorized and plans to establish programs, including the acquisition of lands, waters, or interests therein, for the conservation, protection, restoration, and propagation of endangered and threatened species; and

(6) provision is made for public participation in

designating species of resident fish or wildlife as endangered or threatened.

(d) ALLOCATION OF FUNDS.—(1) Funds appropriated for financial assistance pursuant to subsection (c) of this section shall be available to the Secretary for allocation to the States under cooperative agreements. The purposes for which such funds may be used include, but are not limited to, research, censusing, law enforcement, and habitat acquisition or improvement. The Secretary shall allocate appropriated funds to such States upon the basis of—

(A) the international commitments of the United States to protect endangered or threatened species;

(B) the national significance of a species found to be endangered or threatened within a State; and

(C) the potential for preventing extinction of a species or for restoring a species to nonendangered or nonthreatened status.

Funds allocated to a State but unexpended or unobligated at the close of the fiscal year remain available for expenditure by such State until the close of the succeeding fiscal year.

(2) Each cooperative agreement between a State and the Secretary shall provide for—

(A) the actions to be taken by the Secretary and the State;

(B) the benefits that are expected to be derived

in connection with preservation and restoration of endangered or threatened species;

(C) the estimated cost of these actions; and

(D) the share of such costs to be borne by the Federal Government and by the States, except that—

(i) the Federal share of such program costs shall not exceed 50 per centum of the estimated program costs stated in the agreement; and

(ii) the Federal share may be increased to 66⅔ per centum whenever two or more States, having a common interest in a program that the Secretary deems to meet the criteria of paragraph (1) of this subsection, enter jointly into an agreement with the Secretary.

The Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon in the cooperative agreement.

(3) The Secretary is authorized to issue such regulations as may be appropriate to carry out the provisions of this section with respect to financial assistance to States.

(4) For the purposes of this section, there is authorized to be appropriated not to exceed $10,000,000.

(e) PERIODIC REVIEW.—The finding made under subsection (c) of this section and any action taken by the

Secretary under this section shall be subject to his periodic review, including the consideration of comment from interested persons, at no greater than annual intervals. Upon ninety days' notice in writing to the affected State, the Secretary may terminate in his discretion any cooperative agreement entered into under this section.

(f) STATE ACTION PERMITTED.—Nothing in this Act shall be construed as superseding or limiting the power of any State or political subdivision thereof to enact legislation or regulations more restrictive than or consistent with the provisions of this Act with respect to an endangered or a threatened species: Provided, That any State law or regulation of the import or export of or the interstate or foreign commerce in an endangered species listed pursuant to section 4 of this Act is void to the extent that it may effectively permit what is prohibited by this Act or its implementing regulations, or prohibit what is authorized pursuant to an exemption or permit provided for in this Act or its implementing regulations. This Act shall not otherwise be construed to void any State law or regulation which is intended to conserve and manage migratory, resident, or introduced fish or wildlife, or to permit or prohibit sale of such fish or wildlife.

INTERAGENCY COOPERATION

SEC. 7. The Secretary shall review all programs administered by him and utilize such programs in furtherance of *the policy of this Act. All other departments, agencies, and instrumentalities of the Federal Government shall, in consultation with and with the assistance of the Secretary—*

(a) carry out such programs as are practicable for the protection of species listed, pursuant to section 4 of this Act, as endangered or threatened;

(b) take such action as is necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of any endangered or threatened species, or result in the destruction or modification of any habitat of such species which is determined by the Secretary, after consultation to the extent appropriate and necessary with affected States, to be a critical habitat of such species.

INTERNATIONAL COOPERATION

SEC. 8. (a) FINANCIAL ASSISTANCE.—As a demonstration of the commitment of the United States to the worldwide protection of endangered and threatened species, the President may, subject to the provisions of section 1415 of the Supplemental Appropriation Act, 1953 (31 U.S.C. 724), use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistance Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and management of programs in that country which the

Secretary determines to be necessary or useful for the conservation, protection, restoration, or propagation of any endangered or threatened species listed by the Secretary pursuant to section 4 of this Act: Provided, That no funds other than foreign currencies available for expenditure only within such foreign country shall be used pursuant to this section. The President shall provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, waters, or interests therein) to foreign countries under this section upon such terms and conditions as he deems appropriate.

(b) ENCOURAGEMENT.—In order to carry out further the provisions of this Act, the Secretary, with the assistance of the Secretary of State, shall encourage—

(1) foreign countries to provide for the protection, conservation, restoration, or propagation of fish or wildlife, including endangered and threatened species listed pursuant to section 4 of this Act;

(2) the entering into of bilateral or multilateral agreements for foreign countries to provide for such protection, conservation, restoration, or propagation; and

(3) foreign persons, who directly or indirectly take fish or wildlife in foreign countries or on the high sea for importation into the United States for commercial

or other purposes, to develop and carry out, with such assistance as he may provide, conservation practices designed to enhance such fish, wildlife and plants and their habitat.

(c) P*ERSONNEL.—After consultation with the Secretary of State, the Secretary may—*

(1) assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign countries and international organizations in developing personnel resources and programs which promote the protection, conservation, restoration, or propagation of fish or wildlife; and

(2) conduct or provide financial assistance for the educational training of foreign personnel, in this country or abroad, in fish, wildlife or plant management, research, and law enforcement, and to render professional assistance abroad in such matters.

(d) I*NVESTIGATIONS.—After consultation with the Secretary of State and the Secretary of the Treasury, as appropriate, the Secretary may conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the purposes of this Act.*

(e) C*ONVENTION* I*MPLEMENTATION.—The President is authorized and directed to designate appropriate agencies to act as the Management Authority or Authorities and the Scientific Authority or Authorities pursuant to the Conven-*

tion. The agencies so designated shall thereafter be authorized to do all things assigned to them under the Convention, including the issuance of permits and certificates. The agency designated by the President to communicate with other parties to the Convention and with the Secretariat shall also be empowered, in consultation with the State Department, to act on behalf of and represent the United States in all regards as required by the Convention.

REGULATIONS, PROCEDURE, AND JUDICIAL REVIEW

SEC. 9. (a) REGULATIONS.—The Secretary shall publish any regulations proposed under this Act in the Federal Register at least sixty days prior to the time when such regulations shall become final, except that in case of an emergency the Secretary may publish such regulations not less than thirty days prior to the time when such regulations shall become final if at the same time he publishes in the Federal Register detailed reasons why emergency action is necessary. The Secretary shall also publish in the Federal Register a notice of all petitions received pursuant to this Act and, if such petition is denied, his reasons therefor. Such notice shall identify the purpose of the petition and include a statement of the availability of any data submitted in support of such petition. If any person adversely affected by a proposed regulation files objections and requests a public hearing within forty-five days of the date of publication *of the proposed regulation, the Secretary shall grant such request. If such public hearing is held, final regulations shall not be promulgated by the Secretary until after the conclusion of such hearing. All public hearings authorized by this subsection shall consist of the oral and written presentation of data or arguments in accordance with such conditions or limitations as the Secretary may make applicable thereto. Proposed and final regulations issued under this Act shall set forth findings of fact on which the regulations are based and shall state the relationship of such findings to the regulations issued.*

(b) Procedure.—Except as expressly modified by this section, the provisions of the Administrative Procedure Act (5 U.S.C. 551 et seq.) shall apply to proceedings conducted by the Secretary under this Act: Provided, That the provisions of this section shall not apply to the extent necessary to permit emergency action by the Secretary. Notice of and reasons for such action shall be published prior to such action in the Federal Register.

(c) Judicial Review.—(1) Any judicial review of final regulations promulgated under this Act and final actions under section 5(c) of this Act shall be in accordance with sections 701–706 of title 5, United States Code, except that—

(A) with respect to regulations promulgated under

section 4 or 6 of this Act, the findings of the Secretary as to the facts shall be sustained if based upon substantial evidence on the record considered as a whole; and

(B) with respect to relief pending review, no stay of an action may be granted unless the reviewing court determines that the party seeking such stay—

(i) is likely to prevail on the merits in the review proceeding, and

(ii) will suffer irreparable harm pending such proceeding.

(2) If the party seeking judicial review applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court either that—

(A) the information is material and was not available at the time of the proceeding before the Secretary; or

(B) failure to include such evidence in the proceeding was an arbitrary or capricious act of the Secretary,

the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Secretary, and to be adduced upon the hearing, in such manner and upon such terms and conditions as the court may deem proper. The Secretary may modify his findings as to the facts, or make new findings by reason of the additional evidence *so taken, and he shall file with the court such modified or new findings and his recommendation, if any, for the modification or setting aside of his original order.*

(d) AUDIT.—(1) Each recipient of Federal assistance under this Act, pursuant to grants, subgrants, contracts, subcontracts, loans, or other arrangements, entered into other than by formal advertising, and which are otherwise authorized by this Act, shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, the amount of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall, until the expiration of three years after completion of the project or undertaking referred to in subsection (a) of this section, have access for the purpose of audit and examination to any books, documents, papers, and records of such recipients which in the opinion of the Secretary or the Comptroller General may be related or pertinent to the grants, subgrants, contracts, subcontracts, loans or other arrangements referred to in subsection (a).

UNLAWFUL CONDUCT

SEC. 10. (a) PROHIBITED ACTS.—Except as provided in section 11 of this Act, it is unlawful for any person subject to the jurisdiction of the United States to—

(1) import into, or export from, the United States any endangered species which has been listed pursuant to section 4 of this Act;

(2) take any such species within the United States or in the territorial sea of the United States or upon the high seas;

(3) possess, sell, deliver, carry, transport, ship, or receive, by any means whatever, any such species which are taken in violation of paragraph (2) of this subsection;

(4) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and for commercial purposes, any such species;

(5) sell, distribute, or offer for sale in foreign commerce, interstate commerce, or activity affecting interstate commerce specimens or products processed or manufactured in whole or in part from specimens of any such species;

(6) attempt to commit, solicit another to commit, or cause to be committed, any act prohibited by paragraphs (1) through (5) of this subsection;

(7) engage in any trade in any specimens of fish, wildlife, or plants, contrary to the provisions of the Convention, or possess any specimens traded contrary to the provisions of the Convention, including the definitions in article I therein;

(8) violate any regulation which is promulgated by the Secretary pursuant to section 4(e) of this Act; or

(9) import into or export from the United States except at a port or ports designated by the Secretary, any fish or wildlife, except nonendangered and nonthreatened shellfish and fishery products which are imported or exported for human or animal consumption or taken for recreational purposes in waters under United States jurisdiction or on the high seas. To facilitate enforcement of this paragraph and to reduce the costs of enforcement, the Secretary, with the approval of the Secretary of the Treasury and after notice and opportunity for public hearing, may, by regulation, designate ports and change such designations. Upon such terms and conditions as he may prescribe, the Secretary may permit such importation at nondesignated ports in the interest of the health or safety of the fish or wildlife or for any other reasons he deems appropriate. Any port designated by the Secretary of the Interior under the authority of section 4(d) of

the Act of December 5, 1969 (16 U.S.C. 666cc-4 (d)), shall, if such designation is in effect on the day before the date of the enactment of this Act, be deemed to be a port designated by the Secretary under this paragraph until such time as the Secretary otherwise provides.

(b) SIMILARITY OF APPEARANCE CASES.—The Secretary may, by regulation, and to the extent he deems advisable, treat any species of fish or wildlife as an endangered or threatened species even though it is not listed pursuant to section 4 of this Act if he finds that—

(A) such species so closely resembles in appearance, at the point in question, a species which has been listed pursuant to such section that enforcement personnel would have substantial difficulty in attempting to differentiate between the listed and unlisted species;

(B) the effect of this substantial difficulty is an additional threat to an endangered or threatened species; and

(C) such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of this Act.

EXCEPTIONS

SEC. 11. (a) GENERAL.—Upon a finding that the excepted conduct will not adversely affect the regenerative *capacity of the involved species in a significant portion of its range or habitat or otherwise affect the survival of the wild population of such species, and upon such terms and conditions as he may prescribe, the Secretary may issue permits authorizing the importation, exportation, taking, or transportation, by persons found to be qualified, of any fish or wildlife which is listed as an endangered or threatened species pursuant to section 4 of this Act for—*

(1) scientific purposes in furtherance of the purposes of this Act; or

(2) the propagation of such species in captivity or in a controlled habitat.

(b) HARDSHIP.—The Secretary may except from the application of section 10(a) of this Act any person who enters into a contract with respect to a species of fish or wildlife before the date of publication in the Federal Register of notice of a proposed listing of that species as an endangered or threatened species if the failure to grant such exception will cause undue economic hardship to such person under the contract. The extent and duration of such exception shall be such as the Secretary deems appropriate. No such exception shall be granted unless such person applies to the Secretary in writing and furnishes with such application such information as the Secretary may require to prove such hardship. No such exception shall be for a duration of more than one year from

the date of publication in the Federal Register of notice of a proposed listing of the involved species, nor shall such exception apply to a quantity of fish or wildlife in excess of that specified by the Secretary. The one-year period for those species of fish or wildlife which were listed by the Secretary as endangered prior to the effective date of this Act shall expire in accordance with the terms of section 3 of the Act of December 5, 1969 (83 Stat. 275). No such exemption may be granted for the importation or exportation of a specimen listed in appendix I of the Convention which is to be used for primarily commercial purposes.

(c) Procedure.—(1) The Secretary shall publish a notice in the Federal Register of each application for an exception. Each notice shall invite the submission from interested parties, within thirty days after the date of the notice, of written data, views, or arguments with respect to the application. Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.

(2) The Secretary may grant exceptions under subsections (a) and (b) of this section only if he finds, and publishes such finding in the Federal Register, that such exceptions were applied for in good faith and if granted and exercised will not operate to the disadvantage of such en-

dangered or threatened species and will be consistent with the policy of this Act.

(d) ALASKA NATIVES.—(1) The provisions of this Act shall not apply with respect to the taking of any endangered or threatened species by any Indian, Aleut, or Eskimo who is an Alaskan native who resides in Alaska if such taking is for the purpose of consumption or use in a native community or for the purpose of selling or creating for sale in interstate commerce authentic native articles of handicrafts and clothing: Provided, That in each case such taking is not accomplished in a wasteful manner. As used in this paragraph—

(A) "consumption or use in a native community" includes selling any edible portion of fish or wildlife in native villages and towns in Alaska for native consumption; and

(B) "authentic native articles of handicrafts and clothing" means items composed wholly or in some significant respect of natural materials, and which are produced, decorated, or fashioned in the exercise of traditional native handicrafts without the use of pantographs, multiple carvers, or other mass copying devices. Traditional native handicrafts include, but are not lim-

ited to, weaving, carving, stitching, sewing, lacing, beading, drawing, and painting.

(2) Notwithstanding the provisions of paragraph (1) of this subsection, whenever the Secretary determines that any species of fish or wildlife which is subject to taking by Indians, Aleuts, or Eskimos is an endangered or threatened species, and that such taking materially and negatively affects the threatened and endangered species, he may prescribe regulations upon the taking of such species by any such Indian, Aleut, or Eskimo. Such regulations may be established with reference to species, geographical description of the area included, the season for taking, or any other factors related to the reason for establishing such regulations and consistent with the policy of this Act. Such regulations shall be prescribed after a notice and hearings in the affected judicial districts of Alaska and as otherwise required by section 103 of the Marine Mammal Protection Act of 1972, and shall be removed as soon as the Secretary determines that the need for their imposition has disappeared: Provided, That no such regulation shall be established which is in contravention of any provision of the Marine Mammal Protection Act of 1972.

PENALTIES AND ENFORCEMENT

SEC. 12. (a) CIVIL PENALTY.—(1) Any person who—

(A) knowingly violates any provision of this Act

or any regulation or permit issued under this Act, which prohibits the taking, importing, exporting, shipping, receiving, or otherwise moving in interstate or foreign commerce of any endangered or threatened species of fish or wildlife, or commits any act made unlawful under section 10(a) of this Act, may be assessed a civil penalty by the Secretary of not more than $10,000 for each violation;

(B) commits any act made unlawful under section 10(a) of this Act, or violates any other provision of this Act, or any regulation or permit issued under this Act, may be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation.

No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each prohibited act is a separate violation. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay a penalty assessed under this subsection, the Secretary may by his own attorneys institute a civil action in a district court of the United States for any district in which such person is found, resides, or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. The court shall hear such action solely on the record made before the Secretary and *shall sustain his action if it is supported by substantial evidence on the record considered as a whole.*

(2) Hearings held during proceedings for the assessment of civil penalties authorized by paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5, United States Code. The Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(b) CRIMINAL VIOLATIONS.—(1) Any person who knowingly and willfully violates any provision of this Act, or of any regulation or permit issued thereunder, shall, upon

conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both.

(2) The head of any Federal agency which has issued a lease, license, permit, or other agreement authorizing the use of Federal lands, including grazing of domestic livestock, to any person who is convicted under paragraph (1) of this subsection may immediately modify, suspend, or revoke such lease, license, permit, or other agreement. The Secretary may suspend, cancel, or refuse to issue for a period of up to one year Federal hunting or fishing permits or stamps with respect to any person who is convicted under paragraph (1) of this subsection. The United States shall not be liable to pay any compensation, reimbursement, or damages in connection with any such modification, suspension, or revocation of any lease, license, permit, stamp, or other agreement.

(c) REWARDS.—Upon the recommendation of the Secretary, the Secretary of the Treasury is authorized to pay an amount equal to one-half of the civil penalty or fine paid, but not to exceed $2,500, to any person who furnishes information which leads to a finding of civil violation or a conviction of a criminal violation of any provision of this Act or any regulation or permit issued thereunder. Any officer or employee of the United States or of any State or local government who furnishes information or renders service in

the performance of his official duties shall not be eligible for payment under this section.

(d) ENFORCEMENT.*—(1) The provisions of this Act and any regulations or permits issued under this Act shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all Secretaries. Each such Secretary may utilize, by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency for purposes of enforcing this Act.*

(2) The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulation issued thereunder.

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, in furtherance of the enforcement of this Act may execute and serve any arrest warrant, search warrant, or other warrant of civil or criminal process issued by any officer or court of competent jurisdiction. A person so authorized may search and seize, with or without a warrant, to the extent authorized by law. Any fish, wildlife, property, or item so seized shall be held by any

person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, property, or item pursuant to paragraph (4) of this subsection, except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

(4) All fish or wildlife, or plants taken, possessed, sold, purchased, offered for sale or purchase, transported, delivered, received, carried, shipped, exported or imported contrary to the provisions of this Act, any regulation issued under this Act, or any permit issued thereunder, and all guns, traps, nets, and other equipment, vessels, vehicles, aircraft, and other means of transportation used to aid the taking, possessing, selling, purchasing, offering for sale or purchase, transporting, delivering, receiving, carrying, shipping, exporting or importing of any fish or wildlife, or plants in violation of this Act, any regulation made pursuant thereto, or any permit issued thereunder shall be subject to forfeiture to the United States.

(5) All provisions of law relating to the seizure, forfeiture, and condemnation of a vessel for violation of the customs laws, the disposition of such vessel or the proceeds from

the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act. The powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Treasury Department shall, for purposes of this Act, be exercised or performed by the Secretary or by such persons as he may designate.

(e) Registration.—(1) Any person who engages to any extent in business as an importer of fish or wildlife must register with the Secretary of the Treasury his name and the address of each place of business at which, and all trade names under which, he conducts such business.

(2) Any person required to register with the Secretary of the Treasury under paragraph (1) of this subsection shall—

(A) keep such records as will fully and correctly disclose each importation or exportation of fish or wildlife except nonendangered and nonthreatened shell fish or fishery products which are imported or exported for human or animal consumption or recreational purposes, made by him and the subsequent disposition made by him with respect to such fish or wildlife and

(B) at all reasonable times upon notice by a duly

authorized representative of the Secretary, afford such representative access to his places of business, an opportunity to examine his inventory of imported fish or wildlife and the records required to be kept under subparagraph (A) of this paragraph and to copy such records.

(3) The Secretary of the Treasury, after consultation with the Secretary, shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.

(f) ENFORCEMENT REGULATIONS.—(1) The Secretary, the Secretary of the Treasury, and the Secretary of the Department in which the Coast Guard is operating, are authorized to promulgate such regulations as may be appropriate to enforce this Act, and to charge reasonable fees for expenses to the Government connected with permits authorized by this Act, including processing applications and reasonable inspections, and the transfer, board, handling, or storage of fish, wildlife, or plants and evidentiary items seized and forfeited under this Act. All fees collected pursuant to this subsection shall be deposited in the Treasury to the credit of the appropriation which is current and chargeable for the cost of furnishing the services. Appropriated funds may be expended pending reimbursement from parties in interest.

(g) CITIZEN SUITS.—(1) Except as provided in paragraph (2) of this subsection, any person may commence a civil suit on his own behalf to enjoin any person, including the United States and any other governmental instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution), who is alleged to be in violation of any provision of this Act or regulation issued under the authority thereof. The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any such provision or regulation, as the case may be.

(2) No action may be commenced—

(A) prior to sixty days after written notice of the violation has been given to the Secretary, and to any alleged violator of any such provision or regulation;

(B) if the Secretary has commenced action to impose a penalty pursuant to subsection (a) of this section; or

(C) if the United States has commenced and is diligently prosecuting a criminal action in a court of the United States or a State to redress a violation of any such provision or regulation.

(3)(A) Any suit under this subsection may be brought in the judicial district in which the violation occurs.

(B) In any such suit under this subsection in which the

United States is not a party, the Attorney General, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

(4) The court, in issuing any final order in any suit brought pursuant to paragraph (1) of this subsection may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(5) The injunctive relief provided by this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or limitation or to seek any other relief (including relief against the Secretary or a State agency).

(h) COORDINATION.—The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act with the administration of the animal quarantine laws (21 U.S.C. 101–105, 111–135b, and 612–614) and section 306 of the Tariff Act of 1930 (19 U.S.C. 1306). Nothing in this Act or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations or possession of animals and other articles. No proceeding or determination under this Act shall preclude

any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture. Nothing in this Act shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, including, but not limited to, section 527 of such Act (19 U.S.C. 1527), relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.

ENDANGERED PLANTS

SEC. 13. The Secretary of the Smithsonian Institution, in conjunction with other affected agencies, is authorized and directed to review species of plants which are endangered or threatened, and methods of providing adequate protection including legislation for such species. He shall report the results of such review to Congress, not later than one year after the date of enactment of this Act. For purposes of this section, there is authorized to be appropriated not to exceed $250,000.

CONFORMING AMENDMENTS

SEC. 14. (a) Section 4(c) of the Act of October 15, 1966 (80 Stat. 928, 16 U.S.C. 668dd(c)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered and threat-

ened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of such Act nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the System."

(b) Section 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224, 16 U.S.C. 715i(a)) and section 401(a) of the Act of June 15, 1935 (49 Stat. 383, 16 U.S.C. 715s(a)) are each amended by striking out "threatened with extinction," and inserting in lieu thereof the following: "listed pursuant to section 4 of the Endangered Species Act of 1973 as endangered or threatened species,".

(c) Section 6(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-9(a)1)) is amended by striking out:

> *"THREATENED SPECIES.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction."*

and inserting in lieu thereof the following:

> *"ENDANGERED AND THREATENED SPECIES.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5 of the Endangered Species Act of 1973, needed for the purpose of conserv-*

ing, protecting, restoring, or propagating endangered or threatened species of fish, wildlife, or plants."

(d) The first sentence of section 2 of the Act of September 28, 1962 (76 Stat. 653; 16 U.S.C. 460k–1), is amended to read as follows:

"SEC. 2. The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—

"(1) incidental fish- and wildlife-oriented recreational development,

"(2) the protection of natural resources,

"(3) the protection of endangered or threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973, or

"(4) carrying out two or more of the purposes set forth in paragraphs (1) through (3) of this section,

and are adjacent to, or within, the said conservation areas, except that the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps."

(e) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) is amended—

(1) by striking out "Endangered Species Conser-

vation Act of 1969" in section(1)(B) thereof and inserting in lieu thereof the following: "Endangered Species Act of 1973";

(2) by striking out "pursuant to the Endangered Species Conservation Act of 1969" in section 101(a)(3)(B) thereof and inserting in lieu thereof the following: "or threatened species pursuant to the Endangered Species Act of 1973";

(3) by striking out "endangered under the Endangered Species Conservation Act of 1969" in section 102(b)(3) thereof and inserting in lieu thereof the following: "an endangered or a threatened species pursuant to the Endangered Species Act of 1973"; and

(4) by striking out "Endangered Species List, authorized by the Endangered Species Conservation Act of 1969," in section 202(a)(6) thereof and inserting in lieu thereof the following: "endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered Species Act of 1973".

REPEALER

SEC. 15. The Endangered Species Conservation Act of 1969 (sections 1 through 3 of the Act of October 15, 1966, and sections 1 through 6 of the Act of December 5, 1969; 16 U.S.C. 668aa—668cc-6) is repealed.

APPLICABILITY WITHIN STATES

Sec. 16. (a) State Plan.—By the end of the first year after the date of enactment of this Act, a State may establish a plan for endangered and threatened species in accordance with this Act. A plan is in accordance with this Act if it meets or exceeds the requirements set forth in section 6(c) of this Act and represents an effective response to the Nation's need to conserve, protect, restore, and propagate endangered and threatened species of fish or wildlife. Upon the establishment of such a plan, the Governor or the head of the State agency shall promptly transmit a certified copy to the Secretary.

(b) Determination by Secretary.—Within ninety days after the Secretary receives a certified copy of a State plan established under subsection (a) or subsection (d) of this section, the Secretary shall make a determination whether such State has established a plan for endangered and threatened species in accordance with this Act. Unless the Secretary determines, pursuant to this section, that a State plan is not in accordance with this Act, the plan shall go into effect in such State on the date designated in the plan. In no event shall such State plan go into effect less than three months or more than nine months after the date of its establishment.

(c) Periodic Review.—The Secretary shall periodically, but not less than once every three years, review each

State plan for endangered and threatened species which has been approved under subsection (b) of this section and for which there is experience, to determine whether such plan is still in accordance with this Act and to evaluate the success of such plan in terms of the policy of this Act. To facilitate such review, the Governor or the head of the State agency in each such State shall submit to the Secretary periodically all information relevant and requested by the Secretary. The Secretary shall report to the President and Congress simultaneously each year on the results of such reviews, including any recommendations for legislation.

(d) NO STATE PLAN.—Except as to species listed in Appendix I of the Convention, the provisions of this Act regarding the management and taking of any State's resident species shall become applicable in their entirety within a State fifteen months after the date of enactment of this Act unless, prior to such date, the Secretary has made a determination under subsection (b) of this section that such State has established a plan for endangered and threatened species in accordance with this Act: Provided, That the provisions of subsection (a) of section 10 of this Act shall be effective upon the date of enactment of this Act within any State which does not prevent the taking of any species listed by the Secretary as an endangered species. If, at any time thereafter, the Secretary upon petition makes a determination, pursuant to sub-

section (b) of this section, that a State has established a plan for endangered and threatened species in accordance with this Act, such plan shall go into effect and the provisions of this Act regarding the management and taking of any species shall cease to be applicable or in effect within such State on a date to be designated by the Secretary. If, after a State plan in accordance with this Act is in effect within a State, the Secretary makes a determination, pursuant to subsection (c) of this section, that such plan is no longer in accordance with this Act, the provisions of this Act regarding the management and taking of any species shall go into effect within such State and such plan shall cease to be in effect on a date to be designated by the Secretary.

(e) PROCEDURE.—(1) Before making any determination under this section, the Secretary shall publish a notice in the Federal Register and afford the State and all interested parties a reasonable opportunity to present their views by oral and written submission.

(2) The Secretary shall notify in writing the Governor of the affected State of any determinations made under this section and shall publish these determinations with reasons therefor in the Federal Register.

(3) Any determinations made by the Secretary under this section shall be subject to judicial review in accordance with chapter V of title 5, United States Code, in the United

States court of appeals for the circuit in which is located the State whose plan is the subject of such determination or in the United States Court of Appeals for the District of Columbia Circuit. Any such review shall be instituted within sixty days from the date on which the determination made by the Secretary is published in the Federal Register.

(f) EFFECTIVE DATE.—Except as otherwise provided in this section, the provisions of this Act shall become effective in their entirety upon the date of enactment of this Act.

MARINE MAMMALS ACT

SEC. 17. CONFLICTS.—Except as otherwise provided in this Act, no provision of this Act shall take precedence over any more restrictive conflicting provision of the Marine Mammal Protection Act of 1972.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 18. For purposes of this Act, other than section 6 and section 13 of this Act, there are authorized to be appropriated such sums as are necessary, not to exceed $3,960,000 for the fiscal year ending June 30, 1974; not to exceed $6,660,000 for the fiscal year ending June 30, 1975; and not to exceed $8,870,000 for the fiscal year ending June 30, 1976.

Amend the title so as to read: "A bill to provide for the conservation, protection, restoration, and propagation of threatened and endangered species of fish, wildlife, and plants, and for other purposes."

ENDANGERED SPECIES ACT OF 1973

JULY 1, 1973.—Ordered to be printed
Filed under authority of the order of the Senate of June 30, 1973

Mr. MAGNUSON, from the Committee on Commerce,
submitted the following

REPORT

[To accompany S. 1983]

The Committee on Commerce, to which was referred the bill (S. 1983) to provide for the conservation, protection, restoration, and propagation of species of fish, wildlife, and plants facing extinction, and for other purposes, having considered the same, reports favorably thereon with amendments and recommends that the bill do pass.

PURPOSE

The purpose of this bill is to provide for conservation, protection and propagation of endangered species of fish and wildlife by Federal action and by encouraging the establishment of State endangered species conservation programs. The methods include authorization to the Secretaries of Interior and Commerce to list species which are either (1) endangered or (2) likely to become endangered within the forseeable future, and authority to establish an Advisory Committee for consultation regarding this list; authorization to the Secretary to use certain existing legislation for land acquisition; provision for criminal and civil penalties for violation of its prohibitions; provision for the administrative implementation of the international convention on endangered species; management of endangered and threatened species by the States under State plans that are approved by the Secretary; and provision for financial aid to State wildlife management agencies which enter into cooperative or management agreements with the Secretary.

Programs provided by this bill are to be administered jointly by the Secretary of the Interior and the Secretary of Commerce within their respective jurisdictions as regards fish or wildlife, as provided by Reorganization Plan No. 4 of 1970.

BACKGROUND

It has become increasingly apparent that some sort of protective measures must be taken to prevent the further extinction of many of the world's animal species. The number of animals on the Secretary of the Interior's list of domestic species that are currently threatened with extinction is now 109 On the foreign list, there are over 300 species. Further, the rate of extinction has increased to where on the average, one species disappears per year.

Consideration of this need to protect endangered species goes beyond the aesthetic. In hearings before the Subcommittee on the Environment it was shown that many of these animals perform vital biological services to maintain a "balance of nature" within their environments. Also revealed was the need for biological diversity for scientific purposes.

The two major causes of extinction are hunting and destruction of natural habitat.

The first comprehensive endangered species legislation was enacted by the 89th Congress and has become known as the Endangered Species Preservation Act of October 15, 1966, (Public Law 89-669 (80 Stat. 926)). This Act achieved a dual objective: First, it authorized and directed the Secretary of the Interior to initiate and carry out a comprehensive program to conserve, restore, and where necessary to bolster wild populations to propagate selected species of *native* fish and wildlife, including game and non-game birds, that he found to be threatened with extinction. Secondly, it consolidated and in some cases expanded the authorities of the Secretary of the Interior relating to the management and administration of the National Wildlife Refuge System.

The 91st Congress enacted Public Law 91-135 (83 Stat. 275), known as the Endangered Species Conservation Act of 1969. This law expanded the endangered species program in at least three significant respects:

First, to help insure that the United States does not contribute to the extirpation of other nations' wildlife, the Secretary of the Interior was authorized to develop a list of species or subspecies of animals that were threatened with worldwide extinction, and to prohibit the importation from a foreign country of any such animal or any part, any product, or egg thereof. Two limited exceptions to this prohibition were provided: the first authorizes the Secretary to issue permits for the importation of listed animals for scientific, educational zoological or propagational purposes; the second allows the Secretary to permit for one year the importation of such animals or products for commercial purposes if the importer was a party to a contract entered into prior to the date the animal was placed on the list if the importer would otherwise suffer "undue economic hardship".

Second, in order to assist the States in protecting domestically endangered species, the legislation amended existing laws to make unlawful throughout the United States their sale or purchase by any person who knows, or in the exercise of due care should know, that such animal was taken in any manner in violation of the laws or regulations of a State or foreign country. These provisions supplement an existing statute which currently prevents the interstate sale or purchase of fish, mammals, or birds in violation of State or foreign law.

Third, in order to further assist in the protection of domestically endangered species the law increased the amounts authorized to be appropriated to acquire lands for the purpose of conserving, protecting, restoring, or propagating any endangered species. This new authority for use of funds contained limits of $2.5 million per area and $5 million per year, and $15 million total ceiling.

NEED FOR THE LEGISLATION

While the Acts of 1966 and 1969 laid the framework for an increasingly effective endangered species conservation program, the Department of the Interior has indicated some difficulties in expanding the practical effect of the program to the spirit of the original legislation. As the President stated in his Environmental Message of February 8, 1972, the existing law "simply does not provide the kind of management tools needed to act early enough to save a vanishing species."

From testimony offered at hearings on the bill, it is apparent that the following four requirements must be satisfied if the bill is to be effective:

(1) The bill must provide the Secretary with sufficient discretion in listing and delisting animals so that he may afford present protection to those species which are either in present danger of extinction or likely within the foreseeable future to become so endangered; (2) the bill must provide protection throughout the nation for animals which are either endangered or threatened; (3) the bill must lift the statutory restrictions that existing law places on authorization of monies for habitat acquisition from the Land and Water Conservation Fund Act, and extend to the Secretary land acquisition powers for such purposes from other existing legislation; and (4) finally, it became apparent in hearings that many established State agencies could in the future, or do now provide efficient management programs for the benefit of endangered species.

While the Federal government should protect such species where States have failed to meet minimum Federal standards, it should not pre-empt efficient programs. Instead, it should encourage these, and aid in the extension or establishment of others, to facilitate management by granting regulatory authority and making available financial assistance to approved schemes. The reported bill is designed to meet these requirements.

The bill provides a broadened concept of "endangered species" by affording the Secretary the additional power to list animals which he determines are likely within the foreseeable future to become threatened with extinction. This gives effect to the Secretary's ability to forecast population trends by permitting him to regulate these animals before the danger becomes imminent while long-range action is begun. By creating two levels of protection, regulatory mechanisms may more easily be tailored to the needs of the endangered animals. Flexibility in regulation is enhanced by a provision which allows for listing if the animal is endangered over a "substantial portion of its range". The Secretary makes his listing in full consideration of the forces which acted to bring about such endangerment. The Secretary is required to appoint an advisory committee for consultative purposes to aid in the review of these lists.

The bill makes violations of conduct prohibited under the bill subject either to civil penalties up to $10,000 or, to criminal penalties with fines levied up to $20,000 and/or imprisonment for up to one year. For the first time, the knowing taking of an endangered animal in violation of the law is a criminal offense where the Federal government has retained management power.

The Secretary may make certain exemptions from the prohibitions for scientific purposes or for the propagation of the species in controlled habitats, if he finds that such excepted conduct furthers the intent of the Act. The Committee wishes to clarify that such exemptions may be granted to individuals with legitimate claims who breed such animals domestically, whether or not they are associated with an institution. He may also receive applications for exemption where it is proven to him that failure to grant such an exemption will cause undue economic hardship to the applicant. The Secretary shall carefully scrutinize such applications to assure validity of the claim, and no such hardship exemption shall be longer than one year.

LAND ACQUISITION

Because the authorization for habitat acquisition under the 1969 Act *expired* this year, the Committee reviewed carefully the wisdom of the restrictive authorization ceilings for the habitat acquisition under existing authority. Accordingly, the reported bill permits the Secretary to use funds available to him under the Land and Water Conservation Fund Act with no ceiling attached. In addition, he may utilize his authorities under the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956, and the Fish and Wildlife Coordination Act for land acquisition. Often, protection of habitat is the only means of protecting endangered animals which occur on non-public lands. With programs for protection underway, and worthy of continuation into the foreseeable future, an accelerated land acquisition program is essential.

The Committee finds that the most efficient way to enforce the prohibitions of this bill and to develop the most appropriate and extensive programs is through utilization of the agencies already established for such purposes within the States and development of the potential for such State programs where they do not already exist or have less than sufficient authority to meet the need. Testimony given before the Subcommittee on the Environment revealed that approximately 35 States already have established extensive programs. Many of these already provide for the listing of endangered species, their legal protection, habitat protection, and related land acquisition. Nationwide, State agencies employ approximately 6,000 enforcement agents.

In contrast, the Federal Government, in fiscal year 1973, employed 158 enforcement agents, most of whom were located in ports of entry in order to enforce laws prohibiting the transport of endangered species in foreign commerce. It was found that if the Federal government were to embark on an attempt to manage and regulate endangered fish and wildlife nationwide, administration would necessarily be considerably extended. The Committee decided that the most effective way to fulfill the provisions of the Act was through delegation of authority to approved State agencies. Accordingly, the bill permits three courses of action: (1) The State may enter into a management agreement with the Secretary (section 6(b)); (2) the State may receive financial assistance if it "establishes and maintains an adequate and active program for the management, conservation, protection, and restoration of endangered and threatened species" (section 6(c)); (3) the State may have sole responsibility for the protection of endangered and threatened species of fish and wildlife if it establishes a plan for endangered and threatened species "in accordance with this Act" and such plan is approved by the Secretary (section 16). If a State meets the prerequisites for financial assistance from the Federal government, it may under a cooperative agreement receive as much as 50% of the total budget estimate for such a plan or agreement. For these purposes the bill authorizes the appropriation of $10,000,000. The Federal government shall retain its authority to regulate the interstate and foreign commerce of endangered species, whether or not it has established such agreements with the States.

OTHER PROVISIONS

ALASKAN NATIVES

It became apparent to the Committee in hearings that the case of the Alaskan native Indians, Aleuts, and Eskimoes required special attention. Certain native inhabitants depend on traditional hunting practices not only for sustenance but as a means for preserving social unity. Further, it was shown that their "take" was not the principal threat to the animals involved. Accordingly, S. 1983 does not apply with respect to the taking of any endangered or threatened species by such natives, provided that the action is for the purpose of consumption or use in a native community or for creation and sale of native articles of handicrafts and clothing, and is not accomplished in a wasteful manner. Application of the provisions of this section remains subject to the discretion of the Secretary under the terms and conditions set forth in the Act, who may revoke or regulate the exemption on the taking of endangered or threatened fish or wildlife with reference to species, isolated populations, season for taking, or geographical location.

CONVENTION IMPLEMENTATION

The Federal government has already acknowledged the need for international cooperation in the protection of endangered wildlife by entering into several agreements with other nations, including; migratory bird treaties with Canada and Mexico, a Migratory and Endangered Bird Treaty with Japan, and the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere. Accordingly, one of the purposes of the bill is to take all appropriate steps to implement the Nation's international commitments. To further this intent, the bill provides a means for implementation of the regulations of the Convention on International Trade in Endangered Species of Wild Fauna and Flora if and when that Convention is ratified by the Senate. The Convention met in February 1973 with 80 countries in attendance. "Practically all" of those given plenipotentiary power, including the representatives of the United States, signed the Convention. Under its provisions, a system of regulation designed to prevent the commercial overexploitation of any species of flora or fauna judged to be endangered or threatened by such trade is established. Provision is made for management and scientific authorities, and for a Secretariat to coordinate regulations and lists. The Committee found that such a centralized international authority would further the purposes of the Act regarding international cooperation. S. 1983, therefore, provides the means to establish the appropriate management and scientific authorities, one of which would establish communication between Convention and Federal authorities.

SMITHSONIAN STUDY

Recognizing the need for protection of the habitats of endangered species, as well as the need to protect endangered flora to preserve biological diversity, the Committee studied carefully the possibility of including plants within the protective provisions of the Act. However, it was discovered that there is not enough information available on situations of such endangered plants to bring plants within regulatory legislation. To help remedy this lack of information, the Act authorizes the Smithsonian Institution to conduct a review of species of endangered plants and authorizes $250,000 be appropriated for such study. A report of the conclusions of this study, together with legislative recommendations, shall be sent to the Congress within one year following the passage of the Act.

SECTION-BY-SECTION ANALYSIS

(1) Section 1 (Short Title)

The short title of this Act is the "Endangered Species Act of 1973"; the long and more descriptive title, which constitutes one of two Committee amendments, is "A Bill to provide for the conservation, protection, restoration, and propagation of species of fish, wildlife, and plants facing extinction, and for other purposes."

The other Committee amendment was in the nature of a substitute text, an analysis of which follows.

(2) Section 2 (Declaration of Policy)

In subsection (a) (Findings), the Congress finds that various species of fish and wildlife have become extinct and others are endangered by or threatened with extinction; that such species and their preservation is of value and a matter of concern to the United States for educational and scientific reasons and because the nation has made sovereign commitments by treaty with foreign nations to protect such species of fish and wildlife facing extinction. The Congress finds further that encouraging the States to develop and maintain endangered species programs is a key toward safeguarding the endangered and threatened species.

In subsection (b) (Purposes), the Congress declares that the purposes of this Act include providing an effective means to "conserve, protect, and restore the ecosystems" upon which these species depend; providing programs to conserve, protect, restore, and propagate these species; and insuring that all Federal agencies cooperate in protection efforts.

(3) Section 3 (Definitions)

"Convention", as defined in section 1(1), means the recently signed international convention with respect to international trade in "Endangered Species of Wild Fauna and Flora" and its appendices.

Section 3(2) defines an "endangered species" as one "which is in danger of extinction throughout all or a significant portion of its range". Section 3(13) defines a "threatened species" as one "which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range."

"Fish or wildlife" is defined very broadly in section 3(3) to mean not only animals and fish and birds, but also any part of any such creature, alive or dead. There is a similarly broad definition of "plant" (section 3(7)).

There are definitions of "foreign commerce" (section 3(4)); person (section 3(6)) (includes a corporation or other such entity and any employee of any government); State (section 3(10)); and United States (section 3(14)).

"Import", as used in this Act and defined in section 3(5), has a broader meaning than the same term as used in the customs laws of the United States, including as it does an *attempt* to land on, bring into, or introduce into any place subject to United States jurisdiction, as well as an actual landing, bringing into, or introducing.

"Secretary", as defined in section 3(8), means either the Secretary of the Interior or the Secretary of Commerce depending upon the program responsibilities of each such Secretary under the 1970 Reorganization Plan.

Section 3(9) defines "species" to mean not only a species of fish or wildlife, but also any subspecies or other group of the "same species or lesser taxa in common spatial arrangement that interbreed when mature." Thus, for purposes of this Act, an endangered subspecies of wildlife is an endangered species.

"State agency" is defined in section 3(11) to mean the State agency or other entity within a State which is responsible for that State's program for management and conservation of fish and wildlife resources.

"Take" is defined in section 3(12) in the broadest possible manner to include every conceivable way in which a person can "take" or attempt to "take" any fish or wildlife.

(4) Section 4 (Determination of Endangered or Threatened Species)

This section sets forth the mechanism for determining and listing species of fish and wildlife which are endangered or threatened, and sets up machinery for the transition from the single list maintained today under the Endangered Species Act of 1969 to the two lists to be maintained under this Act.

Under subsection (a) (General), the Secretary can list a species as endangered or threatened "as a result of any" of five listed factors: curtailment of its habitat; overutilization; disease or predation; inadequacy of other regulatory mechanisms; and other "natural or manmade factors affecting its continued existence."

Subsection (b) (Basis for Determinations) sets up requirements for listing as either an endangered or a threatened species.

Subsection (c) (Lists) sets out the mechanics for listing or removing from a list, including publication in the Federal Register, a review under section 553 of title 5, United States Code if a petition is filed by an interested person provided the Secretary finds that such person has presented substantial evidence which in his judgment warrants such a review: The species on the endangered species list which is in existence when this Act becomes effective "shall be republished to conform to the appropriate classifications under this Act."

Subsection (d) (Advisory Committee) establishes a special committee to advise the Secretary on additions to, removals from, or reclassifications within the lists.

Subsection (e) (Protective Regulations) requires the Secretary, once he has listed a species of fish or wildlife as a threatened species, to issue regulations to protect that species. Among other protective measures available, he may make any or all of the acts and conduct defined as "prohibited acts" (in section 10(a)) as to "endangered species" also prohibited acts as to the particular threatened species. (The penalties for prohibited acts are declared in sections 12(a) (civil violation) and 12(b) (criminal violation)).

(5) *Section 5* (*Land Acquisition*)

This section gives the Secretary broad authority to acquire any real property ("land, waters, or interests therein") which he finds "necessary for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species." He may use the land acquisition authority under other legislation in addition to the direct authority conferred by this Act, and he may use funds authorized and appropriated under the "Land and Water Conservation Fund Act of 1965" in addition to direct appropriations under this Act.

(6) *Section 6* (*Cooperation With the States*)

This section establishes mechanisms through which the Federal government and the governments of the States can work fruitfully together toward the mutually accepted goal of protection of endangered and threatened species.

Subsection (a) (General) directs the Secretary to "cooperate to the maximum extent practicable with the States." He is required to consult with a State before acquiring any real property in that State for purposes of protection of endangered or threatened species.

Subsection (b) (Management Agreements) authorizes the Secretary to agree with a State to manage, under a management agreement, any area established for such protective purposes.

Subsection (c) (Financial Assistance) authorizes financial-aid grants to the States for endangered and threatened species programs which meet the criteria set forth in this subsection. The prerequisites to Federal assistance are enumerated.

Subsection (d) (Allocation of Funds) sets out guidelines for the Secretary in dividing appropriated funds between the various eligible States and enumerates provisions regarding each such cooperative agreement for financial aid (e.g. Federal share shall not exceed 50% of the total estimated costs for a single State).

Subsection (e) (Periodic Review) requires annual review by the Secretary, including the consideration of comment from interested persons.

Subsection (f) (State Action Permitted) makes it clear that this Act shall in no way be construed to hold any State to a Federal standard which is lower or less protective of any endangered or threatened species, except for foreign commerce matters.

(7) *Section 7* (*Interagency Cooperation*)

All agencies, departments, and other instrumentalities of the Federal government are directed to cooperate in the implementation of the goals of this Act. Each agency shall, inter alia, take steps to "insure that actions authorized, funded, or carried out" by it do not jeopardize the continued existence of any such species or result in the destruction of its habitat.

(8) Section 8 (International Cooperation)

Subsection (a) (Financial Assistance) authorizes the President to provide assistance to endangered species programs using foreign currencies accruing to the United States in other nations subject to the provisions of section 1415 of the Supplemental Appropriation Act of 1953. However, no funds other than "counterpart" or "blocked" foreign currencies may be used for such purposes.

Subsection (b) (Encouragement) authorizes the Secretary, with the assistance of the Secretary of State, to encourage foreign countries to establish protective programs and to enter into bilateral or multilateral agreements for the protection, conservation, restoration, or propagation of endangered and threatened species, and to encourage citizens of such countries to practice conservation in taking fish or wildlife for importation into the United States.

Subsection (c) (Personnel) authorizes, after consultation with the Secretary of State, overseas assignment of personnel and expenditure of funds for specified programs.

Subsection (d) (Investigations) authorizes research and law enforcement investigations to be conducted overseas by the Secretary, after consultation with the Secretaries of State and Treasury.

Subsection (e) (Convention Implementation) directs the President to designate appropriate agencies to meet the Nation's implementation and enforcement responsibilities under the Convention.

(9) Section 9 (Regulations, Procedure, and Judicial Review)

Subsection (a) (Regulations) sets forth the requirements for the issuance of regulations by the Secretary under this Act.

Subsection (b) (Procedure) incorporates by reference the provisions of the Administrative Procedure Act, except for emergency action.

Subsection (c) (Judicial Review) authorizes limited judicial review of determinations by the Secretary under this Act.

(10) Section 10 (Unlawful Conduct)

Subsection (a) (Prohibited Acts) lists the conduct which is unlawful under this Act and punishable under section 12 (Penalties and Enforcement). The unlawful conduct includes, e.g., importing, exporting, taking, selling, distributing, or offering for sale in the United States any endangered species. The prohibited act is not limited to an entire animal, but includes any part of the dead body of any fish or wildlife which is listed pursuant to section 4 (see definition of fish and wildlife).

Subsection (b) (Similarity of Appearance Cases) authorizes the Secretary to deal with the problem presented by two species which are so similar in appearance that persons without specialized training cannot distinguish between them. If one is species listed under section 4, but the other is not, the Secretary may treat the unlisted species as an endangered or threatened species if such treatment "will substantially facilitate the enforcement and further the policy of this Act."

(11) Section 11 (Exceptions)

Subsection (a) (General) permits, upon approval, the importation, exportation, taking, or transportation of an endangered or threatened species for scientific purposes or the propagation of such species in captivity or in a controlled habitat.

Subsection (b) (Hardship) authorizes a limited hardship case exception for persons who have entered into contracts prior to the date a species is listed or proposed to be listed as an endangered or threatened species.

Subsection (c) (Procedure) requires an application, publication of notice, and review before the Secretary may grant a permit under subsection (a) or (b).

Subsection (d) (Alaska Natives) provides that the provisions of this Act shall not apply, with respect to an endangered or threatened species, to Indians, Aleuts, or Eskimos who take such fish or wildlife for the purpose of consumption or use in a native community or for the purpose of selling or creating for sale authentic native articles of handicrafts and clothing, provided the taking is not done in a wasteful manner. As used in this subsection, the phrase "consumption or use in a native community" includes selling any edible portion of fish and wildlife in native villages and towns in Alaska for native consumption. By "native villages and towns in Alaska" the Committee intends to include any native village and any settlement or municipality in Alaska. By "native village" in the previous sentence, the committee means any tribe, band, clan, group, village, community, or association in Alaska which the Alaska Native Claims Settlement Act or the Secretary of the Interior finds eligible for land conveyances under subsection 14(a) of that Act. "Native village" also includes "native groups" as defined in subsection 3(d) of that Act. The term "native village" thus includes entities containing populations of more than 25 and also entities containing populations of less than 25. The Secretary may, however, with respect to endangered and threatened species set and prescribe detailed regulations.

(12) Section 12 (Penalties and Enforcement)

Subsection (a) (Civil Penalty) makes a knowing violation punishable by a civil penalty up to $10,000. Other violations may be punished by a penalty up to $1,000. Each prohibited act constitutes a separate violation. No such penalty may be assessed without notice and a hearing pursuant to section 554 of title 5, United States Code.

Subsection (b) (Criminal Violation) makes a knowing and willful violation punishable by a $20,000 fine and up to one year in prison, or both. In case of a criminal conviction, a person may also forfeit Federal hunting permits and other licenses.

Subsection (c) (Rewards) authorizes the Secretary to pay one-half of the amount of the penalty or fine paid to any person who furnishes information which leads to a civil penalty or conviction.

Subsection (d) (Enforcement) establishes mechanisms for enforcement and for forfeitures in case of violation.

Subsection (e) (Registration) requires each person who is an importer of fish or wildlife to register with the Secretary of the Treasury; to keep records; and permit inspection of these records.

Subsection (f) (Enforcement Regulations) authorizes the promulgation of enforcement regulations and the charging of reasonable fees for permits.

Subsection (g) (Citizen Suits) permits, subject to certain conditions, private actions to enforce the provisions of this Act.

Subsection (h) (Coordination) directs the Secretary and the Secretary of Agriculture to coordinate the administration of this Act with the administration of the animal quarantine laws, as well as for coordination in other possibly overlapping areas.

(13) *Section 13* (*Endangered Plants*)

The Smithsonian Institution is directed to review species of plants which are endangered or threatened and methods of providing adequate protection for such species. (Such methods might include adding plants to fish or wildlife within the general coverage of this Act). The Institution is directed to report its results and recommendations for legislation to Congress within one year, and funds, not to exceed $250,000, for such purpose are authorized to be appropriated.

(14) *Section 14* (*Conforming Amendments*)

The Act amends several existing statutes to conform with the terminology and provisions of this Act.

(15) *Section 15* (*Repealer*)

The Endangered Species Conservation Act of 1969 is repealed.

(16) *Section 16* (*Applicability Within States*)

Subsection (a) (State Plan) declares that a State may establish a plan for endangered and threatened species in accordance with this Act. A plan is in accordance if it meets or exceeds the requirements set forth in section 6(c) and "represents an effective response to the Nation's need to conserve, protect, restore, and propagate endangered and threatened species of fish or wildlife."

Subsection (b) (Determination by Secretary) provides for the Secretary to determine whether or not such a State plan is in accordance with this Act.

Subsection (c) (Periodic Review) directs the Secretary to review, not less than once every three years, performance within each State with an approved plan "to determine whether such plan is still in accordance with this Act, and to evaluate the success of such plan in terms of the policy of this Act."

Subsection (d) (No State Plan) provides that the provisions of this Act shall become applicable in their entirety within a State 15 months after the enactment date unless, prior to that date, the Secretary has made a determination that such State has not established a plan in accordance with this Act. If such a State later establishes an acceptable plan, such plan shall become effective and the provisions of this Act as to management and taking shall cease to have effect within that State.

Subsection (e) (Procedure) requires published notice and authorizes limited judicial review of a determination regarding a State plan.

Subsection (f) (Effective Date) provides that except for the State plan provisions of this section, the Act takes effect upon the date of enactment.

(17) *Section 17* (*Marine Mammals Act*)

In case of conflict, no provision of this Act shall take precedence over a more restrictive provision in the Marine Mammal Protection Act of 1972.

(*18*) *Section 18* (*Authorization for Appropriations*)

Appropriations are authorized for the next three fiscal years.

TEXT OF S. 1983, AS REPORTED

"A bill to provide for the conservation, protection, restoration, and propagation of threatened and endangered species of fish, wildlife, and plants, and for other purposes." *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That this Act may be cited as the "Endangered Species Act of 1973".

DECLARATION OF POLICY

SEC. 2. (a) FINDINGS.—The Congress finds and declares that—

(1) various species of fish, wildlife, and plants in the United States have been rendered extinct as a consequence of economic growth and development untempered by adequate concern and conservation;

(2) other species of fish, wildlife and plants have been so depleted in numbers that they are in danger of or threatened with extinction;

(3) these species of fish, wildlife and plants are of educational, historical, recreational, and scientific value to the Nation and its people;

(4) the United States has pledged itself as a sovereign state in the international community to conserve and protect to the extent practicable the various species of fish or wildlife and plants facing extinction, pursuant to—

(A) migratory bird treaties with Canada and Mexico;

(B) the Migratory and Endangered Bird Treaty with Japan;

(C) the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere;

(D) the International Convention for the Northwest Atlantic Fisheries;

(E) the International Convention for the High Seas Fisheries of the North Pacific Ocean;

(F) the Convention on International Trade in Endangered Species of Wild Fauna and Flora; and

(G) other international agreements.

(5) encourage the States, through Federal financial assistance and a system of incentives, to develop and maintain conservation, protection, restoration, and propagation programs which meet national and international standards is a key to meeting the Nation's international commitments and to better safeguarding, for the benefit of all citizens, the Nation's heritage in fish and wildlife.

(b) PURPOSES.—The Congress hereby declares that the purposes and policy of this Act are to—

(1) provide an effective means to conserve, protect, and restore the ecosystems upon which endangered and threatened species of fish or wildlife depend;

(2) provide a viable program for the conservation, protection, restoration, and propagation of endangered and threatened species;

(3) take all appropriate steps to implement the Nation's international commitments with respect to endangered and theatened fish and wildlife; and

(4) insure that all departments, agencies, and instrumentalities of the United States seek, within the scope of their authority and administrative jurisdiction, to protect endangered and threatened species.

DEFINITIONS

SEC. 3. As used in this Act—

(1) "Convention" means the Convention on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973, and the appendices thereto.

(2) "Endangered species" means any species of fish or wildlife which is in danger of extinction throughout all or a significant portion of its range.

(3) "Fish or wildlife" means any living member of the animal kingdom and the remains of any dead member of the animal kingdom, including, but not limited to, any mammal, fish, bird, amphibian, reptile, mollusk, crustacean, arthropod or other invertebrate, or any part, egg, or offspring of any such member, or any product produced from any part or parts of the remains of any such member.

(4) "Foreign commerce" includes any transaction—

(A) between persons within one foreign country;

(B) between persons in two or more foreign countries;

(C) between a person within the United States and a person in a foreign country; or

(D) between persons within the United States, where the fish or wildlife involved are moving in any country or countries outside the United States.

(5) "Import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduced into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(6) "Person" means an individual, corporation, partnership, trust, association, or any other private entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(7) "Plant" means any member of the plant kingdom, including seeds, roots, and other parts of any such member.

(8) "Secretary" means, except as otherwise provided, the Secretary of the Interior or the Secretary of Commerce in the same manner in which program responsibilities are vested under Reorganization Plan Numbered 4 of 1970. With respect to enforcement of the provisions of this Act and of the Convention, which pertain to the importation of terrestrial plants, the term means the Secretary of Agriculture.

(9) "Species" includes any subspecies or other group of fish or wildlife of the same species or lesser taxa in common spatial arrangement that interbreed when mature.

(10) "State" means any State, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(11) "State agency" means the State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish and wildlife resources within a State.

(12) "Take" means to harass, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

(13) "Threatened species" means any species of fish or wildlife which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

(14) "United States", when used in a geographical sense, includes all States.

DETERMINATION OF ENDANGERED OR THREATENED SPECIES

SEC. 4. (a) GENERAL.—The Secretary shall by regulation determine whether any fish or wildlife is an endangered or threatened species as a result of any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

(b) BASIS FOR DETERMINATIONS.—(1) The determinations required by this section shall be made on the basis of the best scientific and commercial data available to the Secretary, including any recommendations that have been made by the Advisory Committee established under subsection (d) of this section and after consultation, as appropriate, with all interested persons and organizations, including affected or knowledgeable ederal, State, and foreign government agencies. In any case in which such determinations involve an indigenous species, the Secretary shall consult with and consider the recommendations of each State involved. In any case in which determinations involve a species which is normally found on the high seas, in lakes, or other waters off the coast of a State of which are customarily harvested by citizens of such a State, the Secretary shall consult with and consider the recommendations of each State involved. In any case in which such determinations involve a species which is normally found in a foreign country or countries or which is harvested from the ocean by citizens of such country or countries, the Secretary shall (where practicable) with the assistance of the Secretary of State, consult with and consider the recommendations of such country or countries.

(2) In determining whether or not any fish or wildlife is an endangered or a threatened species, the Secretary shall take into consideration those efforts, if any, being made by any nation or any political subdivision of any nation to protect within any area under its jurisdiction such fish or wildlife, whether by predator control, protection of habitat and food supply, or other conservation or management practices.

(3) Fish or wildlife which have been designated as requiring protection from unrestricted commerce by any foreign country, or pursuant to any international agreement, shall receive special and full consideration by the Secretary to determine whether each is an endangered or a threatened species.

(c) LISTS.—(1) The Secretary shall publish in the Federal Register a list of all fish or wildlife determined by him by regulation to be endangered species and a list of all fish or wildlife determined by him by regulation to be threatened species. Such lists may be amended, modified, or revised periodically by regulation. Each list shall refer to each species of fish or wildlife named therein by scientific name and common name or names and shall specify the portion of its range over which it is endangered or threatened.

(2) The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5, United States Code, conduct a review of any listed or unlisted species of fish or wildlife proposed to be removed from or added to either of the lists published pursuant to paragraph (1) of this subsection, but only if he makes and publishes a finding that such person has presented substantial evidence which in his judgment warrants such a review.

(3) Any list of species of fish or wildlife determined to be threatened with extinction, by the Secretary of the Interior pursuant to the Endangered Species Conservation Act of 1969, which is in effect the day before the date of enactment of this Act shall be republished to conform to the appropriate classifications under this Act. Pending reclassification as endangered species or threatened species and republication, any species listed pursuant to the Act of 1969 shall be deemed an endangered species within the meaning of this Act. Such reclassification and republication shall not require a public hearing or comment under section 553 of title 5, United States Code.

(d) ADVISORY COMMITTEE.—(1) The Secretary shall establish an Advisory Committee on Endangered and Threatened Species to consult with, advise, and make recommendations to him and to the States. The Advisory Committee shall consist of not more than eleven members including a Chairman who shall be appointed by the Secretary from lists of qualified individuals submitted by State fish and wildlife agency administrators, universities, nongovernmental organizations concerned with conservation, and scientific societies. Five of the members shall be regularly employed by State governments or political subdivisions thereof. The terms of office shall be so arranged by the Secretary that each year at least three new members shall be appointed to fill vacancies caused by the expiration of terms of office.

(2) The Advisory Committee shall periodically, but not less than once each year, make recommendations to the Secretary with respect to removal from, addition to, or reclassification within the lists maintained pursuant to subsection (a) of this section, and may, with the

approval of the Secretary, perform other functions in furtherance of the purposes of this Act. A member of the Advisory Committee who is not otherwise a Government employee may, in the discretion of the Secretary, receive not more than $150 per diem when engaged in the actual performance of his duties. Each member may receive reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of his duties.

(e) PROTECTIVE REGULATIONS.—Whenever the Secretary lists a species of fish or wildlife as a threatened species, pursuant to subsection (a) of this section, he shall issue such regulations as he deems necessary and advisable to provide for the conservation, protection, restoration, or propagation of such species. With respect to any endangered or threatened species, the Secretary may by regulation prohibit any act prohibited with respect to an endangered species under section 10(a) this Act.

LAND ACQUISITION

SEC. 5. The Secretary shall establish and implement a program to conserve, protect, restore, and propagate fish or wildlife which are listed as endangered or threatened species pursuant to section 4 of this Act. To carry out such programs, the Secretary—

(a) shall utilize as appropriate the land acquisition and other authorities conferred upon him under the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956, and the Fish and Wildlife Coordination Act;

(b) may acquire by purchase, donation, or otherwise any lands, waters, or interests therein necessary for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species. Such authority shall be in addition to any other land acquisition authority vested in him; and

(c) may use funds made available under the Land and Water Conservation Fund Act of 1965 or under this Act to acquire such lands, waters, or interests therein.

COOPERATION WITH THE STATES

SEC. 6. (a) GENERAL.—In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the States. In addition to all other obligations, the Secretary shall consult with the affected State before the acquisition of any lands, waters, or interests therein for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species.

(b) MANAGEMENT AGREEMENTS.—The Secretary may enter into an agreement or agreements with any State for the administration and management of any area established for the conservation, protection, restoration, or propagation of an endangered or a threatened species. Any revenues derived from the administration of such areas under such agreements shall be subject to section 401 of the Act of June 15, 1935 (16 U.S.C. 715s).

(c) FINANCIAL ASSISTANCE.—The Secretary is authorized to enter into a cooperative agreement in accordance with this subsection to provide financial assistance to any State which establishes and maintains an adequate and active program for the management, conservation, protection, and restoration of endangered and threatened species. Before the Secretary may enter into or renew such a cooperative agreement to provide financial assistance to a State, he shall make, justify, and publish in the Federal Register a finding that such agreement would further the policy of this Act and that such State has a program under which—

(1) the State agency has authority and administrative jurisdiction to manage and protect any species of fish or wildlife which is determined by such agency or the Secretary to be endangered or threatened;

(2) the State has established a State plan, including a management program under the State agency, for all species of resident fish or wildlife which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

(3) the State agency during the first year of the existence of such agreement—

(A) will issue protective regulations;

(B) will employ sufficient trained and qualified personnel; and

(C) will maintain investigation, enforcement, and public education programs,

which are adequate, in the Secretary's judgment, for the conservation, protection, restoration, and propagation of species of fish or wildlife facing extinction;

(4) the State agency is authorized and plans to conduct studies to determine the status and requirements for survival of species of residual fish or wildlife and agrees to transmit a copy of the findings of such studies to the Secretary;

(5) the State agency is authorized and plans to establish programs, including the acquisition of lands, waters, or interests therein, for the conservation, protection, restoration, and propagation of endangered and threatened species; and

(6) provision is made for public participation in designating species of resident fish or wildlife as endangered or threatened.

(d) Allocation of Funds.—(1) Funds appropriated for financial assistance pursuant to subsection (c) of this section shall be available to the Secretary for allocation to the States under cooperative agreements. The purposes for which such funds may be used include, but are not limited to, research, censusing, law enforcement, and habitat acquisition or improvement. The Secretary shall allocate appropriated funds to such States upon the basis of—

(A) the international commitments of the United States to protect endangered or threatened species;

(B) the national significance of a species found to be endangered or threatened within a State; and

(C) the potential for preventing extinction of a species or for restoring a species to nonendangered or nonthreatened status.

Funds allocated to a State but unexpended or unobligated at the close of the fiscal year remain available for expenditure by such State until the close of the succeeding fiscal year.

(2) Each cooperative agreement between a State and the Secretary shall provide for—

(A) the actions to be taken by the Secretary and the State;

(B) the benefits that are expected to be derived in connection with preservation and restoration of endangered or threatened species;

(C) the estimated cost of these actions; and

(D) the share of such costs to be borne by the Federal Government and by the States, except that—

(i) the Federal share of such program costs shall not exceed 50 per centum of the estimated program costs stated in the agreement; and

(ii) the Federal share may be increased to 66⅔ per centum whenever two or more States, having a common interest in a program that the Secretary deems to meet the criteria of paragraph (1) of this subsection, enter jointly into an agreement with the Secretary.

The Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon in the cooperative agreement.

(3) The Secretary is authorized to issue such regulations as may be appropriate to carry out the provisions of this section with respect to financial assistance to States.

(4) For the purposes of this section, there is authorized to be appropriated $10,000,000.

(e) PERIODIC REVIEW.—The finding made under subsection (c) of this section and any action taken by the Secretary under this section shall be subject to his periodic review, including the consideration of comment from interested persons, at no greater than annual intervals. Upon ninety days' notice in writing to the affected State, the Secretary may terminate in his discretion any cooperative agreement entered into under this section.

(f) STATE ACTION PERMITTED.—Nothing in this Act shall be construed as superseding or limiting the power of any State or political subdivision thereof to enact legislation or regulations more restrictive than or consistent with the provisions of this Act with respect to an endangered or a threatened species: *Provided*, That any State law or regulation of the import or export of or the interstate or foreign commerce in an endangered species listed pursuant to section 4 of this Act is void to the extent that it may effectively permit what is prohibited by this Act or its implementing regulations, or prohibit what is authorized pursuant to an exemption or permit provided for in this Act or its implementing regulations. This Act shall not otherwise be construed to void any State law or regulation which is intended to conserve and manage migratory, resident, or introduced fish or wildlife, or to permit or prohibit sale of such fish or wildlife.

INTERAGENCY COOPERATION

SEC. 7. The Secretary shall review all programs administered by him and utilize such programs in furtherance of the policy of this Act. All other departments, agencies, and instrumentalities of the Federal Government shall, in consultation with and with the assistance of the Secretary—

(a) carry out such programs as are practicable for the protection of species listed, pursuant to section 4 of this Act, as endangered or threatened;

(b) take such action as is necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of any endangered or threatened species, or result in the destruction or modification of any habitat of such species which is determined by the Secretary, after consultation to the extent appropriate and necessary with affected States, to be a critical habitat of such species.

INTERNATIONAL COOPERATION

SEC. 8. (a) FINANCIAL ASSISTANCE.—As a demonstration of the commitment of the United States to the worldwide protection of endangered and threatened species, the President may, subject to the provisions of section 1415 of the Supplemental Appropriation Act, 1953 (31 U.S.C. 724), use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistance Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and management of programs in that country which the Secretary determines to be necessary or useful for the conservation, protection, restoration, or propagation of any endangered or threatened species listed by the Secretary pursuant to section 4 of this Act: *Provided*, That no funds other than foreign currencies available for expenditure only within such foreign country shall be used pursuant to this section. The President shall provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, waters, or interests therein) to foreign countries under this section upon such terms and conditions as he deems appropriate.

(b) ENCOURAGEMENT.—In order to carry out further the provisions of this Act, the Secretary, with the assistance of the Secretary of State, shall encourage—

(1) foreign countries to provide for the protection, conservation, restoration, or propagation of fish or wildlife, including endangered and threatened species listed pursuant to section 4 of this Act;

(2) the entering into of bilateral or multilateral agreements for foreign countries to provide for such protection, conservation, restoration, or propagation; and

(3) foreign persons, who directly or indirectly take fish or wildlife in foreign countries or on the high sea for importation into the United States for commercial or other purposes, to develop and carry out, with such assistance as he may provide, conservation practices designed to enhance such fish, wildlife and plants and their habitat.

(c) PERSONNEL.—After consultation with the Secretary of State, the Secretary may—

(1) assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign

countries and international organizations in developing personnel resources and programs which promote the protection, conservation, restoration, or propagation of fish or wildlife; and

(2) conduct or provide financial assistance for the educational training of foreign personnel, in this country or abroad, in fish, wildlife or plant management, research, and law enforcement, and to render professional assistance abroad in such matters.

(d) INVESTIGATIONS.—After consultation with the Secretary of State and the Secretary of the Treasury, as appropriate, the Secretary may conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the purposes of this Act.

(e) CONVENTION IMPLEMENTATION.—The President is authorized and directed to designate appropriate agencies to act as the Management Authority or Authorities and the Scentific Authority or Authorities pursuant to the Convention. The agencies so designated shall thereafter be authorized to do all things assigned to them under the Convention, including the issuance of permits and certificates. The agency designated by the President to communicate with other parties to the Convention and with the Secretariat shall also be empowered, in consultation with the State Department, to act on behalf of and represent the United States in all regards as required by the Convention.

REGULATIONS, PROCEDURE, AND JUDICIAL REVIEW

SEC. 9. (a) REGULATIONS.—The Secretary shall publish any regulations proposed under this Act in the Federal Register at least sixty days prior to the time when such regulations shall become final, except that in case of an emergency the Secretary may publish such regulations not less than thirty days prior to the time when such regulations shall become final if at the same time he publishes in the Federal Register detailed reasons why emergency action is necessary. The Secretary shall also publish in the Federal Register a notice of all petitions received pursuant to this Act and, if such petition is denied, his reasons therefor. Such notice shall identify the purpose of the petition and include a statement of the availability of any data submitted in support of such petition. If any person adversely affected by a proposed regulation files objections and requests a public hearing within forty-five days of the date of publication of the proposed regulation, the Secretary shall grant such request. If such public hearing is held, final regulations shall not be promulgated by the Secretary until after the conclusion of such hearing. All public hearings authorized by this subsection shall consist of the oral and written presentation of data or arguments in accordance with such conditions or limitations as the Secretary may make applicable thereto. Proposed and final regulations issued under this Act shall set forth findings of fact on which the regulations are based and shall state the relationship of such findings to the regulations issued.

(b) PROCEDURE.—Except as expressly modified by this section, the provisions of the Administrative Procedure Act (5 U.S.C. 551 et seq.) shall apply to proceedings conducted by the Secretary under this Act: *Provided*, that the provisions of this section shall not apply to the extent necessary to permit emerging action by the Secretary. Notice of and reasons for such action shall be published prior to such action in the Federal Register.

(c) JUDICIAL REVIEW.—(1) Any judicial review of final regulations promulgated under this Act and final actions under section 5(c) of this Act shall be in accordance with sections 701–706 of title 5, United States Code, except that—

(A) with respect to regulations promulgated under section 4 or 6 of this Act, the findings of the Secretary as to the facts shall be sustained if based upon substantial evidence on the record considered as a whole; and

(B) with respect to relief pending review, no stay of an action may be granted unless the reviewing court determines that the party seeking such stay—

(i) is likely to prevail on the merits in the review proceeding, and

(ii) will suffer irreparable harm pending such proceeding.

(2) If the party seeking judicial review applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court either that—

(A) the information is material and was not available at the time of the proceeding before the Secretary; or

(B) failure to include such evidence in the proceeding was an arbitrary or capricious act of the Secretary,

the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Secretary, and to be adduced upon the hearing, in such manner and upon such terms and conditions as the court may deem proper. The Secretary may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file with the court such modified or new findings and his recommendation, if any, for the modification or setting aside of his original order.

(*d*) AUDIT.—(1) Each recipient of Federal assistance under this Act, pursuant to grants, subgrants, contracts, subcontracts, loans or other arrangements, entered into other than by formal advertising, and which are otherwise authorized by this Act, shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, the amount of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall, until the expiration of three years after completion of the project or undertaking referred to in subsection (a) of this section, have access for the purpose of audit and examination to any books, documents, papers, and records of such recipients which in the opinion of the Secretary or the Comptroller General may be related or pertinent to the grants, subgrants, contracts, subcontracts, loans or other arrangements referred to in subsection (a).

UNLAWFUL CONDUCT

Sec. 10. (a) Prohibited Act.—Except as povided in section 11 of this Act, it is unlawful for any person subject to the jurisdiction of the United States to—

(1) import into, or export from, the United States any endangered species which has been listed pursuant to section 4 of this Act;

(2) take any such species within the United States or in the territorial sea of the United States or upon the high seas;

(3) possess, sell, deliver, carry, transport, ship, or receive, by any means whatever, any such species which are taken in violation of paragraph (2) of this subsection;

(4) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and for commercial purposes, any such species;

(5) sell, distribute, or offer for sale in foreign commerce, interstate commerce, or activity affecting interstate commerce specimens or products processed or manufactured in whole or in part from specimens of any such species;

(6) attempt to commit, solicit another to commit, or cause to be committed, any act prohibited by paragraphs (1) through (5) of this subsection;

(7) engage in any trade in any specimens of fish, wildlife, or plants, contrary to the provisions of the Convention, or possess any specimens traded contrary to the provisions of the Convention, including the definitions in article I therein;

(8) violate any regulation which is promulgated by the Secretary pursuant to section 4(e) of this Act; or

(9) import into or export from the United States except at a port or ports designated by the Secretary, any fish or wildlife, except nonendangered and nonthreatened shellfish and fishery products which are imported or exported for human or animal consumption or taken for recreational purposes in waters under United States jurisdiction or on the high seas. To facilitate enforcement of this paragraph and to reduce the costs of enforcement, the Secretary, with the approval of the Secretary of the Treasury and after notice and opportunity for public hearing, may, by regulation, designate ports and change such designations. Upon such terms and conditions as he may prescribe, the Secretary may permit such importation at nondesignated ports in the interest of the health or safety of the fish or wildlife or for any other reason he deems appropriate. Any port designated by the Secretary of the Interior under the authority of section 4(d) of the Act of December 5, 1969 (16 U.S.C. 666cc-4(d)), shall, if such designation is in effect on the day before the date of the enactment of this Act, be deemed to be a port designated by the Secretary under this paragraph until such time as the Secretary otherwiso provides.

(b) Similarity of Appearance Cases.—The Secretary may, by regulation, and to the extent he deems advisable, treat any species of fish or wildlife as an endangered or threatened species even though it is not listed pursuant to section 4 of this Act if he finds that—

(A) such species so closely resembles in appearance, at the point in question, a species which has been listed pursuant to such section that enforcement personnel would have substantial difficulty in attempting to differentiate between the listed and unlisted species;

(B) the effect of this substantial difficulty is an additional threat to an endangered or threatened species; and

(C) such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of this Act.

SEC. 11. (a) GENERAL.—Upon a finding that the excepted conduct will not adversely affect the regenerative capacity of the involved species in a significant portion of its range or habitat or otherwise affect the survival of the wild population of such species, and upon such terms and conditions as he may prescribe, the Secretary may issue permits authorizing the importation, exportation, taking, or transportation, by persons found to be qualified, of any fish or wildlife which is listed as an endangered or threatened species pursuant to section 4 of this Act for—

(1) scientific purposes in furtherance of the purposes of this Act; or

(2) the propagation of such species in captivity or in a controlled habitat.

(b) HARDSHIP.—The Secretary may except from the application of section 10(a) of this Act any person who enters into a contract with respect to a species of fish or wildlife before the date of publication in the Federal Register of notice of a proposed listing of that species as an endangered or threatened species if the failure to grant such exception will cause undue economic hardship to such person under the contract. The extent and duration of such exception shall be such as the Secretary deems appropriate. No such exception shall be granted unless such person applies to the Secretary in writing and furnishes with such application such information as the Secretary may require to prove such hardship. No such exception shall be for a duration of more than one year from the date of publication in the Federal Register of notice of a proposed listing of the involved species, nor shall such exception apply to a quantity of fish or wildlife in excess of that specified by the Secretary. The one-year period for those species of fish or wildlife which were listed by the Secretary as endangered prior to the effective date of this Act shall expire in accordance with the terms of section 3 of the Act of December 5, 1969 (83 Stat. 275). No such exemption may be granted for the importation or exportation of a specimen listed in appendix I of the Convention which is to be used for primarily commercial purposes.

(c) PROCEDURE.—(1) The Secretary shall publish a notice in the Federal Register of each application for an exception. Each notice shall invite the submission from interested parties, within thirty days after the date of the notice, of written data, views, or arguments with respect to the application. Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.

(2) The Secretary may grant exceptions under subsections (a) and (b) of this section only if he finds, and publishes such finding in the Federal Register, that such exceptions were applied for in good faith and if granted and exercised will not operate to the disadvantage of

such endangered or threatened species and will be consistent with the policy of this Act.

(d) Alaska Natives.—(1) The provisions of this Act shall not apply with respect to the taking of any endangered or threatened species by any Indian, Aleut, or Eskimo who is an Alaskan native who resides in Alaska if such taking is for the purpose of consumption or use in a native community or for the purpose of selling or creating for sale in interstate commerce authentic natives articles of handicrafts and clothing: *Provided*, That in each case such taking is not accomplished in a wasteful manner. As used in this paragraph—

(A) "consumption or use in a native community" includes selling any edible portion of fish or wildlife in native villages and towns in Alaska for native consumption; and

(B) "authentic native articles of handicrafts and clothing" means items composed wholly or in some significant respect of natural materials, and which are produced, decorated, or fashioned in the exercise of traditional native handicrafts without the use of pantographs, multiple carvers, or other mass copying devices. Traditional native handicrafts include, but are not limited to, weaving, carving, stitching, sewing, lacing, beading, drawing, and painting.

(2) Notwithstanding the provisions of paragraph (1) of this subsection, whenever the Secretary determines that any species of fish or wildlife which is subject to taking by Indians, Aleuts, or Eskimos is an endangered or threatened species and that such taking materially and negatively affects the threatened and endangered species, he may prescribe regulations upon the taking of such species by any such Indian, Aleut, or Eskimo. Such regulations may be established with reference to species, geographical decription of the area included, the season for taking, or any other factors related to the reason for establishing such regulations and consistent with the policy of this Act. Such regulations shall be prescribed after notice and hearings in the affected judicial district of Alaska and as otherwise required by section 103 of the Marine Mammal Protection Act of 1972, and shall be removed as soon as the Secretary determines that the need for their imposition has disappeared: *Provided*, That no such regulation shall be established which is in contravention of any provision of the Marine Mammal Protection Act of 1972.

PENALTIES AND ENFORCEMENT

Sec. 12. (a) Civil Penalty.—(1) Any person who—

(A) knowingly violates any provision of this Act or any regulation or permit issued under this Act, which prohibits the taking, importing, exporting, shipping, receiving, or otherwise moving in interstate or foreign commerce of any endangered or threatened species of fish or wildlife, or commits any act made unlawful under section 10(a) of this Act, may be assessed a civil penalty by the Secretary of not more than $10,000 for each violation;

(B) commits any act made unlawful under section 10(a) of this Act, or violates any other provision of this Act, or any regulation or permit issued under this Act, may be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation.

No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each prohibited act is a separate violation. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay a penalty assessed under this subsection, the Secretary may by his own attorneys institute a civil action in a district court of the United States for any district in which such person is found, resides, or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. The court shall hear such action solely on the record made before the Secretary and shall sustain his action if it is supported by substantial evidence on the record considered as a whole.

(2) Hearings held during proceedings for the assessment of civil penalties authorized by paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5, United States Code. The Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(b) CRIMINAL VIOLATIONS.—(1) Any person who knowingly and willfully violates any provision of this Act, or of any regulation or permit issued thereunder, shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both.

(2) The head of any Federal agency which has issued a lease, license, permit, or other agreements authorizing the use of Federal lands, including grazing of domestic livestock, to any person who is convicted under paragraph (1) of this subsection may immediately modify, suspend, or revoke such lease, license, permit, or other agreement. The Secretary may suspend, cancel, or refuse to issue for a period of up to one year Federal hunting or fishing permits or stamps with respect to any person who is convicted under paragraph (1) of this subsection. The United States shall not be liable to pay any compensation, reimbursement, or damages in connection with any such modification, suspension, or revocation of any lease, license, permit, stamp, or other agreement.

(c) REWARDS.—Upon the recommendation of the Secretary, the Secretary of the Treasury is authorized to pay an amount equal to one-half of the civil penalty or fine paid, but not to exceed $2,500, to any person who furnishes information which leads to a finding of civil violation or a conviction of a criminal violation of any provision of this Act or any regulation or permit issued thereunder. Any officer or employee of the United States or of any State or local government who furnishes information or renders service in the performance of his official duties shall not be eligible for payment under this section.

(d) ENFORCEMENT.—(1) The provisions of this Act and any regulations or permits issued under this Act shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all Secretaries. Each such Secretary may utilize, by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency for purposes of enforcing this Act.

(2) The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulation issued thereunder.

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, in furtherance of the enforcement of this Act may execute and serve any arrest warrant, search warrant, or other warrant of civil or criminal process issued by any officer or court of competent jurisdiction. A person so authorized may search and seize, with or without a warrant, to the extent authorized by law. Any fish, wildlife, property, or item so seized shall be held by any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, property, or item pursuant to paragraph (4) of this subsection, except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

(4) All fish or wildlife, or plants taken, possessed, sold, purchased, offered for sale or purchase, transported, delivered, received, carried, shipped, exported or imported contrary to the provisions of this Act, any regulation issued under this Act, or any permit issued thereunder, and all guns, traps, nets, and other equipment, vessels, vehicles, aircraft, and other means of transportation used to aid the taking, possessing, selling, purchasing, offering for sale or purchase, transporting, delivering, receiving, carrying, shipping, exporting, or importing of any fish or wildlife, or plants in violation of this Act, any regulation made pursuant thereto, or any permit issued thereunder shall be subject to forfeiture to the United States.

(5) All provisions of law relating to the seizure, forfeiture, and condemnation of a vessel for violation of the customs laws, the disposition of such vessel or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act. The powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Treasury Department shall, for purposes of this Act,

be exercised or performed by the Secretary or by such persons as he may designate.

(e) Registration.—(1) Any person who engages to any extent in business as an importer of fish or wildlife must register with the Secretary of the Treasury his name and the address of each place of business at which, and all trade names under which, he conducts such business.

(2) Any person required to register with the Secretary of the Treasury under paragraph (1) of this subsection shall—

(A) keep such records as will fully and correctly disclose each importation or exportation of fish or wildlife except nonendangered and nonthreatened shell fish or fishery products which are imported or exported for human or animal consumption or recreational purposes, made by him and the subsequent disposition made by him with respect to such fish or wildlife and

(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his places of business, an opportunity to examine his inventory of imported fish or wildlife and the records required to be kept under subparagraph (A) of this paragraph and to copy such records.

(3) The Secretary of the Treasury, after consultation with the Secretary, shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.

(f) Enforcement Regulations.—(1) The Secretary, the Secretary of the Treasury, and the Secretary of the Department in which the Coast Guard is operating, are authorized to promulgate such regulations as may be appropriate to enforce this Act, and to charge reasonable fees for expenses to the Government connected with permits authorized by this Act, including processing applications and reasonable inspections, and the transfer, board, handling, or storage of fish, wildlife, or plants and evidentiary items seized and forfeited under this Act. All fees collected pursuant to this subsection shall be deposited in the Treasury to the credit of the appropriation which is current and chargeable for the cost of furnishing the services. Appropriated funds may be expended pending reimbursement from parties in interest.

(g) Citizen Suits.—(1) Except as provided in paragraph (2) of this subsection, any person may commence a civil suit on his own behalf to enjoin any person, including the United States and any other governmental instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution), who is alleged to be in violation of any provision of this Act or regulation issued under the authority thereof. The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any such provision or regulation, as the case may be.

(2) No action may be commenced—

(A) prior to sixty days after written notice of the violation has been given to the Secretary, and to any alleged violator of any such provision or regulation;

(B) if the Secretary has commenced action to impose a penalty pursuant to subsection (a) of this section; or

(C) if the United States has commenced and is diligently prosecuting a criminal action in a court of the United States or a State to redress a violation of any such provision or regulation.

(3)(A) Any suit under this subsection may be brought in the judicial district in which the violation occurs.

(B) In any such suit under this subsection in which the United States is not a party, the Attorney General, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

(4) The court, in issuing any final order in any suit brought pursuant to paragraph (1) of this subsection may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(5) The injunctive relief provided by this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or limitation or to seek any other relief (including relief against the Secretary or a State agency).

(h) COORDINATION.—The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act with the administration of the animal quarantine laws (21 U.S.C. 101–105, 111–135b, and 612–614) and section 306 of the Tariff Act of 1930 (19 U.S.C. 1306). Nothing in this Act or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations or possession of animals and other articles. No proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture. Nothing in this Act shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, including, but not limited to, section 527 of such Act (19 U.S.C. 1527), relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.

ENDANGERED PLANTS

SEC. 13. The Secretary of the Smithsonian Institution, in conjunction with other affected agencies, is authorized and directed to review species of plants which are endangered or threatened, and methods of providing adequate protection including legislation for such species. He shall report the results of such review to Congress, not later than one year after the date of enactment of this Act. For purposes of this section, there is authorized to be appropriated not to exceed $250,000.

CONFORMING AMENDMENTS

SEC. 14. (a) Section 4(c) of the Act of October 15, 1966 (80 Stat. 928, 16 U.S.C. 668dd(c)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered and threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of such Act nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the System."

(b) Section 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224, 16 U.S.C. 715i(a)) and section 401(a) of the Act of June 15, 1935 (49 Stat. 383, 16 U.S.C. 715s(a)) are each amended by striking out "threatened with extinction," and inserting in lieu thereof the following: "listed pursuant to section 4 of the Endangered Species Act of 1973 as endangered or threatened species,".

(c) Section 6(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601–9(a)(1)) is amended by striking out:

> "THREATENED SPECIES.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction."

and inserting in lieu thereof the following:

> "ENDANGERED AND THREATENED SPECIES.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5 of the Endangered Species Act of 1973, needed for the purpose of conserving, protecting, restoring, or propagating endangered or threatened species of fish, wildlife, or plants."

(d) The first sentence of section 2 of the Act of September 28, 1962 (76 Stat. 653; 16 U.S.C. 460k–1), is amended to read as follows:

"SEC. 2. The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—

"(1) incidental fish and wildlife-oriented recreational development,

"(2) the protection of natural resources,

"(3) the protection of endangered or threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973, or

"(4) carrying out two or more of the purposes set forth in paragraphs (1) through (3) of this section,

and are adjacent to, or within, the said conservation areas, except that the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps."

(e) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407 is amended—

(1) by striking out "Endangered Species Conservation Act of 1969" in section (1)(B) thereof and inserting in lieu thereof the following: "Endangered Species Act of 1973";

(2) by striking out "pursuant to the Endangered Species Conservation Act of 1969" in section 101(a)(3)(B) thereof and inserting in lieu thereof the following: "or threatened species pursuant to the Endangered Species Act of 1973";

(3) by striking out "endangered under the Endangered Species Conseration Act of 1969" in section 102(b)(3) thereof and in-

serting in lieu thereof the following: "an endangered or a threatened Species pursuant to the Endangered Species Act of 973"; and

(4) by striking out "Endangered Species List," authorized by the Endangered Species Conservation Act of 1969." in section 202(a)(6) thereof and inserting in lieu thereof the following: "endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered Species Act of 1973".

REPEALER

Sec. 15. The Endangered Species Conservation Act of 1969 (sections 1 through 3 of the Act of October 15, 1966, and sections 1 through 6 of the Act of December 5, 1969; 16 U.S.C. 668aa—668cc-6) is repealed.

APPLICABILITY WITHIN STATES

Sec. 16. (a) State Plan.—By the end of the first year after the date of enactment of this Act, a State may establish a plan for endangered and threatened species in accordance with this Act. A plan is in accordance with this Act if it meets or exceeds the requirements set forth in section 6(c) of this Act and represents an effective response to the Nation's need to conserve, protect, restore, and propagate endangered and threatened species of fish or wildlife. Upon the establishment of such a plan, the Governor or the head of the State agency shall promptly transmit a certified copy to the Secretary.

(b) Determination by Secretary.—Within ninety days after the Secretary receives a certified copy of a State plan established under subsection (a) or subsection (d) of this section, the Secretary shall make a determination whether such State has established a plan for endangered and threatened species in accordance with this Act. Unless the Secretary determines, pursuant to this section, that a State plan is not in accordance with this Act, the plan shall go into effect in such State on the date designated in the plan. In no event shall such State plan go into effect less than three months or more than nine months after the date of its establishment.

(c) Periodic Review.—The Secretary shall periodically, but not less than once every three years, review each State plan for endangered and threatened species which has been approved under subsection (b) of this section and for which there is experience, to determine whether such plan is still in accordance with this Act and to evaluate the success of such plan in terms of the policy of this Act. To facilitate such review, the Governor or the head of the State agency in each such State shall submit to the Secretary periodically all information relevant and requested by the Secretary. The Secretary shall report to the President and Congress simultaneously each year on the results of such reviews, including any recommendations for legislation.

(d) No State Plan.—Except as to species listed in Appendix I of the Convention, the provisions of this Act regarding the management and taking of any State's resident species shall become applicable in their entirety within a State fifteen months after the date of enactment of this Act unless, prior to such date, the Secretary has made a determination under subsection (b) of this section that such State has established a plan for endangered and threatened species in accordance with this Act: Provided, That the provisions of subsection (a) of section 10 of this Act shall be effective upon the date of enactment of this Act within any State which does not prevent the taking of any species listed by the Secretary as an endangered species. If, at any time thereafter, the Secretary upon petition makes a determination, pursuant to subsection (b) of this section, that a State has established a plan for endangered and threatened species in accordance with this Act, such plan shall go into effect and the provisions of this Act regarding the management and taking of any species shall cease to be applicable or in effect within such State on a date to be designated by the Secretary. If, after a State plan in accordance with this Act is in effect within a State, the Secretary makes a determination, pursuant to subsection (c) of this section, that such plan is no longer in accordance with this Act, the provisions of this Act regarding the management and taking of any species shall go into effect within such State and such plan shall cease to be in effect on a date to be designated by the Secretary.

(e) PROCEDURE.—(1) Before making any determination under this section, the Secretary shall publish a notice in the Federal Register and afford the State and all interested parties a reasonable opportunity to present their views by oral and written submission.

(2) The Secretary shall notify in writing the Governor of the affected State of any determinations made under this section and shall publish these determinations with reasons therefor in the Federal Register.

(3) Any determinations made by the Secretary under this section shall be subject to judicial review in accordance with chapter V of title 5, United States Code, in the United States court of appeals for the circuit in which is located the State whose plan is the subject of such determination or in the United States Court of Appeals for the District of Columbia Circuit. Any such review shall be instituted within sixty days from the date on which the determination made by the Secretary is published in the Federal Register.

(f) EFFECTIVE DATE.—Except as otherwise provided in this section, the provisions of this Act shall become effective in their entirety upon the date of enactment of this Act.

MARINE MAMMALS ACT

SEC. 17. CONFLICTS.—Except as otherwise provided in this Act, no provision of this Act shall take precedence over any more restrictive conflicting provision of the Marine Mammal Protection Act of 1972.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 18. For purposes of this Act, other than section 6 and section 13 of this Act, there are authorized to be appropriated such sums as are necessary, not to exceed $3,960,000 for the fiscal year ending June 30, 1974; not to exceed $6,660,000 for the fiscal year ending June 30, 1975; and not to exceed $8,870,000 for the fiscal year ending June 30, 1976.

COST ESTIMATES

It is not possible to estimate with precision the cost of S. 1983. The Committee on Commerce estimates that the total cost, except for Sections 6 (Cooperation With the States) and 13 (Endangered Plants), of the endangered species programs under this bill would be:

For fiscal year ending:	*Million*
June 30, 1974	$3.96
June 30, 1975	6.66
June 30, 1976	8.87

No additional authority is granted to the Departments to obtain funds under the Land and Water Conservation Fund Act. Section 6 (d)(4) of the Act authorizes not to exceed $10.0 million to be appropriated for the purpose of funding the cooperative financial agreements between State governments and the Federal government. Section 13 of the Act authorizes not to exceed $250,000 to be appropriated for the purpose of a study by the Secretary of the Smithsonian Institution. The Committee knows of no other cost estimates at variance with its own.

CHANGES IN EXISTING LAW

In compliance with subsection (4) of rule XXIX of the Standing Rules of the Senate, changes in existing law made by the bill as reported are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

SECTION 4(C) OF THE ACT OF OCTOBER 15, 1966 (16 U.S.C. 668dd(c))

"(c) No person shall knowingly disturb, injure, cut, burn, remove, destroy, or possess any real or personal property of the United States, including natural growth, in any area of the System; or take or possess any fish, bird, mammal, or other wild vertebrate or invertebrate animals or part or nest or egg thereof within any such area; or enter, use, or otherwise occupy any such area for any purpose; unless such activities are performed by persons authorized to manage such area, or unless such activities are permitted either under subsection (d) of this section or by express provision of the law, proclamation Executive order, or public land order establishing the area, or amendment thereof: *Provided*, That the United States mining and mineral leasing laws shall continue to apply to any lands within the System to the same extent they apply prior to the effective date of this Act unless subsequently withdrawn under other authority of law. [Nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife, including endangered species thereof, on lands not within the System.] *With the exception of endangered and threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of such Act nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the system.* The regulations permitting hunting and fishing of resident fish and wildlife within the System shall be, to the extent practicable, consistent with State fish and wildlife laws and regulations. The provisions of this Act shall not be construed as affecting the authority, jurisdiction, or responsibility of the several States to manage, control, or regulate fish and resident wildlife under State law or regulations in any area within the System."

SECTION 10(a) OF THE MIGRATORY BIRD CONSERVATION ACT (16 U.S.C. 715i(a))

"(a) Areas of lands, waters, or interests therein acquired or reserved pursuant to sections 1-5, 6, 7-12, and 15-19 of this Act shall, unless otherwise provided by law, be administered by the Secretary of the Interior under rules and regulations prescribed by him to conserve and protect migratory birds in accordance with treaty obligations with Mexico and Canada, and other species of wildlife found thereon, including species that are **[**threatened with extinction**]** *listed pursuant to section 4 of the Endangered Species Act of 1973 as endangered or threatened species*, and to restore or develop adequate wildlife habitat."

SECTION 401(a) OF THE ACT OF JUNE 15, 1935 (16 U.S.C. 715S(a))

"(a) Separate fund in the United States Treasury; availability of funds until expended; definition of "National Wildlife Refuge System". . . . The National Wildlife Refuge System (hereafter referred to as the "System") includes those lands and waters administered by the Secretary as wildlife refuges, lands acquired or reserved for the protection and conservation of fish and wildlife that are **[**threatened with extinction**]** *listed pursuant to section 4 of the Endangered Species Act of 1973 as endangered or threatened species*, wildlife ranges, game ranges, wildlife management areas, and waterfowl areas established under any law, proclamation, Executive or public land order."

SECTION 6(a)(1) OF THE LAND AND WATER CONSERVATION FUND ACT OF 1965 (16 U.S.C. 4601-9(a)(1))

"(a) Moneys appropriated from the fund for Federal purposes shall, unless otherwise allotted in the appropriation Act making them available, be allotted by the President to the following purposes and subpurposes in substantially the same proportion as the number of visitor-days in areas and projects hereinafter described for which admission fees are charged under section 2 of this Act:

"(1) For the acquisition of land, waters, or interests in land or waters as follows: . . .

* * * * *

["THREATENED SPECIES.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction.**]**

"*ENDANGERED AND THREATENED SPECIES.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5 of the Endangered Species Act of 1973, needed for the purpose of conserving, protecting, restoring, or propagating endangered or threatened species of fish, wildlife, or plants. . . .*"

SECTION 2 OF THE ACT OF SEPTEMBER 28, 1962 (16 U.S.C. 460k–1)

"[SEC. 2. In order to avoid adverse effects upon fish and wildlife populations and management operations of the said areas that might otherwise result from public recreation or visitation to such areas, the Secretary is authorized to acquire limited areas of land for recreational development adjacent to the said conservation areas in existence or approved by the Migratory Bird Conservation Commission as of the date of enactment of this Act: *Provided*, That the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps. Lands acquired pursuant to this section shall become a part of the particular conservation area to which they are adjacent.]

SEC. 2. The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—

(1) incidental fish and wildlife oriented recreational development,

(2) the protection of natural resources,

(3) the protection of endangered or threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973, or

(4) carrying out two or more of the purposes set forth in paragraphs (1) through (3) of this section, and are adjacent to, or within, the said conservation areas, except that the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps."

SECTION 3(1)(B) OF THE MARINE MAMMAL PROTECTION ACT (16 U.S.C. 1362) DEFINITIONS

"(1) The term 'depletion' or 'depleted' means any case in which the Secretary, after consultation with the Marine Mammal Commission and the Committee of Scientific Advisors on Marine Mammals established under title II of this Act, determines that the number of individuals within a species or population stock—

(A) has declined to a significant degree over a period of years;

(B) has otherwise declined and that if such decline continues, or is likely to resume, such species would be subject to the provisions of the [Endangered Species Conservation Act of 1969] *Endangered Species Act of 1973;* or

(C) is below the optimum carrying capacity for the species or stock within its environment."

SECTION 101(A)(3)(B) OF THE MARINE MAMMAL PROTECTION ACT (16 U.S.C. 1371)

"(B) Except for scientific research purposes as provided for in paragraph (1) of this subsection, during the moratorium no permit may be issued for the taking of any marine mammal which is classified as belonging to an endangered species [pursuant to the Endangered

Species Conservation Act of 1969] *or threatened species pursuant to the Endangered Species Act of 1973* or has been designated by the Secretary as depleted, and no importation may be made of any such mammal."

SECTION 102(b)(3) OF THE MARINE MAMMAL PROTECTION ACT (16 U.S.C. 1372(b)(3))

"(b) Except pursuant to a permit for scientific research issued under section 104(c) of this title, it is unlawful to import into the United States any marine mammal if such mammal was—

(1) pregnant at the time of taking;

(2) nursing at the time of taking, or less than eight months old, whichever occurs later;

(3) taken from a species or population stock which the Secretary has, by regulation published in the Federal Register, designated as a depleted species or stock or which has been listed as [endangered under the Endangered Species Conservation Act of 1969] *an endangered or a threatened species pursuant to the Endangered Species Act of 1973;* or

(2) taken in a manner deemed inhumane by the Secretary."

SECTION 202(a)(6) OF THE MARINE MAMMAL PROTECTION ACT (16 U.S.C. 1402(a)(6))

SEC. 202. (a) The Commission shall—

". . . (6) recommend to the Secretary of the Interior such revisions of the [Endangered Species List, authorized by the Endangered Species Conservation Act of 1969] *endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered Species Act of 1973*, as may be appropriate with regard to marine mammals;' . . . ."

SECTIONS 1–3 OF THE ACT OF OCTOBER 15, 1966 (16 U.S.C. 668AA–668CC)

[An Act To provide for the conservation, protection, and propagation of native species of fish and wildlife, including migratory birds, that are threatened with extinction; to consolidate the authorities relating to the administration by the Secretary of the Interior of the National Wildlife Refuge System; and for other purposes.

[*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) the Congress finds and declares that one of the unfortunate consequences of growth and development in the United States has been the extermination of some native species of fish and wildlife; that serious losses in other species of native wild animals with educational, historical, recreational, and scientific value have occurred and are occurring; and that the United States has pledged itself, pursuant to migratory bird treaties with Canada and Mexico and the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, to conserve and protect, where practicable, the various species of native fish and wildlife, including game and nongame migratory birds, that are threatened with extinction. The purposes of this Act are to provide a program for the conservation, protection, restoration, and propagation of selected species of native fish and wildlife, including migratory birds, that are threatened with extinction, and to consolidate, restate, and modify the present authorities relating to administration by the Secretary of the Interior of the National Wildlife Refuge System.

[(b) It is further declared to be the policy of Congress that the Secretary of the Interior, the Secretary of Agriculture, and the Secretary of Defense, together with the heads of bureaus, agencies, and services within their departments, shall seek to protect species of native fish and wildlife, including migratory birds, that are threatened with extinction, and, insofar as is practicable and consistent with the primary purposes of such bureaus, agencies, and services, shall preserve the habitats of such threatened species on lands under their jurisdiction.

[(c) A species of native fish and wildlife shall be regarded as threatened with extinction whenever the Secretary of the Interior finds, after consultation with the affected States, that its existence is endangered because its habitat is threatened with destruction, drastic modification, or severe curtailment, or because of overexploitation, disease, predation, or because of other factors, and that its survival requires assistance. In addition to consulting with the States, the Secretary shall, from time to time, seek the advice and recommendations of interested persons and organizations including, but not limited to, ornithologists, ichthyologists, ecologists, herpetologists, and mammalogists. He shall publish in the Federal Register the names of the species of native fish and wildlife found to be threatened with extinction in accordance with this paragraph.

[SEC. 2. (a) The Secretary of the Interior shall utilize the land acquisition and other authorities of the Migratory Bird Conservation Act, as amended, the Fish and Wildlife Act of 1956, as amended, and the Fish and Wildlife Coordination Act to carry out a program in the United States of conserving, protecting, restoring, and propagating selected species of native fish and wildlife that are threatened with extinction.

[(b) In addition to the land acquisition authorities in such Acts, the Secretary is hereby authorized to acquire by purchase, donation, or otherwise, lands or interests therein needed to carry out the purpose of this Act relating to the conservation, protection, restoration, and propagation of selected species of native fish that are threatened with extinction.

[(c) Funds made available pursuant to the Land and Water Conservation Fund Act of 1965 (78 Stat. 897) may be used for the purpose of acquiring lands, waters, or interests therein pursuant to this section that are needed for the purpose of conserving, protecting, restoring, and propagating selected species of native fish and wildlife, including migratory birds, that are threatened with extinction. Not to exceed $5,000,000 may be appropriated annually pursuant to that Act for such purpose for any fiscal year, and the total sum appropriated for such purpose shall not exceed $15,000,000: *Provided*, That the Secretary shall, to the greatest extent possible, utilize funds from the Land and Water Conservation Fund Act of 1965 for such purpose. Such sums shall remain available until expended. The Secretary shall not use more than $750,000 to acquire lands, waters, or interests therein for any one area for such purpose unless authorized by Act of Congress.

[(d) The Secretary shall review other programs administered by him and, to the extent practicable, utilize such programs in furtherance of the purpose of this Act. The Secretary shall also encourage other Federal agencies to utilize, where practicable, their authorities in furtherance of the purpose of this Act and shall consult with and assist such agencies in carrying out endangered species program.

SEC. 3. (a) In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the several States. Such cooperation shall include consultation before the acquisition of any land for the purpose of conserving, protecting, restoring, or propagating any endangered species of native fish and wildlife.

[(b) The Secretary may enter into agreements with the States for the administration and management of any area established for the conservation, protection, restoration, and propagation of endangered species of native fish and wildlife. Any revenues derived from the administration of such areas under these agreements shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383), as amended (16 U.S.C. 715s).]

SECTIONS 1–6 OF THE ACT OF DECEMBER 5, 1969 (16 U.S.C. 66 SEC–1–1- -66 SEC–6)

[*An Act* To prevent the importation of endangered species of fish or widlife into the United States; to prevent the interstate shipment of reptiles, amphibians, and other widlife taken contrary to State law; and for other purposes.

[*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That, for the purposes of sections 2 through 5 of this Act, the term—

[(1) "Secretary" means the Secretary of the Interior;

[(2) "fish or wildlife" means any wild mammal, fish, wild bird, amphibian, reptile, mollusk, or crustacean, or any part, products, egg, or offspring thereof, or the dead body or parts thereof;

[(3) "United States" includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, and Guam; and

[(4) "person" means any individual, firm, corporation, association, or partnership.

[SEC. 2. Except as provided in section 3 of this Act, whoever imports from any foreign country into the United States any species or subspecies of fish or wildlife which the Secretary has determined, in accordance with the provisions of section 3 of this Act, to be threatened with worldwide extinction, shall be punished in accordance with the provisions of section 4 of this Act.

[SEC. 3. (a) A species or subspecies of fish or wildlife shall be deemed to be threatened with worldwide extinction whenever the Secretary determines, based on the best scientific and commercial data available to him and after consultation, in cooperation with the Secretary of State, with the foreign country or countries in which such fish or wildlife are normally found and, or to the extent practicable, with interested persons and organizations and other interested Federal agencies, that the continued existence of such species or subspecies of fish or wildlife is, in the judgment of the Secretary, endangered due to any of the following factors: (1) the destruction, drastic modification, or severe curtailment, or the threatened destruction, drastic modification, or severe curtailment, of its habitat, or (2) its overutilization for commercial or sporting purposes, or (3) the effect on it of disease or predation, or (4) other natural or man-made factors affecting its continued existence. After making such determination, the Secretary shall promulgate and from time to time he may revise, by regulation, a list in the Federal Register of such fish or wildlife by scientific, common, and commercial name or names, together with his determination. The Secretary shall at least once every five years conduct a thorough review of any such list to determine what, if any, changes have occurred relative to the continued existence of the species or subspecies of fish or wildlife then on the list and to determine whether such fish or wildlife continue to be threatened with worldwide extinction. Upon completion of such review, he shall take appropriate action consistent with the purposes of this Act. The Secretary shall, upon the request of any interested person, also conduct such review of any particular listed species or subspecies at any other time if he finds and publishes his finding that such person has presented substantial evidence to warrant such a review.

[(b) In order to minimize undue economic hardship to any person importing any species or subspecies of fish or wildlife which are determined to be threatened with worldwide extinction under this section, under any contract entered into prior to the date of publication of such determination in the Federal Register of such species or subspecies, the Secretary, upon such person filing an application with him and upon filing such information as the Secretary may require showing, to his satisfaction, such hardship, shall permit such person to import such species or subspecies in such quantities and for such periods, not to exceed one year, as he determines to be appropriate.

[(c) The Secretary may permit, under such terms and conditions as he may prescribe, the importation of any species or subspecies of fish or wildlife listed in the Federal Register under this section for zoological, educational, and scientific purposes, and for the propagation of such fish or wildlife in captivity for preservation purposes, unless such importation is prohibited by any other Federal law or regulation.

[(d) The provisions of section 553 of title 5 of the United States Code shall apply to any regulation issued under this section.

[SEC. 4. (a)(1) Any person who violates any provision of section 2 or 3 of this Act or any regulation or permit issued thereunder, or any regulation issued under subsection (d) of this section, other than a violation the penalty for which is prescribed by subsection (b) of this section, shall be assessed a civil penalty by the Secretary of not more than $5,000 for each such violation. No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay the penalty assessed under this paragraph, the Secretary may request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found or resides or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. In hearing such action, the court shall have authority to review the violation and the assessment of the civil penalty de novo.

[(2) Any employee authorized pursuant to subsection (c) of this section to enforce the provision of sections 2 and 3 of this Act, and any regulations or permits issued pursuant thereto or pursuant to subsection (d) of this section, shall have authority, in addition to any other authority provided by law relating to search and seizure, to execute any warrant to search for and seize any fish or wildlife or property or items taken, used, or possessed in connection with any violation of any such section, regulation, or permit with respect to which a civil penalty may be assessed pursuant to paragraph (1) of this subsection. Such fish, wildlife, property, or item so seized shall be held by any employee authorized by the Secretary or the Secretary of the Treasury pending disposition of proceedings by the Secretary involving the assessment of a civil penalty pursuant to paragraph (1) of this subsection; except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit such person to post a bond or other surety satisfactory to the Secretary. Upon the assessment of a civil penalty pursuant to paragraph (1) of this subsection for any nonwillful violation of any such section, regulation, or permit, such fish, wildlife, property, or item so seized may be proceeded against in any court of competent jurisdiction and forfeited to the Secretary for disposition by him in such manner as he deems appropriate. The owner or consignee of any such fish, wildlife, property, or item so seized shall, as soon as practicable following such seizure, be notified of that fact in accordance with regulations established by the Secretary or the Secretary of the Treasury. Whenever any fish or wildlife or property or item is seized pursuant to this subsection, the Secretary shall move to dispose of the civil penalty proceedings pursuant to paragraph (1) of this subsection as expeditiously as possible. If, with respect to any such fish, wildlife, property, or item so seized no action is commenced in any court of competent jurisdiction to obtain the forfeiture of such fish, wildlife, property, or item within thirty days following the disposition of proceedings involving the assessment of a civil penalty, such fish, wildlife, property, or item shall be immediately returned to the owner or the consignee in accordance with regulations promulgated by the Secretary.

[(b) Any person who willfully violates any provision of section 2 or 3 of this Act or any regulation or permit issued thereunder or any regulation issued under subsection (d) of this section shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than one year, or both.

[(c) The provisions of sections 2 and 3 of this Act and any regulations or permits issued pursuant thereto or pursuant to subsection (d) of this section shall be enforced by either the Secretary or the Secretary of the Treasury, or both such Secretaries. Either Secretary may utilize, by agreement, the personnel, services, and facilities of any other Federal agency or any State agency. Any employee of the Department of the Interior or the Department of the Treasury authorized by the Secretary or the Secretary of the Treasury may, without a warrant, arrest any person who such employee has probable cause to believe is willfully violating, in his presence or view, any such section, or any regulation or permit issued thereunder, the penalty for which is provided under subsection (b) of this section, and may execute a warrant or other process issued by an officer or court of competent jurisdiction to enforce the provisions of such sections, regulations or permits. An employee who has made an arrest of a person in connection with any such willful violation may search such person at the time of his arrest and seize any fish or wildlife or property or items taken, used, or possessed in connection with any such violation, or any such employee shall have authority, in addition to any other authority provided by law relating to search and seizure, to execute any warrant to search for and seize any such fish, wildlife, property, or item so taken, used, or possessed. Any fish or wildlife or property or item seized shall be held by any employee authorized by the Secretary or the Secretary of the Treasury or by a United States marshal pending disposition of the case by the court, commissioner, or magistrate, except that the Secretary may, in lieu thereof, permit such person to post a bond or other surety satisfactory to him. Upon conviction, any (1) fish or wildlife seized shall be forfeited to the Secretary for disposal by him in such manner as he deems appropriate, and (2) any other property or items seized may, in the discretion of the court, commissioner, or magistrate, be forfeited to the United States or otherwise disposed of. The owner or consignee of any such fish, wildlife, property, or item so seized, shall, as soon as practicable following such seizure, be notified of that fact in accordance with regulations established by the Secretary or the Secretary of the Treasury. If no conviction results from any such alleged violation, such fish, wildlife, property or item so seized in connection therewith shall be immediately returned to the owner or consignee in accordance with regulations promulgated by the Secretary, unless the Secretary, within thirty days following the final disposition of the case involving such violation, commences proceedings under subsection (a) of this section.

[(d) For the purposes of facilitating enforcement of sections 2 and 3 of this Act and reducing the costs thereof, the Secretary, with the approval of the Secretary of the Treasury, shall, after notice and an opportunity for a public hearing, from time to time designate, by regulation, any port or ports in the United States for the importation of fish and wildlife, other than shellfish and fishery products imported for commercial purposes, into the United States. The importation of such fish or wildlife into any port in the United States, except those so designated, shall be prohibited after the effective date of such designations; except that the Secretary, under such terms and conditions as he may prescribe, may permit importation at nondesignated ports for movement to designated ports of entry. Such regulations may provide other exceptions to such prohibition if the Secretary deems it appropriate and consistent with the purposes of this subsection.

[(e) In carrying out the provisions of sections 2 through 5 of this Act, the Secretary may issue such regulations as may be appropriate.

[SEC. 5. (a) In carrying out the provisions of sections 2 and 3 of this Act, the Secretary, through the Secretary of State, shall encourage foreign countries to provide protection to species and subspecies of fish or wildlife threatened with worldwide extinction, to take measures to prevent **any fish or wildlife** from becoming threatened with extinction, **and shall cooperate with such** countries in providing technical assistance in developing and carrying out **programs to provide** such protection, and shall, through the Secretary of State, encourage bilateral and multilateral agreements with such countries for the protection, conservation, and propagation of fish or wildlife. The Secretary shall also encourage persons, taking directly or indirectly fish or wildlife in foreign countries for importation into the United States for commercial or other purposes, to develop and carry out, with such assistance as he may provide under any authority available to him, conservation practices designed to enhance such fish or wildlife and their habitat. The Secretary of State, in consultation with the Secretary, shall take appropriate measures to encourage the development of adequate measures, including, if appropriate, international agreements, to prevent such fish or wildlife from becoming threatened with worldwide extinction.

[(b) To assure the worldwide conservation of endangered species and to prevent competitive harm to affected United States industries, the Secretary, through the Secretary of State, shall seek the convening of an international ministerial meeting on fish and wildlife prior to June 30, 1971, and included in the business of that meeting shall be the signing of a binding international convention on the conservation of endangered species.

[(c) There are authorized to be appropriated such sums, not to exceed $200,000, as may be necessary to carry out the provisions of subsection (b) of this section, such sums to remain available until expended.

[SEC. 6. (a) The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act and amendments made by this Act, with the administration of the animal quarantine laws (21 U.S.C. 101 et seq., 21 U.S.C. 111, 21 U.S.C. 134 et seq.) and the Tariff Act of 1930, as amended (19 U.S.C. 1306).

[(b) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations of animals and other articles and no proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture.

[(c) Nothing in this Act, or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, as amended, including, without limitation, section 527 of said Act (19 U.S.C. 1527) relating to the importation of wildlife taken, killed, possessed or exported to the United States in violation of the laws or regulations of a foreign country.]

AGENCY COMMENTS

No comments on S. 1983 were received from any affected agency. The following comments were received on S. 1592:

DEPARTMENT OF STATE,
Washington, D.C., June 5, 1973.

Hon. WARREN G. MAGNUSON,
Chairman, Committee on Commerce,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The Secretary has asked me to reply to your letter of May 15, 1973, requesting the Department's comments on S. 1592, a bill to provide for the conservation, protection and propagation of species or subspecies of fish and wildlife that are presently threatened with extinction or likely within the foreseeable future to become threatened with extinction; and for other purposes.

The legislation was transmitted to the Congress in conjunction with the President's State of the Union Message on Natural Resources and Environment of February 15, 1973. This Department strongly supports S. 1592.

The Office of Management and Budget advises that there is no objection to the submission of this report and that enactment of S. 1592 would be in accord with the Administration's program.

Sincerely,

MARSHALL WRIGHT,
Assistant Secretary for Congressional Relations.

THE GENERAL COUNSEL OF THE TREASURY,
Washington, D.C., May 25, 1973.

Hon. WARREN G. MAGNUSON,
Chairman, Committee on Commerce,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Reference is made to your request for the views of this Department on S. 1592, "To provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are presently threatened with extinction or likely within the foreseeable future to become threatened with extinction; and for other purposes."

The President, in his State of the Union Message of February 15, 1973, on Natural Resources and the Environment, stated that the limited scope of existing laws requires new authority to identify and protect endangered species before they are so depleted that it is too late and that he would ask the 93rd Congress to direct its attention to this problem. The Administration's proposal is contained in S. 1592.

In view of the foregoing, the Department recommends the enactment of S. 1592.

The Department was advised by the Office of Management and Budget that there was no objection to the submission to the Committee on Merchant Marine and Fisheries of a similar report on H.R. 758, an identical bill, and that enactment of this legislation would be in accord with the program of the President.

Sincerely yours,

SAMUEL R. PIERCE, Jr.
General Council.

[From the Congressional Record, July 24, 1973]

SENATE CONSIDERATION AND PASSAGE OF S. 1983, WITH AMENDMENTS

ENDANGERED SPECIES ACT OF 1973

The ACTING PRESIDENT pro tempore (Mr. Nunn). Under the previous order the Senate will proceed to the consideration of S. 1983, which will be stated by title.

The bill was stated by title as follows:

A bill (S. 1983) to provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinction, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Commerce with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Endangered Species Act of 1973".

DECLARATION OF POLICY

SEC. 2. (a) FINDINGS.—The Congress finds and declares that—

(1) various species of fish, wildlife, and plants in the United States have been rendered extinct as a consequence of economic growth and development untempered by adequate concern and conservation;

(2) other species of fish, wildlife and plants have been so depleted in numbers that they are in danger of or threatened with extinction;

(3) these species of fish, wildlife and plants are of educational, historical, recreational, and scientific value to the Nation and its people;

(4) the United States has pledged itself as a sovereign state in the international community to conserve and protect to the extent practicable the various species of fish or wildlife and plants facing extinction, pursuant to—

(A) migratory bird treaties with Canada and Mexico;

(B) the Migratory and Endangered Bird Treaty with Japan;

(C) the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere;

(D) the International Convention for the Northwest Atlantic Fisheries;

(E) the International Convention for the High Seas Fisheries of the North Pacific Ocean;

(F) the Convention on International Trade in Endangered Species of Wild Fauna and Flora; and

(G) other international agreements.

(5) encouraging the States, through Federal financial assistance and a system of incentives, to develop and maintain conservation, protection, restoration, and propagation programs which meet national and international standards is a key to meeting the Nation's international commitments and to better safeguarding, for the benefit of all citizens, the Nation's heritage in fish and wildlife.

(b) PURPOSES.—The Congress hereby declares that the purposes and policy of this Act are to—

(1) provide an effective means to conserve, protect, and restore the ecosystems upon which endangered and threatened species of fish or wildlife depend;

(2) provide a viable program for the conservation, protection, restoration, and propagation of endangered and threatened species;

(3) take all appropriate steps to implement the Nation's international commitments with respect to endangered and threatened fish or wildlife; and

(4) insure that all departments, agencies, and instrumentalities of the United States seek, within the scope of their authority and administrative jurisdiction, to protect endangered and threatened species.

DEFINITIONS

SEC. 3. As used in this Act—

(1) "Convention" means the Convention on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973, and the appendices thereto.

(2) "Endangered species" means any species of fish or wildlife which is in danger of extinction throughout all or a significant portion of its range.

(3) "Fish or wildlife" means any living member of the animal kingdom and the remains of any dead member of the animal kingdom, including, but not limited to, any mammal, fish, bird, amphibian, reptile, mollusk, crustacean, arthropod or other invertebrate or any part, egg, or offspring of any such member, or any product produced from any part or parts of the remains of any such member.

(4) "Foreign commerce" includes any transaction—

(A) between persons within one foreign country;

(B) between persons in two or more foreign countries;

(C) between a person within the United States and a person in a foreign country; or

(D) between persons within the United States, where the fish or wildlife involved are moving in any country or countries outside the United States.

(5) "Import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(6) "Person" means an individual, corporation, partnership, trust, association, or any other private entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(7) "Plant" means any member of the plant kingdom, including seeds, roots, or other parts of any such member.

(8) "Secretary" means, except as otherwise provided, the Secretary of the Interior or the Secretary of Commerce in the same manner in which program responsibilities are vested under Reorganization Plan Numbered 4 of 1970. With respect to enforcement of the provisions of this Act and of the Convention, which pertain to the importation of terrestrial plants, the term means the Secretary of Agriculture.

(9) "Species" includes any subspecies or other group of fish or wildlife of the same species or lesser taxa in common spatial arrangement that interbreed when mature.

(10) "State" means any State, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(11) "State agency" means the State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish and wildlife resources within a State.

(12) "Take" means to harass, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

(13) "Threatened species" means any species of fish or wildlife which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

(14) "United States", when used in a geographical sense, includes all States.

DETERMINATION OF ENDANGERED OR THREATENED SPECIES

SEC. 4. (a) GENERAL.—The Secretary shall by regulation determine whether any fish or wildlife is an endangered or threatened species as a result of any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

(b) Basis for Determinations.—(1) The determinations required by this section shall be made on the basis of the best scientific and commercial data available to the Secretary, including any recommendations that have been made by the Advisory Committee established under subsection (d) of this section and after consultation, as appropriate, with all interested persons and organizations, including affected or knowledgeable Federal, State, and foreign government agencies. In any case in which such determinations involve an indigenous species, the Secretary shall consult with and consider the recommendations of each State involved. In any case in which determinations involve a species which is normally found on the high seas, in lakes, or other waters off the coast of a State of which are customarily harvested by citizens of such a State, the Secretary shall consult with and consider the recommendations of each State involved. In any case in which such determinations involve a species which is normally found in a foreign country or countries or which is harvested from the ocean by citizens of such country or countries, the Secretary shall (where practicable) with the assistance of the Secretary of State, consult with and consider the recommendations of such country or countries.

(2) In determining whether or not any fish or wildlife is an endangered or a threatened species, the Secretary shall take into consideration those efforts, if any, being made by any nation or any political subdivision of any nation to protect within any area under its jurisdiction such fish or wildlife, whether by predator control, protection of habitat and food supply, or other conservation or management practices.

(3) Fish or wildlife which have been designated as requiring protection from unrestricted commerce by any foreign country, or pursuant to any international agreement, shall receive special and full consideration by the Secretary to determine whether each is an endangered or a threatened species.

(c) Lists.—(1) The Secretary shall publish in the Federal Register a list of all fish or wildlife determined by him by regulation to be endangered species and a list of all fish or wildlife determined by him by regulation to be threatened species. Such lists may be amended, modified, or revised periodically by regulation. Each list shall refer to each species of fish or wildlife named therein by scientific name and common name or names and shall specify the portion of its range over which it is endangered or threatened.

(2) The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5, United States Code, conduct a review of any listed or unlisted species of fish or wildlife proposed to be removed from or added to either of the lists published pursuant to paragraph (1) of this subsection, but only if he makes and publishes a finding that such person has presented substantial evidence which in his judgment warrants such a review.

(3) Any list of species of fish or wildlife determined to be threatened with extinction, by the Secretary of the Interior pursuant to the Endangered Species Conservation Act of 1969, which is in effect the day before the date of enactment of this Act shall be republished to conform to the appropriate classifications under this Act. Pending reclassification as endangered species or threatened species and republication, any species listed pursuant to the Act of 1969 shall be deemed an endangered species within the meaning of this Act. Such reclassification and republication shall not require a public hearing or comment under section 553 of title 5, United States Code.

(d) Advisory Committee.—(1) The Secretary shall establish an Advisory Committee on Endangered and Threatened Species to consult with, advise, and make recommendations to him and to the States. The Advisory Committee shall consist of not more than eleven members including a Chairman who shall be appointed by the Secretary from lists of qualified individuals submitted by State fish and wildlife agency administrators, universities, nongovernmental organizations concerned with conservation, and scientific societies. Five of the members shall be regularly employed by State governments or political subdivisions thereof. The terms of office shall be so arranged by the Secretary that each year at least three new members shall be appointed to fill vacancies caused by the expiration of terms of office.

(2) The Advisory Committee shall periodically, but not less than one each year, make recommendations to the Secretary with respect to removal from, addition to, or reclassification within the lists maintained pursuant to subsection (a) of

this section, and may with the approval of the Secretary, perform other functions in furtherance of the purposes of this Act. A member of the Advisory Committee who is not otherwise a Government employee may, in the discretion of the Secretary, receive not more than $150 per diem when engaged in the actual performance of his duties. Each member may receive reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of his duties.

(e) PROTECTIVE REGULATIONS.—Whenever the Secretary lists a species of fish or wildlife as a threatened species, pursuant to subsection (a) of this section, he shall issue such regulations as he deems necessary and advisable to provide for the conservation, protection, restoration, or propagation of such species. With respect to any endangered or threatened species, the Secretary may by regulation prohibit any act prohibited with respect to an endangered species under section 10(a) of this Act.

LAND ACQUISITION

SEC. 5. The Secretary shall establish and implement a program to conserve, protect, restore, and propagate fish or wildlife which are listed as endangered or threatened species pursuant to section 4 of this Act. To carry out such programs, the Secretary—

(a) shall utilize as appropriate the land acquisition and other authorities conferred upon him under the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956, and the Fish and Wildlife Coordination Act;

(b) may acquire by purchase, donation, or otherwise any lands, waters, or interests therein necessary for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species. Such authority shall be in addition to any other land acquisition authority vested in him; and

(c) may use funds made available under the Land and Water Conservation Fund Act of 1965 or under this Act to acquire such lands, waters, or interests therein.

COOPERATION WITH THE STATES

SEC. 6. (a) GENERAL.—In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the States. In addition to all other obligations, the Secretary shall consult with the affected State before the acquisition of any lands, waters, or interests therein for the purpose of conserving, protecting, restoring, propagating any endangered or threatened species.

(b) MANAGEMENT AGREEMENTS.—The Secretary may enter into an agreement or agreements with any State for the administration and management of any area established for the conservation, protection, restoration or propagation of an endangered or a threatened species. Any revenues derived from the administration of such areas under such agreements shall be subject to section 401 of the Act of June 15, 1935 (16 U.S.C. 715s).

(c) FINANCIAL ASSISTANCE.—The Secretary is authorized to enter into a cooperative agreement in accordance with this subsection to provide financial assistance to any State which establishes and maintains an adequate and active program for the management, conservation, protection, and restoration of endangered and threatened species. Before the Secretary may enter into or renew such a cooperative agreement to provide financial assistance to a State, he shall make, justify, and publish in the Federal Register a finding that such agreement would further the policy of this Act and that such State has a program under which—

(1) the State agency has authority and administrative jurisdiction to manage and protect any species of fish or wildlife which is determined by such agency or the Secretary to be endangered or threatened;

(2) the State has established a State plan, including a management program under the State agency, for all species of resident fish or wildlife which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

(3) the State agency during the first year of the existence of such agreement—

(A) will issue protective regulations;

(B) will employ sufficient trained and qualified personnel; and

(C) will maintain investigation, enforcement, and public education programs, which are adequate, in the Secretary's judgment for the conservation, protection, restoration, and propagation of species of fish or wildlife facing extinction;

(4) the State agency is authorized and plans to conduct studies to determine the status and requirements for survival of species of resident fish or wildlife and agrees to transmit a copy of the findings of such studies to the Secretary;

(5) the State agency is authorized and plans to establish programs, including the acquisition of lands, waters, or interests therein, for the conservation, protection, restoration, and propagation of endangered and threatened species; and

(6) provision is made for public participation in designating species of resident fish or wildlife as endangered or threatened.

(d) ALLOCATION OF FUNDS.—(1) Funds appropriated for financial assistance pursuant to subsection (c) of this section shall be available to the Secretary for allocation to the States under cooperative agreements. The purposes for which such funds may be used include, but are not limited to, research, censusing, law enforcement, and habitat acquisition or improvement. The Secretary shall allocate appropriated funds to such States upon the basis of—

(A) the international commitments of the United States to protect endangered or threatened species;

(B) the national significance of a species found to be endangered or threatened within a State; and

(C) the potential for preventing extinction of a species or for restoring a species to nonendangered or nonthreatened status.

Funds allocated to a State but unexpended or unobligated at the close of the fiscal year remain available for expenditure by such State until the close of the succeeding fiscal year.

(2) Each cooperative agreement between a State and the Secretary shall provide for—

(A) the actions to be taken by the Secretary and the State;

(B) the benefits that are expected to be derived in connection with preservation and restoration of endangered or threatened species;

(C) the estimated cost of these actions; and

(D) the share of such costs to be borne by the Federal Government and by the States, except that—

(i) the Federal share of such program costs shall not exceed 50 per centum of the estimated program costs stated in the agreement; and

(ii) the Federal share may be increased to 66⅔ per centum whenever two or more States, having a common interest in a program that the Secretary deems to meet the criteria of paragraph (1) of this subsection, enter jointly into an agreement with the Secretary.

The Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon in the cooperative agreement.

(3) The Secretary is authorized to issue such regulations as may be appropriate to carry out the provisions of this section with respect to financial assistance to States.

(4) For the purposes of this section, there is authorized to be appropriated not to exceed $10,000,000.

(e) PERIODIC REVIEW.—The finding made under subsection (c) of this section and any action taken by the Secretary under this section shall be subject to his periodic review, including the consideration of comment from interested persons, at no greater than annual intervals. Upon ninety days notice in writing to the affected State, the Secretary may terminate in his discretion any cooperative agreement entered into under this section.

(f) STATE ACTION PERMITTED.—Nothing in this Act shall be construed as superseding or limiting the power of any State or political subdivision thereof to enact legislation or regulations more restrictive than or consistent with the provisions of this Act with respect to an endangered or a threatened species: *Provided*, That any State law or regulation of the import or export of or the interstate or foreign commerce in an endangered species listed pursuant to section 4 of this Act is void to the extent that it may effectively permit what is prohibited by this Act or its implementing regulations, or prohibit what is authorized pursuant to an exemption or permit provided for in this Act or its implementing regulations. This Act shall not otherwise be construed to void any State law or regulation which is intended to conserve and manage migratory, resident, or introduced fish or wildlife, or to permit or prohibit sale of such fish or wildlife.

INTERAGENCY COOPERATION

SEC. 7. The Secretary shall review all programs administered by him and utilize such programs in furtherance of the policy of this Act. All other departments, agencies, and instrumentalities of the Federal Government shall, in consultation with and with the assistance of the Secretary—

(a) carry out such programs as are practicable for the protection of species listed, pursuant to section 4 of this Act, as endangered or threatened;

(b) take such action as is necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of any endangered or threatened species, or result in the destruction or modification of any habitat of such species which is determined by the Secretary, after consultation to the extent appropriate and necessary with affected States, to be a critical habitat of such species.

INTERNATIONAL COOPERATION

SEC. 8. (a) FINANCIAL ASSISTANCE.—As a demonstration of the commitment of the United States to the worldwide protection of endangered and threatened species, the President may, subject to the provisions of section 1415 of the Supplemental Appropriation Act, 1953 (31 U.S.C. 724), use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistance Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and management of programs in that country which the Secretary determines to be necessary or useful for the conservation, protection, restoration, or propagation of any endangered or threatened species listed by the Secretary pursuant to section 4 of this Act: *Provided*, That no funds other than foreign currencies available for expenditure only within such foreign country shall be used pursuant to this section. The President shall provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, water, or interests therein) to foreign countries under this section upon such terms and conditions as he deems appropriate.

(b) ENCOURAGEMENT.—In order to carry out further the provisions of this Act, the Secretary, with the assistance of the Secretary of State, shall encourage—

(1) foreign countries to provide for the protection, conservation, restoration, or propagation of fish or wildlife, including endangered and threatened species listed pursuant to section 4 of this Act;

(2) the entering into of bilateral or multilateral agreements for foreign countries to provide for such protection, conservation, restoration, propagation; and

(3) foreign persons, who directly or indirectly take fish or wildlife in foreign countries or on the high sea for importation into the United States for commercial or other purposes, to develop and carry out, with such assistance as he may provide, conservation practices designed to enhance such fish, wildlife and plants and their habitat.

(c) PERSONNEL.—After consultation with the Secretary of State, the Secretary may—

(1) assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign countries and international organizations in developing personnel resources and programs which promote the protection, conservation, restoration, or propagation of fish or wildlife; and

(2) conduct or provide financial assistance for the educational training of foreign personnel, in this country or abroad, in fish, wildlife or plant management, research, and law enforcement, and to render professional assistance abroad in such matters.

(d) INVESTIGATIONS.—After consultation with the Secretary of State and the Secretary of the Treasury, as appropriate, the Secretary may conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the purposes of this Act.

(e) CONVENTION IMPLEMENTATION.—The President is authorized and directed to designate appropriate agencies to act as the Management Authority or Authorities and the Scientific Authority or Authorities pursuant to the Convention. The agencies so designated shall thereafter be authorized to do all things assigned to them under the Convention, including the issuance of permits and certificates. The agency designated by the President to communicate with other parties to the Convention and with the Secretariat shall also be empowered, in consultation with the State Department, to act on behalf of and represent the United States in all regards as required by the Convention.

REGULATIONS, PROCEDURE, AND JUDICIAL REVIEW

SEC. 9. (a) REGULATIONS.—The Secretary shall publish any regulations proposed under this Act in the Federal Register at least sixty days prior to the time when such regulations shall become final, except that in case of an emergency the Secretary may publish such regulations not less than thirty days prior to the time when such regulations shall become final if at the same time he publishes in the Federal Register detailed reasons why emergency action is necessary. The Secretary shall also publish in the Federal Register a notice of all petitions received pursuant to this Act and, if such petition is denied, his reasons therefor. Such notice shall identify the purpose of the petition and include a statement of the availability of any data submitted in support of such petition. If any person adversely affected by a proposed regulation files objections and requests a public hearing within forty-five days of the date of publication of the proposed regulation, the Secretary shall grant such request. If such public hearing is held, final regulations shall not be promulgated by the Secretary until after the conclusion of such hearing. All public hearings authorized by this subsection shall consist of the oral and written presentation of data or arguments in accordance with such conditions or limitations as the Secretary may make applicable thereto. Proposed and final regulations issued under this Act shall set forth findings of fact on which the regulations are based and shall state the relationship of such findings to the regulations issued.

(b) PROCEDURE.—Except as expressly modified by this section, the provisions of the Administrative Procedure Act (5 U.S.C. 551 et seq.) shall apply to proceedings conducted by the Secretary under this Act: *Provided*, That the provisions of this section shall not apply to the extent necessary to permit emergency action by the Secretary. Notice of and reasons for such action shall be published prior to such action in the Federal Register.

(c) JUDICIAL REVIEW.—(1) Any judicial review of final regulations promulgated under this Act and final actions under section 5(c) of this Act shall be in accordance with sections 701–706 of title 5, United States Code, except that—

(A) with respect to regulations promulgated under section 4 or 6 of this Act, the findings of the Secretary as to the facts shall be sustained if based upon substantial evidence on the record considered as a whole; and

(B) with respect to relief pending review, on stay of action may be granted unless the reviewing court determines the party seeking such stay—

(i) is likely to prevail on the merits in the review proceeding, and

(ii) will suffer irreparable harm pending such proceeding.

(2) If the party seeking judicial review applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court either that—

(A) the information is material and was not available at the time of the proceeding before the Secretary; or

(B) failure to include such evidence in the proceeding was an arbitrary or capricious act of the Secretary, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Secretary, and to be adduced upon the hearing, in such manner and upon such terms and conditions as the court may deem proper. The Secretary may notify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file with the court such modified or new findings and his recommendation, if any, for the modification or setting aside of his original order.

(d) AUDIT.—(1) Each recipient of Federal assistance under this Act, pursuant to grants, subgrants, contracts, subcontracts, loans, or other arrangements, entered into other than by formal advertising, and which are otherwise authorized by this Act, shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, the amount of that portion of the cost of the project or undertaking supplied by other sources, and such other records a will facilitate an effective audit.

(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall, until the expiration of three years after completion of the project or undertaking referred to in subsection (a) of this section, have access for the purpose of audit and examination to any books, documents, papers, and records of such recipients which in the opinion of the Secretary or the Comptroller General may be related or pertinent to the grants, subgrants, contracts, subcontracts, loans or other arrangements referred to in subsection (a).

UNLAWFUL CONDUCT

SEC. 10. (a) PROHIBITED ACTS.—Except as provided in section 11 of this Act, it is unlawful for any person subject to the jurisdiction of the United States—

(1) import into, or export from the United States any endangered species which has been listed pursuant to section 4 of this Act;

(2) take any such species within the United States or in the territorial sea of the United States or upon the high seas;

(3) possess, sell, deliver, carry, transport, ship, or receive, by any means whatever, any such species which are taken in violation of paragraph (2) of this subsection;

(4) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and for commercial purposes, any such species;

(5) sell, distribute, or offer for sale in foreign commerce, interstate commerce, or activity affecting interstate commerce specimens or products processed or manufactured in whole or in part from specimens of any such species;

(6) attempt to commit, solicit another to commit, or cause to be committed, any act prohibited by paragraphs (1) through (5) of this subsection;

(7) engage in any trade in any specimens of fish, wildlife, or plants, contrary to the provisions of the Convention, or possess any specimens traded contrary to the provisions of the Convention, including the definitions in article I therein;

(8) violate any regulation which is promulgated by the Secretary pursuant to section 4(e) of this Act; and

(9) import into or export from the United States except at a port or ports designated by the Secretary, any fish, or wildlife, except nonendangered and nonthreatened shellfish and fishery products which are imported or exported for human or animal consumption or taken for recreational purposes in waters under United States jurisdiction or on the high seas. To facilitate enforcement of this paragraph and to reduce the costs of enforcement, the Secretary, with the approval of the Secretary of the Treasury and after notice and opportunity for public hearings, may, by regulations, designate ports and change such designations. Upon such terms and conditions as he may prescribe, the Secretary may permit such importation at nondesignated ports in the interest of the health or safety of the fish or wildlife or for any other reasons he deems appropriate. Any port designated by the Secretary of the Interior under the authority of section 4(d) of the Act of December 5, 1969 (16 U.S.C. 666cc–4(d)), shall, if such designation is in effect on the day before the date of the enactment of this Act, be deemed to be a port designated by the Secretary under this paragraph until such time as the Secretary otherwise provides.

(b) SIMILARITY OF APPEARANCE CASES.—The Secretary may, by regulation, and to the extent he deems advisable, treat any species of fish or wildlife as an endangered or threatened species even though it is not listed pursuant to section 4 of this Act is he finds that—

(A) such species so closely resembles in appearance, at the point in question, a species which has been listed pursuant to such section that enforcement personnel would have substantial difficulty in attempting to differentiate between the listed and unlisted species;

(B) the effect of this substantial difficulty is an additional threat to an endangered or threatened species; and

(C) such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of this Act.

EXCEPTIONS

SEC. 11. (a) GENERAL.—Upon a finding that the excepted conduct will not adversely affect the regenerative capacity of the involved species in a significant portion of its range or habitat or otherwise affect the survival of the wild population of such species, and upon such terms and conditions as he may prescribe, the Secretary may issue permits authorizing the importation, exportation, taking, or transportation, **by persons found to be qualified, of any fish or wildlife which is listed as an endangered or threatened species pursuant to section 4 of this Act for—**

(1) **scientific purposes in furtherance of the purposes of this Act; or**

(2) the propagation of such species in captivity or in a controlled habitat.

(b) **HARDSHIP.—The Secretary may except from the application of section 10(a) of this Act any person who enters into a contract with respect to a species of fish or wildlife before the date of publication in the Federal Register of notice** of a proposed listing of that species as an endangered or threatened species if the **failure to grant such exception will cause undue economic hardship to such person under the contract. The extent and duration of such exception shall be such as the Secretary deems appropriate. No such exception shall be granted unless such person applies to the Secretary in writing and furnishes with such application** such information as the Secretary may require to prove such hardship. **No such exception shall be for a duration of more than one year from the date of publication in the Federal Register of notice of a proposed listing of the in**volved species, nor shall such exception apply to a quantity of fish or wildlife **in excess of that specified by the Secretary. The one-year period for those species of fish or wildlife which were listed by the Secretary as endangered prior to the effective date of this Act shall expire in accordance with the terms of section 3 of the Act of December 5, 1969 (83 Stat. 275).** No such exemption may be granted for the importation or exportation of a specimen listed in appendix I of the Convention which is to be used for primarily commercial purposes.

(c) PROCEDURE.—(1) The Secretary shall publish a notice in the Federal Register of each application for an exception. Each notice shall invite the submission from interested parties, within thirty days after the date of the notice, of written data, views, or arguments with respect to the application. Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.

(2) The Secretary may grant exceptions under subsections (a) and (b) of this section only if he finds, and publishes such finding in the Federal Register, that such exceptions were applied for in good faith and if granted and exercised will not operate to the disadvantage of such endangered or threatened species and will be consistent with the policy of this Act.

(d) ALASKA NATIVES.—(1) The provisions of this Act shall not apply with respect to the taking of any endangered or threatened species by any Indian, Aleut, or Eskimo who is an Alaska native who resides in Alaska if such taking is for the purpose of consumption or use in a native community or for the purpose of selling or creating for sale in interstate commerce authentic native articles of handicrafts and clothing: *Provided*, That in each case such taking is not accomplished in a wasteful manner. As used in this paragraph—

(A) "consumption or use in a native community" includes selling any edible portion of fish or wildlife in native villages and towns in Alaska for native consumption; and

(B) "authentic native articles of handicrafts and clothing" means items composed wholly or in some significant respect of natural materials, and which are produced, decorated, or fashioned in the exercise of traditional native handicrafts without the use of pantographs, multiple carvers, or other mass copying devices. Traditional native handicrafts include, but are not limited to, weaving, carving, stitching, sewing, lacing, beading, drawing, and painting.

(2) Notwithstanding the provisions of paragraph (1) of this subsection, whenever the Secretary determines that any species of fish or wildlife which is subject to taking by Indians, Aleuts, or Eskimos is an endangered or threatened species, and that such taking materially and negatively affects the threatened and endangered species. he may prescribe regulations upon the taking of such species by any such Indian, Aleut, or Eskimo. Such regulations may be established with reference to species, geographical description of the area included, the season

for taking, or any other factors related to the reason for establishing such regulations and consistent with the policy of this Act. Such regulations shall be prescribed after a notice and hearings in the affected judicial districts of Alaska and as otherwise required by section 103 of the Marine Mammal Protection Act of 1972, and shall be removed as soon as the Secretary determines that the need for their imposition has disappeared: *Provided*, That no such regulation shall be established which is in contravention of any provision of the Marine Mammal Protection Act of 1972.

PENALTIES AND ENFORCEMENT

SEC. 12. (a) CIVIL PENALTY.—(1) Any person who—

(A) knowingly violates any provision of this Act or any regulation or permit issued under this Act, which prohibits the taking, importing, exporting, shipping, receiving, or otherwise moving in interstate or foreign commerce of any endangered or threatened species of fish or wildlife, or commits any act made unlawful under section 10(a) of this Act, may be assessed a civil penalty by the Secretary of not more than $10,000 for each violation;

(B) commits any act made unlawful under section 10(a) of this Act, or violates any other provision of this Act, or any regulation or permit issued under this Act, may be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation.

No penalty shall be assessed unless such person is given notice of an opportunity for a hearing with respect to such violation. Each prohibited act is a separate violation. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay a penalty assessed under this subsection, the Secretary may by his own attorneys institute a civil action in a district court of the United States for any district in which such person is found, resides, or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. The court shall hear such action solely on the record made before the Secretary and shall sustain his action if it is supported by substantial evidence on the record considered as a whole.

(2) Hearings held during proceedings for the assessment of civil penalties authorized by paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5, United States Code. The Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(b) CRIMINAL VIOLATIONS.—(1) Any person who knowingly and willfully violates any provision of this Act, or of any regulation or permit issued thereunder, shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both.

(2) The head of any Federal agency which has issued a lease, license, permit, or other agreement authorizing the use of Federal lands, including grazing of domestic livestock, to any person who is convicted under paragraph (1) of this subsection may immediately modify, suspend, or revoke such lease, license, permit, or other agreement. The Secretary may suspend, cancel, or refuse to issue for a period of up to one year Federal hunting or fishing permits or stamps with respect to any person who is convicted under paragraph (1) of this subsection. The United States shall not be liable to pay any compensation, reimbursement, or damages in connection with any such modification, suspension, or revocation of any lease, license, permit, stamp, or other agreement.

(c) REWARDS.—Upon the recommendation of the Secretary, the Secretary of the Treasury is authorized to pay an amount equal to one-half of the civil penalty or fine paid, but not to exceed $2,500, to any person who furnishes information which leads to a finding of civil violation or a conviction of a criminal violation of any provision of this Act or any regulation or permit issued thereunder. Any officer or employee of the United States or of any State or local government who furnishes information or renders service in the performance of his official duties shall not be eligible for payment under this section.

(d) ENFORCEMENT.—(1) The provisions of this Act and any regulations or permits issued under this Act shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all Secretaries. Each such Secretary may utilize, by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency for purposes of enforcing this Act.

(2) The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulation issued thereunder.

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, in furtherance of the enforcement of this Act may execute and serve any arrest warrant, search warrant, or other warrant of civil or criminal process issued by any officer or court of competent jurisdiction. A person so authorized may search and seize, with or without a warrant, to the extent authorized by law. Any fish, wildlife, property, or item so seized shall be held by any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, property, or item pursuant to paragraph (4) of this subsection, except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

(4) All fish or wildlife, or plants taken, possessed, sold, purchased, offered for sale or purchase, transported, delivered, received, carried, shipped, exported or imported contrary to the provisions of this Act, any regulation issued under this Act, or any permit issued thereunder, and all guns, traps, nets, and other equipment, vessels, vehicles, aircraft, and other means of transportation used to aid the taking, possessing, selling, purchasing, offering for sale or purchase, transporting, delivering, receiving, carrying, shipping, exporting or importing of any fish or wildlife, or plants in violation of this Act, any regulation made pursuant thereto, or any permit issued thereunder shall be subject to forfeiture to the United States.

(5) All provisions of law relating to the seizure, forfeiture, and condemnation of a vessel for violation of the customs laws, the disposition of such vessel or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act. The powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Treasury Department shall, for purposes of this Act, be exercised or performed by the Secretary or by such persons as he may designate.

(e) REGISTRATION.—(1) Any person who engages to any extent in business as an importer of fish or wildlife must register with the Secretary of the Treasury his name and the address of each place of business at which, and all trade names under which, he conducts such business.

(2) Any person required to register with the Secretary of the Treasury under paragraph (1) of this subsection shall—

(A) keep such records as will fully and correctly disclose each importation or exportation of fish or wildlife except nonendangered and nonthreatened shellfish or fishery products which are imported or exported for human or animal consumption or recreational purposes, made by him and the subsequent disposition made by him with respect to such fish or wildlife and

(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his places of business, an opportunity to examine his inventory of imported fish or wildlife and the records required to be kept under subparagraph (A) of this paragraph and to copy such records.

(3) The Secretary of the Treasury, after consultation with the Secretary, shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.

(f) Enforcement Regulations.—(1) The Secretary, the Secretary of the Treasury, and the Secretary of the Department in which the Coast Guard is operating, are authorized to promulgate such regulations as may be appropriate to enforce this Act, and to charge reasonable fees for expenses to the Government connected with permits authorized by this Act, including processing applications and reasonable inspections, and the transfer, board, handling, or storage of fish, wildlife, or plants and evidentiary items seized and forfeited under this Act. All fees collected pursuant to this subsection shall be deposited in the Treasury to the credit of the appropriation which is current and chargeable for the cost of furnishing the services. Appropriated funds may be expended pending reimbursement from parties in interest.

(g) Citizen Suits.—(1) Except as provided in paragraph (2) of this subsection, any person may commence a civil suit on his own behalf to enjoin any person, including the United States and any other govermental instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution), who is alleged to be in violation of any provision of this Act or regulation issued under the authority thereof. The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any such provision or regulation, as the case may be.

(2) No action may be commenced—

(A) prior to sixty days after written notice of the violation has been given to the Secretary, and to any alleged violator of any such provision or regulation;

(B) if the Secretary has commenced action to impose a penalty pursuant to subsection (a) of this section; or

(C) if the United States has commenced and is dilligently prosecuting a criminal action in the court of the United States or a State to redress a violation of any such provision or regulation.

(3)(A) Any suit under this subsection may be brought in the judicial district in which the violation occurs.

(B) In any such suit under this subsection in which the United States is not a party, the Attorney General, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

(4) The court, in issuing any final order in any suit brought pursuant to paragraph (1) of this subsection may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(5) The injunctive relief provided by this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or limitation or to seek any other relief (including relief against the Secretary or a State agency).

(h) Coordination.—The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act with the administration of the animal quarantine laws (21 U.S.C. 101–105, 111–135b, and 612–614) and section 306 of the Tariff Act of 1930 (19 U.S.C. 1306). Nothing in this Act or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations or possession of animals and other articles. No proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture. Nothing in this Act shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, including, but not limited to, section 527 of such Act (19 U.S.C. 1527), relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.

ENDANGERED PLANTS

Sec. 13. The Secretary of the Smithsonian Institution, in conjunction with other affected agencies, is authorized and directed to review species of plants which are endangered or threatened, and methods of providing adequate protection including legislation for such species. He shall report the results of such review to Congress, not later than one year after the date of enactment of this Act. For purposes of this section, there is authorized to be appropriated not to exceed $250,000.

CONFORMING AMENDMENTS

SEC. 14. (a) Section 4(c) of the Act of October 15, 1966 (80 Stat. 928, 16 U.S.C. 668(c)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered and threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of such Act nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the System."

(b) Section 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224, 16 U.S.C. 715i(a)) and section 401(a) of the Act of June 15, 1935 (49 Stat. 383, 16 U.S.C. 715s(a)) are each amended by striking out "threatened with extinction," and inserting in lieu thereof the following: "listed pursuant to section 4 of the Endangered Species Act of 1973 as endangered or threatened species.".

(c) Section 6(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-9(a)(1)) is amended by striking out:

"THREATENED SPECIES.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction." and inserting in lieu thereof the following:

"ENDANGERED AND THREATENED SPECIES.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5 of the Endangered Species Act of 1973, needed for the purpose of conserving, protecting, restoring, or propagating endangered or threatened species of fish, wildlife, or plants."

(d) The first sentence of section 2 of the Act of September 28, 1962 (76 Stat. 653; 16 U.S.C. 460k-1), is amended to read as follows:

"SEC. 2. The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—

"(1) incidental fish- and wildlife-oriented recreational development,

"(2) the protection of natural resources,

"(3) the protection of endangered or threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973, or

"(4) carrying out two or more of the purposes set forth in paragraph (1) through (3) of this section,

and are adjacent to, or within, the said conservation areas, except that as acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefore by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps."

(e) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407) is amended—

(1) by striking out "Endangered Species Conservation Act of 1969" in section (1)(B) thereof and inserting in lieu thereof the followwing: "Endangered Species Act of 1973";

(2) by striking out "pursuant to the Endangered Species Conservation Act of 1969" in section 101(a) (3)(B) thereof and inserting in lieu thereof the following: "or threatened species pursuant to the Endangered Species Act of 1973";

(3) by striking out "endangered under the Endangered Species Conservation Act of 1969" in section 102(b)(3) thereof and inserting in lieu thereof the following: "an endangered or a threatened species pursuant to the Endangered Species Act of 1973"; and

(4) by striking out "Endangered Species List, authorized by the Endangered Species Conservation Act of 1969," in section 202(a)(6) thereof and inserting in lieu thereof the following: "endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered Species Act of 1973."

REPEALER

SEC. 15. The Endangered Species Conservation Act of 1969 (sections 1 through 3 of the Act of October 15, 1966, and sections 1 through 6 of the Act of December 5, 1969; 16 U.S.C. 668aa—668cc-6) is repealed.

APPLICABILITY WITHIN STATES

SEC. 16. (a) STATE PLAN.—By the end of the first year after the date of enactment of this Act, a State may establish a plan for endangered and threatened species in accordance with this Act. A plan is in accordance with this Act if it meets or exceeds the requirements set forth in section 6(c) of this Act and represents an effective response to the Nation's need to conserve, protect, restore, and propagate endangered and threatened species of fish or wildlife. Upon the establishment of such a plan, the Governor or the head of the State agency shall promptly transmit a certified copy to the Secretary.

(b) DETERMINATION BY SECRETARY.—Within ninety days after the Secretary receives a certified copy of a State plan established under subsection (a) or subsection (d) of this section, the Secretary shall make a determination whether such State has established a plan for endangered and threatened species in accordance with this Act. Unless the Secretary determines, pursuant to this section, that a State plan is not in accordance with this Act, the plan shall go into effect in such State on the date designated in the plan. In no event shall such State plan go into effect less than three months or more than nine months after the date of its establishment.

(c) PERIODIC REVIEW.—The Secretary shall periodically, but not less than once every three years, review each State plan for endangered and threatened species which has been approved under subsection (b) of this section and for which there is experience, to determine whether such plan is still in accordance with this Act and to evaluate the success of such plan in terms of the policy of this Act. To facilitate such review, the Governor or the head of the State agency in each such State shall submit to the Secretary periodically all information relevant and requested by the Secretary. The Secretary shall report to the President and Congress simultaneously each year on the results of such reviews, including any recommendations for legislation.

(d) NO STATE PLAN.—Except as to species listed in Appendix I of the Convention, the provisions of this Act regarding the management and taking of any State's resident species shall become applicable in their entirety within a State fifteen months after the date of enactment of this Act unless, prior to such date, the Secretary has made a determination under subsection (b) of this section that such State has established a plan for endangered and threatened species in accordance with this Act: *Provided*, That the provisions of subsection (a) of section 10 of this Act shall be effective upon the date of enactment of this Act within any State which does not prevent the taking of any species listed by the Secretary as an endangered species. If, at any time thereafter, the Secretary upon petition makes a determination, pursuant to subsection (b) of this section, that a State has established a plan for endangered and threatened species in accordance with this Act, such plan shall go into effect and the provisions of this Act regarding the management and taking of any species shall cease to be applicable or in effect within such State on a date to be designated by the Secretary. If, after a State plan in accordance with this Act is in effect within a State, the Secretary makes a determination, pursuant to subsection (c) of this section, that such plan is no longer in accordance with this Act, the provisions of this Act regarding the management and taking of any species shall go into effect within such State and such plan shall cease to be in effect on a date to be designated by the Secretary.

(e) PROCEDURE.—(1) Before making any determination under this section, the Secretary shall publish a notice in the Federal Register and afford the State and all interested parties a reasonable opportunity to present their views by oral and written submission.

(2) The Secretary shall notify in writing the Governor of the affected State of any determinations made under this section and shall publish these determinations with reasons therefor in the Federal Register.

(3) Any determinations made by the Secretary under this section shall be subject to judicial review in accordance with chapter V of title 5, United States Code, in the United States court of appeals for the circuit in which is located the State whose plan is the subject of such determination or in the United States Court of Appeals for the District of Columbia Circuit. Any such review shall be instituted within sixty days from the date on which the determination made by the Secretary is published in the Federal Register.

(f) EFFECTIVE DATE.—Except as otherwise provided in this section, the provisions of this Act shall become effective in their entirety upon the date of enactment of this Act.

MARINE MAMMALS ACT

SEC. 17. CONFLICTS.—Except as otherwise provided in this Act, no provision of this Act shall take precedence over any more restrictive conflicting provision of the Marine Mammals Protection Act of 1972.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 18. For purposes of this Act, other than section 6 and section 13 of this Act, there are authorized to be appropriated such sums as are necessary, not to exceed $3,960,000 for the fiscal year ending June 30, 1974; not to exceed $6.660,000 for the fiscal year ending June 3, 1975; and not to exceed $8,870,000 for the fiscal year ending June 30, 1976.

The ACTING PRESIDENT pro tempore. The time for debate on this bill will be limited to 1 hour, to be equally divided and controlled by the majority leader and the minority leader or their designees, with 30 minutes on any amendment, debatable motion, or appeal.

The Senator from California is recognized.

Mr. TUNNEY. Mr. President, I yield to the Senator from Alaska.

Mr. STEVENS. I only wanted to have stated the time situation. I shall handle the bill for the minority.

The ACTING PRESIDENT pro tempore. The Senators from California and Alaska, according to the understanding of the Chair, are the designees of the majority leader and the minority leader.

Who yields time?

Mr. TUNNEY. Mr. President, the Endangered Species Act of 1973 is a vital piece of legislation which is absolutely necessary to provide protection to our Nation's species of wildlife that are threatened with extinction.

The goal of the Endangered Species Act is to conserve, protect, restore, and propagate species of fish and wildlife, that are in imminent danger of extinction or are likely to become endangered within the foreseeable future. This bill employs several mechanisms to insure the accomplishment of this goal. They include provision of greater authority to the Secretaries of Interior and Commerce to list endangered or threatened animals, encouragement of further international cooperation for the protection of these animals, provision for the acquisition of habitat useful for the purposes of this act, and incentives for the establishment of effective endangered species programs by the several States.

There is an urgent need for this type of protective legislation. In our country alone, there are 109 species listed as endangered by the Secretary of the Interior. On his foreign list, there are over 300 species. Furthermore, the situation continues to worsen. The rate of extinction has increased to a point where, on the average, one species disappears every year.

This is an extremely disturbing trend. To allow the extinction of animal species is ecologically, economically, and ethically unsound. Each species provides a service to its environment; each species is a part of an immensely complicated ecological organization, the stability of which rests on the health of its components. At present, we are unsure of the total contribution of each species of fish and wildlife to the health of our ecology. To permit the extinction of any species which contributes to the support of this structure without knowledge of the cost or benefits of such extinction is to carelessly tamper with the health of the structure itself.

The existence of each species is also important to the growth of our scientific knowledge of man and his environment. Diversity of genetic types is necessary for thorough scientific knowledge. There is a yet unknown potential for investigation into these species' genetic structure which must remain unhindered if we wish to probe for further knowledge and the transfer of that knowledge into beneficial uses for man.

Finally, many of these animals simply give us esthetic pleasure. We like to view them in zoos and in their natural habitats. We, and our children, learn from these species about the diversity of our universe and the many forms of life which are necessary to support our bountiful and wonderful environment.

For these reasons, it is important that we adopt this act to protect our wildlife. In prior legislation we have taken several steps toward solution of the problem. In 1966 and in 1969, we provided the Secretary with the power to list species or subspecies of fish and wildlife that were threatened with extinction. Importation of these species from foreign countries was prohibited. Federal endangered wildlife reserves were encouraged by authorization of grants for land acquisition. However these provisions only gave limited protection to domestic endangered species; and the Federal grant program terminated last year. There is still no Federal prohibition against the taking of endangered species, still no widespread action to conserve and restore these animals, and the problem of the continuing extinction of species still exists.

The challenge before us now is to protect these species and their vital habitat and to restore their numbers to optimum levels. S. 1983 would accomplish this goal in several ways. First, it provides protection to a broader range of species by affording the Secretary the power to list animals which he determines are likely in the foreseeable future to become extinct, as well as those animals which are presently threatened with extinction. This gives the Secretary and the States which adopt endangered species management plans, the ability not only to protect the last remaining members of the species but to take steps to insure that species which are likely to be threatened with extinction never reach the state of being presently endangered.

The bill would thus hopefully, prevent a crisis situation from occurring for a number of species which would otherwise come close to extinction in future years. The two levels of classification facilitate regulations that are tailored to the needs of the animal while minimizing the use of the most stringent prohibitions. Since most of our resources for restoring and propagating species lie with the States, they are encouraged to use their discretion to promote the recovery of threatened species and Federal prohibitions against taking must be absolutely enforced only for those species on the brink of extinction.

To aid in the delicate and highly specialized task of listing these animals, the Secretary is required to appoint an advisory committee to assist him in the designation of endangered and threatened species.

To insure that the States that may be effected by the Secretary's designation are fully active through the listing process, the Secretary must consult with the States effected prior to listing any species. Furthermore, half the members of the advisory committee must be employed by State governments.

Many species have been inadvertently exterminated by a negligent destruction of their habitat. Their habitats have been cut in size, polluted, or otherwise altered so that they are unsuitable environments for natural populations of fish and wildlife. Under this bill, we can take steps to make amends for our negligent encroachment. The Secretary would be empowered to use the land acquisition authority granted to him in certain existing legislation to acquire land for the use of the endangered species programs. The bill also eliminates the restrictive ceiling which was placed on funds available to the Land and Water Conservation Fund Act by the Act of 1969. Through these land acquisition provisions, we will be able to conserve habitats necessary to protect fish and wildlife from further destruction.

Although most endangered species are threatened primarily by the destruction of their natural habitats, a significant portion of these animals are subject to predation by man for commercial, sport, consumption, or other purposes. The provisions in S. 1983 would prohibit the commerce in or the importation, exportation, or taking of endangered species except where permitted by the Secretary for scientific purposes in furtherance of the purpose of this act, or for the propagation of such species in captivity in a controlled habitat. Amendments which will be offered today, and which would greatly add to the purposes of this act would permit otherwise prohibited acts when they are undertaken to enhance the propagation or survival of the affected species or to prevent serious and otherwise unavoidable threats to human health or the environment.

In order to minimize economic hardship on persons who entered into contracts prior to the passage of the act, such persons are permitted for a limited period of time to engage in activities which would otherwise be in violation of the act.

Alaska Natives are allowed, under regulations to be adopted by the Secretary, to take animals for consumption or use in a native community or for the production of authentic native articles of handicraft or clothing.

Under the bill, the taking of an endangered species for their sale or movement in interstate or foreign commerce is forbidden. Violators of any prohibition under this bill will be liable for a civil penalty of up to $10,000. Knowing violators of the law will be liable for a criminal penalty of up to $20,000 and/or imprisonment for up to 1 year. The most important protective provisions of this bill are those which will improve the condition of existing species. These will be actions taken by the Secretary, the States, and individual citizens. However, we must extend some protection to animals subject to unrestrained predation.

Among the greatest contributions that have been made to the conservation, restoration, protection, and propagation of endangered and threatened species are the contributions made by private citizens. Exceptions to the prohibitions could be made by the Secretary wherever possible to encourage individual actions which will further the purposes of this act. Recent activities by the Secretary to prosecute individuals involved in harmless violations of prior acts which were part of programs designed to restore endangered species appear to have been taken counter to the purposes of our earlier legislation. Penalty provisions of this act are intended to be used to prevent activity which may be actually harmful to a species or its individual members and not merely to employ the law enforcement divisions of the departments.

I would like to discuss what is perhaps the most important section of this bill. Important because I believe it provides the most effective means to achieve the purposes of this bill. Undoubtedly, the threatened extinction of our wildlife is a national problem, necessitating involvement of the Federal Government. Endangered animals are not limited to any one area or State of the Nation so it is impossible for the individual States to limit their movement in interstate or foreign commerce. Furthermore, no one State should be responsible for balancing its interests, with those of other States, for the entire Nation. Central authority is necessary to oversee endangered species protection programs and to insure that local political pressures do not lead to the destruction of a vital national asset.

On the other hand, it was well established in the hearings record that most of the States possess much greater wildlife management resources than does the Federal Government. Clearly, any effort on the part of the Federal Government to encourage restoration of threatened or endangered species would fail without the assistance of the State agencies. This bill is designed to permit and encourage State endangered species programs that act in concert with the purposes of this act.

Subject to the provisions of this act which provide maximum protection for species on the brink of extinction, States with active endangered species programs are given full discretion to manage threatened species which reside within their boundaries. Under the bill, the States are given 1 year to submit plans to the Secretary for the establishment of agencies for the promulgation, conservation, restoration, and protection of resident endangered species. Provisions of this act governing the taking and management of endangered species go into effect 15 months after the passage of this act only for those States where the submitted plans have not been approved by the Secretary.

Further, States, whose plans have been approved by the Secretary, are eligible for a portion of the $10 million provided under this act for financial assistance to defer the cost of implementation. In the case where a State plan is not initially approved by the Secretary, and the Secretary must intervene to insure furtherance of the purposes of this act, a State may reapply at any time for approval of its plan. A State's power to manage endangered species is preempted only to the extent that such State does not prevent taking of endangered species—that is, species which are in imminent danger of extinction. Even in these cases, States whose plans have not been disapproved by the Secretary would have management powers not inconsistent with the prohibitions against taking.

The plan for Federal-State cooperation provides for much more extensive discretionary action on the part of the Secretary and the

State agencies. Under existing laws, a species must be declared "endangered" even if in a certain portion of its range, the species has experienced a population boom, or is otherwise threatening to destroy the life support capacity of its habitat. Such a broad listing prevents local authorities from taking steps to insure healthy population levels.

Under S. 1983, however, the Secretary may list an animal as "endangered" through all or portion of its range. An animal might be "endangered" in most States but overpopulated in some. In a State in which a species is overpopulated, the Secretary would have the discretion to list that animal as merely threatened or to remove it from the endangered species listing entirely while still providing protection in areas where it was threatened with extinction. In that portion of its range where it was not threatened with extinction, the States would have full authority to use their management skills to insure the proper conservation of the species. Also, upon passage of S. 1983, Federal prohibitions against taking would apply only in those States which did not prevent the taking of endangered species. Fifteen months after the passage of the act, the act's provisions would apply only in those States which had not adopted a management plan approved by the Secretary.

A well-known example may serve to illustrate how S. 1983 provides for maximum management and conservation discretion, while insuring absolute protection for species imminently in danger of extinction. The American alligator, which has been plagued by habitat destruction and commercial exploitation, is currently listed as an endangered species. However, due to increased population resulting in habitat destruction, the Louisiana Wildlife and Fisheries Commission ended total protection last year and conducted a closely regulated harvest in one parish of the State. According to the Department of the Interior, it is likely that in certain portions of Louisiana, the American alligator may be relisted under this bill as a threatened species. S. 1983 would permit continued State action to enhance the existence of this species. In other areas the alligator would remain listed as an endangered species and would be entitled to absolute Federal or State protection until a State plan was approved by the Secretary under the provisions of this act.

Should a State decide not to adopt an endangered species protection program, under this bill, as I propose it be amended, that State could always secure a permit from the Secretary to exempt animals from the prohibitions of this act in order to permit management of a species, then listed as endangered, to enhance the propagation or survival of the affected species. However, I hope that, as soon as possible after the passage of this act, all of the State will formulate plans for the management of resident endangered species and that these plans can be approved by the Secretary so that enlightened management programs can continue under the control of the States.

I feel that this bill provides the necessary national protection to severely endangered species while encouraging the States to utilize all of their resources toward the furtherance of the purposes of this act. State participation is necessary for the protection of endangered and threatened species. This bill provides them the authority and additional funds with which to provide that protection. Only those States who are unwilling to adopt endangered species protection programs to provide protection for species threatened with extinction need fear Federal preemption.

Finally, while we are concerned with our endangered domestic species, we must not forget the many animals that are in need of worldwide attention. S. 1983 includes the mechanisms of international cooperation that fulfill our commitments under international conventions for the protection of endangered species. This Nation has dedicated itself for international cooperation through several international treaties. S. 1983 extends this cooperation by permitting the President to use certain blocked Federal funds to provide assistance for the development of management programs in foreign countries, and to offer educational training for foreign personnel in wildlife management. The bill also permits loans for the development of protection agencies in foreign countries. And, the bill provides mechanisms for implementation of the Convention on International Trade and Endangered Species of Wild Flora and Fauna which was signed by representatives from the United States last March and is now pending ratification by the Senate.

As we consider this bill, we must remember the magnitude of the problem and the importance of our concern. We are dealing with the future of many species of fish and wildlife—species which in many cases we have placed near extinction from carelessness and a lack of understanding of their importance. These animals are part of our natural resources, part of our history, and part of our evolutionary heritage. We have a duty to restore what we have endangered—for ourselves and for posterity.

This bill is a step toward that necessary restoration. I urge Senators' favorable consideration.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. STEVENS. Mr. President, I am pleased to support the Endangered Species Act of 1973.

While the bill is not perfect, I believe it takes a major step in the protection of American endangered and threatened species. It will provide for the conservation of endangered fish and wildlife by prohibiting the taking of these species and also by encouraging the establishment of State programs. It retains the present bifurcation of responsibility between the Departments of Interior and Commerce over different species. It extends protection to species which are either endangered or likely to become endangered within the foreseeable future. It expands the protection of the Endangered Species Conservation Act of of 1969 (85 Stat. 275). That act mainly prohibited the importation of foreign species. This legislation extends protection to domestic species. That act also implemented State statutes. This act will permit national listings of species as either endangered or threatened and also impose Federal prohibitions on their taking.

This legislation was the subject of extensive hearings last Congress in the Senate Environment Subcommittee. The former Senator from Virginia (Mr. Spong) and I heard a number of knowledgeable witnesses from governmental agencies and also from various private groups. They were, almost uniformly, of the opinion that such legislation was necessary for the protection of endangered species.

As former Senator Spong said: "Extinction is quite literally a fate worse than death."

I agree.

This bill is designed to provide the Secretary of the Interior and the Secretary of Commerce with the authority to list a species as either endangered or threatened if its habitat or range is threatened with destruction, it is overutilized and taken in great numbers, it is the victim of disease or predation, it is out of balance with its environment, or natural or manmade factors adversely affect its continued existence.

The Secretaries must use the best scientific data to make this determination. They are to consult with all necessary persons and are to publish such a list in the Federal Register. They may periodically review this list upon the petition of any interested party.

For this purpose they are to establish an advisory committee on endangered and threatened species. This advisory committee was recommended by the State departments of fish and game to give them additional input. It will insure that the Secretaries have the very best possible advice before they list any species or delist it.

Section 5 is particularly important. Under it they are to establish particular programs to protect and conserve fish and wildlife listed as endangered and threatened. They are to acquire land for this purpose and may also utilize other Federal lands for this purpose.

Section 6 and 16 provide for cooperation with the States. They provide the major backbone of the act. Presently the States have an extensive network of endangered species legislation. Unfortunately, not all States have as yet implemented such programs. This bill will assist those States not yet involved to implement such programs and will, if the States do not, provide for Federal preemption.

Typical are the laws of Alaska, Illinois, and Texas. Alaska, for example, requires the State government to preserve the natural habitat of species or subspecies of fish and wildlife that are recognized as threatened with extinction. The language is very similar to S. 1983. The Alaska State commissioner of fish and game is required to seek the advice and recommendations of biological experts. Before anyone may take an endangered animal, he must obtain a special permit from the commissioner of fish and game which may only be given "for scientific or educational purposes, or for propagation in captivity for the purpose of preservation." The State statute also provides criminal penalties for anyone violating it.

I ask unanimous consent to have printed in the Record at this point the text of the Alaska State endangered species law.

There being no objection, the text was ordered to be printed in the Record, as follows:

ARTICLE 4. ENDANGERED SPECIES

Section

180. Declaration of purpose
185. Protection of habitat
190. Determining endangered species
195. Permit for taking endangered species
200. Penalty
210. Definitions

Sec. 16.20.180. Declaration of purpose. The legislature recognizes that, due to growth and development, certain species or subspecies of fish and wildlife are now and may in the future be threatened with extinction. The purpose of §§ 180-210 of this chapter is to establish a program for their continued conservation, protection, restoration and propagation. (§ 1 ch 115 SLA 1971)

Sec. 16.20.185. Protection of habitat. On land under their respective jurisdictions, the commissioner of fish and game and the commissioner of natural resources shall take measures to preserve the natural habitat of species or subspecies of fish and wildlife that are recognized as threatened with extinction. (§ 1 ch 115 SLA 1971)

Sec. 16.20.190. Determining endangered species. (a) A species or subspecies of fish or wildlife is considered endangered when the commissioner of fish and game determines that its numbers have decreased to such an extent as to indicate that its continued existence is threatened. In making this determination the commissioner of fish and game shall consider

(1) the destruction, drastic modification, or severe curtailment of its habitat;

(2) its overutilization for commercial or sporting purposes;

(3) the effect on it of disease or predation;

(4) other natural or man-made factors affecting its continued existence.

(b) After making a determination under (a) of this section, the commissioner of fish and game shall, in accordance with the Administrative Procedure Act (AS 44.62), publish a list of the species or subspecies of fish and wildlife that are endangered. The commissioner shall, at least once every two years thereafter, conduct a thorough review of the list to determine what changes have occurred concerning the species or subspecies listed. Consideration of existing species or subspecies of fish and wildlife for listing under this section shall be made on a continuing basis. The review of listed species or subspecies conducted under this section shall be submitted in writing to the governor and the legislature and shall be made available to the public.

(c) In making his determination and review under (a) and (b) of this section, the commissioner of fish and game shall seek the advice and recommendation of interested persons and organizations, including but not limited to ornithologists, ichthyologists, ecologists and zoologists. (§ 1 ch 115 SLA 1971)

Sec. 16.20.195. Permit for taking endangered species. No species or subspecies of fish or wildlife listed as endangered under § 190(b) of this chapter may be harvested, captured or propagated except under the terms of a special permit issued by the commissioner of fish and game for scientific or educational purposes, or for propagation in captivity for the purpose of preservation. (§ 1 ch 115 SLA 1971)

Sec. 16.20.200. Penalty. A person who, without a permit issued under § 195 of this chapter, harvests, injures, imports, exports, or captures a species or subspecies of fish or wildlife listed under § 190 of this chapter, is guilty of a misdemeanor. (§ 1 ch 115 SLA 1971)

Sec. 16.20.210. Definitions. In §§ 180–210 of this chapter "fish or wildlife" includes birds. (§ 1 ch 115 SLA 1971)

Mr. STEVENS. The Illinois State statute lists a number of domestic and foreign species and makes it unlawful to "possess, sell, order for sale, give or dispose of any animal or the wild animal product of any animal which is an endangered species under this act" without obtaining a permit. Such permits may be given only for "zoological, educational or scientific purposes." It provides for fines and imprisonment for persons violating this act.

Mr. President, I ask unanimous consent that the text of the Illinois Endangered Species Act be printed in the Record at this point.

There being no objection, the text was ordered to be printed in the Record, as follows:

ILLINOIS ENDANGERED SPECIES ACT

An Act to prohibit the transfer, sale and possession of products or skins of animals in danger of extinction, to create a Board to determine which species are endangered and to provide penalties for the violation thereof, and to make an appropriation therefor.

Be it enacted by the People of the State of Illinois, represented in the General Assembly:

Section 1. This Act shall be known and may be cited as the "Illinois Endangered Species Protection Act."

Section 2. As used in this Act the following words have the following meanings:

"Board" means the Endangered Species Protection Board created by this Act.

"Department" means the Department of Conservation and "Director" means the director of that Department.

"Endangered Species" means the species of animals listed in this Section plus such other species as the Board deems to be in danger of extinction. This includes but is not limited to the following species: leopard, Panthera pardus; snow leopard, Panthera unica; clouded leopard, Neofelis nebulosa; tiger, Panthera tigris, cheetah, Acinonyx jubatus; alligators, caiman, crocodiles and all other members of the order crocodylia; vicuna, Vicugna vicugna; red wolf, Canis niger; gray wolf, Canis lupus; polar bear, Thalarcotos martimus; mountain lion, sometimes called cougar, Felis wiedii; desert kit fox, Vulpes macrotis; kit or swift fox, Vulpes velox; Pacific Ridley turtle or warana, Lepidochelys olivacea; or green turtle, Chelonia mydas.

"Wild animal product" means the fur, hide, skin, teeth, feathers, tusks, claws or the body or any portion thereof whether in a green or raw state or as a product manufactured or refined from an animal protected under this Act or under regulations issued pursuant to this Act.

Section 3. After January 1, 1973, it is unlawful to possess, sell, order for sale, give or dispose of any animal or the wild animal product of any animal which is an endangered species under this Act, without a permit therefor issued by the Department.

Section 4. Upon proper application, the Department shall issue to any person, firm, association or corporation a permit which allows the possession, purchase and disposal of live animals or wild animal products of an endangered species for zoological, educational or scientific purposes only. Such permit shall be issued without fee. The holder of such permit and all applicants therefor shall submit a list of all animals and wild animal products of endangered species owned or in their possession when ordered by the Director, but no more than annually. The Director may, upon notice and hearing, revoke the permit of any holder thereof upon his failure to file the reports required by this Section or the filing of a knowingly false report or the use of any wild animal product or animal of an endangered species for any purpose other than an educational, zoological or scientific purpose.

Section 5. Upon proper application, the Department shall issue a limited permit to any person, firm, association or corporation which had in its possession prior to the effective date of this Act, wild animal product of an endangered species. Such permit shall specifically name and describe each wild animal product possessed by the permit holder and shall be valid only for possession of the products so named. The Department may require proof that acquisition of such wild animal was made before the effective date of this Act. Such permit shall be valid as long as the product is in existence. The limited permit may be revoked by the Director for any violation of this Act.

Section 8. Any officer or agent authorized by the Department or Conservation, or any police officer of any municipality within the State of Illinois, may execute any warrant to search for and seize any goods, merchandise or wildlife sold or offered for sale in violation of this Section, or any property or item used in connection with a violation of this Section. Such goods, merchandise, wildlife or property shall be held pending proceedings in any court of proper jurisdiction. Upon conviction, such seized goods, merchandise or wildlife shall be forfeited and, upon forfeiture, either offered to a recognized institution for scientific or educational purposes, or destroyed.

Section 9. Any person who violates any provision of this Act shall be fined not less than $100 nor more than $1,000 or imprisoned for not more than one year in a penal institution other than the penitentiary, or both.

Section 10. All fines collected under this Act shall be paid to the State Treasurer and deposited in the Game and Fish Fund.

Mr. STEVENS. A third example is the Texas Endangered Species Act. This was signed into law this May. It implements the present Federal statutes and also closely follows the wording of S. 1983. It requires permits before any species may be taken for zoological or scientific purposes if that species has been classified as endangered. It also provides criminal penalties.

Mr. President, I ask unanimous consent that the text of the Texas Endangered Species Act be printed in the Record at this point.

There being no objection, the text was ordered to be printed in the Record, as follows:

TEXAS ENDANGERED SPECIES BILL

An act relating to the conservation, management, protection, propagation, sale, and use of nongame fish and wildlife species; relating to the classification of certain fish and wildlife as endangered species, and the protection, propagation, sale, and use of endangered species and products of endangered species; providing penalties for violations; and declaring an emergency

Be it enacted by the Legislature of the State of Texas:

Section 1. Definitions.—As used in this Act:

(1) "Director" means the executive director of the parks and wildlife department.

(2) "Department" means the parks and wildlife department.

(3) "Fish or wildlife" means any wild mammal, fish, wild bird, amphibian, reptile, mollusk, or crustacean, or any part, product, egg, offspring, dead or alive, of a wild mammal, fish, wild bird, amphibian, reptile, mollusk, or crustacean.

(4) "Person" means any individual, firm, corporation, association, or partnership.

(5) "Management" means the collection and application of biological information for the purposes of increasing the number of individuals within species and populations of wildlife up to the optimum carrying capacity of their habitat and the maintaining of such levels. The term "management" likewise includes the entire range of activities constituting a full scientific resource program including, but not limited to, research, census, law enforcement, habitat acquisition and improvement, and education. Also included within the term, when and where appropriate, is the periodic or total protection of species or populations as well as regulated taking.

Sec. 2. Nongame species. (a) The department shall conduct investigations on nongame fish and wildlife in order to develop information relating to population, distribution, habitat needs, limiting factors, and other biological and ecological data to determine management measures necessary for their continued ability to sustain themselves successfully. On the basis of such determination, the department shall issue proposed regulations not later than one year from the effective date of this Act and develop management programs designed to insure the continued ability of nongame fish and wildlife to perpetuate themselves successfully. The proposed regulations shall set forth species or subspecies of nongame wildlife which the department deems in need of management pursuant to this section, giving their common and scientific names by species and subspecies. The department shall conduct ongoing investigations of nongame fish and wildlife and may from time to time amend such regulations by adding or deleting therefrom species or subspecies of nongame wildlife.

(b) The department shall by regulations establish proposed limitations relating to taking, possession, transportation, exportation, processing, sale or offer for sale, or shipment as may be deemed necessary to manage nongame fish and wildlife. The regulations shall become effective 60 days after being proposed and during that period public comment shall be solicited. The department shall hold a public hearing, notice of which shall be published in at least three major newspapers of general circulation in this state at least one week prior to the hearing date. On the basis of public comments received or the testimony at a hearing the department may make such changes in the proposed regulations as are consistent with effective management of nongame fish and wildlife.

Sec. 3. Endangered species. Fish or wildlife are classified as endangered species if they appear on:

(1) the present United States List of Endangered Foreign Fish and Wildlife (50 C.F.R. Part 17, Appendix A);

(2) the present United States List of Endangered Native Fish and Wildlife (50 C.F.R. Part 17, Appendix D); or

(3) the list filed by the director under this Act of fish or wildlife threatened with statewide extinction.

Sec. 4. Statewide extinction. Fish or wildlife may be classified by the director as threatened with statewide extinction if the department finds that the continued existence of the fish or wildlife is endangered in this state due to any of the following factors:

(1) the destruction, drastic modification, or severe curtailment of its habitat;

(2) the over-utilization of it for commercial or sporting purposes;

(3) the effect on it of disease or predation; or

(4) other natural or man-made factors affecting its continued existence.

Sec. 5. Initial classification by director. Within 45 days after the effective date of this Act, the department shall file with the secretary of state a proposed list of fish or wildlife threatened with statewide extinction. This list shall become effective on the 45th day after the date it is filed. Before the effective date of the proposed list, the department shall hold a public hearing on the proposed list. Notice of the hearing shall be published in at least three major newspapers of general circulation in this state at least one week prior to the hearing date. The proposed list may be amended prior to its effective date.

Sec. 6. Classification amendment by director. (a) If the federal lists set out in Section 3 of this Act are subsequently altered, the director shall file an order with the secretary of state accepting the alteration. The order is effective immediately.

(b) The department may amend the list filed under Section 5 of this Act by filing an order with the secretary of state. Notice of the intent to file the order and the contents of the proposed order must be given 60 days prior to the date of filing. If petition procedures set out in Section 7 of this Act are initiated relating to the contents of the proposed order during the 60-day notice period, the order may not be filed until the conclusion of the proceedings. The order is effective on the date of filing.

Sec. 7. Petition for reclassification. (a) On the petition of three interested persons presenting substantial scientific evidence for the addition or deletion of fish or wildlife classified as threatened with statewide extinction, the department may conduct a review of the classification and file an order with the secretary of state adding or deleting fish or wildlife from the list of fish or wildlife threatened with statewide extinction.

(b) If the department refuses to conduct a review of the classification of fish or wildlife threatened with statewide extinction under Subsection (a) of this section, a petition of 50 interested persons presenting scientific evidence for the addition or deletion of fish or wildlife classified as threatened with statewide extinction may be presented to the department. On receipt of this petition, the department must hold a public hearing to review the classification. Notice of the hearing shall be published in at least three major newspapers of general circulation in this state at least one week prior to the hearing date. Based on findings from the public hearing, the department may file an order with the secretary of state adding or deleting fish or wildlife from the list of fish or wildlife threatened with statewide extinction.

(c) Orders filed under this section are effective immediately.

Sec. 8. Use of name for sale. No person may advertise, offer for sale, or sell any other species of fish or wildlife under the name of any fish or wildlife classified as an endangered species.

Sec. 9. Permit to take certain fish or wildlife. (a) No person may take, possess, or transport fish or wildlife classified as endangered species for zoological gardens or scientific purposes or take or transport fish or wildlife classified as endangered species from the wild or from their natural habitat for propagation for commercial purposes, unless he has obtained a permit under Article 913, Penal Code of Texas, 1925, as amended, or under a federal permit.

(b) A permit may not be granted under Article 913, Penal Code of Texas, 1925, as amended, if the taking, possessing, or transporting of the fish or animal classified as an endangered species is specifically prohibited by federal law.

(c) The department may refuse to grant a permit to take or transport fish or wildlife classified as an endangered species from the wild or from their natural habitat for propagation for commercial purposes if the fish or wildlife may be legally obtained from a source in this state other than the wild or its natural habitat.

(d) Fish or wildlife classified as an endangered species shall be considered and included within the meaning of "protected fish or wildlife" as that term is used in Article 913, Penal Code of Texas, 1925, as amended.

(e) Failure to comply with this section is a violation of this Act. Failure to comply with the terms of a permit issued under Article 913, Penal Code of Texas, 1925, as amended, is a violation of that article.

(f) The provisions of this Act do not apply to the possession of mounted or preserved endangered species by public or private nonprofit educational, zoological, or research institutions held prior to the effective date of this Act. The department may require such institutions to furnish a list of mounted or preserved endangered species which they hold, together with adequate proof of the time of acquisition.

SEC. 10. Propagation. No person may possess fish or wildlife classified as endangered species for the purpose of propagating them for sale unless he has obtained a commercial propagation permit issued under this Act.

SEC. 11. Original commercial propagation permit. (a) An applicant for an original commercial propagation permit must submit to the department the permit fee of $300 and an application containing information or statements required by the department.

(b) The department shall issue an original commercial propagation permit to an applicant on compliance with Subsection (a) of this section if the department is satisfied that the fish or wildlife to be used for initial breeding stock was acquired by the applicant for commercial propagation purposes under Section 9 of this Act, federal rules, regulations, or permits, or from a person or source authorized to possess, sell, or dispose of the fish or wildlife under the laws of this state, another state, or federal law.

(c) Each original commercial propagation permit which is issued shall contain a description of the fish or wildlife classified as an endangered species which may be possessed by the permit holder.

(d) An original commercial propagation permit expires one year from the date of issuance.

SEC. 12. Renewal commercial propagation permit. (a) The department shall renew a commercial propagation permit on receipt of an application and the $550 renewal fee prior to or within 10 days of the expiration date of the permit.

(b) A renewal commercial propagation permit expires three years from the date of issuance and may be renewed under the same conditions as renewal of the original permit.

(c) The department may refuse to renew any permit when it is deemed to be in the best interest of the species.

SEC. 13. Duty of permittee. A person holding a commercial propagation permit must submit annually to the department:

(1) a written report by a veterinarian licensed to practice in this state containing an evaluation of the physical conditions of the propagation facilities and the condition of the fish or wildlife held by the permit holder; and

(2) a written report by the permit holder on forms prepared by the department relating to the general propagation activity during the previous year.

SEC. 14. Refusal of cancellation of permit. (a) If, on the basis of the reports required by Section 13 of this Act or from an investigation or inspection of an authorized employee of the department, the department finds that a permit holder is improperly caring for or handling the fish or wildlife held under the permit, the department shall give written notice of the objectionable actions or conditions to the permit holder.

(b) If the department finds that the improper caring for or handling of the fish or wildlife is detrimental to the fish or wildlife and the fish or wildlife need immediate protection, the department may seize the fish or wildlife and authorize proper care pending the correction of the improper conditions or actions.

SEC. 15. Appeal. (a) A person whose application for a commercial propagation permit or for renewal of a commercial propagation permit has been refused by the department or whose permit has been cancelled may take an appeal within 20 days from the date of refusal to any district court of Travis County or to any district court of the county of his residence.

(b) A case reviewed under this provision of this section proceeds in the district court by trial de novo as that term is used and understood in appeals from justice of the peace courts to the county courts of this state. Appeal from the judgment of the district court lies as in other civil cases.

SEC. 16. Disposition of fish or wildlife. A person who holds a commercial propagation permit and fails to renew the permit or his renewal application is denied, or whose permit is cancelled under Section 14 of this Act, must dispose of the fish or wildlife held under Section 14 of this Act, must dispose of the fish or wildlife held under the permit and any increase in the fish or wildlife in the manner specified by the department.

SEC. 17. Rules and regulations. The department shall make rules and regulations to administer the provisions of this Act including:

(1) permit application forms, fees, and procedures;

(2) hearing procedures;

(3) procedures for identifying fish or wildlife classified as endangered species which may be possessed, propagated, or sold under the provisions of this Act;

(4) publication and distribution of lists of the species or subspecies of fish or wildlife or products of fish or wildlife classified as endangered species; and

(5) other rules and regulations necessary to attain the objectives of this Act.

SEC. 18. Disposition of Funds. Money received from the issuance of permits under this Act or from violations of this Act shall be deposited by the department in the state treasury to the credit of the general revenue fund.

SEC. 19. Sale of fish or wildlife classified as endangered species. (a) No person may sell, process, offer for sale, advertise for sale, or distribute fish or wildlife classified as endangered species unless the fish or wildlife have been lawfully born and raised in captivity for commercial purposes under the provisions of this Act or federal law.

(b) No person may sell, process, offer for sale, advertise for sale, or distribute goods made from fish or wildlife classified as endangered species unless the goods were made from fish or wildlife which were lawfully born and raised in captivity for commercial purposes under the provisions of this Act or federal law.

(c) Fish or wildlife classified as endangered species or goods made from fish or wildlife classified as endangered species sold under this section must be tagged or labeled in a manner to indicate compliance with this section.

SEC. 20. Exemptions. The provisions of this Act do not apply to coyotes (prairie wolves), cougars, bobcats, prairie dogs or red foxes.

No provision of this Act shall apply to any animals, fish or fowl which are privately owned animals, fish or fowl by the private owners of such animals, fish or fowl.

SEC. 21. Enforcement. (a) The Provisions of this Act shall be enforced by the department.

(b) Any commissioned peace officer in this state, including game management officers commissioned as peace officers in this state may execute a warrant to search for and seize fish or wildlife or goods made from fish or wildlife taken, sold, or possessed in violation of this Act or the rules and regulations issued under this Act.

(c) An officer who has made an arrest of a person for a violation of this Act or the rules and regulations issued under this Act may search the person at the time of arrest and seize fish or wildlife, or goods made from fish or wildlife, taken, possessed, or made in connection with a violation of this Act or the rules and regulations issued under this Act.

(d) Fish or wildlife, or goods seized under this section shall be delivered to the department and held by the department pending disposition of court proceedings. Subsequent to the disposition of court proceedings, the department shall dispose of fish or wildlife, and goods in accordance with rules and regulations established by the department. Any costs of maintenance for fish or wildlife seized under this section incurred by the department during the pendency of court proceedings may be assessed to the defendant.

SEC. 22. Penalty. A person who violates a provision of this Act or a rule or regulation issued under this Act is guilty of a misdemeanor and on first conviction is punishable by a fine of not less than $100 nor more than $200. A person who is convicted for a second violation of a provision of this Act or a rule or regulation issued under this Act is punishable by a fine of not less than $200 nor more than $500, or confinement in the county jail for not less than 30 days nor more than 90 days, or both. A person who is convicted for a third or subsequent violation of a provision of this Act or a rule or regulation issued under this Act is punishable by a fine of not less than $500 nor more than $2,000, and confinement in the county jail for not less than six months nor more than one year.

SEC. 23. Conflict of laws. Any species or subspecies of fish or wildlife classified as an endangered species shall be governed exclusively by the provisions of this Act and no other regulatory or licensing laws of this state shall be applicable. This Act does not repeal Article 913, Penal Code of Texas, 1925, as amended.

Sec. 24. Funding. Funds for the administration of this Act may be appropriated from the general revenue fund by legislative appropriation.

Sec. 25. Issuance of permits on effective date. Any person who is engaged in the business of commercial propagation of a species of fish or wildlife classified as an endangered species on the effective date of this Act, may obtain a permit under Section 11 of this Act regardless of the method in which the fish or wildlife were initially obtained. Application for a permit under this section must be submitted within 120 days from the effective date of this Act.

Sec. 26. Effective date. Subsection (b) of Section 19 of this Act shall become effective September 1, 1974.

Sec. 27. Emergency. The importance of this legislation and the crowded condition of the calendars in both houses create an emergency and an imperative public necessity that the constitutional rule requiring bills to be read on three several days in each house be suspended, and this rule is hereby suspended, and that this Act shall take effect and be in force according to its provisions, and it is so enacted.

Mr. Stevens. These then are but three examples of the many State laws on the subject.

As Dr. Ralph MacMullan, president of the International Association of Game, Fish, and Conservation Commissioners, stated last year in hearings before our subcommittee, State wildlife agencies employ presently over 5,800 enforcement officers across the Nation. Formal endangered species programs are being implemented in over 30 States. The three I have just had printed in the Record are but examples.

The International Association of Game, Fish, and Conservation Commissioners have promulgated a model State bill relating to funding and authorization for improved nongame and endangered species programs. This is set forth on pages 164–168 of the hearing record, S. 92–81 of the Senate Commerce Committee. I will not ask that that be reprinted, but merely incorporated by reference.

But even Dr. MacMullen believed that the Federal Government has a definite role in this area to insure that minimum standards are set and to assist the States in their responsibility for managing resident species.

Dr. MacMullen indicated that there are only two Federal enforcement people in Michigan and there are 200 full-time conservation officers and another 200 part-time employees in the same State in 83 counties. In other words, in Michigan there are an average of over two full-time conservation officers plus a number of other peace officers in each county to enforce State laws. These State and local law enforcement officials enforce Federal as well as State laws. He said "we perform the legwork." This is true nationwide. He also indicated that if the Federal Government were to take away the right of the States to manage these species and to preempt the States, State legislatures would not be willing to appropriate the necessary funds to protect endangered species.

This is, as a practical matter, what has happened in the ocean mammal bill. The Federal Government has preempted the States and has not provided enough money to manage the program. Thus there is no enforcement agency to protect ocean mammals. This is the reason that the Endangered Species Act of 1973 provides for a larger role for States and why there has been less opposition to it. I strongly support this trend.

Sections 6 and 16 of this legislation require the Secretaries to consult with the States before the acquisition of any lands, waters or interests therein for the protection of an endangered species. Cooperative agreements may be entered into. Financial assistance may be given to the States for this purpose. Specific requirements for the States are listed. Periodic review is required also. Section 16 specifically provides that by the end of the first year after the date of enactment each State may establish a plan in accordance with this act to protect endangered and threatened species. The Secretary must make a determination as to whether the plan meets the requirements of the act. Periodic review is also required. States are given 15 months to conform their statutes to the provision of this act. If not, they are subject to Federal preemption. I shall offer an amendment shortly to improve this section.

Financial assistance and encouragement of international efforts in the conservation of endangered species are also encouraged. This is particularly important for many of the migratory species involved.

Stringent prohibitions against unlawful taking or importation are also included.

There is set forth a specific exception for undue economic hardship. Because of certain technical problems with this section, I shall speak on it at some length when I offer an amendment on this later this morning.

There is also a specific exception for Alaska Natives. This was written utilizing the Marine Mammal Protection Act of 1972 (86 Stat. 1027) as a guide and was reviewed in detail with my staff and is entirely agreeable to me. I believe it provides the protection necessary for Alaskan Natives. Many of the technical changes were made as a result of certain problems we have found in the implementation of the marine mammal bill and certain questions that have subsequently been raised by those agencies in enforcing that act. Hopefully this will eliminate many of these ambiguities and will also, I intend, clarify our original interpretation of the Marine Mammal Protection Act.

It was my specific intent in this subsection to obviate the problems I mentioned in my several letters to the Departments of the Interior and Commerce on the Marine Mammal Protection Act. By passing this section, the Senate will be again indicating our congressional intent on each of these points.

Section 17 discusses the relationship of this act with the Marine Mammal Protection Act. A similar provision is found in section 11(d). It is important to note that certain of the provisions in that subsection will affect marine mammals and that, as specified in that subsection, they will take precedence over the Marine Mammal Protection Act of 1972.

One final point, last year at my request this legislation was not taken up on the Senate floor after being reported out of the Senate Commerce Committee.

That report, S. 92–1136, set forth my supplemental views also. I did not oppose this legislation at that time and I do not now. As I stated then: "I agree with the majority of the committee that legislation embodying the concepts in this bill is necessary."

I went on to state that time remaining in that congressional session was too short to permit the care and deliberation essential to the drafting and passage of legislation of this magnitude. The necessary time and care has since been spent. I believe we have a good bill in S. 1983 and am very pleased to have been designated the Republican floor manager for it.

Mr. President, in the United States there are 109 species and subspecies of wildlife—14 mammals, 50 birds, 7 reptiles, and 30 fish species—now threatened with extinction. These include such animals as the black-footed ferret, the whooping crane, the eastern timber wolf, the masked bobwhite, the ivory-billed woodpecker, and peregrine falcons. These are only domestic endangered species and do not include foreign endangered species.

Of this number, eight species, including the eastern cougar and the Mississippi sandhill crane, were listed on June 1 of this year.

I ask unanimous consent to have printed in the Record at this point, a list of the endangered species so specified by the Secretary of the Interior prior to June 1 and a second list of the additional species listed on June 1 of this year.

There being no objection, the lists were ordered to be printed in the Record, as follows:

ENDANGERED SPECIES

MAMMALS

Hawaiian hoary bat, *Lasiurus cinereus semotus.*
Indiana bat, *Myotis sodalis.*
Delmarva Peninsula fox squirrel, *Sciurus niger cinereus.*
Morro Bay kangaroo rat, *Dipolomys heermanni morroensis.*
Salt marsh harvest mouse, *Reithrodontomys raviventris.*
Eastern timber wolf, *Canis lupus lycaon.*
Red wolf, *Canis rufus.*
San Joaquin kit fox, *Vulpes macrotis mutica.*
Black-footed ferret, *Mustela nigripes.*
Florida panther, *Felis concolor coryi.*
Florida manatee (sea cow), *Trichechus manatus latirostris.*
Key deer, *Odocoileus virginianus clavium.*
Columbian white-tailed deer, *Odocoileus virginianus leucurus.*
Sonoran pronghorn, *Antilocapra americana sonoriensis.*

BIRDS

Hawaiian dark-rumped petrel, *Pterodroma phaeopygia sandwichensis.*
California least tern, *Sterna albifrons browni.*
Hawaiian goose (nene), *Branta sandvicensis.*
Aleutian Canada goose, *Branta canadensis leucopareia.*
Laysan duck, *Anas laysanensis.*
Hawaiian duck (koloa), *Anas wyvilliana.*
Mexican duck, *Anas diazi.*
Brown pelican, *Pelecanus occidentalis.*
California condor, *Gymnogyps californianus.*
Florida everglade kite (snail kite), *Rostrhamus sociabilis plumbeus.*
Hawaiian hawk (io), *Buteo solitarius.*
Southern bald eagle, *Haliaeetus leucocephalus leucocephalus.*
American peregrine falcon, *Falco peregrinus anatum.*
Arctic peregrine falcon, *Falco peregrinus tundrius.*
Attwater's greater prairie chicken, *Tympanuchus cupido attwateri.*
Masked bobwhite, *Colinus virginianus ridgwayi.*
Whooping crane, *Grus americana.*
Yuma clapper rail, *Rallus longirostris yumanensis.*
California clapper rail, *Rallus longirostris obsoletus.*
Light-footed clapper rail, *Rallus longirostris levipes.*
Hawaiian gallinule, *Gallinula chloropus sandvicensis.*
Hawaiian coot, *Fulica americana alai.*
Eskimo curlew, *Numenius borealis.*
Hawaiian stilt, *Himantopus himantopus knudseni.*

Puerto Rican plain pigeon, *Columbia inornata wetmorei.*
Puerto Rican parrot, *Amazona vittata.*
Ivory-billed woodpecker, *Campephilus principalis.*
Red-cockaded woodpecker, *Dendrocopus borealis.*
Hawaiian crow (alala), *Corvus tropicus.*
Small Kauai thrust (puaiohi), *Phaeornis palmeri.*
Large Kauai thrush, *Phaeornis obscurus myadestina.*
Molokai thrush (Olomau), *Phaeornis obscurus rutha.*
Nilhoa millerbird, *Acrocephalus kingi.*
Kauai oo (oo-aa), *Moho braccatus.*
Crested honeycreeper (akohekohe), *Palmeria dolei.*
Hawaii akepa (akepa), *Loxops coccinea coccinea.*
Maui akepa (akepuie), *Loxops coccinea ochraceu.*
Oahu creeper (alauwahio), *Loxops maculata maculata.*
Molokai creeper (kakawahie), *Loxops maculata flammea.*
Akiapolaau *Hemignathus wilsoni.*
Kauai akialoa, *Hemignathus procerus.*
Kaua and Maui nukupuus, *Hemignathus lucidus.*
Laysan and Nihoa finches, *Psittirostra cantans.*
Ou, *Psittirostra psittacea.*
Palila, *Psittirostra bailleui.*
Maui parrotbill, *Pseudonestor xanthorphrys.*
Bachman's warbler, *Vermivora bachmanii.*
Kirtland's warbler, *Dendroica kirtlandii.*
Dusky seaside sparrow,*Ammospiza nigrescens.*
Cape Sable sparrow, *Ammospiza mirabilis.*

REPTILES AND AMPHIBIANS

American alligator, *Alligator mississippiensis.*
Blunt-nosed leopard lizard, *Crotaphytus silus.*
San Francisco garter snake, *Thamnophis sirtalis tetrataenia.*
Puerto Rican boa, *Epicrates inornatus.*
Santa Cruz long-toed salamander, *Ambystoma macrodactylum croceum.*
Texas blind salamander, *Typhlomolge rathbuni.*
Houston toad, *Bufo houstonensis.*

FISHES

Shortnose sturgeon, *Acipenser brevirostrum.*
Longjaw cisco, *Coregonus alpenae.*
Lahontan cutthroat trout, *Salmo clarki henshawi.*
Piute cutthroat trout, *Salmo clarki seleniris.*
Greenback cutthroat trout, *Salmo clarki stomias.*
Gila trout, *Salmo gilae.*
Arizona (Apache) trout, *Salmo sp.*
Humpback chub, *Gila cypha.*
Mohave chub, *Siphatles mohavensis.*
Pahranagat bonytail, *Gila robusta jordani.*

Created in 1849, the Department of the Interior is concerned with the management, conservation, and development of the Nation's water, fish, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States—now and in the future.

ADDITIONAL SPACE LISTED JUNE 1, 1973

1. Utah prairie dog.
2. Northern Rocky Mountain wolf.
3. Eastern cougar.
4. Mississippi sandhill crane.
5. Puerto Rican whip-poor-will.
6. Santa Barbara song sparrow.
7. Desert slender salamander.
8. Okaloosa darter—a tiny minnow found only in Okaloosa County, Florida.

Mr. STEVENS. Some question has arisen with respect to the status of dall sheep and brown bear, two species found in Alaska. Neither of these species is on the Department of the Interior's list of endangered native fish and wildlife. Nor are there plans to add them at this time. I ask unanimous consent to have printed in the Record a letter from the Associate Director of the Bureau of Sport Fisheries and Wildlife to this effect.

There being no objection, the letter was ordered to be printed in the Record, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
FISH AND WILDLIFE SERVICE,
Washington, D.C., June 7, 1973.

Hon. TED STEVENS,
U.S. Senate, Washington, D.C.

DEAR SENATOR STEVENS: This responds to your letter on behalf of Mr. John W. Hendrickson, Esq., regarding dall sheep and brown bear.

Please assure Mr. Hendrickson that neither of these animals are on the Department's List of Endangered Native Fish and Wildlife and there are no plans to add them to this time.

We hope this information will clarify the matter. If we can assist you further, please call on us.

Sincerely yours,

——— ———,
Associate Director.

Mr. STEVENS. Mr. President, I would like to inquire of the Senator from California if he is prepared at this time to take up an amendment I have concerning undue economic hardship.

Mr. TUNNEY. Mr. President, the Senator from New Jersey has a few comments that he wants to make in debate, if that is agreeable with the Senator from Alaska.

Mr. STEVENS. Mr. President, that is perfectly agreeable with me.

Mr. WILLIAMS. Mr. President, first I want to extend my sincere thanks and appreciation to the Senator from Washington (Mr. Magnuson) and to other members of the Senate Commerce Committee for their hard and alert work on this bill and for their dedication to the protection of endangered wildlife.

Mr. President, this is important legislation. It is remarkable when one considers the time in which the committee has been able to deal with this bill after its introduction on the floor, the hearings, and then bringing it to the Senate for consideration by the full Senate.

It was only June 12 of this year that I introduced this bill. It followed the introduction of another bill by the Senator from Washington (Mr. Magnuson) in April. The bill that I had introduced had a broader sweep of protection than the Magnuson bill. In my judgment, the best of both bills has been combined in S. 1983, the bill before us today, and I am more than grateful to the committee for their expeditious consideration of this measure.

Mr. President, one of our most precious natural resources is our wildlife. It is difficult to imagine a world without the many and varied creatures which inhabit our forests, rivers, and oceans.

And yet, if our wildlife continues to decline at the alarming rate we have witnessed during the past 100 years or so, it is indeed possible that the time will come when it will be necessary to visit a zoo or wildlife preserve in order to observe what was once an integral part of our everyday environment.

Many species of fish, birds and mammals have disappeared through the evolution process. Many of them were never abundant to begin with and were therefore particularly vulnerable to the encroachment of civilization. However, many species would still be abundant today were it not for overexploitation by man.

It was once necessary for man to hunt wild animals in order to obtain food and clothing. However, in today's industrial society, where there is a synthetic substitute for almost anything nature can provide, we are no longer dependent upon animals, as we once were.

Most animals are worth very little in terms of dollars and cents. However, their esthetic value is great indeed. The pleasure of simply observing them, as demonstrated by the hundreds of thousands of people who visit zoos and wildlife preserves each year, is unmeasurable. Furthermore, the integral part they play in preserving the delicate balance of nature cannot be ignored.

In the United States alone, over the past 100 years, 47 species of native fish and wildlife have become extinct. We have hunted them and destroyed their habitat. We have been indifferent to their fate and ignored the fact that once an animal has vanished from the Earth, it can never be replaced. Today, we can only hope to prevent more wildlife from becoming extinct.

For quite some time, it has been evident that present laws are inadequate for protecting endangered wildlife.

Neither the Endangered Species Protection Act of 1966, nor the Endangered Species Conservation Act of 1969, prohibits the taking or possession of native, endangered fish and wildlife.

Migratory birds are protected under the Migratory Bird Treaty Act; eagles are protected under the Bald Eagle Act; and marine mammals under the Marine Mammal Protection Act. The Lacey Act provides for Federal involvement if an animal is taken contrary to State law and transported across State lines. And the importation of foreign endangered wildlife is prohibited under the Endangered Species Conservation Act of 1969.

The present endangered species law requires the Secretary of the Interior to maintain two lists of endangered wildlife. One list is composed of the names of native—or domestic—endangered wildlife and the other list is made up of the names of foreign endangered wildlife. This law further requires that a species of wildlife be threatened with extinction before it may be placed on the endangered list. An animal's continued existence must actually be in peril before it may be considered endangered.

It is absolutely essential that a species of wildlife be afforded protection before it reaches the endangered list and thereby the brink of extinction. In addition, a Federal prohibition against the taking, import, export and interstate transportation of any species listed as endangered is mandatory if endangered wildlife is to be saved.

The continued survival of many species now listed as endangered is questionable. Various factors, including small population levels, restricted breeding areas, continued destruction of habitat and inadequate prohibitions against taking are responsible for their precarious existence.

The bill before us today, S. 1983, which I introduced, is designed to provide the protection needed to save species of wildlife threatened with extinction, as well as those species which are likely to become threatened with extinction if protective measures are not taken.

I would like to take a few moments to briefly review the provisions of this legislation.

S. 1983 requires that the Secretary maintain two lists. One list shall contain the names of "endangered" native and foreign wildlife and the other shall contain the names of "threatened" native and foreign wildlife. The endangered list will be composed of those species which are in danger of extinction. The theatened list will be composed of those species which are not presently in danger of extinction, but which are likely to become endangered if protective measures are not taken. The bill sets up requirements for determining and listing species of fish and wildlife which are endangered or threatened. Further, whenever the Secretary lists a species as threatened, he is required to issue regulations to protect such species.

S. 1983 would prohibit the taking, import, export, and interstate transportation, of any species of wildlife or part thereof which is listed as endangered or threatened. In addition, the Secretary is authorized to extend the protection of the act to any species which so closely resembles in appearance one which has been listed as endangered or threatened that enforcement personnel have difficulty in distinguishing between the listed and nonlisted species.

Jurisdiction over endangered and threatened species of wildlife is divided between the Secretaries of the Department of the Interior and the Department of Commerce.

Most States are intimately involved with endangered wildlife because of the habitat they control, the legal responsibilities they have for resident wildlife, and the skilled professional personnel which they employ. Many States are already conducting programs to identify and collect information about threatened resident wildlife and to design programs for their protection.

In recognition of the fact that the protection and conservation of endangered wildlife requires close cooperation between the Federal and State Governments, S. 1983 establishes mechanisms through which they can work together to protect endangered and threatened wildlife.

S. 1983 directs the Secretary to cooperate to the maximum extent practicable with the States. Financial aid grants to the States are authorized for the purpose of carrying out programs for the protection and management of endangered and threatened species. In order to qualify for this financial assistance, a State program must meet the strict criteria which is set forth in the bill. The Federal share of such a program may not exceed 50 percent of the total estimated costs for a single State.

The act in no way limits the power of any State to enact legislation or regulations more restrictive than the provisions of the act.

Under the provisions of S. 1983, the Secretary may delegate to a State the authority to manage resident endangered and threatened wildlife, if such State submits an acceptable plan for this purpose. Such plan must be submitted to the Secretary within 1 year from the date of enactment and must meet or exceed the requirements set forth in the act for obtaining financial assistance. If the plan is not disapproved by the Secretary, it shall go into effect within the State.

The prohibitions against the taking of endangered and threatened wildlife contained in S. 1983 will not apply within the 15-month period following the date of enactment, except in those States which have not established an acceptable plan and those which do not prohibit the taking of endangered and threatened wildlife.

Resident endangered and threatened wildlife will be subject to the provisions of S. 1983 in their entirety upon the date of enactment in any State which has not established an acceptable plan.

One of the major causes of the decline in wildlife populations is the destruction of their habitat. The future of many species, including some already listed as endangered, is in jeopardy because of continued threats to their environment.

It is therefore essential that the habitat of endangered or threatened wildlife be protected from further encroachment. S. 1983 gives the Secretary authority to acquire any real property which he determines to be necessary in order to protect and restore an endangered or threatened species. He is authorized to use the land acquisition authorities of the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956 and the Fish and Wildlife Coordination Act. He is further authorized to use funds authorized and appropriated under the Land and Water Conservation Fund Act, in addition to direct appropriations under S. 1983, for the purpose of acquiring such lands.

In order to facilitate international cooperation in the protection of endangered and threatened wildlife, foreign currencies accruing to the United States in other nations under the Agricultural Trade Development and Assistance Act or any other law, may be used to provide assistance to any foreign country in the development and management of programs which are necessary or useful in the conservation and protection of endangered or threatened wildlife. Further, the Secretary, in cooperation with the Secretary of State, is authorized to encourage foreign countries to establish protective programs and to enter into bilateral or multilateral agreements for the protection of endangered or threatened species, and to encourage citizens of such countries to practice conservation in taking fish or wildlife for importation into the United States.

In February of this year, the United States convened a plenipotentiary conference to bring international protection to wild fauna and flora in danger of extinction due to commerce. Representatives from 80 countries attended this conference. The result was the Convention on International Trade in Endangered Species of Wild Flora and Fauna, which provides for a system of regulation for the purpose of preventing the commercial overexploitation of any species of flora or fauna judged to be endangered or threatened by trade. S. 1983 provides the means with which to carry out the provisions of the convention.

Permits may be issued for the taking of a threatened or endangered species for scientific purposes or the propagation of such species in captivity or in a controlled habitat. But only if such taking will not adversely affect the survival of the wild population.

The provisions of the act do not apply to Alaska natives, who take endangered or threatened species for the purposes of consumption or use in a native community or for the purpose of creating authentic native articles of handicrafts and clothing, provided the taking is not done in a wasteful manner.

In addition, a limited hardship exemption is authorized for persons who have entered into contracts prior to the date a species is listed or proposed to be listed as an endangered or threatened species.

A civil penalty of up to $10,000 and a criminal penalty of up to $20.000 and up to 1 year in prison, is provided for under the act.

The act also authorizes the Secretary to pay a reward of up to $2,500 to persons who furnish information leading to a civil penalty or criminal conviction.

Importers of fish and wildlife will be required to register with the Secretary of the Treasury, to keep records and to provide the Secretary or his representative with access to these records and to their place of business.

Citizen suits are also permitted, subject to certain conditions.

Furthermore, the Secretary of the Smithsonian Institution is directed to review species of plants which are endangered or threatened and methods of providing adequate protection, including legislation. He is directed to report his findings to Congress within 1 year from the date of enactment.

Mr. President, I believe that in S. 1983, we have before us the necessary tools with which to restore our endangered and threatened wildlife. I sincerely hope that my colleagues in the Senate share this view, and that S. 1983 will be approved without delay.

I appreciate the full and comprehensive explanation and review of the provisions of this bill that has been made earlier by the knowledgeable Senator from California (Mr. Tunney) and the comanager of the bill, the Senator from Alaska (Mr. Stevens).

Mr. President, I yield the floor.

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The second assistant legislative clerk proceeded to read the amendment.

Mr. Stevens. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The Acting President pro tempore. Without objection it is so ordered. The amendment will be printed in the Record.

Mr. Stevens' amendment is as follows:

On page 53, line 13, through page 54, line 11, strike sub-section 11(b) and insert:

"(b)(1) Hardship.—The Secretary may except from the application of section 10(a) of this Act any person if the failure to grant such exception will cause undue economic hardship: *Provided*, That such exception shall be granted any non-Native resident of an Alaska Native village unless such resident is found by the Secretary not to be primarily dependent upon the taking of fish and wildlife for consumption or use in a Native community or for creating and selling authentic Native articles or handicrafts. The extent and duration of such exception shall be such as the Secretary deems appropriate: *Provided*, No such exception shall be for a duration of more than one year from the date of publication in the Federal Register of notice of proposed listing of the involved species. No exception shall apply to a quantity of fish or wildlife in excess of that specified by the Secretary. No such exception shall be granted unless such person, except non-Native residents of Alaska Native villages who are primarily dependent upon the taking of fish and wildlife for subsistence purposes, applies to the Secretary in writing and furnishes with such application such information as the Secretary may require to prove hardship. The one year period for those species of fish or wildlife which were listed by the Secretary as endangered prior to the effective date of this Act shall expire in accordance with the terms of Section 3 of the Act of December 5, 1969 (83 Stat. 275). No such exemption may be granted for the importation or exportation of a specimen listed in Appendix I of the Convention which is to be used for primarily commercial purposes.

"(2) As used in this subsection, the term 'undue economic hardship' shall include, but not be limited to:

"(A) Substantial economic loss resulting from inability caused by this Act to perform contracts with respect to species of fish and wildlife entered into prior to the date of publication in the Federal Register of a notice of a proposed listing of such species as an endangered or threatened species.

"(B) Substantial economic loss to persons who, for the year prior to the listing of a species under this Act derived a substantial portion of their income from the lawful taking of any listed species which taking would be made unlawful under this Act; or

"(C) Curtailment of subsistence taking made unlawful under this Act by persons (i) not reasonably able to secure other sources of subsistence: and (ii) dependent to a substantial extent upon hunting and fishing for subsistence; and (iii) who must engage in such curtailed taking for subsistence purposes.

"(3) The Secretary may make further requirements for a showing of undue economic hardship as he deems fit. Exceptions granted under this section may be limited by the Secretary in his discretion as to time, area, or other factor of applicability."

Mr. Stevens. Mr. President, this is really a noncontroversial amendment, and I am pleased to note that I understand the distinguished Senator from California, the manager of the bill (Mr. Tunney) has indicated that he would accept the amendment.

It makes certain changes in the section granting exceptions for undue economic hardship. Because it makes a series of changes throughout that section, I have set forth the entire section as amended in my proposed amendment.

My amendment would require that an exception for undue economic hardship must be granted to all non-Native residents of Alaskan Native villages unless such residents are found by the Secretary not to be primarily dependent upon the taking of fish and wildlife for consumption or use in a Native community or for creating and selling authentic Native articles of handicrafts. In other words, the presumption is that such persons are to be entitled to such an exception. This exception will apply probably to no more than a dozen Alaskans. These are persons who are not one quarter or more Native by blood but are integral members of the Native communities that take endangered species. Presently the only such species of which I am aware is the bowhead whale. This is taken in approximately seven villages along the northwest coast of Alaska. Thus, very few people will be covered. However, to be fair, I believe that all such persons, because they really are part of the Native communities, must be excepted to the same extent as Alaskan Natives in the same communities. Such non-Natives who depend primarily upon the taking of fish and wildlife for subsistence need not apply in writing for the exception. Others must.

This amendment defines the term "undue economic hardship" to also include three groups of persons.

The first group is those persons who incur substantial economic loss resulting from the inability caused by this act to perform contracts with respect to species of fish and wildlife entered into prior to the date of publication in the Federal Register of a proposed listing of a species.

The second is those who, for the year prior to the listing of a species, have derived a substantial portion of their income from the lawful taking of any listed species and will incur substantial economic loss as the result of such listing.

The third is those who must take endangered species for subsistence and who first, are not reasonably able to secure other sources of subsistence, and second, depend to a substantial extent upon hunting and fishing for subsistence, and third, must engage in such curtailed taking for subsistence purposes.

The Secretary is also, under my amendment, given additional discretion to grant exceptions under such limits as he may determine necessary, if he does not believe blanket exceptions are warranted. Such limits may be as to time, area, or any other factor of applicability.

I ask unanimous consent to have printed in the Record a telegram I received from the Alaska Legal Services Attorney for Nome.

There being no objection, the telegram was ordered to be printed in the Record, as follows:

NOME, ALASKA, *July 19, 1973.*

Senator TED STEVENS,
Washington, D.C.

This is to convey my strong support for your amendments to the endangered species legislation currently before the commerce committee. As an Alaska legal services attorney assigned to the Nome office I travel quite extensively through the villages in northwest Alaska. The impact on the residents of these villages of prohibiting the taking of animals supplying traditional foods would be disastrous. As for nonnatives, I would estimate there are not more than 10 persons who rely on the taking of animals used in traditional Eskimo food for subsistence. They are hardly a danger to any species.

ROBERT BUNDY,
Attorney at Law.

Mr. STEVENS. Mr. President, this amendment and the other amendments dealing with Alaska Natives were worked out by my staff and the staff of the Senate Commerce Committee's Environmental Subcommittee in coordination with Alaska Legal Services.

I am most pleased to express my appreciation to the staff of the Commerce Committee's Environmental Subcommittee and to the Alaska legal services in regard to this amendment. I believe that it does protect fully the rights of those residents of Alaska Native villages. That is the intent of the amendment, to clarify the congressional intent with regard to that protection.

I am hopeful that the Senator from California may be able to accept the amendment.

Mr. TUNNEY. Mr. President, I understand that this amendment is not intended to create a loophole for those who would exploit their Native village resident status in order to increase their taking of the endangered species or to increase commerce in such endangered species but only in order to meet the bona fide community needs; is that not correct?

Mr. STEVENS. The Senator from California is absolutely correct. They are bona fide residents of Native villages who may not be considered to be Natives, who may be married, for instance, to Native people and who are part of the subsistence economy. This amendment is not intended to give anyone the opportunity to start taking endangered species or any other kind of species by virtue of merely establishing residence in a Native village.

Mr. TUNNEY. We have seen examples of thoughtless commercial taking of endangered species, which only helps to drive endangered species nearer and nearer to extinction. I would expect that no permit would be granted under the provisions of this amendment to further that kind of process. I am sure that the Senator from Alaska would agree that no area of the drafting of this amendment would be utilized in order to permit unwarranted exploitation of endangered species.

Mr. STEVENS. I absolutely concur. The Endangered Species Act of the State of Alaska is specific in that regard already. I am trying to make certain that the Federal law is as specific. We are not trying to open the door to commercial exploitation. We are trying, however, to protect those people who live in a subsistence economy and depend on the animals for food and for their livelihood. It is not intended in any way to encourage or to authorize commercial exploitation by those not so dependent.

Mr. TUNNEY. The Senator from California is aware that certain non-Native Alaska village residents are dependent upon the taking of endangered species. Some of these people have entered into contracts which may have to be broken due to this act. They would suffer unwarranted economic hardship. As I understand the amendment, its purpose is to provide individuals, particularly those who depend on such taking for subsistence purposes, and may be unaware of the application requirements of the act, with a 1-year period to find other means of support. Is that correct?

Mr. STEVENS. That is correct.

Mr. TUNNEY. With that understanding, I think that the Senator from Alaska has offered an amendment which will strengthen the legislation and will protect certain constituents of the Senator in Alaska, and the committee will accept the amendment.

The PRESIDING OFFICER (Mr. Chiles). Is all time yielded back on the amendment?

Mr. Stevens. I yield back the remainder of my time.

Mr. Tunney. I yield back the remainder of my time.

The Presiding Officer. All time on the amendment has been yielded back.

The question is on agreeing to the amendment of the Senator from Alaska (Mr. Stevens).

The amendment was agreed to.

Mr. Stevens. Mr. President, I move that the vote by which the amendment was agreed to be reconsidered.

Mr. Tunney. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. Tunney. Mr. President, I ask for the yeas and nays on final passage.

The yeas and nays were ordered.

Mr. Stevens. I call up another amendment.

The Presiding Officer. The clerk will report the amendment.

The second assistant legislative clerk read as follows:

> On page 71, lines 20 through 24, strike the proviso and substitute:
>
> "*Provided*, That if, within fifteen months of the date of enactment of this Act, the Secretary finds that a state which does not prevent the taking of a species listed by him as endangered does not provide adequate protection for that species, he may be regulation implement the provisions of subsection 10(a) of this Act with respect to that species in that State."

Mr. Stevens. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. Robert C. Byrd. Mr. President, I ask unanimous consent that the vote on the pending amendment occur today at the hour of 2 p.m.

The Presiding Officer. Without objection, it is so ordered.

Mr. Eastland. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The Presiding Officer. The Senator would have to ask unanimous consent for that because there is an amendment already pending.

Mr. Eastland. Mr. President, I ask unanimous consent that I may send an amendment to the desk for immediate consideration. The manager of the bill has agreed to accept it.

The Presiding Officer. Without objection, it is so ordered, and the clerk will state the amendment.

The second assistant legislative clerk read as follows:

> On page 29, line 15, before the period, insert a comma and the following: "other than a species of the order insectica determined by the Secretary to constitute a pest whose protection under the provisions of this Act would present an overwhelming and overriding risk to man."

The Presiding Officer. Who yields time?

Mr. Eastland. Mr. President, I yield myself such time as I may desire.

Mr. President, this amendment would except insect pests which the Secretary found presented an overwhelming risk to man from the protection provided by the bill. The Senate recently passed S. 1888 to provide for a program to eradicate the boll weevil and other insect pests of cotton. Millions of dollars are spent every year in trying to protect man from such pests. If these eradication programs should approach success, the bill as reported would require their cessation until the insect had been given an opportunity to regenerate.

Another example is the gypsy moth, which was brought into this country by an individual for scientific purposes and has multiplied and spread across the Northeast and is expanding its range State by State defoliating our forests. I do not believe that it makes any sense to attempt to eradicate and preserve these pests at the same time; and I hope that the committee will see fit to agree to this amendment as a technical correction to the bill.

Mr. TUNNEY. Mr. President, I accept the amendment offered by the Senator from Mississippi, which would permit the Secretary to not list species of the order of insecta determined by the Secretary to constitute a pest whose protection under provisions of this act would present an overwhelming and overriding risk to man.

It is my understanding that this amendment would permit the Secretary to not list an insect upon a finding that the insect presented such an overwhelming risk to man that there was no possible justification for providing protection, but that it would not be used to promote the elimination of species which in only a few numbers might be of value to society. The term "overriding" threat implies an extreme danger which only total destruction would prevent.

Even if the risk is overwhelming, that, in and of itself, would not keep the species off the list. The Secretary must also find that the avoidance of that overwhelming risk overrides the need to protect the species. In other words, he has discretion as to whether he chooses to protect the species or humans in the case of an overwhelming risk to man. Without the Eastland amendment, he would not have that discretion and would have to protect the species whenever it became endangered regardless of the very worst consequences for man's health or well-being.

I think that the Senator from Mississippi has a similar understanding of the amendment.

Mr. EASTLAND. That is correct.

Mr. TUNNEY. I am prepared to accept the amendment and yield back the remainder of my time.

Mr. EASTLAND. I yield back the remainder of my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back.

The question is on agreeing to the amendment of the Senator from Mississippi (Mr. Eastland).

[The amendment was agreed to.]

Mr. STEVENS. Mr. President, the pending amendment is my amendment. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Mr. President, it is my understanding that the Senator from Utah has an amendment and if it is one that is to be accepted by the manager of the bill, I would have no objection to taking it up at this time.

I suggest the absence of a quorum, and I ask unanimous consent that the time not be charged against my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

[The second assistant legislative clerk proceeded to call the roll.]

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, the amendment I have at the desk is to section 16(d). The present proviso states that the prohibitions against taking under S. 1983 automatically apply in any State which does not prevent the taking of any species listed by the Secretary as an endangered species. These prohibitions against taking apply to all species which have been listed by the Secretaries. The present proviso gives the Secretaries no discretion in the matter. The prohibitions automatically apply.

This amendment, as submitted by me and the Senators from Montana (Mr. Mansfield and Mr. Metcalf) and the Senator from Georgia (Mr. Talmadge), would give the Secretary the discretion he needs to act in this area. This amendment also preserves traditional areas of State sovereignty over resident species.

The amendment provides that if the Secretary with authority over the particular species finds that a particular State does not prevent the taking of a species listed by him as endangered and also does not provide adequate protection for that species, he may in his discretion by regulation implement the provisions of subsection 10(a), the prohibitions against taking.

Certain species, like the American alligator, are listed as endangered presently by the Federal Government. However, they are not endangered in certain States like Louisiana. As a matter of fact, there are enough American alligators in Louisiana to permit the export of a number of animals to other States, for zoos and other purposes.

Certain States do not "prevent the taking" of particular species, but have enacted other measures to protect them. These include habitat acquisition to protect the areas in which these animals live and forage. Such programs are not taken into account under the present language of this section. Land acquisition and other similar conservation measures actually will do more to protect many species of endangered animals than preventing their taking.

Third, certain States, like Illinois, lists the species protected under their State statutes. The Secretary may, by regulation, list or delist additional species and it will take some time to amend the State law to take care of those circumstances.

If each State law which so lists the species covered does not exactly conform to the Secretary's lists, present prohibitions of the bill, under section 10(a), will automatically become effective.

Unfortunately, in none of these cases is the Secretary given any discretion. He must prohibit the taking of all species covered under the act merely because some of the species are not protected by State statute, although there is every reason to believe that the State would act to protect those species that are found to endangered. They have in the past, and I feel certain they will in the future.

This amendment will give the Secretary the discretion he needs to act in such situations.

I want to emphasize the necessity of keeping the States interested in endangered species. They have almost 6,000 officers who are capable of protecting these species. The Federal Government has only some 200 in the whole United States, and to shift this burden from the States to the Federal Government without giving the Secretary discretion to recognize those States which are in fact taking action to protect endangered species would be unfortunate.

I am pleased that Senators Mansfield, Metcalf, and Talmadge have seen fit to join as cosponsors of the amendment.

I hope Senators will read the letter we have placed on their desks before voting on this amendment, because the amendment, I think, is very important to preserve the role of the State fish and game departments who have done an admirable job so far in trying to protect endangered species.

Mr. President, I reserve the remainder of my time.

Mr. TUNNEY. Mr. President, as floor manager for the Endangered Species Protection Act, I am not able to accept the amendment offered by the Senator from Alaska. I recognize full well that the purposes of the Senator are well intended. However, I feel it goes too far.

The Committee on Commerce, which has carefully studied Federal-State relationships in the endangered species protection area, has designed in S. 1983, a legislative scheme which is sufficiently sophisticated, first, to permit the continued management of endangered species by those States with well-developed programs; second, to provide Federal protection to States which do not yet offer such protection; and third, to encourage the development of programs in those States which do not now actively protect endangered species in a manner that will eventually permit a much reduced Federal commitment to endangered species conservation and management.

If the bill is reported, Federal prohibitions against the taking of endangered species apply upon the date of enactment of this act only in those States which have not adopted similar protective measures. During the 15 months subsequent to the passage of the act any State would otherwise be able to exercise its full powers to manage, protect, conserve, restore, or propagate endangered and threatened species. These powers would include the power to permit the taking of threatened species. Furthermore, during this 15-month period any State might apply to the Secretary for approval of its State's endangered species management plan. Any State whose plan was not disapproved by the Secretary within 3 months of submission to the Secretary would have full power to regulate both endangered and threatened species, including the power to regulate the taking of endangered species otherwise regulated under this Act. At the end of the 15 months following passage of the act, all of the provisions of this act regarding the management and taking of endangered and threatened species would go into effect in any State which had not applied to the Secretary or whose plan had been disapproved by the Secretary.

Thus, the bill as reported, takes care of all the options: First, it provides immediate protection against the taking of endangered species in any State which has not provided for such protection at this time. Second, it allows any State to secure full management powers over endangered species by submitting an adequate management plan to the Secretary for approval. Third, 15 months after the passage of the act, Federal law would go into effect to carry out the purposes of this act in any State that should not have an approved management program.

Not only does the bill, as reported, permit any State which adequately protects endangered species to continue such a protection program; it provides funds to assist the State in its management and conservation activities. Ten million dollars is provided to fund this effort for the first 2 years the act is in effect.

The Senator from Alaska argues that the issue is whether or not we are going to preempt the State judicial power to manage present fish and wildlife. This, however, is not the issue. The issue is whether we are going to provide full protection to those species of fish and wildlife which are imminently in danger of extinction in those States which have not yet deemed fit, on the 200 years of our Nation's existence, to provide full protection to these species.

Presently, 35 States provide protection for endangered species. In most of these States, their laws are as strong as or stronger than the provisions of this bill. In the others there are strong management programs. Only 15 States do not now provide some protection for endangered species.

Under this bill there would be absolutely no Federal intervention in those States which provided full protection for presently endangered species. Those States which do not provide absolute prohibitions against taking endangered species but do provide strong programs approved by the Secretary would be totally free to manage a residential species within 3 months of this act. The rationale behind the proposed amendment is that in an emergency the Secretary can rush in and take care of any endangered species. This bill as reported in predicated on the evidence provided in hearings before the Committee on Commerce in the last 2 years that an emergency already exists. This bill only prevents the capacity of those who would exploit endangered species in those States which have not yet had the time to prepare adequate endangered species programs.

This is a bill to protect endangered species, to provide for their conservation, restoration, and propagation. Some argue that the States should have their chance. I argue that the States have had their chance. Nothing in this bill prevents them from continuing to do the excellent work that most of the States have done in the past.

Some States, such as Alaska, have done an excellent job. I think California has done a good job. But there are States which have not done a good job, and it seems to me we ought to have the ability, immediately upon passage of this bill, to protect endangered species inasmuch as those States themselves have not seen fit to do as good a job as the authors of the bill envision as being necessary to protect endangered species.

Mr. STEVENS. Mr. President, I think the Senator from California states his case very well, but, unfortunately, the bill is drawn on the basis of making the Federal law preemptive. In the event there is a species that is not totally protected, then the Federal law applies to all species.

The effect of the amendment I have offered is that if the Secretary finds within this 15-month period that a State does not prevent the taking of a species listed by him as endangered, does not provide adequate protection for that species, he may by regulation implement subsection 10(a) with respect to the taking of that species. In other words, my amendment is directed to a particular situation.

The present language of section 16(d) makes the provisions of the bill effective on the date of enactment of the bill. It does not prevent the taking of any species listed by the Secretary as an endangered species. I think it is most important to keep in mind again what we are doing. We are saying, in effect, that if Louisiana has a management program which has in fact produced a situation in which alligators can be harvested for cultural, scientific, or other purposes without harming the species in that area, even though the alligator may be listed as an endangered species by the Secretary of the Interior, since they do not prevent the taking of alligators, and in fact are taking them under a very scientific and wise management program, that all of the Louisiana laws would be suspended with regard to any species listed among the 109 in the Federal endangered species list. That to me is foolhardy, to suspend the activities of a very viable and good management program, and one that is farsighted.

All that my amendment would do would be to give the Secretary discretion over that on the basis of the individual species, and not make the law effective on the date of the act as to all species if there is any species that is not protected and on the list of the Secretaries on the date of enactment of the bill.

I think that it would be important to list some of the types of species we are talking about. There has been prepared a list of some 14 particular species.

I ask unanimous consent to have this material printed in the Record at this point if the Senator from California does not object.

Mr. TUNNEY. Mr. President, I do not object.

There being no objection, the material was ordered to be printed in the Record, as follows:

1. Longjaw cisco—distribution of this species is throughout Lakes Michigan and Huron, and a very small population in the small deep hole in Lake Erie that was present as late as 1948. The decline of this species is attributed to sea lamprey predation and intensive commercial fisheries for large ciscos and increased competition from the small bloater and alewife in Lakes Michigan and Huron. The low number in Lake Erie is due to a very limited favorable environment which has become increasingly unfavorable in recent years.

2. Lahontan cutthroat trout—this species is found primarily in California, but there are a few in Nevada. California provides complete protection but Nevada does not. The decline of the species is attributed to damage to spawning beds resulting from forest removal, fires, and overgrazing. Also, dams which block spawning runs, pollution, diversion of water for irrigation, hybridization, and competition with rainbow trout and other cutthroats are considered to be other reasons for their demise. This species is found primarily on public lands and has been placed in a special protected category by the Bureau of Land Management. The Bureau of Sport Fisheres and Wildlife is constructing a fish hatchery primarily for rearing this subspecies.

3. Breenback cuttroat trout—this species is found only in Boulder and Larimer Counties, Colorado. The decline of this species was caused by deterioration of habitat due to man's activities, competition from stocked trout, and hybridization. Although my information does not show that this species is fully protected by the State of Colorado, the wildlife agency is cooperating in reclamation and restocking of certain waters in the Rocky Mountain National Park and stocking is proposed in other limited reclaimed suitable waters. Barrier dams to isolate populations and angling restrictions are also proposed for certain streams.

4. Arizona trout—the Arizona Game and Fish Department has stocked several streams in Arizona with this species. They have closed Ford Creek and the Upper East Fork of the White River to fishing. Barrier dams to protect the species were constructed on both streams in cooperation with the department, and, the White Mountain Apache tribe constructed two lakes for this trout. Plans are underway to increase hatchery production of this species and restock suitable reclaimed

waters. The Arizona Game and Fish Department has several thousand of these fish producing at one of its state hatcheries.

5. Pahranagat bonytail—this species is found only at the outflow of two springs in Lincoln County, Nevada. Its decline is attributed to irrigation development and establishment of competitive and predatory exotic species in its range. Measures have been proposed to transplant the species into other suitable habitat, if it can be found.

6. Woundfin—this species found essentially in the Virgin River below Hurricane, Utah. Its decline is attributed to modification of its habitat by man. The species is adapted to life in sandy, swift, turbid rivers. A dam is proposed above St. George, Utah, which purportedly would render this species extinct. Research has been proposed to determine its habitat requirement so as to establish a population elsewhere.

7. Colorado squawfish—this species occurs only in the middle and lower Green River, the main Colorado River above Lake Powell, and the Salt River. The reason for its decline is attributed to the modification of its habitat by man through construction of large reservoirs. The species will not reproduce in cold tailwaters below high dams nor in reservoirs behind these dams.

8. Warm spring pupfish—this species is found in School Spring and Scruggs Springs in the northern part of Ash Meadows, Nye, Nevada. Although not fully protected by state law, School Springs, which is administrated by the Bureau of Land Management, was improved and fenced in 1969. In 1970 a well was drilled to serve as an additional water supply during periods of low spring waterflow to protect the species. This pupfish, of course, is found primarily on public land.

9. American alligator—the American alligator is completely protected in all states. However, due to increased populations and impending habitat destruction, the Louisiana Wildlife and Fisheries Commission lifted the total protection last year and conducted a closely regulated harvest in one parish of the state. This species, with its tremendous reproductive potential, and with strict law enforcement given by southern state wildlife agencies, has rebounded tremendously in recent years. It is very doubtful if it will remain on the endangered species list very long.

10. Puerto Rician boa—this species, found only in Puerto Rico, is in trouble mainly from mongoose predation, according to authorities. This theory has been disputed, however, by some observers. People usually kill every one they see and automobiles kill a few every year.

11. Aleutian Canada Goose—this species does not receive total state or federal protection. It is managed by the federal government, not the state, under the Migratory Bird Treaty Act. Hunting is still permitted by the Bureau of Sport Fisheries and Wildlife.

12. Mexican duck—likewise, this species comes under the purview of the federal government. It is not totally protected, hunting is still allowed by the Bureau of Sport Fisheries and Wildlife.

13. Eastern timber wolf—this species is totally protected in every state except Minnesota. The State of Minnesota came up with a state plan to protect and manage this species last year but violent objection from the Bureau of Sport Fisheries and Wildlife resulted in the state legislature rejecting the proposal. Hopefully this program will be accepted by the next state legislature. At present nearly 2 million acres of the Superior National Forest provides complete protection for the species.

14. Red wolf—the red wolf is found in Texas and Louisiana. Texas recently passed an endangered species law which affords complete protection to the red wolf in that state. In Louisiana the red wolf is given complete protection except in cases of livestock predation which is controlled by federal agents. The livestock-killing animals are removed alive and transferred to the Wild Animal Propagation Trust of the American Association of Zoological Parks and Aquariums.

Those animals listed above are the only ones on the U.S. native endangered species list not receiving complete protection by state law, to the best of my knowledge. As you can see two of the species are under federal control, not state. Also, many of the species do receive protection in some form or another either from the state or some federal agency when they are found on public lands. Therefore, I cannot foresee where any animals on the endangered species list would suffer as a result of an interim period provided in the new endangered species act to give state agencies an opportunity to beef-up their programs in compliance with that act.

Mr. STEVENS. I am not trying to undermine the bill. My State supports the bill, and I think that we have been the leaders in this endeavor. My Governor has indicated that he thinks it is a good idea. However, we want to maintain our ability to act with regard to all species, even though it might be that one species is listed.

I hope that the Senator from California will see my point, that if one species or more is listed and is endangered in Pennsylvania, but is not endangered in Alaska, having it on that list, as the bill stands now, would not only lift it with regard to one State, but would lift it entirely.

Mr. TUNNEY. Mr. President, all that the State of Alaska would have to do would be to apply to the Secretary for approval of this plan.

Mr. STEVENS. But what that would require would be calling a special session of the State legislature. We protect them by State statute. And we must be given the time to call the legislature into session to pass a law on the subject. That is the reason for the 15 months delay.

My friend, the Senator from California, will recall that we put in the 15 months as a sort of breathing period to permit the States which do not protect the taking of any species to have time to act.

We can turn that around and say that the burden is on the Secretary, and if he finds that they are not protected, he may suspend the State law as to that species.

I think that is fair. I think the burden is where it should be. After all, we are dealing with 109 species on the list now. And a lot of people are thinking that we want to take a species that is in danger. They do not understand the fact that Louisiana can have alligators literally, as the old saying goes, coming out of the swamps, whereas they are endangered in some other States.

Mr. TUNNEY. The State of Louisiana could apply for approval of the plan. And if they had an excess number of alligators and they felt that a reasonable harvest of alligators made sense in the State of Louisiana, the Secretary of the Interior might agree.

Mr. STEVENS. In the meantime, all of the plans would be suspended. The State law would become inoperative. They are listed and, therefore, no management could be undertaken as far as the harvesting of any species during that period of time. And the State has to wait and ask the Secretary of the Interior for approval of a plan which is already effective.

Mr. TUNNEY. In the case of Louisiana, it is the understanding of the Senator from California that if the State of Louisiana made application, they would have immediate approval of the plan as it relates particularly to alligators. They would then be under State management, and there would be no problem.

What specific species in Alaska is the Senator from Alaska talking about in terms of their being affected?

Mr. STEVENS. I would inform the Senator from California that to my knowledge there is no species in Alaska that are endangered that are not already protected by the State plan.

I am not talking about Alaska. I am talking about the general proposition of protecting them where they are endangered. Again, in the Lake Superior wilderness area, we have an area which protects wolves, even though they may not be fully protected by the State law.

They are provided a habitat, which is absolute protection. It would be immaterial as to whether the State law protected them, because the only place in which they are found is in a sanctuary.

Any Secretary of the Interior under my amendment, if he lists wolves, would look to that area and say that those wolves do not have to be listed under State endangered species law, because the State already has, as a practical matter, imposed absolute protection for that species. Under present language of the bill, because they are in fact listed on the Federal endangered species list for the whole Nation, they would be taken out of State jurisdiction in this regard.

Mr. TUNNEY. Unless the State came in and asked for approval of that management plan. In the case of Alaska, the management plan would be approved immediately. It is an excellent plan. We are not talking about States such as Alaska which have excellent management plans. However, we are talking about States which do not have plans or which have inadequate management plans. We did not want to wait 15 months to have the kind of controls that were deemed necessary.

It was the view of the committee that if there is a clear and present danger to the endangered or threatened species, then we wanted to have action to protect those species as of the date of the enactment of the law.

I think it is very important that we take such action immediately. It does not make sense, at least to me, to say that we are going to wait for another period of time when we already recognize that the danger is present and with us and that some species are threatened with extinction.

Mr. STEVENS. Mr. President, I think the Senator from California states his position well. I have no great disagreement with him the way it is stated.

The only problem is that the burden is placed on the wrong foot. The burden is placed on those people who have a good program—a program that is effective—to come forward and ask the Secretary to approve their program. However, my amendment puts the burden on the Secretary to go to those who do not have an effective program and suspend their authority as to particular species.

As the Senator points out, some 30 States do already have programs.

A relatively small number of States do not have the program. However, it would be very simple for the Secretary to go to these States and say, "You are not protecting the species that are listed." They would then be suspended and they would have the burden of coming back and asking for approval.

However, under the Senator's amendment, the 30 States that do have programs are all suspended if any of them contain any species listed on the Federal endangered species list on the date of the enactment of this act.

In the outline which I had printed in the Record, one of the species, as I recall, is a small fish that is found only in Hot Springs. If that fish is not listed on the endangered species program in that State, the entire management program is suspended until the State comes in and asks for restoration.

That is wrong. If the State does not list that species, and the Secretary wants to have it listed, he can do so immediately under my amendment. There is no time frame involved. He can issue the regulations to protect them immediately.

I am sure that if my amendment is in the bill at the time the bill goes to the House and the bill is signed by the President, the Secretary will have the regulations ready to protect those species that are not protected now.

But I believe we have an honest difference of opinion. I want to be subjective, to put the burden on the Secretary to look after those States which do not have effective regulation. I believe the Senator from California is defending the committee's bill, which puts the burden on those States which do have effective regulation to come in and prove it. That to me is the wrong way to approach the bill, and I disagree very honestly and openly with the Senator from California, as I have throughout the consideration of this measure.

Therefore, I would like to change that proviso.

Mr. TUNNEY. Mr. President, I would just like to say there is no Senator who has made a greater contribution to the development of this legislation than the Senator from Alaska.

The PRESIDING OFFICER. All time of the Senator from California has expired. The Senator from Alaska has 8 minutes remaining.

Mr. STEVENS. I yield such time as the Senator from California may desire.

Mr. TUNNEY. I thank the Senator. As I say, there is no Senator who has made a greater contribution to the development of this legislation than the Senator from Alaska. So I certainly do not want my remarks to be in any way construed that I think the Senator from Alaska is trying to open up an evasive loophole in this legislation, because I do not think that is the case. His persistent interest in seeing this legislation passed shows that he is devoted to the concept of protecting endangered species. I know this full well, and I would say that he has made a tremendous contribution, not only in the committee but on the floor, in explaining what the purposes of this act are.

I must say that I do disagree on this particular point. I think that we do have a clear and present danger to endangered species now, and I think that the Federal Government ought to, at the time that this bill passes, provide protection to endangered species, and the States ought to come in and have their plans approved if they are not now providing adequate protection. In the case of Alaska, it would be approved forthwith, and with many other States the case would be the same. As things now stand, many States already provide the protection required under the act.

The Senator mentioned the State of Louisiana and the alligators, and the fact that at one point alligators were threatened in Louisiana, but through a good management program the State of Louisiana has been able to see propagation of alligators to the point that a reasonable harvest is deemed desirable.

There is nothing in the legislation as presently drafted and as reported by the committee to prevent the Secretary from granting a permit to take a reasonable number of alligators, even if the State plan for the management of endangered species in Louisiana was disapproved by the Secretary. I do not know whether the State plan would be disapproved or approved, but even if it were disapproved, and that meant that the Federal regulations would be operative, it would not prevent the Secretary from granting a specific permit to the State to allow a reasonable number of alligators to be taken.

So I recognize that there is a disagreement. I recognize that there is a difference of philosophy. I just happen to think that we have such a need for the management at the Federal level of endangered species that we ought to have the act become operative across the board at the time of passage, and if States are now handling the problem better that the Federal Government, the Federal Government would not be involved in their affairs.

Mr. STEVENS. Mr. President, I thank the Senator from California for his kind remarks. I believe we have, as I stated, an honest difference of opinion on the approach to be taken with regard to alligators. They are listed among the 109 that are already endangered species, notwithstanding the fact that, as I say, in Louisiana they have a good management program and they are not endangered there. The effect of the committee bill would be to suspend the Louisiana program until the State of Louisiana came forward and demonstrated that it was in fact a good program. The fact that there is a surplus of alligators there demonstrates that they have a good program, in my opinion.

I would say to the Senator from California that when I conducted the hearings on this matter, I asked the representatives of the National Association of State Game & Fish Commissioners, the Wilderness Society, the Friends of Earth, and the others with regard to this preemption, did they not feel that the States should have a time period to act before the Federal Government should move. My understanding of their response was that they all believed that the State should be given a reasonable time. That is the reason for the 15-month time period that is in the bill, which is reasonable as far as the committee is concerned. The Secretary should act on an emergency basis to protect individual species that are in need of protection during that period.

That is my understanding of the general tenor of the witnesses' comments, and I believe this amendment would carry out that objective, which I outlined to the witnesses as they appeared before the committee.

Mr. President, I assume that the time is expired.

The PRESIDING OFFICER (Mr. Chiles). All time on the amendment has expired. Time can be yielded on the bill itself.

Mr. TUNNEY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. TUNNEY. Is there anything in the rules to prevent another amendment from being offered between now and 2 o'clock, the time that was designated for the yea-and-nay vote on the Stevens amendment?

The PRESIDING OFFICER. The time on the Stevens amendment having expired, another amendment is in order.

Mr. MOSS. Mr. President, I send to the desk a series of amendments, which I call up, and ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. Without objection, the amendments will be considered en bloc.

The amendments will be stated.

The legislative clerk proceeded to read the amendments.

Mr. Moss. Mr. President, since they are rather lengthy and complicated, I ask unanimous consent that further reading of the amendments be dispensed with, and I shall try to explain what the purpose of the amendments is. I have discussed them fully with the manager of the bill.

The Presiding Officer. Without objection, it is so ordered.

Mr. Moss' amendments, en bloc, are as follows:

Page 29, line 9, insert "(1) 'Conservation' and 'management' mean the collection and application of biological information for the purposes of increasing and maintaining the number of animals within species and populations of endangered and threatened species at the optimum carrying capacity of their habitat. Such terms include the entire scope of activities that constitute a modern scientific resources program, including, but not limited to, research census, law enforcement, and habitat acquisition and improvement. Also included within these terms, when and where appropriate, is the protection, propagation, conservation and restoration of such species, including regulation and taking necessary to these ends.

Page 30, line 16, insert "(7) 'Optimum carrying capacity' means the ability of a given habitat to support the optimum sustainable population of an endangered or threatened species in a healthy state without diminishing the ability of the habitat to continue that function."

Page 30, line 16, and immediately following (7) above, insert "(8) 'Optimum sustainable population' means, with respect to any population segment to endangered or threatened species, the number of such species which will result in the maximum productivity of the species, keeping in mind the optimum carrying capacity of the habitat and the health of the ecosystem of which they form a constituent part."

Pages 29, 30, 31 and 32, renumber the present paragraphs (1), (2), (3), (4) and (5) as (2), (3), (4), (5) and (6) and renumber the present paragraphs (6), (7), (8), (9), (10), (11), (12), (13) and (14) as (9), (10), (11), (12), (13), (14), (15), (16) and (17).

Page 36, lines 14 and 15, strike the words "protection, restoration or propagation" and insert the words "and management."

Page 38, lines 2 and 3, strike the words "protection, restoration, or propagation" and insert the words "and management."

Page 38, lines 11 and 12, strike the words "management, conservation, protection, and restoration" and insert the words "conservation and management."

Page 39, lines 12 and 13, strike the words "conservation, protection, restoration, and propagation" and insert the words "conservation and management."

Page 39, lines 21 and 22, strike the words "conservation, protection, restoration and propagation" and insert the words "conservation and management."

Page 40, lines 7, 8 and 9, strike the words "research, censusing, law enforcement, propagation and habitat acquisition or improvement." and insert the words "conservation and management."

Page 72, line 4, strike the words "management and taking" and insert the words "conservation and management."

Mr. Moss. Mr. President, these amendments that I have proposed are simply to establish in this bill a definition or definitions that are consistent generally with the language that was worked out in the sea mammal bill that the Senator from South Carolina (Mr. Hollings) worked on so vigorously, and that also came out of our Commerce Committee.

What we are trying to do here, and what this amendment will accomplish, is to define conservation and management in a way that is agreeable to and supported by the wildlife community. It reinforces Congress' determination, as expressed in the Marine Mammal Protection Act, that our invaluable and irreplaceable wildlife resources be handled on a professional and not simply an emotional basis.

The amendments would, first of all, insert a new paragraph 1 at page 29, line 9, to provide that conversation and management mean the collection and application of biological information for the purposes of increasing and maintaining the number of animals within species and populations in endangered and threatened species at the optimum carrying capacity of their habitat.

Such terms include the entire scope of activities that constitute a modern scientific resources program, including but not limited to research, census, law enforcement, and habitat acquisition and improvement. Also included within these terms, when and where appropriate, is the protection, propagation, conservation, and restoration of such species, including regulation and taking necessary to these ends.

The thrust of these amendments is that the States, in managing resident wildlife, are authorized to maximize the population. It is not simply to keep endangered species at a good level, but really to improve and expand the species, and that whatever scientific methods are needed in order to bring the population up to the maximum carrying capacity of the habitat shall be done, and this includes all of the specific functions. Also, in the amendments, we define "optimum carrying capacity" and "optimum sustainable population" and what those terms mean. Then, with those definitions engrafted in there, there is a renumbering of the paragraphs in order to make them fit in their regular order in there. That is what constitutes the second page of the amendment.

We consistently use the words "conservation and management" rather than repeating all the other terms, because they all refer back to the first paragraph on conservation and management.

In our consideration of the bill, we thought it would be entirely proper to write this language in a concise and logical manner, and to emphasize the fact that the purpose of this is not simply to protect the resident species which are threatened or endangered, but simply to provide that there be a maximum effort made to restore the numbers of those species to the point that they would not any longer be considered threatened or in any way endangered.

We believe that this language will accomplish that.

I have discussed this, as I say, at some length with the manager of the bill. I compliment him very highly for his dedication to the work he has done on this matter and for his great concern for the problems we face.

As our country has become more populated and metropolitan in nature, of course, we put pressure on the various species of wildlife. The time is here when we must make a determined effort to see that we do not drive to extinction any of the wildlife that can be preserved.

I think that is the objective of all of us who have been concerned with this bill.

I especially compliment the Senator from California for the valuable work he has done on this matter.

Mr. Tunney. Mr. President, I want to thank the distinguished Senator from Utah for his very kind remarks. It is clear that the language which is suggested by the Senator from Utah would strengthen the purposes of this act, which is, namely, to protect, conserve, propagate and restore endangered species. I have had the opportunity to consult with the Senator from Utah, as he has indicated, regarding the language, and I think that my understanding of it is similar to his; that is, that the amendment is designed in a more careful fashion to articulate the type of protections the committee intended when it reported the bill from the committee to the floor of the Senate.

Mr. Moss. I thank the Senator from California for his remarks. I believe that we see eye to eye on the matter. It will strengthen the bill considerably as these definition amendments are adopted.

Mr. TUNNEY. One further point. It is the understanding of the Senator from Utah, is it not, that in no way by this amendment are we going to be moving the direction of treating endangered species as game animals?

Mr. Moss. No. It does not affect that at all. It does not change the characterization of any animal into a game or a nongame kind of animal. But many of those on the endangered or the threatened species list do fall into the game classification.

Mr. TUNNEY. If they do fall into the game classification the protection afforded them under this bill, will in no way be diminished by the language which is the clarifying language suggested by the Senator from Utah?

Mr. Moss. Yes. That is true. It applies to all animals of resident species. In fact, beyond even the animal class.

Mr. TUNNEY. It would not change the protection given to endangered species.

Mr. Moss. No, it would not change that.

I want to compliment the Senator from Utah for the great interest he has shown in the bill. As a member of the committee, he has taken a very deep interest in the matter and has helped to fashion the bill which has come to the floor of the Senate today.

With the understandings that I now have, and as expressed by the Senator from Utah, I am prepared to accept the amendment and yield back the remainder of my time.

Mr. Moss. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. Haskell). All time on the amendment has now expired.

The question is on agreeing to the amendment of the Senator from Utah (Mr. Moss).

The amendment was agreed to.

Mr. Moss. Mr. President, I move that the vote by which the amendment was agreed to be reconsidered.

Mr. TUNNEY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. TUNNEY. Mr. President, I send to the desk a series of technical and clarifying amendments to S. 1973 and ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. The amendments will be stated.

The legislative clerk proceeded to read the amendments.

Mr. TUNNEY. Mr. President, I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered, and the amendments will be printed in the Record.

The text of the amendments is as follows:

On page 27, line 12, before the word "educational." insert the words "aesthetic, ecological,".

On page 28, line 8, after the word "States" insert the words "and other interested parties,".

On page 31, line 6, delete the word "terrestrial".

On page 31, line 20, after the word "harass," and before the word "pursue", insert the word "harm,".

On page 33, delete lines 17–23.

On page 33, line 34, delete the number "3" and insert the number "2".

On page 35, line 9, delete the word "Secretary" and insert the word "Secretaries".

On page 36, lines 15–16, strike the words "endangered or".

On page 38, line 12, before the word "and" insert the word "propagation".

On page 38, line 18, after the word "has", insert the words "statutory and regulatory".

On page 39, line 13, strike the words "facing extinction" and, before the word "fish" strike the words "endangered and threatened".

On page 40, strike lines 13–17 and insert, in lieu thereof, the following:

"(B) the readiness of a State to proceed with a conservation and management program consistent with the objectives and purposes of this Act;

"(C) the number of endangered and threatened species within a State;

"(D) the potential for restoring endangered and threatened species within a State; and

"(E) the relative urgency to initiate a program to restore and protect an endangered or threatened species in terms of the survival of the species."

On page 40, line 19, after the word "year" insert the word "shall".

On page 40, line 20, after the period insert the words "Any funds remaining unobligated or unexpended at the close of the second fiscal year shall remain available to the Secretary for the purpose of this section."

On page 41, line 18, after the period, insert the words "For the purposes of this section, the non-federal share may, in the discretion of the Secretary, be in the form of real or personal property, the value of which will be determined by the Secretary, as well as money."

On page 41, line 23, after the word "appropriated" insert the words "through the fiscal year ending June 30, 1977."

On page 42, line 12, strike the word "of" and insert in lieu thereof the word "regarding".

On page 49, lines 19 and 20, delete the words "subsection (a)" and insert the words "paragraph (1) of this subsection".

On page 50, lines 20–22, strike the words "specimens or products processed or manufactured in whole or in part from specimens of any such species" and insert, in lieu thereof the words "any endangered species of fish or wildlife".

On page 51, lines 12–14, after the word "consumption" strike the words, "or taken for recreational purpose in waters under United States jurisdiction or on the high seas," and insert in lieu thereof the words ", or fish or wildlife taken for recreational purposes pursuant to applicable Federal or State laws and regulations in waters under United States jurisdiction or on the high seas".

On page 55, line 16, after the word "consumption" insert the words "within native villages or towns".

On page 59, line 14, after the word "revocation," insert the words "made pursuant to this section".

On page 68, line 11, strike the word "protection", and insert in lieu thereof the word "conservation".

On page 69, line 20, add a new subsection as follows:

"(f) Section 2(1) of the Federal Environmental Pesticide Control Act of 1972 (P.L. 92–516) is amended by striking out the words 'by the Secretary of the Interior under Public Law 91–135' and inserting in lieu thereof the words 'or threatened by the Secretary pursuant to the Endangered Species Act of 1973' ".

The PRESIDING OFFICER. Without objection, the amendments will be considered en bloc.

Mr. TUNNEY. Mr. President, I have submitted these technical and clarifying amendments to the Senator from Alaska (Mr. Stevens) and he has indicated that he will support them. The amendments will help to achieve the purposes of the bill and will clarify some confusion caused by language remaining in the bill from earlier drafts or omitted from earlier drafts which went unnoticed during the final committee markup.

They are, as I indicate, technical in nature. They are important, however.

If there is a member of the minority on the floor now, I should like to move their adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. TUNNEY. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. TUNNEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the Record.

The amendment is as follows:

On page 53, line 8, strike the word "for.".

On page 53, line 8, before the word "scientific" insert the word "for".

On page 53, at line 11–12, strike the words "the propagation of such species in captivity or in a controlled habitat", and insert the following "(2) to enhance the propagation or survival of the affected species including the propagation of such species in captivity or in a controlled habitat.

Mr. TUNNEY. Mr. President, the purpose of the amendment I am offering is to allow the Secretary to permit the taking of an endangered species for the enhancement of the species. This is a needed management tool recommended by all wildlife biologists. It is needed, for example, where a species is destroying its habitat or where the species is diseased.

This amendment has been discussed with the Senator from Alaska, who has indicated that he approves of it.

I am prepared to yield back the remainder of my time, if the distinguished Senator from Kentucky, the designee of the minority leader, is prepared to yield back the remainder of his time.

Mr. COOK. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. TUNNEY. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. TUNNEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the Record.

The amendment is as follows:

On page 52, between lines 22 and 23, insert a new subsection as follows:

"(c) SPECIES HELD IN CAPTIVITY OR CONTROLLED ENVIRONMENT.—The provisions of this section shall not apply to any species held in captivity or in a controlled environment on the effective date of this Act if the purposes of such holding are not contrary to the purposes of this Act.".

Mr. TUNNEY. Mr. President, I submit an amendment to S. 1983 to exempt from the prohibitions of this bill present owners of certain endangered species.

This amendment would exempt from Government interference endangered species now lawfully held in captivity or in a controlled environment which might come under provisions of this bill. These animals include pets, species held for obligation purposes for which permits might otherwise have to be secured under this bill, and species held in similar circumstances. The Government has made several attempts in the recent past to prosecute certain individuals attempting to enhance the condition of endangered species for seemingly technical violations of the law.

Mr. President, this amendment has been discussed with the Senator from Alaska, and he has indicated that he approves of this amendment.

I am prepared to yield back the remainder of my time, if the Senator from Kentucky is prepared to do the same.

Mr. COOK. Mr. President, we have no objection to this amendment and I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

ENDANGERED SPECIES ACT OF 1973

The Senate continued with the consideration of the bill (S. 1983) to provide for the conservation, protection, and propagation of species or subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinction, and for other purposes.

Mr. COOK. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

> On page 43, line 11, insert the following: strike the word "such," and insert the word "any."

Mr. COOK. Mr. President, an earlier version of this bill provided that the appropriate Secretary review other programs administered by him and utilize such programs in furtherance of the purpose of the act. The bill provided further that all other Federal departments and agencies, shall, in consultation with and with the assistance of the Secretary, utilize their authority in furtherance of the purpose of the act by carrying out programs for the protection of endangered species or subspecies of fish and wildlife by taking such action necessary to insure that actions authorized, funded or carried out by them do not jeopardize the continued existence of endangered species.

I am in complete agreement with this provision as stated, but it did not go far enough as it did not protect the habitat of the endangered species. I therefore recommended to the committee, and I am pleased that the bill we are now considering includes a provision which would prohibit the destruction or modification of the critical habitat of such species.

Mr. President, the only purpose of my amendment to change the word "such" to "any" is to make the provision all inclusive. I think we should be concerned with the habitat of all wildlife instead of considering that of endangered species.

We have a situation in my State that falls in this category.

Mr. TUNNEY. Mr. President, I ask the Senator whether the effect of his amendment would be, first, if the Bureau of Public Roads wanted to build a highway through an area of the country, as it deemed necessary for the citizens of the Nation, if it would be prevented from doing so by changing the word "such" to "any."

Mr. COOK. Mr. President, I would be less than fair with the Senator if I would say otherwise to him. It is conceivable that this could happen. It is conceivable also that never would happen.

The only point I am making is that they would have to have consultation with the respective agency. The point I have in mind is that we have the Pioneer Weapons Hunting Area in the State of Kentucky. It is the only one of its kind in the United States. There is no other. It is a tremendous nesting area for wild turkeys.

I might suggest that the Corps of Engineers decided that it would build a road right through the middle of this area. We have tried our best to have them change the route of the road. They had alternate routes, but they decided, despite their alternative routes, that this is where they would build the road.

This language means that they have to consult with the respective agencies under this bill, and they have to consult with the respective State agencies in order to work out this problem. That is exactly what it means. And I would be less than candid if I did not explain that to the Senator.

Mr. TUNNEY. Mr. President, as I understand it, after the consultation process took place, the Bureau of Public Roads, or the Corps of Engineers, would not be prohibited from building such a road if they deemed it necessary to do so.

Mr. COOK. The point is that they would then be doing it after consultation with the respective agencies, rather than making that decision on their own.

Mr. TUNNEY. But they would have the final decision after consultation.

Mr. COOK. The Senator has put me in a rather bad light. Under the terms of this, it would have to be under an agreement worked out with the respective agencies.

Mr. TUNNEY. Mr. President, as I understand the legislation, just reading the language:

> All other departments, agencies, and instrumentalities of the Federal Government shall, in consultation and with the assistance of the Secretary—
>
> (b) take such action as is necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of any endangered or threatened species, or result in the destruction or modification of any habitat of such species which is determined by the Secretary, after consultation to the extent appropriate and necessary with affected States, to be a critical habitat of such species.

So, as I read the language, there has to be consultation. However, the Bureau of Public Roads or any other agency would have the final decision as to whether such a road should be built. That is my interpretation of the legislation at any rate.

Mr. Cook. Mr. President, we find ourselves in a position where we are debating or really talking about endangered or threatened species, and that is where the consequence of this amendment lies.

I might suggest to the Senator from California that if the Senator feels this might be the burden of this language, I do have another amendment which would designate this area.

Mr. Tunney. Mr. President, I would prefer it if the Senator would withdraw his pending amendment. I know what the Senator's next amendment is. And I support that amendment. I recognize that the Senator has to secure unanimous consent to make the amendment germane to the bill. However, I am prepared to accept the amendment. I have looked it over.

I do not think there is any desire on the part of any Senator on the floor to object to a unanimous-consent request that the amendment be considered.

Mr. President, I am hesitant, as the floor manager of the bill, to accept the amendment. This does broaden considerably the impact of the language which requires consultations with the respective agencies and the Department and the Secretary of Interior. It moves it from endangered species to any species of animal. And with that extension of the language on the floor and without any hearings, I believe it is something that I would not be able to accept.

Mr. Cook. Mr. President, I withdraw my amendment.

The Presiding Officer. The amendment is withdrawn.

Mr. Cook. Mr. President, I send to the desk an amendment which is the same as S. 1532 which I introduced earlier this year and ask that it be immediately considered.

The Presiding Officer. The clerk will report the amendment.

The legislative clerk proceeded to state the amendment.

Mr. Cook. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The Presiding Officer. Without objection, it is so ordered.

The amendment reads as follows:

At the end of the bill, add the following:

That, in accordance with section 3(b) of the Wilderness Act (78 Stat. 892; 16 U.S.C. 1132(b), those lands in the Daniel Boone National Forest, Kentucky, comprising the Pioneer Weapons Hunting Area and consisting of approximately seven thousand three hundred acres, are hereby designated as wilderness.

Sec. 2. As soon as practicable after this Act takes effect, a map of the wilderness area and a description of its boundaries shall be filed with the Interior and Insular Affairs Committee of the United States Senate and House of Representatives and such map and description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal description and map may be made. A copy of such map and description shall be on file and available for public inspection in the offices of the Chief, Forest Service, United States Department of Agriculture.

Sec. 3. The wilderness area designated by this Act shall be known as the Cave Run Wilderness and shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as Wilderness areas, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

SEC. 4. Nothing in this Act or the Wilderness Act shall be construed as precluding the construction of a Zilpo recreation site access road generally on a route extending northward from Forest Development Road Numbered 129 generally skirting the eastern boundary of the Pioneer Weapons Hunting Area, or as affecting or modifying in any manner the 1962 Cooperative Management Plan between the Department of Fish and Wildlife Resources of the State of Kentucky and the Department of Agriculture involving the designation of the Pioneer Weapons Hunting Area within the Daniel Boone National Forest.

Mr. COOK. Mr. President, I ask unanimous consent that as to this amendment the rule of germaneness be waived.

Mr. ROBERT C. BYRD. Mr. President, the Senator does not have to ask unanimous consent as long as no Senator makes a point of order.

The PRESIDING OFFICER. The Senator from West Virginia is correct.

Mr. COOK. Mr. President, I thank the Senator from West Virginia.

Mr. President, I thank the Senator from California, because this now gives me an opportunity to clarify the situation.

Mr. President, I believe that S. 1983 as written will contribute to the guarantee we all want that succeeding generations will enjoy some measure of nature and wildlife as we have known it. However, I would like further assurance for the people of Kentucky.

Mr. President, in my State of Kentucky, we have located at Cave Run, in Daniel Boone National Forest, a Pioneer Weapons Hunting Area. Within this area are various species of wild turkeys, white-tailed deer, red and grey foxes, ruffed grouse, dove, and quail. During the past year there have been attempts made to bisect this Pioneer Weapons Hunting Area by construction of a road through the normal nesting and grazing area of these species. To do so would most assuredly destroy or severely endanger the species. The tragedy is in the fact that a feasible alternate route is available that would generally skirt the Pioneer Weapons Hunting Area. We cannot permit such inconsiderate and ill-conceived projects to continue.

The amendment would now add a new section to the bill which would designate under section 3(b) of the Wilderness Act of the United States Code, that this area be designated as a wilderness area. Therefore, having such a designation, it is in the unique position of not being subject to this kind of tampering.

If we can get this accomplished, we will solve a problem and this has been going on for more than 2 years on my part.

We no longer have to fear that an agency can decide to arbitrarily build a major highway which bisects this area. I assure my colleagues that this would be of significance to the Pioneer Weapons Hunting Area located in the Daniel Boone National Forest in Kentucky.

Mr. TUNNEY. Mr. President, I have had an opportunity to consult with the Senator from Kentucky on his amendment. It is a good amendment. It is specific. It clearly focuses on the problem. I am prepared to accept the amendment.

I yield back the remainder of my time.

Mr. COOK. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. Haskell). All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from Kentucky.

The amendment was agreed to.

The PRESIDING OFFICER. The hour of 2 p.m. having arrived, the Senate will now proceed to vote on the amendment of the Senator from Alaska (Mr. Stevens) to S. 1983.

On this question the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. Robert C. Byrd. I announce that the Senator from Nevada (Mr. Cannon), is necessarily absent.

I further announce that the Senator from South Dakota (Mr. Abourezk) is absent on official business.

I also announce that the Senator from Mississippi (Mr. Stennis) is absent because of illness.

Mr. Griffin. I announce that the Senator from Oklahoma (Mr. Bellmon) is absent to attend the funeral of a friend.

The Senator from New Hampshire (Mr. Cotton) is absent because of illness.

The Senator from Maryland (Mr. Beall) and the Senator from Arizona (Mr. Goldwater) are detained on official business.

The result was announced—yeas 60, nays 33, as follows:

[No. 321 Leg.]

So Mr. Stevens' amendment was agreed to.

The Presiding Officer. The bill is open to further amendment.

Mr. Fulbright. Mr. President, I send an amendment to the desk.

The Presiding Officer. The amendment will be stated.

The assistant legislative clerk read as follows:

> On page 66, line 12, strike "the Secretary of the Smithsonian Institution" and insert in lieu thereof "The Secretary of Agriculture."

Mr. Fulbright. Mr. President, this provision, authorizing the money to the Smithsonian Institution, was not in the original bill. It was inserted in the House, in the Subcommittee on Commerce, by Representative Dingell.

I have consulted the Smithsonian, and Mr. Michael Huxley, the Assistant Secretary, has informed me that they do not wish to pursue this; and they have suggested the substitution of the Secretary of Agriculture for the Smithsonian Institution.

The Smithsonian is interested in this subject, but they do not feel that they are in a position today to carry out the program which is here authorized, and they have suggested that the Department of Agriculture be substituted. It is my understanding that this amendment is acceptable to the chairman of the committee.

Of course, if the Department of Agriculture wishes the cooperation of the Smithsonian, I am quite sure they can obtain it, insofar as the Smithsonian's facilities will permit them to do so.

Mr. Tunney. Mr. President, it is my understanding that the amendment would enable the Department of Agriculture to contract with the Smithsonian Institution to conduct a part of the study if the Department of Agriculture felt that it was necessary—or, for that matter, to contract with any other Federal agency, State agency, or private individual for the purpose of conducting that study.

Mr. Fulbright. I see nothing to prevent that, either.

I must say that I had no notice of this matter until a couple of hours ago, and on inquiry from the Smithsonian, this is the best information I have.

Mr. Tunney. I certainly have no objection to the amendment; but I want to make clear that it is the manager's understanding that it would not prevent the Secretary of Agriculture from contracting with the Smithsonian Institution or any other group or agency for the purpose of conducting the study.

Mr. Fulbright. So far as I can see, there is nothing to prevent that. It is up to the Department of Agriculture.

Mr. Tunney. I accept the amendment, and I yield back the remainder of my time.

Mr. Fulbright. I yield back the remainder of my time.

The Presiding Officer. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was agreed to.

The Presiding Officer. The bill is open to further amendment.

Mr. Nelson. Mr. President, I send an amendment to the desk.

The Presiding Officer. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. Nelson. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The Presiding Officer. Without objection, it is so ordered; and, without objection, the amendment will be printed in the Record.

The amendment is as follows:

On page 32 insert the following new subsection after Section 3(14):

"(15) 'chemical toxicant' means any chemical substance designed, intended, or employed to control or eradicate insects, rodents, predators and any other wildlife, or plants, by causing significant bodily malfunction, injury, illness, or death immediately or in the future."

On page 39, line 23, immediately before the semicolon, insert a comma and the following: "and plans to issue regulations prohibiting the use of chemical toxicants within the areas comprising such lands, waters, and interests so acquired, in a manner comparable to that provided under section 10(a)(10)."

On page 52, insert the following new subsection after section 10(a)(9):

"(10) uses any chemical toxicants within any area, comprising lands and waters, including interests therein, of the United States, which were acquired and are being utilized for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species, except that the Secretary may authorize the use of a chemical toxicant, but only if he makes a written finding which he shall publish in the Federal Register, that:

"(A) an emergency exists to the endangered or threatened species that cannot be dealt with by means which do not involve the use of chemical toxicants, and that such use is necessary for the survival of the endangered or threatened species; or

"(B) a particular method of applying a chemical toxicant will not impair the survival of an endangered or threatened species."

Mr. NELSON. Mr. President, this act is designed to stave off the extinction of our wildlife by protecting the endangered species from men who might knowingly or inadvertently harm them. Because of this act, an animal or fish species will not be overtly "taken."

Yet, it is common knowledge that there is another danger to our wildlife, a threat which is unavoidable: the expansion of our cities and industries. But we should also watch that we do not destroy the animal world, made helpless by human technology. This act acknowledges that habitat modification is liable to be increasingly prevalent as the cause of future wildlife losses. The Secretaries of Interior and Commerce are authorized to acquire the lands upon which the endangered and threatened species reside and funds are provided for this purpose. Habitat acquisition will provide a framework, a base for the construction of true sanctuaries, preserves free from harmful human intrusions. This amendment would aid in safeguarding the sanctuaries of the endangered species.

Around 10 years ago we first learned the insidiousness of chemical poisons: how the residues of herbicides, insecticides, of pesticides in general, remain and find their way into the tissue of the low members of the food chain which are consumed by the next higher and so on, until the birds and mammals of prey, representing the top of the food chain, accumulate massive concentrations of chemical poisons.

They become the victims of chemical toxicant poisoning in the form of reproductive failures, incapacitation, or death.

There are presently eight species upon the Department of the Interior's red book list of rare and endangered species, including the southern bald eagle and the California condor which have been decimated by the use of chemical toxicants. Other species like the prairie falcon will have to be added to the future endangered and threatened species list because of our widespread use of pesticides. This amendment does not cover much area, only those small preserves which are wholly dedicated to endangered species protection.

Poisons are so lethal and the existence of endangered species so precarious that we must be overly cautious to avoid chemical disasters. This amendment applies to those lands "acquired and being utilized for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species." However, the Secretary is authorized to allow the use of chemical toxicants if he finds that that use is needed to insure the survival or that such use will not at all affect the survival of an endangered or threatened species.

The amendment prohibits the use of chemical poisons upon the lands that the Federal Government and the States have and will acquire as selected habitat for the endangered or threatened species. The lands this amendment refers to are primarily those in the National Wildlife Refuge System and those lands which State Fish and Game Departments will oversee. The ratio will be even more lopsided for the lands the States will acquire under the provisions of this act. For example the California Department of Fish and Game has identified seven of its indigenous rare and endangered species of wildlife as being presently threatened by county rodent control programs and is negotiating a joint policy agreement with the California Department of Food and Agriculture so that the two Departments will cooperate more closely. In other words, the Fish and Game Department is very concerned, and with good reason, that control people in the field will not realize until it is too late that they are using chemical toxicants within the areas upon which the endangered and rare species are making their last stand.

Mr. President, this is a very simple amendment which provides that chemical toxicants, poisons, may not be used on those lands which are—

> Acquired by and are being used for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species, except that the Secretary may authorize the use of a chemical toxicant, but only if he makes a written finding which he shall publish in the Federal Register.

That the use of chemical toxicants is necessary for the purpose of protecting endangered species.

I think there is no controversy about the amendment. I ask the Senator if he is willing to accept it.

Mr. TUNNEY. Mr. President, I want to make sure I understand the amendment. Does the amendment provide that the Secretary of Interior must make a positive finding that before chemical toxicants can be used such a toxicant will protect the species or not hurt the species?

Mr. NELSON. He must file a statement saying that the use of the chemical toxicant is necessary for the purpose of protecting the endangered species. Otherwise it may not be used on sanctuary lands.

Mr. TUNNEY. Let me make sure that I understand the lands this applies to. The Senator said sanctuary lands.

Mr. NELSON. Yes. In the amendment it is described as—

> Lands acquired and being utilized for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species.

The Government is going to be acquiring lands under this provision and there are sanctuary lands already set aside; the amendment applies to these lands unless the Secretary says that the use of toxicants is necessary for the protection of endangered species.

Mr. TUNNEY. Are toxicants presently allowed to be used on sanctuary lands?

Mr. NELSON. For example, I think there is a case in the Senator's State where there are two different agencies. One agency used chemical poisons to kill rodents and one of the endangered birds was being poisoned by the poisons being used to kill rodents. Those two departments of the state government which were operating with conflicting purposes have now reached an agreement. But this is the kind of case that could occur. Poison could be used on same lands where you are trying to protect a species, and at the same time they are threatening the survival of the endangered species.

This provides that poison cannot be used on those lands unless the Secretary certifies that it is necessary to protect the species for which the sanctuary is in existence.

Mr. TUNNEY. What if it is a State sanctuary as contrasted with the Federal sanctuary? If it were a State sanctuary would they have to get authorization from the Secretary of the Interior?

Mr. NELSON. That is the way I interpret it.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. NELSON. I yield.

The PRESIDING OFFICER. The Senator from Wyoming is recognized. The Senate will be in order. The Senator may proceed.

Mr. HANSEN. I am wondering about this situation. In times past, in western Wyoming, the State game and fish commission has found it advisable to employ the use of so-called coyote getters in and around elk winter feeding areas. I am not certain that has been used in national elk sanctuaries.

My question is, if in the judgment of the Fish and Wildlife Service, or the Bureau of Sports, Fisheries, and Wildlife, as it is now called, it became necessary to try to bring some effective control upon the coyote—we have trumpeter swan and waterfowl and other birds in addition to elk, which is the major big game animal in the area, although there are moose, deer, and mountain sheep—would this amendment prohibit any control of the coyote within the national elk refuge, if it is permitted, assuming it may be, if in the judgment of the Bureau of Sports, Fisheries, and Wildlife it became necessary or desirable to effect control of the coyote? Would this preclude that action unless the Secretary certified that the use of the coyote getter was to protect the endangered species?

Mr. TUNNEY. I do not know the the classification of the Elk Refuge Commission. It is clear that if it involved any lands that were being acquired under this legislation——

Mr. HANSEN. These lands have been acquired first, partly by gift. The Izaak Walton League many years ago made a grant and, from 1914 forward, the Federal Government through different measures has added to the refuge, and by purchase.

Does that answer the Senator's question?

Mr. NELSON. I am not sure it does. If the sanctuary has been created or the lands acquired for the purpose of creating a sanctuary or a wildlife habitat for an endangered species, very clearly you could not use chemical poisons on that land except upon authorization of the Secretary who would make the finding in the amendment.

I assume it would apply to the elk land referred to, but I do not know what classification they are under.

Mr. HANSEN. My purpose in asking the question is to try to have a better understanding of the amendment. I have posed a hypothetical question. I do not think for a moment this might happen, but sometimes in our enthusiasm it is easy to attain a certain objective that might tie our hands. The trumpeter swan found in that refuge were an endangered species. As far as I know, they are the only endangered species in the elk refuge. I do not think the elk refuge was established because the elk was endangered, but was an important wildlife species which deserved better year-around care than they were getting.

Mr. TUNNEY. Mr. President, I believe the Senator's amendment is designed to achieve a very desirable purpose but during the course of the hearings we never did have an opportunity to get testimony from any party with respect to chemical toxicants and the use of chemical toxicants on sanctuaries. Inasmuch as the Senator's amendment relates also to State sanctuaries and we would be imposing the will of the Secretary of the Interior on State officials as it relates to State sanctuaries. I think the matter should be subject to hearings.

Therefore for the committee, I cannot accept the amendment.

Mr. NELSON. I would like to ask a question. Is there a similar bill under consideration in the other body?

Mr. TUNNEY. Yes. The House will be considering legislation.

Mr. NELSON. On this bill, or do they have a bill of their own?

Mr. TUNNEY. They have one of their own.

Mr. NELSON. Have they finished the hearings on that?

Mr. TUNNEY. Yes.

Mr. NELSON. In view of the Senator's objection, Mr. President, I will withdraw the amendment and if they have not acted on the House side, I will have further comment.

Mr. TUNNEY. I sympathize with the purpose of the Senator's amendment, but I do not see how we can include it without hearings.

Mr. NELSON. Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on agreeing to the committee amendment, as amended, in the nature of a substitute.

The committee amendment, as amended, in the nature of a substitute was agreed to.

The bill was ordered to be engrossed for a third reading, and was read the third time.

Mr. ROTH. Mr. President, I am proud to lend my support to the Endangered Species Act of 1973, a long overdue piece of legislation. The time has come for us to recognize that more than one hundred species and subspecies of wildlife—fish, animals, and birds—as well as forms of plantlife, are being seriously threatened through hunting and trapping, and by man's encroachment on their natural habitats. I encourage support of S. 1983 because it refines previous legislation that this body developed and passed in 1966 and expanded upon in 1969.

The President stated in his environmental message of February 8, 1972, that the existing law "simply does not provide the kind of management tools needed to act early enough to save a vanishing species." In effect, the present law prevents the Government from taking action until a species is virtually extinct. Often, by the time something is done, it is too late to reverse the trend. I support the provisions of this bill and urge your careful consideration. Especially notable in this legislation are its provisions to create a more flexible classification and declassification system, strict civil and criminal penalties, and its acknowledgement of migratory patterns and the need for international cooperation.

The people of Delaware who admire the graceful and inspiring flight of the few American bald eagles remaining in the State, who view with awe the migratory flight of geese, ducks, and swans, hope that the Senate will look favorably upon this measure.

Mr. DOMENICI. Mr. President, today we will vote on S. 1983—the Endangered Species Act of 1973—a bill which provides for the conservation, protection and propagation of now endangered species of fish and wildlife. If implemented, this legislation will save from extinction one of our more valuable natural resources.

In recent years, many citizens of the United States have come to view the various species of wildlife as environmental indicators for their State, and, in a larger context, for the world. These citizens consider wildlife a precious natural resource which, if husbanded and protected, will be one of the factors in our natural surroundings which will endure for generations to follow. These individuals—whether they live in New York City or Chama, N. Mex.—want to be assured that there exists abundance of wildlife "somewhere" in our Nation, as well as to be assured of its continued existence.

The beautiful State of New Mexico has fought hard, although in some cases not hard enough, to protect its environment and its endangered species. The people of my State share a feeling of pride in the fact that they continually strive to preserve the natural—they strive to prevent technology from overriding the natural resources of our State.

In terms of wildlife, there has always been an endangered species for both natural and manmade reasons. Natural population fluctuations of some species have diminished their number to such a low point that they were unable to generate a continued existence. Other species have become so highly specialized that any slight alteration of the habitat spelled doom for their continued existence—experts point out that this natural phenomenon continues today. However, in the "modern age" of man, many experts claim that the possible extinction of numerous species of wildlife has increased by a tremendous factor. In many cases, "progress" for man means threatening disaster or devastating decline for a major portion of our wildlife. I feel the main thrust of our discussion on this legislation should be man's obvious detrimental effect on wildlife to the point of practically guaranteeing its extinction.

We are not here today to discuss individual blame but to plan an immediate solution to insure the life of our endangered species. The advance of man's civilization has proved to be costly to the natural environment. It is a fact that man has been the culprit in bringing certain species to the point of extinction; it would be a double indictment against humanity to ignore the present situation and allow the destruction of our resource of wildlife to continue.

How has man effected wildlife adversely? Some reasons are quite obvious and others more subtle. Many of our land-use practices have destroyed the delicate habitat necessary to maintain a healthy wildlife. Certain intensive agricultural practices, unconcerned with their harmful influence on wildlife, have brought various species to the brink of extinction. All of us in these Chambers have heard of the now infamous golden eagle killings in Colorado and Wyoming. While the golden eagle has been saved from extinction, it was through indiscriminate shooting and treatment that this species was almost lost. In New Mexico, the prairie dog towns have been so decimated that the rare and endangered black-footed ferret is nowhere to be seen. While most naturally harmful organochlorine pesticides have been banned, their effects have been detrimental to various wildlife species, Again, in New Mexico, the peregrine falcon is still trying to recover from DDT poisoning.

Also, man through commercial exploitation of a particular wildlife species has placed some animals in the endangered category. Most of you here today are aware of the disputes within the whaling industry which exist among other nations. While the legislation under consideration takes care of such problems within the United States territorial boundries, we must additionally have a procedure to intervene in such international disputes where the existence of endangered species is at stake.

Under the provisions of this act, there exists various means of recovery that can be instituted on behalf of rare and endangered species. We must demand the continued protection of prime habitat and, where feasible, renew and refurbish deteriorated species. Through the Office of Endangered Species and other Federal agencies, and with the aid and coordination of the various States' fish and game agencies, innovative and intensive programs should be initiated for all endangered species; such management will result in beneficial effects for our wildlife. Finally, various programs of captive propagation would be beneficial for rare and endangered species in order that progeny raised in captivity could be used to replenish the wildlife population.

At the same time, our governmental agencies, in cooperation with biologists and interested citizens, should continue research on the rare and endangered wildlife of our Nation. Continued investigations should be made to determine the population fluctuations of the various species. On the basis of a complete census, efforts should be made to determine which are the limiting factors at the present time and which factors in the future will affect the well-being of our wildlife resource.

Senate bill 1983 addresses itself to rare and endangered wildlife. This legislation is drafted to protect these species, and it suggests a number of ways by which this can be accomplished. Under the authority of the Secretaries of Interior and Commerce, any species which is considered rare or endangered shall be free from molestation by the threat of civil penalty. It also gives authority to the Secretaries to permit continued scientific research into the problems of endangered wildlife. With a broadening of our knowledge concerning the problems of endangered species, maybe we can turn the tide on the uncertain existence of many of these animals. I urge my colleagues in the Senate to support this legislation which will benefit the generations which follow us and our Nation as well.

Mr. PERCY. Mr. President, it is certainly encouraging to me that the Senate is about to move promptly and hopefully unanimously upon S. 1983, the Endangered Species Act of 1973. For too long there has been insufficient means to protect and preserve all the valuable species of wildlife that contribute so much to the quality of life as we know it. S. 1983 will provide the tools we need both to protect animals that are presently endangered and to take the necessary precautions so that additional species are not reduced to the endangered level.

Action in this field reflects both an increased awareness of man's place in the ecosystem and the healthy respect that that awareness must engender. I am pleased that the Senate will take positive action with the adoption of S. 1883 and I am confident that this legislation will go a long way toward preserving our valuable and unfortunately perishable wildlife.

It is my pleasure to report that the State of Illinois has taken a lead in the area of endangered species with the passage of vigorous legislation earlier this year and will have no trouble in complying with the new Federal regulations.

The PRESIDING OFFICER. The bill has been read the third time. The question now is, shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. Cannon) is necessarily absent.

I further announce that the Senator from South Dakota (Mr. Abourezk) is absent on official business.

I also announce that the Senator from Mississippi (Mr. Stennis) is absent because of illness.

I further announce that, if present and voting, the Senator from South Dakota (Mr. Abourezk) would vote "yea."

Mr. GRIFFIN. I announce that the Senator from Oklahoma (Mr. Bellmon) is absent to attend the funeral of a friend.

The Senator from Utah (Mr. Bennett) is necessary absent.

The Senator from New Hampshire (Mr. Cotton) is absent because of illness.

The Senator from Maryland (Mr. Beall) and the Senator from Arizona (Mr. Goldwater) are detained on official business.

The result was announced—yeas 92, nays 0, as follows:

So the bill (S. 1983) was passed, as follows:

S. 1983

An act to provide for the conservation, protection, restoration, and propagation of threatened and endangered species of fish, wildlife, and plants, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Endangered Species Ac of 1973".

DECLARATION OF POLICY

SEC. 2. (a) FINDINGS.—The Congress finds and declares that—

(1) various species of fish, wildlife, and plants in the United States have been rendered extinct as a consequence of economic growth and development untempered by adequate concern and conservation;

(2) other species of fish, wildlife and plants have been so depleted in numbers that they are in danger of or threatened with extinction;

(3) these species of fish, wildlife and plants are of esthetic, ecological, educational, historical, recreational, and scientific value to the Nation and its people;

(4) the United States has pledged itself as a sovereign state in the international community to conserve and protect to the extent practicable the various species of fish or wildlife and plants facing extinction, pursuant to—

(A) migratory bird treaties with Canada and Mexico;

(B) the Migratory and Endangered Bird Treaty with Japan;

(C) the Conservation on Nature Protection and Wildlife Preservation in the Western Hemisphere;

(D) the International Convention for the Northwest Atlantic Fisheries;

(E) the International Convention for the High Seas Fisheries of the North Pacific Ocean;

(F) the Convention on International Trade in Endangered Species of Wild Fauna and Flora; and

(G) other international agreements.

(5) encouraging the States and other interested parties, through Federal financial assistance and a system of incentives, to develop and maintain conservation, protection, restoration, and propagation programs which meet national and international standards is a key to meeting the Nation's international commitments and to better safeguarding, for the benefit of all citizens, the Nation's heritage in fish and wildlife.

(b) PURPOSES.—The Congress hereby declares that the purposes and policy of this Act are to—

(1) provide an effective means to conserve, protect, and restore the ecosystems upon which endangered and threatened species of fish or wildlife depend;

(2) provide a viable program for the conservation, protection, restoration, and propagation of endangered and threatened species;

(3) take all appropriate steps to implement the Nation's international commitments with respect to endangered and threatened fish or wildlife; and

(4) insure that all departments, agencies, and instrumentalities of the United States seek, within the scope of their authority and administrative jurisdiction, to protect endangered and threatened species.

DEFINITIONS

SEC. 3. As used in this Act—

(1) "Conservation" and "management" mean the collection and application of biological information for the purposes of increasing and maintaining the number of animals within species and populations of endangered and threatened species at the optimum carrying capacity of their habitat. Such terms include the entire scope of activities that constitute a modern scientific resources program, including, but not limited to, research, census, law enforcement, and habitat acquisition and improvement. Also included within these terms when and where appropriate, is the protection, propagation, conservation and restoration of such species including regulation and taking necessary to these ends.

(2) "Convention" means the Convention on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973, and the appendices thereto.

(3) "Endangered species" means any species of fish or wildlife which is in danger of extinction throughout all or a significant portion of its range, other than a species of the order insectica determined by the Secretary to constitute a pest whose protection under the provisions of this Act would present an overwhelming and overriding risk to man.

(4) "Fish or wildlife" means any living member of the animal kingdom and remains of any dead member of the animal kingdom, including, but not limited to, any mammal, fish, bird, amphibian, reptile, mollusk, crustacean, arthropod or other invertebrate, or any part, egg, or offspring of any such member, or any product produced from any part or parts of the remains of any such member.

(5) "Foreign commerce" includes any transaction—

(A) between persons within one foreign country;

(B) between persons in two or more foreign countries;

(C) between a person within the United States and a person in a foreign country; or

(D) between persons within the United States, where the fish or wildlife involved are moving in any country or countries outside the United States.

(6) "Import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(7) "Optimum carrying capacity" means the ability of a given habitat to support the optimum sustainable population of an endangered or in a healthy state without diminishing the ability of the habitat to continue that function threatened species.

(8) "Optimum sustainable population" means, with respect to any of endangered or threatened species, the number of such species which will result in the maximum productivity of the species, keeping in mind the optimum carrying capacity of the habitat and the health of the ecosystem of which they form a constituent part.

(9) "Person" means an individual, corporation, partnership, trust, association, or any other private entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(10) "Plant" means any member of the plant kingdom, including seeds, roots, or other parts of any such member.

(11) "Secretary" means, except as otherwise provided, the Secretary of the Interior or the Secretary of Commerce in the same manner in which program responsibilities are vested under Reorganization Plan Numbered 4 of 1970. With respect to enforcement of the provisions of this Act and of the Convention, which pertain to the importation of plants, the term means the Secretary of Agriculture.

(12) "Species" includes any subspecies or other group of fish or wildlife of the same species or lesser taxa in common spatial arrangement that interbreed when mature

(13) "State" means any State, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(14) "State agency" means the State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish and wildlife resources within a State.

(15) "Take" means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

(16) "Threatened species" means any species of fish or wildlife which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

(17) "United States", when used in a geographical sense, includes all States.

DETERMINATION OF ENDANGERED OR THREATENED SPECIES

SEC. 4. (a) GENERAL.—The Secretary shall by regulation determine whether any fish or wildlife is an endangered or threatened species as a result of any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

(b) BASIS FOR DETERMINATIONS.—(1) The determinations required by this section shall be made on the basis of the best scientific and commercial data available to the Secretary, including any recommendations that have been made by the Advisory Committee established under subsection (d) of this section and after consultation, as appropriate, with all interested persons and organizations, including affected or knowledgeable Federal, State, and foreign government agencies. In any case in which such determinations involve an indigenous species, the Secretary shall consult with and consider the recommendations of each State involved. In any case in which determinations involve a species which is normally found on the high seas, in lakes, or other waters off the coast of a State of which are customarily harvested by citizens of such a State, the Secretary shall consult with and consider the recommendations of each State involved. In any case in which such determinations involve a species which is normally found in a foreign country or countries or which is harvested from the ocean by citizens of such country or countries, the Secretary shall (where practicable) with the assistance of the Secretary of State, consult with and consider the recommendations of such country or countries.

(2) Fish or wildlife which have been designated as requiring protection from unrestricted commerce by any foreign country, or pursuant to any international agreement, shall receive special and full consideration by the Secretary to determine whether each is an endangered or a threatened species.

(c) LISTS.—(1) The Secretary shall publish in the Federal Register a list of all fish or wildlife determined by him by regulation to be endangered species and a list of all fish or wildlife determined by him by regulation to be threatened species. Such lists may be amended, modified, or revised periodically by regulation. Each list shall refer to each species of fish or wildlife named therein by scientific name and common name or names and shall specify the portion of its range over which it is endangered or threatened.

(2) The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5, United States Code, conduct a review of any listed or unlisted species of fish or wildlife proposed to be removed from or added to either of the lists published pursuant to paragraph (1) of this subsection, but only if he makes and publishes a finding that such person has presented substantial evidence which in his judgment warrants such a review.

(3) Any list of species of fish or wildlife determined to be threatened with extinction, by the Secretary of the Interior pursuant to the Endangered Species Conservation Act of 1969, which is in effect the day before the date of enactment of this Act shall be republished to conform to the appropriate classifications under this Act. Pending reclassification as endangered species or threatened species and republication, any species listed pursuant to the Act of 1969 shall be deemed an endangered species within the meaning of this Act. Such reclassification and republication shall not require a public hearing or comment under section 553 of title 5, United States Code.

(d) ADVISORY COMMITTEE.—(1) The Secretaries shall establish an Advisory Committee on Endangered and Threatened Species to consult with, advise, and make recommendations to him and to the State. The Advisory Committee shall consist of not more than eleven members including a Chairman who shall be appointed by the Secretary from lists of qualified individuals submitted by State fish and wildlife agency administrators, universities, nongovernmental organizations concerned with conservation, and scientific societies. Five of the members shall be regularly employed by State governments or political subdivisions thereof. The terms of office shall be so arranged by the Secretary that each year at least three new members shall be appointed to fill vacancies caused by the expiration of terms of office.

(2) The Advisory Committee shall periodically, but not less than once each year, made recommendations to the Secretary with respect to removal from, addition to, or reclassification within the lists maintained pursuant to subsection (a) of this section and may, with the approval of the Secretary, perform other functions in furtherance of the purposes of this Act. A member of the Advisory Committee who is not otherwise a Government employee may, in the discretion of the Secretary, receive not more than $150 per diem when engaged in the actual performance of his duties. Each member may receive reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of his duties.

(e) PROTECTIVE REGULATIONS.—Whenever the Secretary lists a species of fish or wildlife as a threatened species, pursuant to subsection (a) of this section, he shall issue such regulations as he deems necessary and advisable to provide for the conservation and management of such species. With respect to any threatened species, the Secretary may by regulation prohibit any act prohibited with respect to an endangered species under section 10(a) of this Act.

LAND ACQUISITION

SEC. 5. The Secretary shall establish and implement a program to conserve, protect, restore, and propagate fish or wildlife which are listed as endangered or threatened species pursuant to section 4 of this Act. To carry out such programs, the Secretary—

(a) shall utilize as appropriate the land acquisition and other authorities conferred upon him under the Migratory Bird Conservation Act, the Fish and Wildlife Act of 1956, and the Fish and Wildlife Coordination Act;

(b) may acquire by purchase, donation, or otherwise any lands, waters, or interests therein necessary for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species. Such authority shall be in addition to any other land acquisition authority vested in him;

(c) may use funds made available under the Land and Water Conservation Fund Act of 1965 or under this Act to acquire such lands, waters, or interests therein.

COOPERATION WITH THE STATES

SEC. 6. (a) GENERAL.—In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the States. In addition to all other obligations, the Secretary shall consult with the affected State before the acquisition of any lands, waters, or interests therein for the purpose of conserving, protecting, restoring, or propagating any endangered or threatened species.

(b) MANAGEMENT AGREEMENTS.—The Secretary may enter into an agreement or agreements with any State for the administration and management of any area established for the conservation and management of an endangered or a threatened species. Any revenues derived from the administration of such areas under such agreements shall be subject to section 401 of the Act of June 15, 1935 (16 U.S.C. 715s).

(c) FINANCIAL ASSISTANCE.—The Secretary is authorized to enter into a cooperative agreement in accordance with this subsection to provide financial assistance to any State which establishes and maintains an adequate and active program for the conservation and management of endangered and threatened species. Before the Secretary may enter into or renew such a cooperative agreement to provide financial assistance to a State, he shall make, justify, and publish in the Federal Register a finding that such agreement would further the policy of this Act and that such State has a program under which—

(1) the State agency has statutory and regulatory authority and administrative jurisdiction to manage and protect any species of fish or wildlife which is determined by such agency or the Secretary to be endangered or threatened;

(2) the State has established a State plan, including a management program under the State agency, for all species of resident fish or wildlife which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

(3) the State agency during the first year of the existence of such agreement—

(A) will issue protective regulations;

(B) will employ sufficient trained and qualified personnel; and

(C) will maintain investigation, enforcement, and public education programs, which are adequate, in the Secretary's judgment, for the conservation and management of species of endangered and threatened fish or wildlife;

(4) the State agency is authorized and plans to conduct studies to determine the status and requirements for survival of species of resident fish or wildlife and agrees to transmit a copy of the findings of such studies to the Secretary;

(5) the State agency is authorized and plans to establish programs, including the acquisition of lands, waters, or interests therein, for the conservation and management of endangered and threatened species; and

(6) provision is made for public participation in designating species of resident fish or wildlife as endangered or threatened.

(d) ALLOCATION OF FUNDS.—(1) Funds appropriated for financial assistance pursuant to subsection (c) of this section shall be available to the Secretary for allocation to the States under cooperative agreements. The purposes for which such funds may be used include, but are not limited to, conservation and management. The Secretary shall allocate appropriated funds to such States upon the basis of—

(A) the international commitments of the United States to protect endangered or threatened species;

(B) the readiness of a State to proceed with a conservation and management program consistent with the objectives and purposes of this Act;

(C) the number of endangered and threatened species within a State;

(D) the potential for restoring endangered and threatened species within a State; and

(E) the relative urgency to initiate a program to restore and protect an endangered or threatened species in terms of the survival of the species.

Funds allocated to a State but unexpended or unobligated at the close of the fiscal year shall remain available for expenditure by such State until the close of the succeeding fiscal year. Any funds remaining unobligated or unexpended at the close of the second fiscal year shall remain available to the Secretary for the purpose of this section.

(2) Each cooperative agreement between a State and the Secretary shall provide for—

(A) the actions to be taken by the Secretary and the State;

(B) the benefits that are expected to be derived in connection with preservation and restoration of endangered or threatened species;

(C) the estimated cost of these actions; and

(D) the share of such costs to be borne by the Federal Government and by the States, except that—

(i) the Federal share of such program costs shall not exceed 50 per centum of the estimated program costs stated in the agreement; and

(ii) the Federal share may be increased to 66⅔ per centum whenever two or more States, having a common interest in a program that the Secretary deems to meet the criteria of paragraph (1) of this subsection, enter jointly into an agreement with the Secretary.

The Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon in the cooperative agreement. For the purposes of this section, the non-Federal share may, in the discretion of the Secretary, be in the form of real or personal property, the value of which will be determined by the Secretary, as well as money.

(3) The Secretary is authorized to issue such regulations as may be appropriate to carry out the provisions of this section with respect to financial assistance to States.

(4) For the purposes of this section, there is authorized to be appropriated through the fiscal year ending June 30, 1977, not to exceed $10,000,000.

(e) PERIODIC REVIEW.—The finding made under subsection (c) of this section and any action taken by the Secretary under this section shall be subject to his periodic review, including the consideration of comment from interested persons, at no greater than annual intervals. Upon ninety days' notice in writing to the affected State, the Secretary may terminate in his discretion any cooperative agreement entered into under this section.

(f) STATE ACTION PERMITTED.—Nothing in this Act shall be construed as superseding or limiting the power of any State or political subdivision thereof to enact legislation or regulations more restrictive than or consistent with the provisions of this Act with respect to an endangered or a threatened species: *Provided*, That any State law or regulation regarding the import or export of or the interstate or foreign commerce in an endangered species listed pursuant to section 4 of this Act is void to the extent that it may effectively permit what is prohibited by this Act or its implementing regulations, or prohibit what is authorized pursuant to an exemption or permit provided for in this Act or its implementing regulations. This Act shall not otherwise be construed to void any State law or regulation which is intended to conserve and manage migratory, resident, or introduced fish or wildlife, or to permit or prohibit sale of such fish or wildlife.

INTERAGENCY COOPERATION

SEC. 7. The Secretary shall review all programs administered by him and utilize such programs in furtherance of the policy of this Act. All other departments, agencies, and instrumentalities of the Federal Government shall, in consultation with and with the assistance of the Secretary—

(a) carry out such programs as are practicable for the protection of species listed, pursuant to section 4 of this Act, as endangered or threatened;

(b) take such actions as is necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of any endangered or threatened species, or result in the destruction or modification of any habitat of such species which is determined by the Secretary, after consultation to the extent appropriate and necessary with affected States, to be a critical habitat of such species.

INTERNATIONAL COOPERATION

SEC. 8. (a) FINANCIAL ASSISTANCE.—As a demonstration of the commitment of the United States to the worldwide protection of endangered and threatened species, the President may, subject to the provisions of section 1415 of the Supplemental Appropriation Act, 1953 (31 U.S.C. 724), use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistance Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and management of programs in that country which the Secretary determines to be necessary or useful for the conservation, protection, restoration, or propagation of any endangered or threatened species listed by the Secretary pursuant to section 4 of this Act: *Provided*, That no funds other than foreign currencies available for expenditure only within such foreign country shall be used pursuant to this section. The President shall provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, waters, or interests therein) to foreign countries under this section upon such terms and conditions as he deems appropriate.

(b) ENCOURAGEMENT.—In order to carry out further the provisions of this Act, the Secretary, with the assistance of the Secretary of State, shall encourage—

(1) foreign countries to provide for the protection, conservation, restoration, or propagation of fish or wildlife, including endangered and threatened species listed pursuant to section 4 of this Act;

(2) the entering into of bilateral or multilateral agreements for foreign countries to provide for such protection, conservation, restoration, or propagation; and

(3) foreign persons, who directly or indirectly take fish or wildlife in foreign countries or on the high sea for importation into the United States for commercial or other purposes, to develop and carry out, with such assistance as he may provide, conservation practices designed to enhance such fish, wildlife and plants and their habitat.

(c) PERSONNEL.—After consultation with the Secretary of State, the Secretary may—

(1) assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign countries and international organizations in developing personnel resources and programs which promote the protection, conservation, restoration, or propagation of fish or wildlife; and

(2) conduct or provide financial assistance for the educational training of foreign personnel, in this country or abroad, in fish, wildlife or plant management, research, and law enforcement, and to render professional assistance abroad in such matters.

(d) INVESTIGATIONS.—After consultation with the Secretary of State and the Secretary of the Treasury, as appropriate, the Secretary may conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the purposes of this Act.

(e) CONVENTION IMPLEMENTATION.—The President is authorized and directed to designate appropriate agencies to act as the Management Authority or Authorities and the Scientific Authority or Authorities pursuant to the Convention. The agencies so designated shall thereafter be authorized to do all things assigned to them under the Convention, including the issuance of permits and certificates. The agency designated by the President to communicate with other parties to the Convention and with the Secretariat shall also be empowered, in consultation with the State Department, to act on behalf of and represent the United States in all regards as required by the Convention.

REGULATIONS, PROCEDURE, AND JUDICIAL REVIEW

SEC. 9. (a) REGULATIONS.—The Secretary shall publish any regulations proposed under this Act in the Federal Register at least sixty days prior to the time when such regulations shall become final, except that in case of an emergency the Secretary may publish such regulations not less than thirty days prior to the time when such regulations shall become final if at the same time he publishes in the Federal Register detailed reasons why emergency action is necessary. The

Secretary shall also publish in the Federal Register a notice of all petitions received pursuant to this Act and, if such petition is denied, his reasons therefor. Such notice shall identify the purpose of the petition and include a statement of the availability of any data submitted in support of such petition. If any person adversely affected by a proposed regulation files objections and requests a public hearing within forty-five days of the date of publication of the proposed regulation, the Secretary shall grant such request. If such public hearing is held, final regulations shall not be promulgated by the Secretary until after the conclusion of such hearing. All public hearings authorized by this subsection shall consist of the oral and written presentation of data or arguments in accordance with such conditions or limitations as the Secretary may make applicable thereto. Proposed and final regulations issued under this Act shall set forth findings of fact on which the regulations are based and shall state the relationship of such findings to the regulations issued.

(b) PROCEDURE.—Except as expressly modified by this section, the provisions of the Administrative Procedure Act (5 U.S.C. 551 et seq.) shall apply to proceedings conducted by the Secretary under this Act: *Provided*, That the provisions of this section shall not apply to the extent necessary to permit emergency action by the Secretary. Notice of and reasons for such action shall be published prior to such action in the Federal Register.

(c) JUDICIAL REVIEW.—(1) Any judicial review of final regulations promulgated under this Act and final actions under section 5(c) of this Act shall be in accordance with sections 701–706 of title 5, United States Code, except that—

(A) with respect to regulations promulgated under section 4 or 6 of this Act, the findings of the Secretary as to the facts shall be sustained if based upon substantial evidence on the record considered as a whole; and

(B) with respect to relief pending review, no stay of an action may be granted unless the reviewing court determines that the party seeking such stay—

(i) is likely to prevail on the merits in the review proceeding, and

(ii) will suffer irreparable harm pending such proceeding.

(2) If the party seeking judicial review applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court either that—

(A) the information is material and was not available at the time of the proceeding before the Secretary; or

(B) failure to include such evidence in the proceeding was an arbitrary or capricious act of the Secretary, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Secretary, and to be adduced upon the hearing, in such manner and upon such terms and conditions as the court may deem proper. The Secretary may modify his findings, by reason of the additional evidence so taken, and he shall file with the court such modified or new findings and his recommendation, if any, for the modification or setting aside of his original order.

(d) AUDIT.—(1) Each recipient of Federal assistance under this Act, pursuant to grants, subgrants, contracts, subcontracts, loans, or other arrangements, entered into other than by formal advertising, and which are otherwise authorized by this Act, shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, the amount of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall, until the expiration of three years after completion of the project or undertaking referred to in paragraph (1) of this subsection of this section, have access for the purpose of audit and examination to any books, documents, papers, and records of such receipts which in the opinion of the Secretary or the Comptroller General may be related or pertinent to the grants, subgrants, contracts, subcontracts, loans or other arrangements referred to in subsection (a).

UNLAWFUL CONDUCT

SEC. 10. (a) PROHIBITED ACTS.—Except as provided in section 11 of this Act, it is unlawful for any person subject to the jurisdiction of the United States to—

(1) import into, or export from, the United States any endangered species which has been listed pursuant to section 4 of this Act;

(2) take any such species within the United States or in the territorial sea of the United States or upon the high seas;

(3) possess, sell, deliver, carry, transport, ship, or receive, by any means whatever, any such species which are taken in violation of paragraph (2) of this subsection;

(4) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and for commercial purposes, any such species;

(5) sell, distribute, or offer for sale in foreign commerce, interstate commerce, or activity affecting interstate commerce any endangered species of fish or wildlife;

(6) attempt to commit, solicit another to commit, or cause to be committed, any act prohibited by paragraphs (1) through (5) of this subsection;

(7) engage in any trade in any specimens of fish, wildlife, or plants, contrary to the provisions of the Convention, or possess any specimens traded contrary to the provisions of the Convention, including the definitions in article I therein;

(8) violate any regulation which is promulgated by the Secretary pursuant to section 4(e) of this Act; or

(9) import into or export from the United States except at a port or ports designated by the Secretary, any fish or wildlife, except nonendangered and nonthreatened shellfish and fishery products which are imported or exported for human or animal consumption, or fish or wildlife taken for recreational purposes pursuant to applicable Federal or State laws and regulations in waters under United States jurisdiction or on the high seas.

To facilitate enforcement of this paragraph and to reduce the costs of enforcement, the Secretary, with the approval of the Secretary of the Treasury and after notice and opportunity for public hearing, may, by regulation, designate ports and change such designations. Upon such terms and conditions as he may prescribe, the Secretary may permit such importation at nondesignated ports in the interest of the health or safety of the fish or wildlife or for any other reasons he deems appropriate. Any port designated by the Secretary of the Interior under the authority of section 4(d) of the Act of December 5, 1969 (16 U.S.C. 666cc–4(d)), shall, if such designation is in effect on the day before the date of the enactment of this Act, be deemed to be a port designated by the Secretary under this paragraph until such time as the Secretary otherwise provides.

(b) SIMILARITY OF APPEARANCE CASES.—The Secretary may, by regulation, and to the extent he deems advisable, treat any species of fish or wildlife as an endangered or threatened species even though it is not listed pursuant to section 4 of this act if he finds that--

(A) such species so closely resembles in appearance, at the point in question, a species which has been listed pursuant to such section that enforcement personnel would have substantial difficulty in attemping to differentiate between the listed and unlisted species;

(B) the effect of this substantial difficulty is an additional threat to an endangered or threatened species; and

(C) such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of this Act.

(c) SPECIES HELD IN CAPTIVITY OR CONTROLLED ENVIRONMENT.—The provisions of this section shall not apply to any species held in captivity or in a controlled environment on the effective date of this Act if the purposes of such holding are not contrary to the purposes of this act.

EXCEPTIONS

SEC. 11. (a) GENERAL.—Upon a finding that the excepted conduct will not adversely affect the regenerative capacity of the involved species in a significant portion of its range or habitat or otherwise affect the survival of the wild population of such species, and upon such terms and conditions as he may prescribe, the Secretary may issue permits authorizing the importation, exportation, taking, or transportation, by persons found to be qualified, of any fish or wildlife which is listed as an endangered or threatened species pursuant to section 4 of this act for—

(1) for scientific purposes in furtherance of the purposes of this act; or

(2) to enhance the propagation or survival of the affected species including the propagation of such species in captivity or in a controlled habitat.

(b)(1) HARDSHIP.—The Secretary may except from the application of section 10(a) of this Act any person if the failure to grant such exception will cause undue economic hardship: *Provided*, That such exception shall be granted any non-Native resident of an Alaska Native village unless such resident is found by the Secretary not to be primarily dependent upon the taking of fish and wildlife for consumption or use in a Native community or for creating and selling authentic Native articles of handicrafts. The extent and duration of such exception shall be such as the Secretary deems appropriate: *Provided*, No such exception shall be for a duration of more than one year from the date of publication in the Federal Register of notice of proposed listing of the involved species. No exception shall apply to a quantity of fish or wildlife in excess of that specified by the Secretary. No such exception shall be granted unless such person, except non-Native residents of Alaska Native villages who are primarily dependent upon the taking of fish and wildlife for subsistence purposes, applies to the Secretary in writing and furnishes with such application such information as the Secretary may require to prove hardship. The one year period for those species of fish and wildlife which were listed by the Secretary as endangered prior to the effective date of this Act shall expire in accordance with the terms of section 3 of the Act of December 5, 1969 (83 Stat. 275). No such exemption may be granted for the importation or exportation of a specimen listed in appendix I of the Convention which is to be used for primarily commercial purposes.

(2) As used in this subsection, the term "undue economic hardship" shall include, but not be limited to:

(A) Substantial economic loss resulting from inability caused by this Act to perform contracts with respect to species of fish and wildlife entered into prior to the date of publication in the Federal Register of a notice of a proposed listing of such species as an endangered or threatened species.

(B) Substantial economic loss to persons who, for the year prior to the listing of a species under this Act derived a substantial portion of their income from the lawful taking of any listed species which taking would be made unlawful under this Act; or

(C) Curtailment of subsistence taking made unlawful under this Act by persons (i) not reasonably able to secure other sources of subsistence; and (ii) dependent to a substantial extent upon hunting and fishing for subsistence; and (iii) who must engage in such curtailed taking for subsistence purposes.

(3) The Secretary may make further requirements for a showing of undue economic hardship as he deems fit. Exceptions granted under this section may be limited by the Secretary in his discretion as to time, area, or other factor of applicability.

(c) PROCEDURE.—(1) The Secretary shall publish a notice in the Federal Register of each application for an exception. Each notice shall invite the submission from interested parties within thirty days after the date of the notice, of written data, views, or arguments with respect to the application. Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.

(2) The Secretary may grant exceptions under subsections (a) and (b) of this section only if he finds, and publishes such finding in the Federal Register, that such exceptions were applied for in good faith and if granted and exercised will not operate to the disadvantage of such endangered or threatened species and will be consistent with the policy of this Act.

(d) ALASKA NATIVES.—(1) The provisions of this Act shall not apply with respect to the taking of any endangered or threatened species by any Indian, Aleut, or Eskimo who is an Alaskan native who resides in Alaska if such taking is for the purpose of consumption or use in a native community or for the purpose of selling or creating for sale in interstate commerce authentic native articles of handicrafts and clothing: *Provided*, That in each case such taking is not accomplished in a wasteful manner. As used in this paragraph—

(A) "consumption or use in a native community" includes selling any edible portion of fish or wildlife in native villages and towns in Alaska for native consumption within native villages or towns; and

(B) "authentic native articles of handicrafts and clothing" means items composed wholly or in some significant respect of natural materials, and which are produced, decorated or fashioned in the exercise of traditional native handicrafts without the use of pantographs, multiple carvers, or other mass copying devices. Traditional native handicrafts include but are not limited to, weaving, carving, stitching, sewing, lacing, beading, drawing, and painting.

(2) Notwithstanding the provisions of paragraph (1) of this subsection, whenever the Secretary determines that any species of fish or wildlife which is subject to taking by Indians, Aleuts, or Eskimos is an endangered or threatened species, and that such taking materially and negatively affects the threatened and endangered species, he may prescribe regulations upon the taking of such species by any such Indian, Aluet, or Eskimo. Such regulations may be established with reference to species, geographical description of the area included, the season for taking, or any other factors related to the reason for establishing such regulations and consistent with the policy of this Act. Such regulations shall be prescribed after a notice and hearings in the affected judicial districts of Alaska and as otherwise required by section 103 of the Marine Mammal Protection Act of 1972, and shall be removed as soon as the Secretary determines that the need for their imposition has disappeared: *Provided*, That no such regulation shall be established which is in contravention of any provision of the Marine Mammal Protection Act of 1972.

PENALTIES AND ENFORCEMENT

SEC. 12. (a) CIVIL PENALTY.—(1) Any person who—

(A) knowingly violates any provision of this Act or any regulation or permit issued under this Act, which prohibits the taking, importing, exporting, shipping, receiving, or otherwise moving in interstate or foreign commerce of any endangered or threatened species of fish or wildlife, or commits any act made unlawful under section 10(a) of this Act, may be assessed a civil penalty by the Secretary of not more than $10,000 for each violation;

(B) commits any act made unlawful under section 10(a) of this Act, or violates any other provision of this Act, or any regulation or permit issued under this Act, may be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation.

No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each prohibited act is a separate violation. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay a penalty assessed under this subsection, the Secretary may by his own attorneys institute a civil action in a district court of the United States for any district in which such person is found, resides, or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. The court shall hear such action solely on the record made before the Secretary and shall sustain his action if it is supported by substantial evidence on the record considered as a whole.

(2) Hearings held during proceedings for the assessment of civil penalties authorized by paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5, United States Code. The Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(b) CRIMINAL VIOLATION.—(1) Any person who knowingly and willfully violates any provision of this Act, or of any regulation or permit issued thereunder, shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both.

(2) The head of any Federal agency which has issued a lease, license, permit, or other agreement authorizing the use of Federal lands, including grazing of domestic livestock, to any person who is convicted under paragraph (1) of this subsection may immediately modify, suspend, or revoke such lease, license, permit, or other agreement. The Secretary may suspend, cancel, or refuse to issue for a period of up to one year Federal hunting or fishing permits or stamps with respect to any person who is convicted under paragraph (1) of this subsection.

The United States shall not be liable to pay any compensation, reimbursement, or damages in connection with any such modification, suspension, or revocation made pursuant to this section of any lease, license, permit, stamp, or other agreement.

(c) Rewards.—Upon the recommendation of the Secretary, the Secretary of the Treasury is authorized to pay an amount equal to one-half of the civil penalty or fine paid, but not to exceed $2,500, to any person who furnishes information which leads to a finding of civil violation or a conviction of a criminal violation of any provision of this Act or any regulation or permit issued thereunder. Any officer or employee of the United States or of any State or local government who furnishes information or renders service in the performance of his official duties shall not be eligible for payment under this section.

(d) Enforcement.—(1) The provisions of this Act and any regulations or permits issued under this Act shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all Secretaries. Each such Secretary may utilize, by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency for purposes of enforcing this Act.

(2) The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulation issued thereunder.

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, in furtherance of the enforcement of this Act may execute and serve any arrest warrant, search warrant, or other warrant of civil or criminal process issued by any officer or court of competent jurisdiction. A person so authorized may search and seize, with or without a warrant, to the extent authorized by law. Any fish, wildlife, property, or item so seized shall be held by any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, property, or item pursuant to paragraph (4) of this subsection, except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

(4) All fish or wildlife, or plants taken, possessed, sold, purchased, offered for sale or purchase, transported, delivered, received, carried, shipped, exported or imported contrary to the provisions of this Act, any regulation issued under this Act, or any permit issued thereunder, and all guns, traps, nets, and other equipment, vessels, vehicles, aircraft, and other means of transportation used to aid the taking, possessing, selling, purchasing, offering for sale or purchase, transporting, delivering, receiving, carrying, shipping, exporting or importing of any fish or wildlife or plants in violation of this Act, any regulation made pursuant thereto, or any permit issued thereunder shall be subject to forfeiture to the United States.

(5) All provisions of law relating to the seizure, forfeiture, and condemnation of a vessel for violation of the customs laws, the disposition of such vessel or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act. The powers, rights, and duties conferred or imposed by the cutsoms laws upon any officer or employee of the Treasury Department shall, for purposes of this Act, be exercised or performed by the Secretary or by such persons as he may designate.

(e) Registration.—(1) Any person who engages to any extent in business as an importer of fish or wildlife must register with the Secretary of the Treasury his name and the address of each place of business at which, and all trade names under which, he conducts such business.

(2) Any person required to register with the Secretary of the Treasury under paragraph (1) of this subsection shall—

(A) keep such records as will fully and correctly disclose each importation or exportation of fish or wildlife except nonendangered and nonthreatened shell fish or fishery products which are imported or exported for human or animal consumption or recreational purposes, made by him and the subsequent disposition made by him with respect to such fish or wildlife; and

(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his places of business, an opportunity to examine his inventory of imported fish or wildlife and the records required to be kept under subparagraph (A) of this paragraph and to copy such records.

(3) The Secretary of the Treasury, after consultation with the Secretary, shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.

(f) ENFORCEMENT REGULATIONS.—(1) The Secretary, the Secretary of the Treasury, and the Secretary of the Department in which the Coast Guard is operating, are authorized to promulgate such regulations as may be appropriate to enforce this Act, and to charge reasonable fees for expenses to the Government connected with permits authorized by this Act, including processing applications and reasonable inspections, and the transfer, board, handling, or storage of fish, wildlife, or plants and evidentiary items seized and forfeited under this Act. All fees collected pursuant to this subsection shall be deposited in the Treasury to the credit of the appropriation which is current and chargeable for the cost of furnishing and services. Appropriated funds may be expended pending reimbursement from parties in interest.

(g) CITIZEN SUITS.—(1) Except as provided in paragraph (2) of this subsection, any person may commence a civil suit on his own behalf to enjoin any person, including the United States and any other governmental instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution), who is alleged to be in violation of any provision of this Act or regulation issued under the authority thereof. The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any such provision or regulation, as the case may be.

(2) No action may be commenced—

(A) prior to sixty days after written notice of the violation has been given to the Secretary, and to any alleged violator of any such provision or regulation;

(B) if the Secretary has commenced action to impose a penalty pursuant to subsection (a) of this section; or

(C) if the United States has commenced and is diligently prosecuting a criminal action in a court of the United States or a State to redress a violation of any such provision or regulation.

(3)(A) Any suit under this subsection may be brought in the judicial district in which the violation occurs.

(B) In any such suit under this subsection in which the United States is not a party, the Attorney General, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

(4) The court, in issuing any final order in any suit brought pursuant to paragraph (1) of this subsection may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(5) The injunctive relief provided by this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or limitation or to seek any other relief (including relief against the Secretary or a State agency).

(h) COORDINATION.—The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act with the administration of the animal quarantine laws (21 U.S.C. 101–105, 111–135b, and 612–614 and section 306 of the Tariff Act of 1930 (19 U.S.C. 1306). Nothing in this Act or any amendment made by this Act, shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations or possession of animals and other articles. No proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture. Nothing in this Act shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, including, but not limited to, section 527 of such Act (19 U.S.C. 1527), relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.

ENDANGERED PLANTS

Sec. 13. The Secretary of Agriculture, in conjunction with other affected agencies, is authorized and directed to review species of plants which are endangered or threatened, and methods of providing adequate protection including legislation for such species. He shall report the results of such review to Congress, not later than one year after the date of enactment of this Act. For purposes of this section, there is authorized to be appropriated not to exceed $250,000.

CONFORMING AMENDMENTS

Sec. 14. (a) Section 4(c) of the Act of October 15, 1966 (80 Stat. 928, 16 U.S.C. 668dd(c)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered and threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of such Act nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the System."

(b) Section 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224, 16 U.S.C. 715i(a)) and section 401(a) of the Act of June 15, 1935 (49 Stat. 383, 16 U.S.C. 715s(a)) are each amended by striking out "threatened with extinction," and inserting in lieu thereof the following: "listed pursuant to section 4 of the Endangered Species Act of 1973 as endangered or threatened species.".

(c) Section 6(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601–9(a)(1)) is amended by striking out:

"Threatened Species.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction." and inserting in lieu thereof the following:

"Endangered and Threatened Species.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5 of the Endangered Species Act of 1973, needed for the purpose of conserving, protecting, restoring, or propagating endangered or threatened species of fish, wildlife, or plants."

(d) The first sentence of section 2 of the Act of September 28, 1962 (76 Stat. 653; 16 U.S.C. 406k–1), is amended to read as follows:

"Sec. 2. The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—

"(1) incidental fish- and wildlife-oriented recreational development,

"(2) the protection of natural resources,

"(3) the conservation of endangered or threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973, or

"(4) carrying out two or more of the purposes set forth in paragraphs (1) through (3) of this section, and are adjacent to, or within, the said conservation area, except that the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps."

(e) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) is amended—

(1) by striking out "Endangered Species Conservation Act of 1969" in section (1)(B) thereof and inserting in lieu thereof the following: "Endangered Species Act of 1973";

(2) by striking out "pursuant to the Endangered Species Conservation Act of 1969" in section 101(a)(3)(B) thereof and inserting in lieu thereof the following: "or threatened species pursuant to the Endangered Species Act of 1973";

(3) by striking out "endangered under the Endangered Species Conservation Act of 1969" in section 102(b)(3) thereof and inserting in lieu thereof the following: "an endangered or a threatened species pursuant to the Endangered Species Act of 1973"; and

(4) by striking out "Endangered Species List, authorized by the Endangered Species Conservation Act of 1969," in section 202(a)(6) thereof and inserting in lieu thereof the following: "endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered Species Act of 1973".

(f) Section 2(1) of the Federal Environmental Pesticide Control Act of 1972 (Public Law 92–516) is amended by striking out the words "by the Secretary of the Interior under Public Law 91–135" and inserting in lieu thereof the words "or threatened by the Secretary pursuant to the Endangered Species Act of 1973".

REPEALER

SEC. 15. The Endangered Species Conservation Act of 1969 (sections 1 through 3 of the Act of October 15, 1966, and sections 1 through 6 of the Act of December 5, 1969; 16 U.S.C. 668aa—668cc-6) is repealed.

APPLICABILITY WITHIN STATES

SEC. 16. (a) STATE PLAN.—By the end of the first year after the date of enactment of this Act, a State may establish a plan for endangered and threatened species in accordance with this Act. A plan is in accordance with this Act if it meets or exceeds the requirements set forth in section 6(c) of this Act and represents an effective response to the Nation's need to conserve, protect, restore, and propagate endangered and threatened species of fish or wildlife. Upon the establishment of such a plan, the Governor or the head of the State agency shall promptly transmit a certified copy to the Secretary.

(b) DETERMINATION BY SECRETARY.—Within ninety days after the Secretary receives a certified copy of a State plan established under subsection (a) or subsection (d) of this section, the Secretary shall make a determination whether such State has established a plan for endangered and threatened species in accordance with this Act. Unless the Secretary determines, pursuant to this section, that a State plan is not in accordance with this Act, the plan shall go into effect in such State on the date designated in the plan. In no event shall such State plan go into effect less than three months or more than nine months after the date of its establishment.

(c) PERIODIC REVIEW.—The Secretary shall periodically, but not less than once every three years, review each State plan for endangered and threatened species which has been approved under subsection (b) of this section and for which there is experience, to determine whether such plan is still in accordance with this Act and evaluate the success of such plan in terms of the policy of this Act. To facilitate such review, the Governor or the head of the State agency in each such State shall submit to the Secretary periodically all information relevant and requested by the Secretary. The Secretary shall report to the President and Congress simultaneously each year on the results of such reviews, including any recommendations for legislation.

(d) NO STATE PLAN.—Except as to species listed in Appendix I of the Convention, the provisions of this Act regarding the management and taking of any State's resident species shall become applicable in their entirety within a State fifteen months after the date of enactment of this Act unless, prior to such date, the Secretary has made a determination under subsection (b) of this section that such State has established a plan for endangered and threatened species in accordance with this Act: *Provided*, That if, within fifteen months of the date of enactment of this Act, the Secretary finds that a State which does not prevent the taking of a species listed by him as endangered does not provide adequate protection for that species, he may by regulation implement the provisions of subsection 10(a) of this Act with respect to that species in that State. If, at any time thereafter, the Secretary upon petition makes a determination, pursuant to subsection (b) of this section, that a State has established a plan for endangered and threatened species in accordance with this Act, such plan shall go into effect and the provisions of this Act regarding the conservation and management of any species shall cease to be applicable or in effect within such State on a date to be designated by the Secretary. If, after a State plan in accordance with this Act is in effect within a State, the Secretary makes a determination, pursuant to subsection (c) of this section, that such plan is no longer in accordance with this Act, the provisions of this Act regarding the management and taking of any species shall go into effect within such State and such plan shall cease to be in effect on a date to be designated by the Secretary.

(e) PROCEDURE.—(1) Before making any determination under this section, the Secretary shall publish a notice in the Federal Register and afford the State and all interested parties a reasonable opportunity to present their views by oral and written submission.

(2) The Secretary shall notify in writing the Governor of the affected State of any determinations made under this section and shall publish these determinations with reasons therefor in the Federal Register.

(3) Any determinations made by the Secretary under this section shall be subject to judicial review in accordance with chapter V of title 5, United States Code, in the United States court of appeals for the circuit in which is located the State whose plan is the subject of such determination or in the United States Court of Appeals for the District of Columbia Circuit. Any such review shall be instituted within sixty days from the date on which the determination made by the Secretary is published in the Federal Register.

(f) EFFECTIVE DATE.—Except as otherwise provided in this section, the provisions of this Act shall become effective in their entirety upon the date of enactment of this Act.

MARINE MAMMALS ACT

SEC. 17. CONFLICTS.—Except as otherwise provided in this Act, no provision of this Act shall take precedence over any more restrictive conflicting provision of the Marine Mammal Protection Act of 1972.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 18. For purposes of this Act, other than section 6 and section 13 of this Act, there are authorized to be appropriated such sums as are necessary, not to exceed $3,960,000 for the fiscal year ending June 30, 1974; not to exceed $6,660,000 for the fiscal year ending June 30, 1975; and not to exceed $8,870,000 for the fiscal year ending June 30, 1976.

SEC. 19. (a) That, in accordance with section 3(b) of the Wilderness Act (78 Stat. 892; 16 U.S.C. 1132(b)), those lands in the Daniel Boone National Forest, Kentucky, comprising the Pioneer Weapons Hunting Area and consisting of approximately seven thousand three hundred acres, are hereby designated as wilderness.

(b) As soon as practicable after this Act takes effect, a map of the wilderness area and a description of its boundaries shall be filed with the Interior and Insular Affairs Committee of the United States Senate and House of Representatives and such map and description shall have the same force and effect as if included in this Act: *Provided, however*, That correction of clerical and typographical errors in such legal description and map may be made. A copy of such map and description shall be on file and available for public inspection in the offices of the Chief, Forest Service, United States Department of Agriculture.

(c) The wilderness area designated by this Act shall be known as the Cave Run Wilderness and shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness areas, except that any reference in such provisions, to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

(d) Nothing in this Act or the Wilderness Act shall be construed as precluding the construction of a Zilpo recreation site access road generally on a route extending northward from Forest Development Road Numbered 129 generally skirting the eastern boundary of the Pioneer Weapons Hunting Area, or as affecting or modifying in any manner the 1962 Cooperative Management Plan between the Department of Fish and Wildlife Resources of the State of Kentucky and the Department of Agriculture involving the designation of the Pioneer Weapons Hunting Area within the Daniel Boone National Forest.

The title was amended, so as to read: "A bill to provide for the conservation, restoration, and propagation of threatened and endangered species of fish, wildlife, and plants, and for other purposes."

Mr. TUNNEY. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the bill, S. 1983, which was just passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

93D CONGRESS } HOUSE OF REPRESENTATIVES { REPORT
1st Session } { No. 93-740

ENDANGERED SPECIES ACT OF 1973

DECEMBER 19, 1973.—Ordered to be printed

Mrs. SULLIVAN, from the committee of conference,
submitted the following

CONFERENCE REPORT

[To accompany S. 1983]

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1983), to provide for the conservation, protection, restoration, and propagation of threatened and endangered species of fish, wildlife, and plants, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

That this Act may be cited as the "Endangered Species Act of 1973".

TABLE OF CONTENTS

Sec. 2. Findings, purposes, and policy.
Sec. 3. Definitions.

Sec. 17. Marine Mammal Protection Act of 1972.

FINDINGS, PURPOSES, AND POLICY

Sec. 2. (a) Findings.—The Congress finds and declares that—

(1) various species of fish, wildlife, and plants in the United States have been rendered extinct as a consequence of economic growth and development untempered by adequate concern and conservation;

(2) other species of fish, wildlife, and plants have been so depleted in numbers that they are in danger of or threatened with extinction;

(3) these species of fish, wildlife, and plants are of esthetic, ecological, educational, historical, recreational, and scientific value to the Nation and its people;

(4) the United States has pledged itself as a sovereign state in the international community to conserve to the extent practicable the various species of fish or wildlife and plants facing extinction, pursuant to—

- *(A) migratory bird treaties with Canada and Mexico;*
- *(B) the Migratory and Endangered Bird Treaty with Japan;*
- *(C) the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere;*
- *(D) the International Convention for the Northwest Atlantic Fisheries;*
- *(E) the International Convention for the High Seas Fisheries of the North Pacific Ocean;*
- *(F) the Convention on International Trade in Endangered Species of Wild Fauna and Flora; and*
- *(G) other international agreements.*

(5) encouraging the States and other interested parties, through Federal financial assistance and a system of incentives, to develop and maintain conservation programs which meet national and international standards is a key in meeting the Nation's international commitments and to better safeguarding, for the benefit of all citizens, the Nation's heritage in fish and wildlife.

(b) Purposes.—The purposes of this Act are to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved, to provide a program for the conservation of such endangered species and threatened species, and to take such steps as may be appropriate to achieve the purposes of the treaties and conventions set forth in subsection (a) of this section.

(c) Policy.—It is further declared to be the policy of Congress that all Federal departments and agencies shall seek to conserve endangered species and threatened species and shall utilize their authorities in furtherance of the purposes of this Act.

DEFINITIONS

Sec. 3. For the purposes of this Act—

(1) The term "commercial activity" means all activities of industry and trade, including, but not limited to, the buying or selling of commodities and activities conducted for the purpose of facilitating such buying and selling.

(2) The terms "conserve", "conserving", and "conservation" mean to use and the use of all methods and procedures which are

necessary to bring any endangered species or threatened species to the point at which the measures provided pursuant to this Act are no longer necessary. Such methods and procedures include, but are not limited to, all activities associated with scientific resources management such as research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation, and, in the extraordinary case where population pressures within a given ecosystem cannot be otherwise relieved, may include regulated taking.

(3) The term "Convention" means the Convention on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973, and the appendices thereto.

(4) The term "endangered species" means any species which is in danger of extinction throughout all or a significant portion of its range other than a species of the Class Insecta determined by the Secretary to constitute a pest whose protection under the provisions of this Act would present an overwhelming and overriding risk to man.

(5) The term "fish or wildlife" means any member of the animal kingdom, including without limitation any mammal, fish, bird (including any migratory, nonmigratory, or endangered bird for which protection is also afforded by treaty or other international agreement), amphibian, reptile, mollusk, crustacean, arthropod or other invertebrate, and includes any part, product, egg, or offspring thereof, or the dead body or parts thereof.

(6) The term "foreign commerce" includes, among other things, any transaction—

(A) between persons within one foreign country;

(B) between persons in two or more foreign countries;

(C) between a person within the United States and a person in a foreign country; or

(D) between persons within the United States, where the fish and wildlife in question are moving in any country or countries outside the United States.

(7) The term "import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(8) The term "person" means an individual, corporation, partnership, trust, association, or any other private entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(9) The term "plant" means any member of the plant kingdom, including seeds, roots and other parts thereof.

(10) The term "Secretary" means, except as otherwise herein provided, the Secretary of the Interior or the Secretary of Commerce as program responsibilities are vested pursuant to the provisions of Reorganization Plan Numbered 4 of 1970; except that with respect to the enforcement of the provisions of this Act and the Convention which pertain to the importation or exportation of terrestrial plants, the term means the Secretary of Agriculture.

(11) The term "species" includes any subspecies of fish or wildlife or plants and any other group of fish or wildlife of the same species or smaller taxa in common spatial arrangement that interbreed when mature.

(12) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(13) The term "State agency" means the State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish or wildlife resources within a State.

(14) The term "take" means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

(15) The term "threatened species" means any species which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

(16) The term "United States", when used in a geographical context, includes all States.

DETERMINATION OF ENDANGERED SPECIES AND THREATENED SPECIES

SEC. 4. (a) GENERAL.—(1) The Secretary shall by regulation determine whether any species is an endangered species or a threatened species because of any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

(2) With respect to any species over which program responsibilities have been vested in the Secretary of Commerce pursuant to Reorganization Plan Numbered 4 of 1970—

(A) in any case in which the Secretary of Commerce determines that such species should—

(i) be listed as an endangered species or a threatened species, or

(ii) be changed in status from a threatened species to an endangered species,

he shall so inform the Secretary of the Interior, who shall list such species in accordance with this section;

(B) in any case in which the Secretary of Commerce determines that such species should—

(i) be removed from any list published pursuant to subsection (c) of this section, or

(ii) be changed in status from an endangered species to a threatened species,

he shall recommend such action to the Secretary of the Interior, and the Secretary of the Interior, if he concurs in the recommendation, shall implement such action; and

(C) the Secretary of the Interior may not list or remove from any list any such species, and may not change the status of any such species which are listed, without a prior favorable determination made pursuant to this section by the Secretary of Commerce.

(b) BASIS FOR DETERMINATIONS.—(1) The Secretary shall make determinations required by subsection (a) of this section on the basis of the best scientific and commercial data available to him and after consultation, as appropriate, with the affected States, interested persons and organizations, other interested Federal agencies, and, in cooperation with the Secretary of State, with the country or countries in which the species concerned is normally found or whose citizens harvest such species on the high seas; except that in any case in which such determinations involve resident species of fish or wildlife, the Secretary of the Interior may not add such species to, or remove such species from, any list published pursuant to subsection (c) of this section, unless the Secretary has first—

(A) published notice in the Federal Register and notified the Governor of each State within which such species is then known to occur that such action is contemplated;

(B) allowed each such State 90 days after notification to submit its comments and recommendations, except to the extent that such period may be shortened by agreement between the Secretary and the Governor or Governors concerned; and

(C) published in the Federal Register a summary of all comments and recommendations received by him which relate to such proposed action.

(2) In determining whether or not any species is an endangered species or a threatened species, the Secretary shall take into consideration those efforts, if any, being made by any nation or any political subdivision of any nation to protect such species, whether by predator control, protection of habitat and food supply, or other conservation practices, within any area under the jurisdiction of any such nation or political subdivision, or on the high seas.

(3) Species which have been designated as requiring protection from unrestricted commerce by any foreign country, or pursuant to any international agreement, shall receive full consideration by the Secretary to determine whether each is an endangered species or a threatened species.

(c) LISTS.—(1) The Secretary of the Interior shall publish in the Federal Register, and from time to time he may by regulation revise, a list of all species determined by him or the Secretary of Commerce to be endangered species and a list of all species determined by him or the Secretary of Commerce to be threatened species. Each list shall refer to the species contained therein by scientific and common name or names, if any, and shall specify with respect to each such species over what portion of its range it is endangered or threatened.

(2) The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5, United States Code, conduct a review of any listed or unlisted species proposed to be removed from or added to either of the lists published pursuant to paragraph (1) of this subsection, but only if he makes and publishes a finding that such person has presented substantial evidence which in his judgment warrants such a review.

(3) Any list in effect on the day before the date of the enactment of this Act of species of fish or wildlife determined by the Secretary of the Interior, pursuant to the Endangered Species Conservation Act of 1969, to be threatened with extinction shall be republished to conform to the classification for endangered species or threatened species, as the case may be, provided for in this Act, but until such republication, any such species so listed shall be deemed an endangered species within the meaning of this Act. The republication of any species pursuant to this paragraph shall not require public hearing or comment under section 553 of title 5, United States Code.

(d) PROTECTIVE REGULATIONS.—Whenever any species is listed as a threatened species pursuant to subsection (c) of this section, the Secretary shall issue such regulations as he deems necessary and advisable to provide for the conservation of such species. The Secretary may by regulation prohibit with respect to any threatened species any act prohibited under section 9(a)(1), in the case of fish or wildlife, or section 9(a)(2), in the case of plants, with respect to endangered species; except that with respect to the taking of resident species of fish or wildlife, such regulations shall apply in any State which has entered into a cooperative agreement pursuant to section 6(a) of this Act only to the extent that such regulations have also been adopted by such State.

(e) SIMILARITY OF APPEARANCE CASES.—The Secretary may, by regulation, and to the extent he deems advisable, treat any species as an endangered species or threatened species even though it is not listed pursuant to section 4 of this Act if he finds that—

(A) such species so closely resembles in appearance, at the point in question, a species which has been listed pursuant to such section that enforcement personnel would have substantial difficulty in attempting to differentiate between the listed and unlisted species;

(B) the effect of this substantial difficulty is an additional threat to an endangered or threatened species; and

(C) such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of this Act.

(f) REGULATIONS.—(1) Except as provided in paragraphs (2) and (3) of this subsection and subsection (b) of this section, the provisions of section 553 of title 5, United States Code (relating to rulemaking procedures), shall apply to any regulation promulgated to carry out the purposes of this Act.

(2)(A) In the case of any regulation proposed by the Secretary to carry out the purposes of this Act—

(i) the Secretary shall publish general notice of the proposed regulation (including the complete text of the regulation) in the Federal Register not less than 60 days before the effective date of the regulation; and

(ii) if any person who feels that he may be adversely affected by the proposed regulation files (within 45 days after the date of publication of general notice) objections thereto and requests a public hearing thereon, the Secretary may grant such request, but shall, if he denies such request, publish his reasons therefor in the Federal Register.

(B) Neither subparagraph (A) of this paragraph nor section 553 of title 5, United States Code, shall apply in the case of any of the following

regulations and any such regulation shall, at the discretion of the Secretary, take effect immediately upon publication of the regulation in the Federal Register:

(i) Any regulation appropriate to carry out the purposes of this Act which was originally promulgated to carry out the Endangered Species Conservation Act of 1969.

(ii) Any regulation (including any regulation implementing section 6(g)(2)(B)(ii) of this Act) issued by the Secretary in regard to any emergency posing a significant risk to the well-being of any species of fish or wildlife, but only if (I) at the time of publication of the regulation in the Federal Register the Secretary publishes therein detailed reasons why such regulation is necessary, and (II) in the case such regulation applies to resident species of fish and wildlife, the requirements of subsection (b)(A), (B), and (C) of this section have been complied with. Any regulation promulgated under the authority of this clause (ii) shall cease to have force and effect at the close of the 120-day period following the date of publication unless, during such 120-day period, the rulemaking procedures which would apply to such regulation without regard to this subparagraph are complied with.

(3) The publication in the Federal Register of any proposed or final regulation which is necessary or appropriate to carry out the purposes of this Act shall include a statement by the Secretary of the facts on which such regulation is based and the relationship of such facts to such regulation.

LAND ACQUISITION

SEC. 5. (a) PROGRAM.—The Secretary of the Interior shall establish and implement a program to conserve (A) fish or wildlife which are listed as endangered species or threatened species pursuant to section 4 of this Act; or (B) plants which are included in Appendices to the Convention. To carry out such program, he—

(1) shall utilize the land acquisition and other authority under the Fish and Wildlife Act of 1956, as amended, the Fish and Wildlife Coordination Act, as amended, and the Migratory Bird Conservation Act, as appropriate; and

(2) is authorized to acquire by purchase, donation, or otherwise, lands, waters, or interest therein, and such authority shall be in addition to any other land acquisition authority vested in him.

(b) ACQUISITIONS.—Funds made available pursuant to the Land and Water Conservation Fund Act of 1965, as amended, may be used for the purpose of acquiring lands, waters, or interests therein under subsection (a) of this section.

COOPERATION WITH THE STATES

SEC. 6. (a) GENERAL.—In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the States. Such cooperation shall include consultation with the States concerned before acquiring any land or water, or interest therein, for the purpose of conserving any endangered species or threatened species.

(b) MANAGEMENT AGREEMENTS.—The Secretary may enter into agreements with any State for the administration and management of any area established for the conservation of endangered species or threatened

species. Any revenues derived from the administration of such areas under these agreements shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383; 16 U.S.C. 715s).

(c) *Cooperative Agreements.—In furtherance of the purposes of this Act, the Secretary is authorized to enter into a cooperative agreement in accordance with this section with any State which establishes and maintains an adequate and active program for the conservation of endangered species and threatened species. Within one hundred and twenty days after the Secretary receives a certified copy of such a proposed State program, he shall make a determination whether such program is in accordance with this Act. Unless he determines, pursuant to this subsection, that the State program is not in accordance with this Act, he shall enter into a cooperative agreement with the State for the purpose of assisting in implementation of the State program. In order for a State program to be deemed an adequate and active program for the conservation of endangered species and threatened species, the Secretary must find, and annually thereafter reconfirm such finding, that under the State program—*

(*1*) *authority resides in the State agency to conserve resident species of fish or wildlife determined by the State agency or the Secretary to be endangered or threatened;*

(*2*) *the State agency has established acceptable conservation programs, consistent with the purposes and policies of this Act, for all resident species of fish or wildlife in the State which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;*

(*3*) *the State agency is authorized to conduct investigations to determine the status and requirements for survival of resident species of fish and wildlife;*

(*4*) *the State agency is authorized to establish programs, including the acquisition of land or aquatic habitat or interests therein, for the conservation of resident endangered species or threatened species; and*

(*5*) *provision is made for public participation in designating resident species of fish or wildlife as endangered or threatened.*

(d) *Allocation of Funds.—(1) The Secretary is authorized to provide financial assistance to any State, through its respective State agency, which has entered into a cooperative agreement pursuant to subsection (c) of this section to assist in development of programs for the conservation of endangered and threatened species. The Secretary shall make an allocation of appropriated funds to such States based on consideration of—*

(*A*) *the international commitments of the United States to protect endangered species or threatened species;*

(*B*) *the readiness of a State to proceed with a conservation program consistent with the objectives and purposes of this Act;*

(*C*) *the number of endangered species and threatened species within a State;*

(*D*) *the potential for restoring endangered species and threatened species within a State; and*

(*E*) *the relative urgency to initiate a program to restore and protect an endangered species or threatened species in terms of survival of the species.*

So much of any appropriated funds allocated for obligation to any State for any fiscal year as remains unobligated at the close thereof is authorized *to be made available to that State until the close of the succeeding fiscal year. Any amount allocated to any State which is unobligated at the end of the period during which it is available for expenditure is authorized to be made available for expenditure by the Secretary in conducting programs under this section.*

(2) Such cooperative agreements shall provide for (A) the actions to be taken by the Secretary and the States; (B) the benefits that are expected to be derived in connection with the conservation of endangered or threatened species; (C) the estimated cost of these actions; and (D) the share of such costs to be borne by the Federal Government and by the States; except that—

(i) the Federal share of such program costs shall not exceed 66⅔ per centum of the estimated program costs stated in the agreement; and

(ii) the Federal share may be increased to 75 per centum whenever two or more States having a common interest in one or more endangered or threatened species, the conservation of which may be enhanced by cooperation of such States, enter jointly into an agreement with the Secretary.

The Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon in the cooperative agreement. For the purposes of this section, the non-Federal share may, in the discretion of the Secretary, be in the form of money or real property, the value of which will be determined by the Secretary, whose decision shall be final.

(e) REVIEW OF STATE PROGRAMS.—Any action taken by the Secretary under this section shall be subject to his periodic review at no greater than annual intervals.

(f) CONFLICTS BETWEEN FEDERAL AND STATE LAWS.—Any State law or regulation which applies with respect to the importation or exportation of, or interstate or foreign commerce in, endangered species or threatened species is void to the extent that it may effectively (1) permit what is prohibited by this Act or by any regulation which implements this Act, or (2) prohibit what is authorized pursuant to an exemption or permit provided for in this Act or in any regulation which implements this Act. This Act shall not otherwise be construed to void any State law or regulation which is intended to conserve migratory, resident, or introduced fish or wildlife, or to permit or prohibit sale of such fish or wildlife. Any State law or regulation respecting the taking of an endangered species or threatened species may be more restrictive than the exemptions or permits provided for in this Act or in any regulation which implements this Act but not less restrictive than the prohibitions so defined.

(g) TRANSITION.—(1) For purposes of this subsection, the term "establishment period" means, with respect to any State, the period beginning on the date of enactment of this Act and ending on whichever of the following dates first occurs: (A) the date of the close of the 120-day period following the adjournment of the first regular session of the legislature of such State which commences after such date of enactment, or (B) the date of the close of the 15-month period following such date of enactment.

(2) The prohibitions set forth in or authorized pursuant to sections 4(d) and 9(a)(1)(B) of this Act shall not apply with respect to the taking of any

resident endangered species or threatened species (other than species listed in Appendix I to the Convention or otherwise specifically covered by any other treaty or Federal law) within any State—

(A) which is then a party to a cooperative agreement with the Secretary pursuant to section 6(c) of this Act (except to the extent that the taking of any such species is contrary to the law of such State); or

(B) except for any time within the establishment period when—

(i) the Secretary applies such prohibition to such species at the request of the State, or

(ii) the Secretary applies such prohibition after he finds, and publishes his finding, that an emergency exists posing a significant risk to the well-being of such species and that the prohibition must be applied to protect such species. The Secretary's finding and publication may be made without regard to the public hearing or comment provisions of section 553 of title 5, United States Code, or any other provision of this Act; but such prohibition shall expire 90 days after the date of its imposition unless the Secretary further extends such prohibition by publishing notice and a statement of justification of such extension.

(h) REGULATIONS.—The Secretary is authorized to promulgate such regulations as may be appropriate to carry out the provisions of this section relating to financial assistance to States.

(i) APPROPRIATIONS.—For the purposes of this section, there is authorized to be appropriated through the fiscal year ending June 30, 1977, not to exceed $10,000,000.

INTERAGENCY COOPERATION

SEC. 7. The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

INTERNATIONAL COOPERATION

SEC. 8. (a) FINANCIAL ASSISTANCE.—As a demonstration of the commitment of the United States to the worldwide protection of endangered species and threatened species, the President may, subject to the provisions of section 1415 of the Supplemental Appropriation Act, 1953 (31 U.S.C. 724), use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistance Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and management of programs in that country which the Secretary determines to be necessary or useful for the conservation of any endangered species or threatened species listed by the Secretary pursuant to section 4 of this Act. The President shall *provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, waters, or interests therein) to foreign countries under this section under such terms and conditions as he deems appropriate. Whenever foreign currencies are available for the provision of assistance under this section, such currencies shall be used in preference to funds appropriated under the authority of section 15 of this Act.*

(b) ENCOURAGEMENT OF FOREIGN PROGRAMS.—In order to carry out further the provisions of this Act, the Secretary, through the Secretary of State, shall encourage—

(1) foreign countries to provide for the conservation of fish or wildlife including endangered species and threatened species listed pursuant to section 4 of this Act;

(2) the entering into of bilateral or multilateral agreements with foreign countries to provide for such conservation; and

(3) foreign persons who directly or indirectly take fish or wildlife in foreign countries or on the high seas for importation into the United States for commercial or other purposes to develop and carry out with such assistance as he may provide, conservation practices designed to enhance such fish or wildlife and their habitat.

(c) PERSONNEL.—After consultation with the Secretary of State, the Secretary may—

(1) assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign countries and international organizations in developing personnel resources and programs which promote the conservation of fish or wildlife; and

(2) conduct or provide financial assistance for the educational training of foreign personnel, in this country or abroad, in fish, wildlife, or plant management, research and law enforcement and to render professional assistance abroad in such matters.

(d) INVESTIGATIONS.—After consultation with the Secretary of State and the Secretary of the Treasury, as appropriate, the Secretary may conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the purposes of this Act.

(e) CONVENTION IMPLEMENTATION.—The President is authorized and directed to designate appropriate agencies to act as the Management Authority or Authorities and the Scientific Authority or Authorities pursuant to the Convention. The agencies so designated shall thereafter be authorized to do all things assigned to them under the Convention, including the issuance of permits and certificates. The agency designated by the President to communicate with other parties to the Convention and with the Secretariat shall also be empowered, where appropriate, in consultation with the State Department, to act on behalf of and represent the United States in all regards as required by the Convention. The President shall also designate those agencies which shall act on behalf of and represent the United States in all regards as required by the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere.

PROHIBITED ACTS

SEC. 9. (a) GENERAL.—(1) Except as provided in sections 6(g)(2) and 10 of this Act, with respect to any endangered species of fish or wildlife listed pursuant to section 4 of this Act it is unlawful for any person subject to the jurisdiction of the United States to—

(A) import any such species into, or export any such species from the United States;

(B) take any such species within the United States or the territorial sea of the United States;

(C) take any such species upon the high seas;

(D) possess, sell, deliver, carry, transport, or ship, by any means whatsoever, any such species taken in violation of subparagraphs (B) and (C);

(E) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity, any such species;

(F) sell or offer for sale in interstate or foreign commerce any such species; or

(G) violate any regulation pertaining to such species or to any threatened species of fish or wildlife listed pursuant to section 4 of this Act and promulgated by the Secretary pursuant to authority provided by this Act.

(2) Except as provided in sections 6(g)(2) and 10 of this Act, with respect to any endangered species of plants listed pursuant to section 4 of this Act, it is unlawful for any person subject to the jurisdiction of the United States to—

(A) import any such species into, or export any such species from, the United States;

(B) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity, any such species;

(C) sell or offer for sale in interstate or foreign commerce any such species; or

(D) violate any regulation pertaining to such species or to any threatened species of plants listed pursuant to section 4 of this Act and promulgated by the Secretary pursuant to authority provided by this Act.

(b) SPECIES HELD IN CAPTIVITY OR CONTROLLED ENVIRONMENT.—The provisions of this section shall not apply to any fish or wildlife held in captivity or in a controlled environment on the effective date of this Act if the purposes of such holding are not contrary to the purposes of this Act; except that this subsection shall not apply in the case of any fish or wildlife held in the course of a commercial activity. With respect to any act prohibited by this section which occurs after a period of 180 days from the effective date of this Act, there shall be a rebuttable presumption that the fish or wildlife involved in such act was not held in captivity or in a controlled environment on such effective date.

(c) VIOLATION OF CONVENTION.—(1) It is unlawful for any person subject to the jurisdiction of the United States to engage in any trade in any specimens contrary to the provisions of the Convention, or to possess any specimens traded contrary to the provisions of the Convention, including the definitions of terms in article I thereof.

(2) Any importation into the United States of fish or wildlife shall, if—

(A) such fish or wildlife is not an endangered species listed pursuant to section 4 of this Act but is listed in Appendix II to the Convention,

(B) the taking and exportation of such fish or wildlife is not contrary to the provisions of the Convention and all other applicable requirements of the Convention have been satisfied,

(C) the applicable requirements of subsections (d), (e), and (f) of this section have been satisfied, and

(D) such importation is not made in the course of a commercial activity,

be presumed to be an importation not in violation of any provision of this Act or any regulation issued pursuant to this Act.

(d) *IMPORTS AND EXPORTS.—(1) It is unlawful for any person to engage in business as an importer or exporter of fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered species or threatened species, and (B) are imported for purposes of human or animal consumption or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants without first having obtained permission from the Secretary.*

(2) Any person required to obtain permission under paragraph (1) of this subsection shall—

(A) keep such records as will fully and correctly disclose each importation or exportation of fish, wildlife, or plants made by him and the subsequent disposition made by him with respect to such fish, wildlife, or plants;

(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his places of business, an opportunity to examine his inventory of imported fish, wildlife, or plants and the records required to be kept under subparagraph (A) of this paragraph, and to copy such records; and

(C) file such reports as the Secretary may require.

(3) The Secretary shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.

(e) *REPORTS.—It is unlawful for any person importing or exporting fish or wildlife (other than shellfish and fishery products which (1) are not listed pursuant to section 4 of this Act as endangered or threatened species, and (2) are imported for purposes of human or animal consumption or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants to fail to file any declaration or report as the Secretary deems necessary to facilitate enforcement of this Act or to meet the obligations of the Convention.*

(f) *DESIGNATION OF PORTS.—(1) It is unlawful for any person subject to the jurisdiction of the United States to import into or export from the United States any fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered species or threatened species, and (B) are imported for purposes of human or animal consumption or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants, except at a port or ports designated by the Secretary of the Interior. For the purpose of facilitating enforcement of this Act and reducing the costs thereof, the Secretary of the Interior, with approval of the Secretary of the Treasury and after notice and opportunity for public hearing, may, by regulation, designate ports and change such designations. The Secretary of the Interior, under such terms and conditions as he may prescribe, may permit the importation or exportation at nondesignated ports in the interest of the health or safety of the fish or wildlife or plants, or for other reasons if, in his discretion, he deems it appropriate and consistent with the purpose of this subsection.*

(2) Any port designated by the Secretary of the Interior under the authority of section 4(d) of the Act of December 5, 1969 (16 U.S.C. 666cc–4(d)), shall, if such designation is in effect on the day before the date of the enactment of this Act, be deemed to be a port designated by the Secretary under paragraph (1) of this subsection until such time as the Secretary otherwise provides.

(g) Violations.—It is unlawful for any person subject to the jurisdiction of the United States to attempt to commit, solicit another to commit, or cause to be committed, any offense defined in this section.

EXCEPTIONS

Sec. 10. (a) Permits.—The Secretary may permit, under such terms and conditions as he may prescribe, any act otherwise prohibited by section 9 of this Act for scientific purposes or to enhance the propagation or survival of the affected species.

(b) Hardship Exemptions.—(1) If any person enters into a contract with respect to a species of fish or wildlife or plant before the date of the publication in the Federal Register of notice of consideration of that species as an endangered species and the subsequent listing of that species as an endangered species pursuant to section 4 of this Act will cause undue economic hardship to such person under the contract, the Secretary, in order to minimize such hardship, may exempt such person from the application of section 9(a) of this Act to the extent the Secretary deems appropriate if such person applies to him for such exemption and includes with such application such information as the Secretary may require to prove such hardship; except that (A) no such exemption shall be for a duration of more than one year from the date of publication in the Federal Register of notice of consideration of the species concerned, or shall apply to a quantity of fish or wildlife or plants in excess of that specified by the Secretary; (B) the one-year period for those species of fish or wildlife listed by the Secretary as endangered prior to the effective date of this Act shall expire in accordance with the terms of section 3 of the Act of December 5, 1969 (83 Stat. 275); and (C) no such exemption may be granted for the importation or exportation of a specimen listed in Appendix I of the Convention which is to be used in a commercial activity.

(2) As used in this subsection, the term "undue economic hardship" shall include, but not be limited to:

> *(A) substantial economic loss resulting from inability caused by this Act to perform contracts with respect to species of fish and wildlife entered into prior to the date of publication in the Federal Register of a notice of consideration of such species as an endangered species;*
>
> *(B) substantial economic loss to persons who, for the year prior to the notice of consideration of such species as an endangered species, derived a substantial portion of their income from the lawful taking of any listed species, which taking would be made unlawful under this Act; or*
>
> *(C) curtailment of subsistence taking made unlawful under this Act by persons (i) not reasonably able to secure other sources of subsistence; and (ii) dependent to a substantial extent upon hunting and fishing for subsistence; and (iii) who must engage in such curtailed taking for subsistence purposes.*

(3) The Secretary may make further requirements for a showing of undue economic hardship as he deems fit. Exceptions granted under this

section may be limited by the Secretary in his discretion as to time, area, or other factor of applicability.

(c) N*OTICE* A*ND* R*EVIEW.—The Secretary shall publish notice in the Federal Register of each application for an exemption or permit which is made under this subsection. Each notice shall invite the submission from interested parties, within thirty days after the date of the notice, written data, views, or arguments with respect to the application. Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.*

(d) P*ERMIT AND* E*XEMPTION* P*OLICY.—The Secretary may grant exceptions under subsections (a) and (b) of this section only if he finds and publishes his finding in the Federal Register that (1) such exceptions were applied for in good faith, (2) if granted and exercised will not operate to the disadvantage of such endangered species, and (3) will be consistent with the purposes and policy set forth in section 2 of this Act.*

(e) A*LASKA* N*ATIVES.—(1) Except as provided in paragraph (4) of this subsection the provisions of this Act shall not apply with respect to the taking of any endangered species or threatened species, or the importation of any such species taken pursuant to this section, by—*

(A) any Indian, Aleut, or Eskimo who is an Alaskan Native who resides in Alaska; or

(B) any non-native permanent resident of an Alaskan native village;

if such taking is primarily for subsistence purposes. Non-edible byproducts of species taken pursuant to this section may be sold in interstate commerce when made into authentic native articles of handicrafts and clothing; except that the provisions of this subsection shall not apply to any non-native resident of an Alaskan native village found by the Secretary to be not primarily dependent upon the taking of fish and wildlife for consumption or for the creation and sale of authentic native articles of handicrafts and clothing.

(2) Any taking under this subsection may not be accomplished in a wasteful manner.

(3) As used in this subsection—

(i) The term "subsistence" includes selling any edible portion of fish or wildlife in native villages and towns in Alaska for native consumption within native villages or towns; and

(ii) The term "authentic native articles of handicrafts and clothing" means items composed wholly or in some significant respect of natural materials, and which are produced, decorated, or fashioned in the exercise of traditional native handicrafts without the use of pantographs, multiple carvers, or other mass copying devices. Traditional native handicrafts include, but are not limited to, weaving, carving, stitching, sewing, lacking, beading, drawing, and painting.

(4) Notwithstanding the provisions of paragraph (1) of this subsection, whenever the Secretary determines that any species of fish or wildlife which is subject to taking under the provisions of this subsection is an endangered species or threatened species, and that such taking materially and negatively affects the threatened or endangered species, he may prescribe regulations upon the taking of such species by any such Indian, Aleut, Eskimo, or non-Native Alaskan resident of an Alaskan native village. Such regulations may be established with reference to species, geographical description of the area included, the season for taking, or any other factors related to the reason for establishing such regulations and consistent with the policy of this Act. Such regulations shall be prescribed after

a notice and hearings in the affected judicial districts of Alaska and as otherwise required by section 103 of the Marine Mammal Protection Act of 1972, and shall be removed as soon as the Secretary determines that the need for their impositions has disappeared.

PENALTIES AND ENFORCEMENT

SEC. 11. (a) CIVIL PENALTIES.—(1) Any person who knowingly violates, or who knowingly commits an act in the course of a commercial activity which violates, any provision of this Act, or any provision of any permit or certificate issued hereunder, or of any regulation issued in order to implement subsection (a)(1) (A), (B), (C), (D), (E), or (F), (a)(2) (A), (B), or (C), (c), (d) (other than a regulation relating to recordkeeping or filing of reports), (f) or (g) of section 9 of this Act, may be assessed a civil penalty by the Secretary of not more than $10,000 for each violation. Any person who knowingly violates, or who knowingly commits an act in the course of a commercial activity which violates, any provision of any other regulation issued under this Act may be assessed a civil penalty by the Secretary of not more than $5,000 for each such violation. Any person who otherwise violates any provision of this Act, or any regulation, permit, or certificate issued hereunder, may be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation. No penalty may be assessed under this subsection unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be remitied or mitigated by the Secretary. Upon any failure to pay a penalty assessed under this subsection, the Secretary may request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found, resides, or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. The court shall hear such action on the record made before the Secretary and shall sustain his action if it is supported by substantial evidence on the record considered as a whole.

(2) Hearings held during proceedings for the assessment of civil penalties authorized by paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5, United States Code. The Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(b) CRIMINAL VIOLATIONS.—(1) Any person who willfully commits an act which violates any provision of this Act, of any permit or certificate issued hereunder, or of any regulation issued in order to implement subsection (a)(1) (A), (B), (C), (D), (E), or (F); (a)(2) (A), (B), or (C), (c), (d) (other than a regulation relating to recordkeeping or filing of reports, (f), or (g) of section 9 of this Act shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both.

Any person who willfully commits an act which violates any provision of any other regulation issued under this Act shall, upon conviction, be fined not more than $10,000 or imprisoned for not more than six months, or both.

(2) The head of any Federal agency which has issued a lease, license, permit, or other agreement authorizing the use of Federal lands, including grazing of domestic livestock, to any person who is convicted of a criminal violation of this Act or any regulation, permit, or certificate issued hereunder may immediately modify, suspend, or revoke each lease, license, permit, or other agreement. The Secretary shall also suspend for a period of up to one year, or cancel, any Federal hunting or fishing permits or stamps issued to any person who is convicted of a criminal violation of any provision of this Act or any regulation, permit, or certificate issued hereunder. The United States shall not be liable for the payments of any compensation, reimbursement, or damages in connection with the modification, suspension, or revocation of any leases, licenses, permits, stamps, or other agreements pursuant to this section.

(c) DISTRICT COURT JURISDICTION.—The several district courts of the United States, including the courts enumerated in section 460 of title 28, United States Code, shall have jurisdiction over any actions arising under this Act. For the purpose of this Act, American Samoa shall be included within the judicial district of the District Court of the United States for the District of Hawaii.

(d) REWARDS.—Upon the recommendation of the Secretary, the Secretary of the Treasury is authorized to pay an amount equal to one-half of the civil penalty or fine paid, but not to exceed $2,500, to any person who furnishes information which leads to a finding of civil violation or a conviction of a criminal violation of any provision of this Act or any regulation or permit issued thereunder. Any officer or employee of the United States or of any State or local government who furnishes information or renders service in the performance of his official duties shall not be eligible for payment under this section.

(e) ENFORCEMENT.—(1) The provisions of this Act and any regulations or permits issued pursuant thereto shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all such Secretaries. Each such Secretary may utilize by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency for purposes of enforcing this Act.

(2) The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulation issued thereunder.

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, to enforce this Act may detain for inspection and inspect any package, crate, or other container, including its contents, and all accompanying documents, upon importation or exportation. Such person may execute and serve any arrest warrant, search warrant, or other warrant or civil or criminal process issued by any officer or court of competent jurisdiction for enforcement of this Act. Such person so authorized may search and seize, with or without a warrant, as authorized by law. Any fish, wildlife, property, or item so seized shall be held by any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating

pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, property, or item pursuant to paragraph (4) of this subsection; except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

(4)(A) All fish or wildlife or plants taken, possessed, sold, purchased, offered for sale or purchase, transported, delivered, received, carried, shipped, exported, or imported contrary to the provisions of this Act, any regulation made pursuant thereto, or any permit or certificate issued hereunder shall be subject to forfeiture to the United States.

(B) All guns, traps, nets, and other equipment, vessels, vehicles, aircraft, and other means of transportation used to aid the taking, possessing, selling, purchasing, offering for sale or purchase, transporting, delivering, receiving, carrying, shipping, exporting, or importing of any fish or wildlife or plants in violation of this Act, any regulation made pursuant thereto, or any permit or certificate issued thereunder shall be subject to forfeiture to the United States upon conviction of a criminal violation pursuant to section 11(b)(1) of this Act.

(5) All provisions of law relating to the seizure, forfeiture, and condemnation of a vessel for violation of the customs laws, the disposition of such vessel or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act; except that all powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Treasury Department shall, for the purposes of this Act, be exercised or performed by the Secretary or by such persons as he may designate.

(f) REGULATIONS.—The Secretary, the Secretary of the Treasury, and the Secretary of the Department in which the Coast Guard is operating, are authorized to promulgate such regulations as may be appropriate to enforce this Act, and charge reasonable fees for expenses to the Government connected with permits or certificates authorized by this Act including processing applications and reasonable inspections, and with the transfer, board, handling, or storage of fish or wildlife or plants and evidentiary items seized and forfeited under this Act. All such fees collected pursuant to this subsection shall be deposited in the Treasury to the credit of the appropriation which is current and chargeable for the cost of furnishing the services. Appropriated funds may be expended pending reimbursement from parties in interest.

(g) CITIZEN SUITS.—(1) Except as provided in paragraph (2) of this subsection any person may commence a civil suit on his own behalf—

> *(A) to enjoin any person, including the United States and any other governmental instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution), who is alleged to be in violation of any provision of this Act or regulation issued under the authority thereof; or*
>
> *(B) to compel the Secretary to apply, pursuant to section 6(g)(2)(B)(ii) of this Act, the prohibitions set forth in or authorized pursuant to section 4(d) or section 9(a)(1)(B) of this Act with respect to the taking of any resident endangered species or threatened species within any State.*

The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any such provision *or regulation, as the case may be. In any civil suit commenced under subparagraph (B) the district court shall compel the Secretary to apply the prohibition sought if the court finds that the allegation that an emergency exists is supported by substantial evidence.*

(2) (A) No action may be commenced under subparagraph (1)(A) of this section—

(i) prior to sixty days after written notice of the violation has been given to the Secretary, and to any alleged violator of any such provision or regulation;

(ii) if the Secretary has commenced action to impose a penalty pursuant to subsection (a) of this section; or

(iii) if the United States has commenced and is diligently prosecuting a criminal action in a court of the United States or a State to redress a violation of any such provision or regulation.

(B) No action may be commenced under subparagraph (1)(B) of this section—

(i) prior to sixty days after written notice has been given to the Secretary setting forth the reasons why an emergency is thought to exist with respect to an endangered species or a threatened species in the State concerned; or

(ii) if the Secretary has commenced and is diligently prosecuting action under section 6(g)(2)(B)(ii) of this Act to determine whether any such emergency exists.

(3)(A) Any suit under this subsection may be brought in the judicial district in which the violation occurs.

(B) In any such suit under this subsection in which the United States is not a party, the Attorney General, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

(4) The court, in issuing any final order in any suit brought pursuant to paragraph (1) of this subsection, may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(5) The injunctive relief provided by this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or limitation or to seek any other relief (including relief against the Secretary or a State agency.)

(h) COORDINATION WITH OTHER LAWS.—The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act with the administration of the animal quarantine laws (21 U.S.C. 101–105, 111–135b, and 612–614) and section 306 of the Tariff Act of 1930 (19 U.S.C. 1306). Nothing in this Act or any amendment made by this Act shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations or possession of animals and other articles and no proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture. Nothing in this Act shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, including, without limitation, section 527 of that Act (19 U.S.C. 1527), relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.

ENDANGERED PLANTS

Sec. 12. The Secretary of the Smithsonian Institution, in conjunction with other affected agencies, is authorized and directed to review (1) species of plants which are now or may become endangered or threatened and (2) methods of adequately conserving such species, and to report to Congress, within one year after the date of the enactment of this Act, the results of such review including recommendations for new legislation or the amendment of existing legislation.

CONFORMING AMENDMENTS

Sec. 13. (a) Subsection 4(c) of the Act of October 15, 1966 (80 Stat. 928, 16 U.S.C. 668dd(c)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered species and threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of that Act, nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the system."

(b) Subsection 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224, 16 U.S.C. 715i(a)) and subsection 401(a) of the Act of June 15, 1935 (49 Stat. 383, 16 U.S.C. 715s(a)), are each amended by striking out "threatened with extinction," and inserting in lieu thereof the following. "listed pursuant to section 4 of the Endangered Species Act of 1973 as endangered species or threatened species,".

(c) Section 7(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 460l—9(a)(1)) is amended by striking out:

> *"Threatened Species.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction."*

and inserting in lieu thereof the following:

> *"Endangered Species and Threatened Species.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5(a) of the Endangered Species Act of 1973, needed for the purpose of conserving endangered or threatened species of fish or wildlife or plants."*

(d) The first sentence of section 2 of the Act of September 28, 1962, as amended (76 Stat. 653, 16 U.S.C. 460k–1), is amended to read as follows: "The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—

> *"(1) incidental fish and wildlife-oriented recreational development,*
>
> *"(2) the protection of natural resources,*
>
> *"(3) the conservation of endangered species or threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973, or*
>
> *"(4) carrying out two or more of the purposes set forth in paragraphs (1) through (3) of this section, and are adjacent to, or within, the said conservation areas, except that the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps."*

(e) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) is amended—

(1) by striking out "Endangered Species Conservation Act of 1969" in section 3(1)(B) thereof and inserting in lieu thereof the following: "Endangered Species Act of 1973";

(2) by striking out "pursuant to the Endangered Species Conservation Act of 1969" in section 101(a)(3)(B) thereof and inserting in lieu thereof the following: "or threatened species pursuant to the Endangered Species Act of 1973";

(3) by striking out "endangered under the Endangered Species Conservation Act of 1969" in section 102(b)(3) thereof and inserting in lieu thereof the following: "an endangered species or threatened species pursuant to the Endangered Species Act of 1973"; and

(4) by striking out "of the Interior such revisions of the Endangered Species List, authorized by the Endangered Species Conservation Act of 1969," in section 202(a)(6) thereof and inserting in lieu thereof the following: "such revisions of the endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered Species Act of 1973".

(f) Section 2(l) of the Federal Environmental Pesticide Control Act of 1972 (Public Law 92–516) is amended by striking out the words "by the Secretary of the Interior under Public Law 91–135" and inserting in lieu thereof the words "or threatened by the Secretary pursuant to the Endangered Species Act of 1973".

REPEALER

SEC. 14. The Endangered Species Conservation Act of 1969 (sections 1 through 3 of the Act of October 15, 1966, and sections 1 through 6 of the Act of December 5, 1969; 16 U.S.C. 668aa—668cc–6), is repealed.

AUTHORIZATION OF APPROPRIATIONS

SEC. 15. Except as authorized in section 6 of this Act, there are authorized to be appropriated—

(A) not to exceed $4,000,000 for fiscal year 1974, not to exceed $8,000,000 for fiscal year 1975 and not to exceed $10,000,000 for fiscal year 1976, to enable the Department of the Interior to carry out such functions and responsibilities as it may have been given under this Act; and

(B) not to exceed $2,000,000 for fiscal year 1974, $1,500,000 for fiscal year 1975 and not to exceed $2,000,000 for fiscal year 1976, to enable the Department of Commerce to carry out such functions and responsibilities as it may have been given under this Act.

EFFECTIVE DATE

SEC. 16. This Act shall take effect on the date of its enactment.

MARINE MAMMAL PROTECTION ACT OF 1972

SEC. 17. Except as otherwise provided in this Act, no provision of this Act shall take precedence over any more restrictive conflicting provision of the Marine Mammal Protection Act of 1972.

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the title of the bill, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the amendment of the House to the title of the bill, insert the following: "An Act to provide for the conservation of endangered and threatened species of fish, wildlife, and plants, and for other purposes."

And the House agree to the same.

LEONOR K. SULLIVAN,
JOHN D. DINGELL,
GEO. A. GOODLING,
Managers on the Part of the House.

PHILIP A. HART,

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1983) to provide for the conservation, protection, restoration, and propagation of threatened and endangered species of fish, wildlife, and plants, and for other purposes submit the following statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House struck out all of the Senate bill after the enacting clause and inserted a substitute amendment. The committee of conference has agreed to a substitute for both the Senate bill and the House amendment. Except for technical, clarifying and conforming changes, the following statement explains the resolution of differences between the Senate bill and the House amendment thereto.

PROVISIONS OF THE CONFERENCE SUBSTITUTE

Section 3. Definitions

The Senate bill contained language defining the term "conservation and management" as these concepts relate to endangered species: the House bill did not. In view of the varying responsibilities assigned to the administering agencies in the bill, the term was redefined to include generally the kinds of activities that might be engaged in to improve the status of endangered and threatened species so that they would no longer require special treatment. The concept of conservation covers the full spectrum of such activities: from total "hands-off" policies involving protection from harassment to a careful and intensive program of control. In extreme circumstances, as where a given species exceeds the carrying capacity of its particular ecosystem and where this pressure can be relieved in no other feasible way, this "conservation" might include authority for carefully controlled taking of surplus members of the species. To state that this possibility exists, however, in no way is intended to suggest that this extreme situation is likely to occur—it is just to say that the authority exists in the unlikely event that it ever becomes needed.

The Senate added an exception allowing an exclusion from the protection provided by the Act where an otherwise endangered or threatened species of insect presented an overwhelming and overriding risk to man; the House had no such exception. The conferees accepted the Senate language with a technical change, acknowledging that the likelihood of this exception ever being used was vanishingly small but being unwilling to tie the Secretary's hands if such an unlikely event were ever to come to pass.

Also added to the section was a new definition of "commercial activity," to delineate the types of activities which would qualify for special treatment under the Act. It includes trades and exchanges of animals or products from those animals wherever those trades or exchanges are undertaken in the pursuit of any gain or profit.

There was considerable discussion in the conference as to the proper assignment of responsibilities between the Departments of Commerce and the Interior with respect to marine species, general authority for the management of which had been transferred to the Department of Commerce under Reorganization Plan No. 4 of 1970. The roles of the Departments had not been specifically set out in either bill, whereas the legislative history of the bills included much language that was ambiguous and some that was contradictory. The conferees resolved the issue by placing general management and regulatory responsibility for such species in the Department of Commerce, in most respects parallel to that which has resided in the Interior Department for other species of fish and wildlife.

The physical act of maintaining the list is in the Department of the Interior. That Department continues to be solely responsible for determining of status of species not assigned to Commerce under the 1970 Reorganization Plan. If Commerce concludes that any species under its authority should be put on the list of endangered or threatened species, or that any such species now listed as threatened should be relisted as endangered, it may take the necessary steps under Section 4 and then inform the Secretary, who will promptly and automatically revise the lists under his control. If Commerce concludes, on the other hand, that species should be taken off the present or any later list or changed in status from endangered to threatened, it must so recommend to Interior, after having taken the necessary procedural steps; Interior may concur, in which case the lists will be revised accordingly, or it may disagree, in which case no action will be taken unless and until the deadlock is subsequently broken.

The Secretary of the Interior will continue to have sole authority to designate ports of entry under Section 9(f) of the bill and to handle the processing of imported and exported goods. It is expected that there will be adequate coordination with the Department of Commerce in order to see that no violations of the law will take place with respect to the species over which Commerce has jurisdiction. The Secretary of the Interior will also continue to have sole responsibility for the responsibilities outlined in Section 5 of the Act, dealing with land acquisition with funds from the Land and Water Conservation Act. In all other respects, the responsibilities and authorities for different species will be controlled by the 1970 Reorganization Plan, except insofar as the agencies may themselves later elect to adjust their responsibilities by mutal agreement. When and if a Department of Natural Resources is ever created, then of course these two lines of authority will merge and this problem will cease to exist. In this regard, the conferees expect that every effort will be made by both agencies, and indeed all agencies of government, to eliminate wasteful duplication of effort and unnecessary dual regulatory programs.

Section 4. Determination of endangered species and threatened species

Prior to determining the status of a given species, both bills require the Secretary to engage in extensive consultations with all affected parties. In addition the Senate bill required consultation with a special Advisory Committee created for that purpose; the House had no such body. The conferees agreed upon language which eliminated the need for such a body, by requiring special notification of the Governor of each state within which the species under consideration is then known to occur, simultaneous with public notification that such a review was in process, and requiring a minimum of 90 days for the state to respond unless that period was shortened.

If a given species were found and taken in two or more states, each state should be consulted; in the case of an emergency the Secretary could, upon the agreement of all, or with respect to any individual state with the consent of the Governor of that state, declare the existence of that emergency and publish appropriate regulations, as provided in the regulations subsection. The comments of the state would have to be published in summary form prior to the time the Secretary made his final determination.

The Senate bill followed in part and differed in part from the otherwise controlling Administrative Procedures Act; the House bill did not discuss the issue and thereby adopted the APA. Some apprehensions were expressed by the enforcement agencies that the variations required from normal practice might make day-to-day operations extremely complicated. While little disagreement was expressed in conference as to the ultimate objectives of the Senate provision of notice of proposed actions, coupled with an opportunity for full public participation, the means which had been proposed was criticized as unnecessarily cumbersome.

The conferees rewrote Section 9 of the Senate bill and included it as subsection 4(f). The new subsection extends the period of public notice, provides for discretionary hearings, and establishes procedures whereby emergency action may be taken for a short period, which period may be extended only if the Secretary later goes through the prescribed regulatory procedures. The subsection also requires the Secretary to state in detail the basis for proposed regulations, and the reason for denial of requested hearings.

Section 5. Land acquisition

Any effective program for the conservation of endangered species demands that there be adequate authority vested in the program managers to acquire habitat which is critical to the survival of those species. Both the House and the Senate bills provided such authority, but the Senate bill restricted that authority to habitat for fish and wildlife alone. The conferees accepted the House version, which extended the authority to acquire plant habitat, but expect that this authority will be used sparingly, in cases where the needs of the situation are clear. This authority is restricted to the Secretary of the Interior alone, but it is anticipated that he will consult with the Secretary of Commerce in cases involving the marine species over which Commerce has sole jurisdiction under Reorganization Plan No. 4.

Section 6. Cooperation with the States

The House placed the fundamental responsibility for establishing and overseeing an endangered species program in the federal government, but provided for the development of cooperative programs upon agreement with the agencies concerned. The Senate provided for cooperative state and federal programs but gave the initial responsibility to the states in section 16 of its bill.

As finally approved, the Act will have the effect of giving the states fundamental roles with regard to resident species for a given period of time (15 months, or 120 days after adjournment of the first legislative session of any state which commences after passage of the Act). The conferees hope that this device will impel the states to develop strong programs to avoid the alternative of federal preemption.

Following the establishment period, during which it is expected that the states will adjust to the new federal program, the law will apply as it would have under the House bill. Where cooperative agreements are in force, these will of course direct and control the enforcement of endangered and threatened species programs. Where none are then in effect, it will be the responsibility of the states to develop workable programs and to secure cooperative agreements with the Secretary.

Both bills provided for a grant program to enable the states to develop systems for conserving endangered and threatened species. The House bill provided open-ended appropriations whereas the Senate bill authorized the sum of $10 million over a 3½ year period; the House authorized a larger federal share of assistance; and the Senate bill restricted unobligated grant authority to other grant programs under the section. The conferees accepted the Senate version in all respects save that relating to the federal percentage of cost-sharing agreements.

During the establishment period, the states retain authority to regulate the taking of resident endangered and threatened species of fish and wildlife (which are not otherwise covered by treaty or federal law). The only exceptions to this are found where the state has entered into and is operating under a valid cooperative agreement, which then controls, or the state has requested the federal government to extend federal protection to one or more species under the Act, or the Secretary finds that an emergency exists requiring immediate and unilateral action to respond. In this last case, the Secretary has discretion to suspend the state laws for 90 days, or longer if extended pursuant to Section 4(f), pending an agreement on how matters are to be handled in the future.

It should be noted that the successful development of an endangered species program will ultimately depend upon a good working arrangement between the federal agencies, which have broad policy perspective and authority, and the state agencies, which have the physical facilities and the personnel to see that state and federal endangered species policies are properly executed. The grant program authorized by this legislation is essential to an adequate program. Since the federal government is directing new, innovative and perhaps expensive programs, it seems only fair that it should also bear a significant portion of their costs. The conferees wish to make it clear that the grant authority must be exercised if the high purposes of this legislation are to be met.

Section 8. International cooperation

Both bills authorized international endangered species programs but the Senate restricted those programs to countries in which counterpart funds are available, while the House stipulated that where such funds were available, they should be used in preference to appropriated funds under Section 15 of the Act. The Senate receded on this issue.

The House allowed foreign assistance programs which related to plants as well as to fish and wildlife; the Senate bill did not extend to plants. The House receded on this issue.

Section 9. Prohibited acts

Both bills prohibit certain actions which relate to endangered or threatened species, or to products or parts from such species. These prohibitions are carried into the conference bill.

While the House bill extended the prohibitions of the Act to actions of persons subject to U.S. jurisdiction whenever they might occur, the Senate bill did not reach quite so far, since it did not make illegal such actions if performed entirely with one or more foreign countries. The House accepted the Senate bill in the absence of a demonstrated need for such extensive coverage.

The Senate bill restricted the prohibitions of the Act so as not to apply them to species held in captivity or in a controlled environment as of the date of enactment; the House bill was silent on the subject and hence included such animals. As drafted, the Senate language may have made it very difficult, and perhaps even impossible, to enforce the action. The real problems envisioned by the Senate had to do with live animals in captivity, such as zoos and privately-owned animal products, and the conferees agreed that these animals are rarely transferred for commercial purposes.

The conferees rewrote the provision to create an affirmative defense with respect to noncommercial activities, permitting a qualified person to plead in defense to a charge of violation of the Act that the goods or animals themselves were in their hands or under control on the effective date of the Act. Only persons holding such goods and animals for other than commercial purposes would be enabled to plead this subsection as a defense, such as noncommercial zoos, private collectors of animals and the owners of fur coats and rugs. The section would not apply in the case of later born progeny of animals alive at the time of enactment.

The section was also rewritten in part to clarify the situation with respect to endangered or threatened species of plants. Under the terms of the Convention, this country is obligated to control importations and exportations of plants as well as fish or wildlife. Accordingly the prohibitions of the Act relate, with respect to plants, to import and export situations alone, as well as to associated actions. The determination of what further must be done in connection with internal activities relating to endangered or threatened species of plants must await the outcome of the study to be conducted under Section 12 in the coming year.

Section 10. Exceptions

The Senate bill contained extensive language providing exceptions for certain Alaskan native and nonnative residents, to take endangered or threatened species for purposes of subsistence or for native handicrafts. The House bill provided no similar exception.

The conferees rewrote the section and provided an Alaska native and nonnative exception; the House receded on the basis of the language in Section 6 which would allow the State of Alaska to restrict native and nonnative taking as a part of or independent from a state endangered species program. This appears to meet the principal state objection to special language for groups of citizens, since the state may impose additional restrictions upon those or other groups, if it chooses to do so. The definition of natives is considered to be that contained in the recent Alaska Native Land Claims Settlement Act.

Section 11. Penalties and enforcement

The House bill carried a two-tiered civil penalty provision, with a limit of $10,000 for violations of certain specified requirements, and a lesser penalty for violation of other requirements of a regulatory nature. The Senate followed the same general pattern, but varied the requirements somewhat. The conferees developed new language, subjecting knowing or commercial violators to the full $10,000 penalty, where specified offenses were proven, and to a $5,000 penalty to cases where regulatory violations were proven. A third penalty of $1,000 may be assessed against an ignorant violator, such as a casual hunter or tourist, although the conferees expect that this penalty will seldom be invoked, coupled as it would be with automatic forfeiture of the goods concerned, unless special circumstances were shown warranting such action by the Secretary. For a casual tourist who bought an item with no hint of its illegality or impropriety, simple forfeiture should prove to be an ample deterrent.

The House bill provided authority to agents of the Secretary to inspect packages and crates upon importation or exportation; the Senate bill did not. This authority is parallel to that which already is exercised by customs agents and which has even been assessed by Interior agents under existing law. The Department of the Interior claims such authority is a practical requirement if the law is to be enforced and that it will be no more abused in the future than it has in the past.

The conferees accepted the House language but stressed that they were prepared to reexamine that decision in the future if it should appear that the authority was being abused.

Section 12. Endangered plants

While the Act, as finally approved, is broad enough to comply fully with this country's obligations under the recently approved Convention, it was felt that further efforts should be undertaken to ensure adequate controls upon interstate commerce in endangered species of plants, as well. Both bills provided for a study of the problems, with recommendations as to how best to proceed to come from the agency charged with responsibility for the study. The conferees accepted the House version, which assigned this function to the Smithsonian, as an institution with no bias in the eventual outcome of the study.

Section 15. Authorization of appropriations

Both bills carried authorization authority for a three-year period, ending with fiscal year 1976. The House ceiling was somewhat higher than the Senate ceiling, and divided the authorizations between the two departments principally concerned. The conferees accepted the House ceilings, but assigned $2 million of the authorizations which had originally been earmarked for the Interior Department for fiscal year 1974 to the Commerce Department for the same year.

Section 17. Marine Mammal Protection Act of 1972

The Senate bill contained a section which stated that, wherever a conflict between the Endangered Species Act and the recent Marine Mammal Protection Act might occur, the stricter of the two will prevail. This would allow, for example, state regulation of the taking of marine mammals, once these were declared endangered or threatened, without that state having a fully approved marine mammal program, as it would otherwise be required to do under the Marine Mammal Protection Act. The House accepted the Senate provision.

Kentucky National Forest Road

The Senate bill contained a section added on the Floor by Senator Cook which would have had the effect of prohibiting the construction of a public road through the Pioneer Weapons Hunting Area in the Daniel Boone National Forest. Opponents of the road fear that its construction will do irreparable damage to the area and urge the construction of a more expensive road to go around the Hunting Area. Proponents of the road respond that it will not destroy the character of the area and will be desirable. The House recently adopted an amendment to the Water Resources Development Act which, if enacted, would allow construction of the road after public review of the final NEPA environmental impact statement.

In light of the considerable controversy on the subject, the conferees felt that this issue ought not to be resolved by inclusion of this section in the bill, but that it would be more appropriate for full hearings to be held on the question by the proper Committees of Congress. Accordingly the section was stricken from the bill with the understanding and hope that such hearings might be expeditiously completed.

[From the Congressional Record, Dec. 19, 1973]

Senate Agreement to Conference Report

Endangered Species Act of 1973—Conference Report

Mr. Tunney. Mr. President, I submit a report of the committee of conference on S. 1983, and ask for its immediate consideration.

The Vice President. The report will be stated by title.

The second assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1983) to provide for the conservation, protection, restoration, and propagation of threatened and endangered species of fish, wildlife, and plants, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all the conferees.

The Vice President. Is there objection to the consideration of the conference report?

There being no objection, the Senate proceeded to consider the report, which reads as follows:

Conference Report

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1983), to provide for the conservation, protection, restoration, and propagation of threatened and endangered species of fish, wildlife, and plants, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

That this Act may be cited as the "Endangered Species Act of 1973".

FINDINGS, PURPOSES, AND POLICY

Sec. 2. (a) Findings.—The Congress finds and declares that—

(1) various species of fish, wildlife, and plants in the United States have been rendered extinct as a consequence of economic growth and development untempered by adequate concern and conservation;

(2) other species of fish, wildlife, and plants have been so depleted in numbers that they are in danger of or threatened with extinction;

(3) these species of fish, wildlife, and plants are of esthetic, ecological, educational, historical, recreational, and scientific value to the Nation and its people;

(4) the United States has pledged itself as a sovereign state in the international community of conserve to the extent practicable the various species of fish or wildlife and plants facing extinction, pursuant to—

(A) migratory bird treaties with Canada and Mexico;

(B) the Migratory and Endangered Bird Treaty with Japan;

(C) the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere;

(D) the International Convention for the Northwest Atlantic Fisheries;

(E) the International Convention for the High Seas Fisheries of the North Pacific Ocean;

(F) the Convention on International Trade in Endangered Species of Wild Fauna and Flora; and

(G) other international agreements.

(5) encouraging the States and other interested parties, through Federal financial assistance and a system of incentives, to develop and maintain conservation programs which meet national and international standards is a key to meeting the Nation's international commitments and to better safeguarding, for the benefit of all citizens, the Nation's heritage in fish and wildlife.

(b) PURPOSES.—The purposes of this Act are to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved, to provide a program for the conservation of such endangered species and threatened species, and to take such steps as may be appropriate to achieve the purposes of the treaties and conventions set forth in subsection (a) of this section.

(c) POLICY.—It is further declared to be the policy of Congress that all Federal departments and agencies shall seek to conserve endangered species and threatened species and shall utilize their authorities in furtherance of the purposes of this Act.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) The term "commercial activity" means all activities of industry and trade, including, but not limited to, the buying or selling of commodities and activities conducted for the purpose of facilitating such buying and selling.

(2) The term "conserve," "conserving," and "conservation" means to use and the use of all methods and procedures which are necessary to bring any endangered species or threatened species to the point at which the measures provided pursuant to this Act are no longer necessary. Such methods and procedures include, but are not limited to, all activities associated with scientific resources management such as research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation, and, in the extraordinary case where population pressures within a given ecosystem cannot be otherwise relieved, may include regulated taking.

(3) The term "Convention" means the Convention on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973, and the appendices thereto.

(4) The term "endangered species" means any species which is in danger of extinction throughout all or a significant portion of its range other than a species of the Class Insecta determined by the Secretary to constitute a pest whose protection under the provisions of this Act would present an overwhelming and overriding risk to man.

(5) The term "fish or wildlife" means any member of the animal kingdom, including without limitation any mammal, fish, bird (including any migratory, nonmigratory, or endangered bird for which protection is also afforded by treaty or other international agreement), amphibian, reptile, mollusk, crustacean, arthropod or other invertebrate, and includes any part, product, egg, or offspring thereof, or the dead body or parts thereof.

(6) The term "foreign commerce" includes, among other things, any transaction—

(A) between persons within one foreign country;

(B) between persons in two or more foreign countries;

(C) between a person within the United States and a person in a foreign country; or

(D) between persons within the United States, where the fish and wildlife in question are moving in any country or countries outside the United States.

(7) The term "import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(8) The term "person" means an individual, corporation, partnership, trust, association, or any other private entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(9) The term "plant" means any member of the plant kingdom, including seeds, roots, and other parts thereof.

(10) The term "Secretary" means, except as otherwise herein provided, the Secretary of the Interior or the Secretary of Commerce as program responsibilities are vested pursuant to the provisions of Reorganization Plan Numbered 4 of 1970; except that with respect to the enforcement of the provisions of this Act and the Convention which pertain to the importation or exportation of terrestrial plants, the term means the Secretary of Agriculture.

(11) The term "species" includes any subspecies of fish or wildlife or plants and any other group of fish or wildlife of the same species or smaller taxa in common spatial arrangement that interbreed when mature.

(12) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(13) The term "State agency" means the State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish or wildlife resources within a State.

(14) The term "take" means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

(15) The term "threatened species" means any species which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

(16) The term "United States," when used in a geographical context, includes all States.

DETERMINATION OF ENDANGERED SPECIES AND THREATENED SPECIES

SEC. 4. (a) GENERAL.—(1) The Secretary shall by regulation determine whether any species is an endangered species or a threatened species because of any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

(2) With respect to any species over which program responsibilities have been vested in the Secretary of Commerce pursuant to Reorganization Plan Numbered 4 of 1970—

(A) in any case in which the Secretary of Commerce determines that such species should—

(i) be listed as an endangered species or a threatened species, or

(ii) be changed in status from a threatened species to an endangered species,

he shall so inform the Secretary of the Interior, who shall list such species in accordance with this section;

(B) in any case in which the Secretary of Commerce determines that such species should—

(i) be removed from any list published pursuant to subsection (c) of this section, or

(ii) be changed in status from an endangered species to a threatened species, he shall recommend such action to the Secretary of the Interior, and the Secretary of the Interior, if he concurs in the recommendation, shall implement such action; and

(C) the Secretary of the Interior may not list or remove from any list any such species, and may not change the status of any such species which are listed, without a prior favorable determination made pursuant to this section by the Secretary of Commerce.

(b) Basis for Determinations.—(1) The Secretary shall make determinations required by subsection (a) of this section on the basis of the best scientific and commercial data available to him and after consultation, as appropriate, with the affected States, interested persons and organizations, other interested Federal agencies, and, in cooperation with the Secretary of State, with the country or countries in which the species concerned is normally found or whose citizens harvest such species on the high seas; except that in any case in which such determinations involve resident species of fish or wildlife, the Secretary of the Interior may not add such species to, or remove such species from, any list published pursuant to subsection (c) of this section, unless the Secretary has first—

(A) published notice in the Federal Register and notified the Governor of each State within which such species is then known to occur that such action is contemplated;

(B) allowed each such State 90 days after notification to submit its comments and recommendations, except to the extent that such period may be shortened by agreement between the Secretary and the Governor or Governors concerned; and

(C) published in the Federal Register a summary of all comments and recommendations received by him which relate to such proposed action.

(2) In determining whether or not any species is an endangered species or a threatened species, the Secretary shall take into consideration those efforts, if any, being made by any nation or any political subdivision of any nation to protect such species, whether by predator control, protection of habitat and food supply, or other conservation practices, within any area under the jurisdiction of any such nation or political subdivision, or on the high seas.

(3) Species which have been designated as requiring protection from unrestricted commerce by any foreign country, or pursuant to any international agreement, shall receive full consideration by the Secretary to determine whether each is an endangered species or a threatened species.

(c) Lists.—(1) The Secretary of the Interior shall publish in the Federal Register, and from time to time he may by regulation revise, a list of all species determined by him or the Secretary of Commerce to be endangered species and a list of all species determined by him or the Secretary of Commerce to be threatened species. Each list shall refer to the species contained therein by scientific and common name or names, if any, and shall specify with respect to each such species over what portion of its range it is endangered or threatened.

(2) The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5, United States Code, conduct a review of any listed or unlisted species proposed to be removed from or added to either of the lists published pursuant to paragraph (1) of this subsection, but only if he makes and publishes a finding that such person has presented substantial evidence which in his judgment warrants such a review.

(3) Any list in effect on the day before the date of the enactment of this Act of species of fish or wildlife determined by the Secretary of the Interior, pursuant to the Endangered Species Conservation Act of 1969, to be threatened with extinction shall be republished to conform to the classification for endangered species or threatened species, as the case may be, provided for in this Act, but until such republication, any such species so listed shall be deemed an endangered species within the meaning of this Act. The republication of any species pursuant to this paragraph shall not require public hearing or comment under section 553 of title 5, United States Code.

(d) Protective Regulations.—Whenever any species is listed as a threatened species pursuant to subsection (c) of this section, the Secretary shall issue such regulations as he deems necessary and advisable to provide for the conservation of such species. The Secretary may by regulation prohibit with respect to any threatened species any act prohibited under section 9(a)(1), in the case of fish or wildlife, or section 9(a)(2), in the case of plants, with respect to endangered species; except that with respect to the taking of resident species of fish or wildlife, such regulations shall apply in any State which has entered into a cooperative agreement pursuant to section 6(a) of this Act only to the extent that such regulations have also been adopted by such State.

(e) SIMILARITY OF APPEARANCE CASES.—The Secretary may, by regulation, and to the extent he deems advisable, treat any species as an endangered species or threatened species even though it is not listed pursuant to section 4 of this Act if he finds that—

(A) such species so closely resembles in appearance, at the point in question, a species which has been listed pursuant to such section that enforcement personnel would have substantial difficulty in attempting to differentiate between the listed and unlisted species;

(B) the effect of this substantial difficulty is an additional threat to an endangered or threatened species; and

(C) such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of this Act.

(f) REGULATIONS.—(1) Except as provided in paragraphs (2) and (3) of this subsection and subsection (b) of this section, the provisions of section 553 of title 5, United States Code (relating to rulemaking procedures), shall apply to any regulation promulgated to carry out the purposes of this Act.

(2)(A) in the case of any regulation proposed by the Secretary to carry out the purposes of this Act—

(i) the Secretary shall publish general notice of the proposed regulation (including the complete text of the regulation) in the Federal Register not less than 60 days before the effective date of the regulation; and

(ii) of any person who feels that he may be adversely affected by the proposed regulation files (within 45 days after the date of publication of general notice) objections thereto and requests a public hearing thereon, the Secretary may grant such request but shall, if he denies such request, publish his reasons therefor in the Federal Register.

(B) Neither subparagraph (A) of this paragraph nor section 553 of title 5, United States Code, shall apply in the case of any of the following regulations and any such regulation shall, at the discretion of the Secretary, take effect immediately upon publication of the regulation in the Federal Register:

(i) Any regulation appropriate to carry out the purposes of this Act which was originally promulgated to carry out the Endangered Special Conservation Act of 1969.

(ii) Any regulation (including any regulation implementing section 6(g)(2)(B)(ii) of this Act) issued by the Secretary in regard to any emergency posing a significant risk to the well-being of any species of fish or wildlife, but only if (I) at the time of publication of the regulation in the Federal Register the Secretary publishes therein detailed reasons why such regulation is necessary, and (II) in the case such regulation applies to resident species of fish and wildlife, the requirements of subsection (b)(A), (B), and (C) of this section have been complied with. Any regulation promulgated under the authority of this clause (ii) shall cease to have force and effect at the close of the 120-day period following the date of publication unless, during such 120-day period, the rulemaking procedures which would apply to such regulation without regard to this subparagraph are complied with.

(3) The publication in the Federal Register of any proposed or final regulation which is necessary or appropriate to carry out the purposes of this Act shall include a statement by the Secretary of the facts on which such regulation is based and the relationship of such facts to such regulation.

LAND ACQUISITION

SEC. 5. (a) PROGRAM.—The Secretary of the Interior shall establish and implement a program to conserve (A) fish or wildlife which are listed as endangered species or threatened species pursuant to section 4 of this Act; or (B) plants which are included in Appendices to the Convention. To carry out such program, he—

(1) shall utilize the land acquisition and other authority under the Fish and Wildlife Act of 1956, as amended, the Fish and Wildlife Coordination Act, as amended, and the Migratory Bird Conservative Act, as appropriate; and

(2) is authorized to acquire by purchase, donation, or otherwise, lands, waters, or interest therein, and such authority shall be in addition to any other land acquisition authority vested in him.

(b) Acquisitions.—Funds made available pursuant to the Land and Water Conservation Fund Act of 1965, as amended, may be used for the purpose of acquiring lands, waters, or interests therein under subsection (a) of this section.

COOPERATION WITH THE STATES

Sec. 6. (a) General.—In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the States. Such cooperation shall include consultation with the States concerned before acquiring any land or water, or interest therein, for the purpose of conserving any endangered species or threatened species.

(b) Management Agreements.—The Secretary may enter into agreements with any State for the administration and management of any area established for the conservation of endangered species or threatened species. Any revenues derived from the administration of such areas under these agreement shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383; 16 U.S.C. 715s).

(c) Cooperative Agreements.—In furtherance of the purposes of this Act, the Secretary is authorized to enter into a cooperative agreement in accordance with this section with any State which establishes and maintains an adequate and active program for the conservation of endangered species and threatened species. Within one hundred and twenty days after the Secretary receives a certified copy of such a proposed State program, he shall make a determination whether such program is in accordance with this Act. Unless he determines, pursuant to this subsection, that the State program is not in accordance with this Act, he shall enter into a cooperative agreement with the State for the purpose of assisting in implementation of the State program. In order for a State program to be deemed an adequate and active program for the conservation of endangered species and threatened species, the Secretary must find, and annually thereafter reconfirm such finding, that under the State program—

(1) authority resides in the State agency to conserve resident species of fish or wildlife determined by the State agency or the Secretary to be endangered or threatened;

(2) the State agency has established acceptable conservation programs, consistent with the purposes and policies of this Act, for all resident species of fish and wildlife in the State which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

(3) the State agency is authorized to conduct investigations to determine the status and requirements for survival of resident species of fish and wildlife;

(4) the State agency is authorized to establish programs, including the acquisition of land or aquatic habitat or interests therein, for the conservation of resident endangered species or threatened species; and

(5) provision is made for public participation in designating resident species of fish or wildlife as endangered or threatened.

(d) Allocation of Funds.—(1) The Secretary is authorized to provide financial assistance to any State, through its respective State agency, which has entered into a cooperative agreement pursuant to subsection (c) of this section to assist in development of programs for the conservation of endangered and threatened species. The Secretary shall make an allocation of appropriated funds to such States based on consideration of—

(A) the international commitments of the United States to protect endangered species or threatened species;

(B) the readiness of a State to proceed with a conservation program consistent with the objectives and purposes of this Act;

(C) the number of endangered species and threatened species within a State;

(D) the potential for restoring endangered species and threatened species within a State; and

(E) the relative urgency to initiate a program to restore and protect an endangered species or threatened species in terms of survival of the species.

So much of any appropriated funds allocated for obligation to any State for any fiscal year as remains unobligated at the close thereof is authorized to be made available to that State until the close of the succeeding fiscal year. Any amount allocated to any State which is unobligated at the end of the period during which is available for expenditure is authorized to be made available for expenditure by the Secretary in conducting programs under this section.

(2) Such cooperative agreements shall provide for (A) the actions to be taken by the Secretary and the States; (B) the benefits that are expected to be derived in connection with the conservation of endangered or threatened species; (C) the estimated cost of these actions; and (D) the share of such costs to be borne by the Federal Government and by the States; except that—

(i) the Federal share of such program costs shall not exceed 66⅔ per centum of the estimated program costs stated in the agreement; and

(ii) the Federal share may be increased to 75 per centum whenever two or more States having a common interest in one or more endangered or threatened species, the conservation of which may be enhanced by cooperation of such States, enter jointly into an agreement with the Secretary.

The Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon in the cooperative agreement. For the purposes of this section, the non-Federal share may, in the discretion of the Secretary, be in the form of money or real property, the value of which will be determined by the Secretary, whose decision shall be final.

(e) REVIEW OF STATE PROGRAMS.—Any action taken by the Secretary under this section shall be subject to his periodic review at no greater than annual intervals.

(f) CONFLICTS BETWEEN FEDERAL AND STATE LAWS.—Any State law or regulation which applies with respect to the importation or exportation of, or interstate or foreign commerce in, endangered species or threatened species is void to the extent that it may effectively (1) permit what is prohibited by this Act or by any regulation which implements this Act, or (2) prohibit what is authorized pursuant to an exemption or permit provided for in this Act or in any regulation which implements this Act. This Act shall not otherwise be construed to void any State law or regulation which is intended to conserve migratory, resident, or introduced fish or wildlife, or to permit or prohibit sale of such fish or wildlife. Any State law or regulation respecting the taking of an endangered species or threatened species may be more restrictive than the exemptions or permits provided for in this Act or in any regulation which implements this Act but not less restrictive than the prohibitions so defined.

(g) TRANSITION.—(1) For purposes of this subsection, the term "establishment period" means, with respect to any State, the period beginning on the date of enactment of this Act and ending on whichever of the following dates first occurs: (A) the date of the close of the 120-day period following the adjournment of the first regular session of the legislature of such State which commences after such date of enactment, or (B) the date of the close of the 15-month period following such date of enactment.

(2) The prohibitions set forth in or authorized pursuant to sections 4(d) and 9(a)(1)(B) of this Act shall not apply with respect to the taking of any resident endangered species or threatened species (other than species listed in Appendix I to the Convention or otherwise specifically covered by any other treaty or Federal law) within any State—

(A) which is then a party to a cooperative agreement with the Secretary pursuant to section 6(c) of this Act (except to the extent that the taking of any such species is contrary to the law of such State); or

(B) except for any time within the establishment period when—

(i) the Secretary applies such prohibition to such species at the request of the State, or

(ii) the Secretary applies such prohibition after he finds, and publishes his finding, that an emergency exists posing a significant risk to the wellbeing of such species and that the prohibition must be applied to protect such species. The Secretary's finding and publication may be made without regard to the public hearing or comment provisions of section 553 of title 5, United States Code, or any other provision of this Act; by such prohibition shall expire 90 days after the date of its imposition unless the Secretary further extends such prohibition by publishing notice and a statement of justification of such extension.

(h) REGULATIONS.—The Secretary is authorized to promulgate such regulations as may be appropriate to carry out the provisions of this section relating to financial assistance to States.

(i) APPROPRIATIONS.—For the purposes of this section, there is authorized to be appropriated through the fiscal year ending June 30, 1977, not to exceed $10,000,000.

INTERAGENCY COOPERATION

SEC. 7. The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

INTERNATIONAL ASSISTANCE

SEC. 8. (a) FINANCIAL ASSISTANCE.—As a demonstration of the commitment of the United States to the worldwide protection of endangered species and threatened species, the President may, subject to the provisions of section 1415 of the Supplemental Appropriation Act, 1953 (31 U.S.C. 724), use foreign currencies accruing to the United States Government under the Agricultural Trade Development and Assistance Act of 1954 or any other law to provide to any foreign country (with its consent) assistance in the development and management of programs in that country which the Secretary determines to be necessary or useful for the conservation of any endangered species or threatened species listed by the Secretary pursuant to section 4 of this Act. The President shall provide assistance (which includes, but is not limited to, the acquisition, by lease or otherwise, of lands, waters, or interests therein) to foreign countries under this section under such terms and conditions as he deems appropriate. Whenever foreign currencies are available for the provision of assistance under this section, such currencies shall be used in preference to funds appropriated under the authority of section 15 of this Act.

(b) ENCOURAGEMENT OF FOREIGN PROGRAMS.—In order to carry out further the provisions of this Act, the Secretary, through the Secretary of State, shall encourage—

(1) foreign countries to provide for the conservation of fish or wildlife including endangered species and threatened species listed pursuant to section 4 of this Act;

(2) the entering into of bilateral or multilateral agreements with foreign countries to provide for such conservation; and

(3) foreign persons who directly or indirectly take fish or wildlife in foreign countries or on the high seas for importation into the United States for commercial or other purposes to develop and carry out with such assistance as he may provide, conservation practices designed to enhance such fish or wildlife and their habitat.

(c) PERSONNEL.—After consultation with the Secretary of State, the Secretary may—

(1) assign or otherwise make available any officer or employee of his department for the purpose of cooperating with foreign countries and international organizations in developing personnel resources and programs which promote the conservation of fish or wildlife; and

(2) conduct or provide financial assistance for the educational training of foreign personnel, in this country or abroad, in fish, wildlife, or plant management, research, and law enforcement and to render professional assistance abroad in such matters.

(d) INVESTIGATIONS.—After consultation with the Secretary of State and the Secretary of the Treasury, as appropriate, the Secretary may conduct or cause to be conducted such law enforcement investigations and research abroad as he deems necessary to carry out the purposes of this Act.

(e) CONVENTION IMPLEMENTATION.—The President is authorized and directed to designate appropriate agencies to act as the Management Authority or Authorities and the Scientific Authority or Authorities pursuant to the Convention. The agencies so designated shall thereafter be authorized to do all things assigned to them under the Convention, including the issuance of permits and certificates. The agency designated by the President to communicate with other parties to the Convention and with the Secretariat shall also be empowered, where appropriate, in consultation with the State Department, to act on behalf of and represent the United States in all regards as required by the Convention. The President shall also designate those agencies which shall act on behalf of and represent the United States in all regards as required by the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere.

PROHIBITED ACTS

SEC. 9. (a) GENERAL.—(1) Except as provided in sections 6(g)(2) and 10 of this Act, with respect to any endangered species of fish or wildlife listed pursuant to section 4 of this Act it is unlawful for any person subject to the jurisdiction of the United States to—

(A) import any such species into, or export any such species from the United States;

(B) take any such species within the United States or the territorial sea of the United States;

(C) take any such species upon the high seas;

(D) possess, sell, deliver, carry, transport, or ship, by any means whatsoever, any such species taken in violation of subparagraphs (B) and (C);

(E) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity, any such species;

(F) sell or offer for sale in interstate or foreign commerce any such species; or

(G) violate any regulation pertaining to such species or to any threatened species of fish or wildlife listed pursuant to section 4 of this Act and promulgated by the Secretary pursuant to authority provided by this Act.

(2) Except as provided in sections 6(g)(2) and 10 of this Act, with respect to any endangered species of plants listed pursuant to section 4 of this Act, it is unlawful for any person subject to the jurisdiction of the United States to—

(A) import any such species into, or export any such species from, the United States;

(B) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity, any such species;

(C) sell or offer for sale in interstate or foreign commerce any such species; or

(D) violate any regulation pertaining to such species or to any threatened species of plants listed pursuant to section 4 of this Act and promulgated by the Secretary pursuant to authority provided by this Act.

(b) SPECIES HELD IN CAPTIVITY OR CONTROLLED ENVIRONMENT.—The provisions of this section shall not apply to any fish or wildlife held in captivity or in a controlled environment on the effective date of this Act if the purposes of such holding are not contrary to the purposes of this Act; except that this subsection shall not apply in the case of any fish or wildlife held in the course of a commercial activity. With respect to any act prohibited by this section which occurs after a period of 180 days from the effective date of this Act, there shall be a rebuttable presumption that the fish or wildlife involved in such act was not held in captivity or in a controlled environment on such effective date.

(c) VIOLATION OF CONVENTION.—(1) It is unlawful for any person subject to the jurisdiction of the United States to engage in any trade in any specimens contrary to the provisions of the Convention, or to possess any specimens traded contrary to the provisions of the Convention, including the definitions of terms in article I thereof.

(2) Any importation into the United States of fish or wildlife shall, if—

(A) such fish or wildlife is not an endangered species listed pursuant to section 4 of this Act but is listed in Appendix II to the Convention,

(B) the taking and exportation of such fish or wildlife is not contrary to the provisions of the Convention and all other applicable requirements of the Convention have been satisfied,

(C) the applicable requirements of subsections (d), (e), and (f) of this section have been satisfied, and

(D) such importation is not made in the course of a commercial activity, be presumed to be an importation not in violation of any provision of this Act or any regulation issued pursuant to this Act.

(d) Imports and Exports.—(1) It is unlawful for any person to engage in business as an importer or exporter of fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered species or threatened species, and (B) are imported for purposes of human or animal consumption or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants without first having obtained permission from the Secretary.

(2) Any person required to obtain permission under paragraph (1) of this subsection shall—

(A) keep such records as will fully and correctly disclose each importation or exportation of fish, wildlife, or plants made by him and the subsequent disposition made by him with respect to such fish, wildlife, or plants;

(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his places of business, an opportunity to examine his inventory of imported fish, wildlife, or plants and the records required to be kept under subparagraph (A) of this paragraph, and to copy such records; and

(C) file such reports as the Secretary may require.

(3) The Secretary shall prescribe such regulations as are necessary and appropriate to carry out the purposes of this subsection.

(e) Reports.—It is unlawful for any person importing or exporting fish or wildlife (other than shellfish and fishery products which (1) are not listed pursuant to section 4 of this Act as endangered or threatened species, and (2) are imported for purposes of human or animal consumption or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plans to fail to file any declaration or report as the Secretary deems necessary to facilitate enforcement of this Act or to meet the obligations of the Convention.

(f) Designation of Ports.—(1) It is unlawful for any person subject to the jurisdiction of the United States to import into or export from the United States any fish or wildlife (other than shellfish and fishery products which (A) are not listed pursuant to section 4 of this Act as endangered species or threatened species, and (B) are imported for purposes of human or animal consumption or taken in waters under the jurisdiction of the United States or on the high seas for recreational purposes) or plants, except at a port or ports designated by the Secretary of the Interior. For the purpose of facilitating enforcement of this Act and reducing the costs thereof, the Secretary of the Interior, with approval of the Secretary of the Treasury and after notice and opportunity for public hearing, may, by regulation, designate ports and change such designations. The Secretary of the Interior, under such terms and conditions as he may prescribe, may permit the importation or exportation at nondesignated ports in the interest of the health or safety of the fish or wildlife or plants, or for other reasons if, in his discretion, he deems it appropriate and consistent with the purpose of this subsection.

(2) Any port designated by the Secretary of the Interior under the authority of section 4(d) of the Act of December 5, 1969 (16 U.S.C. 666cc–4(d)), shall, if such designation is in effect on the day before the date of the enactment of this Act, be deemed to be a port designated by the Secretary under paragraph (1) of this subsection until such time as the Secretary otherwise provides.

(g) Violations.—It is unlawful for any person subject to the jurisdiction of the United States to attempt to commit solicit another to commit, or cause to be committed, any offense defined in this section.

EXCEPTIONS

Sec. 10. (a) Permits.—The Secretary may permit, under such terms and conditions as he may prescribe, any act otherwise prohibited by section 9 of this Act for scientific purposes or to enhance the propagation or survival of the affected species.

(b) HARDSHIP EXEMPTIONS.—(1) If any person enters into a contract with respect to a species of fish or wildlife or plant before the date of the publication in the Federal Register of notice of consideration of that species as an endangered species and the subsequent listing of that species as an endangered species pursuant to section 4 of this Act will cause undue economic hardship to such person under the contract, the Secretary, in order to minimize such hardship, may exempt such person from the application of section 9(a) of this Act to the extent the Secretary deems appropriate if such person applies to him for such exemption and includes with such application such information as the Secretary may require to prove such hardship; except that (A) no such exemption shall be for a duration of more than one year from the date of publication in the Federal Register of notice of consideration of the species concerned, or shall apply to a quantity of fish or wildlife or plants in excess of that specified by the Secretary; (B) the one-year period for those species of fish or wildlife listed by the Secretary as endangered prior to the effective date of this Act shall expire in accordance with the terms of section 3 of the Act of December 5, 1969 (83 Stat. 275); and (C) no such exemption may be granted for the importation or exportation of a specimen listed in Appendix I of the Convention which is to be used in a commercial activity.

(2) As used in this subsection, the term "undue economic hardship" shall include, but not be limited to:

(A) substantial economic loss resulting from inability caused by this Act to perform contracts with respect to species of fish and wildlife entered into prior to the date of publication in the Federal Register of a notice of consideration of such species as an endangered species;

(B) substantial economic loss to persons who, for the year prior to the notice of consideration of such species as an endangered species, derived a substantial portion of their income from the lawful taking of any listed species, which taking would be made unlawful under this Act; or

(C) curtailment of subsistence taking made unlawful under this Act by persons (i) not reasonably able to secure other sources of subsistence; and (ii) dependent to a substantial extent upon hunting and fishing for subsistence; and (iii) who must engage in such curtailed taking for subsistence purposes.

(3) The Secretary may make further requirements for a showing of undue economic hardship as he deems fit. Exceptions granted under this section may be limited by the Secretary in his discretion as to time, area, or other factor of applicability.

(c) NOTICE AND REVIEW.—The Secretary shall publish notice in the Federal Register of each application for an exemption or permit which is made under this subsection. Each notice shall invite the submission from interested parties, within thirty days after the date of the notice, written data, views, or arguments with respect to the application. Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.

(d) PERMIT AND EXEMPTION POLICY.—The Secretary may grant exceptions under subsections (a) and (b) of this section only if he finds and publishes his finding in the Federal Register that (1) such exceptions were applied for in good faith, (2) if granted and exercised will not operate to the disadvantage of such endangered species, and (3) will be consistent with the purposes and policy set forth in section 2 of this Act.

(e) ALASKA NATIVES.—(1) Except as provided in paragraph (4) of this subsection the provisions of this Act shall not apply with respect to the taking of any endangered species or threatened species, or the importation of any such species taken pursuant to this section by—

(A) any Indian, Aleut, or Eskimo who is an Alaskan Native who resides in Alaska; or

(B) any non-native permanent resident of an Alaskan native village; if such taking is primarily for subsistence purposes. Non-edible byproducts of species taken pursuant to this section may be sold in interstate commerce when made into authentic native articles of handicrafts and clothing: except that the provisions of this subsection shall not apply to any non-native resident of an Alaskan native village found by the Secretary to be not primarily dependent upon the taking of fish and wildlife for consumption or for the creation and sale of authentic native articles of handicrafts and clothing.

(2) Any taking under this subsection may not be accomplished in a wasteful manner.

(3) As used in this subsection—

(i) The term "subsistence" includes selling any edible portion of fish or wildlife in native villages and towns in Alaska for native consumption within native villages or towns; and

(ii) The term "authentic" native articles of handicrafts and clothing" means items composed wholly or in some significant respect of natural materials, and which are produced, decorated, or fashioned in the exercise of traditional native handicrafts without the use of pantographs, multiple carvers, or other mass copying devices. Traditional native handicrafts include, but are not limited to, weaving, carving, stitching, sewing, lacking, beading, drawing, and painting.

(4) Notwithstanding the provisions of paragraph (1) of this subsection, whenever the Secretary determines that any species of fish or wildlife which is subject to taking under the provisions of this subsection is an endangered species or threatened species, and that such taking materially and negatively affects the threatened or endangered species, he may prescribe regulations upon the taking of such species by any such Indian, Aleut, Eskimo, or non-Native Alaskan resident of an Alaskan native village. Such regulations may be established with reference to species, geographical description of the area included, the season for taking, or any other factors related to the reason for establishing such regulations and consistent with the policy of this Act. Such regulations shall be prescribed after a notice and hearings in the affected judicial districts of Alaska and as otherwise required by section 103 of the Marine Mammal Protection Act of 1972, and shall be removed as soon as the Secretary determines that the need for their impositions has disappeared.

PENALTIES AND ENFORCEMENT

SEC. 11. (a) CIVIL PENALTIES.—(1) Any person who knowingly violates, or who knowingly commits an act in the course of a commercial activity which violates, any provision of this Act, or any provision of any permit or certificate issued hereunder, or of any regulation issued in order to implement subsection (a)(1) (A), (B), (C), (D), (E), or (F), (a)(2), (A), (B), or (C), (c), (d) (other than a regulation relating to recordkeeping of filing of reports), (f) or (g) of section 9 of this Act, may be assessed a civil penalty by the Secretary of not more than $10,000 for each violation. Any person who knowingly violates, or who knowingly commits an act in the course of a commercial activity which violates, any provision of any other regulation issued under this Act may be assessed a civil penalty by the Secretary of not more than $5,000 for each such violation. Any person who otherwise violates any provision of this Act, or any regulation, permit, or certificate issued hereunder, may be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation. No penalty may be assessed under this subsection unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be remitted or mitigated by the Secretary. Upon any failure to pay a penalty assessed under this subsection, the Secretary may request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found, resides or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. The court shall hear such action on the record made before the Secretary and shall sustain his action if it is supported by substantial evidence on the record considered as a whole.

(2) Hearings held during proceedings for the assessment of civil penalties authorized by paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5, United States Code. The Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary,

or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(b) CRIMINAL VIOLATIONS.—(1) Any person who willfully commits an act which violates any provision of this Act, of any permit or certificate issued hereunder, or of any regulation issued in order to implement subsection (a)(1) (A), (B), (C), (D), (E), or (F); (a)(2)(A), (B), or (C) (c), (d) (other than a regulation relating to recordkeeping or filing of reports, (f) or (g) of section 9 of this Act shall, upon conviction, be fined not more than $20,000 or imprisoned for not more than one year, or both. Any person who willfully commits an act which violates any provision of any other regulation issued under this Act shall, upon conviction, be fined not more than $10,000 or imprisoned for not more than six months, or both.

(2) The head of any Federal agency which has issued a lease, license, permit, or other agreement authorizing the use of Federal lands, including grazing of domestic livestock, to any person who is convicted of a criminal violation of this Act or any regulation, permit, or certificate issued hereunder may immediately modify, suspend, or revoke each lease, license, permit, or other agreement. The Secretary shall also suspend for a period of up to one year, or cancel, any Federal hunting or fishing permits or stamps issued to any person who is convicted of a criminal violation of any provision of this Act or any regulation, permit, or certificate issued hereunder. The United States shall not be liable for the payments of any compensation, reimbursement, or damages in connection with the modification, suspension, or revocation of any leases, licenses, permits, stamps, or other agreements pursuant to this section.

(c) DISTRICT COURT JURISDICTION.—The several district courts of the United States, including the courts enumerated in section 460 of title 28, United States Code, shall have jurisdiction over any actions arising under this Act. For the purpose of this Act, American Samoa shall be included within the judicial district of the District Court of the United States for the District of Hawaii.

(d) REWARDS.—Upon the recommendation of the Secretary, the Secretary of the Treasury is authorized to pay an amount equal to one-half of the civil penalty or fine paid, but not to exceed $2,500, to any person who furnishes information which leads to a finding of civil violation or a conviction of a criminal violation of any provision of this Act or any regulation or permit issued thereunder. Any officer or employee of the United States or of any State or local government who furnishes information or renders service in the performance of his official duties shall not be eligible for payment under this section.

(e) ENFORCEMENT.—(1) The provisions of this Act and any regulations or permits issued pursuant thereto shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all such Secretaries. Each such Secretary may utilize by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency or any State agency for purposes of enforcing this Act.

(2) The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulation issued thereunder.

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, to enforce this Act may detain for inspection and inspect any package, crate, or other container, including its contents, and all accompanying documents, upon importation or exportation. Such person may execute and serve any arrest warrant, search warrant, or other warrant or civil or criminal process issued by any officer or court of competent jurisdiction for enforcement of this Act. Such person so authorized may search and seize, with or without a warrant, as authorized by law. Any fish, wildlife, property or item so seized shall be held by any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating pending disposition of civil or criminal proceedings, or the institution of any action in rem for forfeiture of such fish, wildlife, property, or item pursuant to paragraph (4) of this subsection: except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

(4)(A) All fish or wildlife or plants taken, possessed, sold, purchased, offered for sale or purchase, transported, delivered, received, carried, shipped, exported or imported contrary to the provisions of this Act, any regulation made pursuant thereto, or any permit or certificate issued hereunder shall be subject to forfeiture to the United States.

(B) All guns, traps, nets, and other equipment, vessels, vehicles, aircraft, and other means of transportation used to aid the taking, possessing, selling, purchasing, offering for sale or purchase, transporting, delivering, receiving, carrying, shipping, exporting, or importing of any fish or wildlife or plants in violation of this Act, any regulation made pursuant thereto, or any permit or certificate issued thereunder shall be subject to forfeiture to the United States upon conviction of a criminal violation pursuant to section 11(b)(1) of this Act.

(5) All provisions of law relating to the seizure, forfeiture, and condemnation of a vessel for violation of the customs laws, the disposition of such vessel or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act; except that all powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Treasury Department shall, for the purposes of this Act, be exercised or performed by the Secretary or by such persons as he may designate.

(f) REGULATIONS.—The Secretary, the Secretary of the Treasury, and the Secretary of the Department in which the Coast Guard is operating, are authorized to promulgate such regulations as may be appropriate to enforce this Act, and charge reasonable fees for expenses to the Government connected with permits or certificates authorized by this Act including processing applications and reasonable inspections, and with the transfer, board, handling, or storage of fish or wildlife or plants and evidentiary items seized and forfeited under this Act. All such fees collected pursuant to this subsection shall be deposited in the Treasury to the credit of the appropriation which is current and chargeable for the cost of furnishing the services. Appropriated funds may be expended pending reimbursement from parties in interest.

(g) CITIZEN SUITS.—(1) Except as provided in paragraph (2) of this subsection any person may commence a civil suit on his own behalf—

(A) to enjoin any person, including the United States and any other governmental instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution), who is alleged to be in violation of any provision of this Act or regulation issued under the authority thereof; or

(B) to compel the Secretary to apply, pursuant to section 6(g)(2)(B)(ii) of this Act, the prohibitions set forth in or authorized pursuant to section 4(d) or section 9(a)(1)(B) of this Act with respect to the taking of any resident endangered species or threatened species within any State.

The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any such provision or regulation, as the case may be. In any civil suit, commenced under subparagraph (B) the district court shall compel the Secretary to apply the prohibition sought if the court finds that the allegation that an emergency exists is supported by substantial evidence.

(2)(A) No action may be commenced under subparagraph (1)(A) of this section—

(i) prior to sixty days after written notice of the violation has been given to the Secretary, and to any alleged violator of any such provision or regulation;

(ii) if the Secretary has commenced action to impose a penalty pursuant to subsection (a) of this section; or

(iii) if the United States has commenced and is diligently prosecuting a criminal action in a court of the United States or a State to redress a violation of any such provision or regulation.

(B) No action may be commenced under subparagraph (1)(B) of this section—

(i) prior to sixty days after written notice has been given to the Secretary setting forth the reasons why an emergency is thought to exist with respect to an endangered species or a threatened species in the State concerned; or

(ii) if the Secretary has commenced and is diligently prosecuting action under section 6(g)(2)(B)(ii) of this Act to determine whether any such emergency exists.

(3)(A) Any suit under this subsection may be brought in the judicial district in which the violation occurs.

(B) In any such suit under this subsection in which the United States is not a party, the Attorney General, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

(4) The court, in issuing any final order in any suit brought pursuant to paragraph (1) of this subsection, may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(5) The injunctive relief provided by this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or limitation or to seek any other relief (including relief against the Secretary or a State agency.)

(h) Coordination With Other Laws.—The Secretary of Agriculture and the Secretary shall provide for appropriate coordination of the administration of this Act with the administration of the animal qurantine laws (21 U.S.C. 101–105, 111–135b and 612–614) and section 306 of the Tariff Act of 1930 (19 U.S.C. 1306). Nothing in this Act or any amendment made by this Act shall be construed as superseding or limiting in any manner the functions of the Secretary of Agriculture under any other law relating to prohibited or restricted importations or possession of animals and other articles and no proceeding or determination under this Act shall preclude any proceeding or be considered determinative of any issue of fact or law in any proceeding under any Act administered by the Secretary of Agriculture. Nothing in this Act shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary of the Treasury under the Tariff Act of 1930, including, without limitation, section 527 of that Act (19 U.S.C. 1527), relating to the importation of wildlife taken, killed, possessed, or exported to the United States in violation of the laws or regulations of a foreign country.

ENDANGERED PLANTS

Sec. 12. The Secretary of the Smithsonian Institution, in conjunction with other affected agencies, is authorized and directed to review (1) species of plants which are now or may become endangered or threatened and (2) methods of adequately conserving such species, and to report to Congress, within one year after the date of the enactment of this Act, the results of such review including recommendations for new legislation or the amendment of existing legislation.

CONFORMING AMENDMENTS

Sec. 13. (a) Subsection 4(c) of the Act of October 15, 1966 (80 Stat. 928, 16 U.S.C 668dd(e)), is further amended by revising the second sentence thereof to read as follows: "With the exception of endangered species and threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973 in States wherein a cooperative agreement does not exist pursuant to section 6(c) of that Act, nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the system."

(b) Subsection 10(a) of the Migratory Bird Conservation Act (45 Stat. 1224, 16 U.S.C. 715(a)) and subsection 401(a) of the Act of June 15, 1935 (49 Stat. 383, 16 U.S.C. 715s(a)) are each amended by striking out "threatened with extinction," and inserting in lieu thereof the following: "listed pursuant to section 4 of the Endangered Species Act of 1973 as endangered species or threatened species,".

(c) Section 7(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C 4601—9(a)(1)) is amended by striking out:

"Threatened Species.—For any national area which may be authorized for the preservation of species of fish or wildlife that are threatened with extinction."

and inserting in lieu thereof the following:

"Endangered Species and Threatened Species.—For lands, waters, or interests therein, the acquisition of which is authorized under section 5(a) of the Endangered Species Act of 1973, needed for the purpose of conserving endangered or threatened species of fish or wildlife or plants."

(d) The first sentence of section 2 of the Act of September 28, 1962, as amended (76 Stat. 653, 16 U.S.C. 460k–1), is amended to read as follows:

"The Secretary is authorized to acquire areas of land, or interests therein, which are suitable for—

"(1) incidental fish and wildlife-oriented recreational development,

"(2) the protection of natural resources,

"(3) the conservation of endangered species or threatened species listed by the Secretary pursuant to section 4 of the Endangered Species Act of 1973, or

"(4) carrying out two or more of the purposes set forth in paragraphs (1) through (3) of this section, and are adjacent to, or within, the said conservation areas, except that the acquisition of any land or interest therein pursuant to this section shall be accomplished only with such funds as may be appropriated therefor by the Congress or donated for such purposes, but such property shall not be acquired with funds obtained from the sale of Federal migratory bird hunting stamps."

(e) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) is amended—

(1) by striking out "Endangered Species Conservation Act of 1969" in section 3(1)(B) thereof and inserting in lieu thereof the following: "Endangered Species Act of 1973";

(2) by striking out "pursuant to the Endangered Species Conservation Act of 1969" in section 101(a)(3)(B) thereof and inserting in lieu thereof the following: "or threatened species pursuant to the Endangered Species Act of 1973";

(3) by striking out "endangered under the Endangered Species Conservation Act of 1969" in section 102(b)(3) thereof and inserting in lieu thereof the following: "an endangered species or threatened species pursuant to the Endangered Species Act of 1973"; and

(4) by striking out "of the Interior such revisions of the Endangered Species List, authorized by the Endangered Species Conservation Act of 1969," in section 202(a)(6) thereof and inserting in lieu thereof the following: "such revisions of the endangered species list and threatened species list published pursuant to section 4(c)(1) of the Endangered Species Act of 1973".

(f) Section 2(1) of the Federal Environmental Pesticide Control Act of 1972 (Public Law 92–516) is amended by striking out the words "by the Secretary of the Interior under Public Law 91–135" and inserting in lieu thereof the words "or threatened by the Secretary pursuant to the Endangered Species Act of 1973".

REPEALER

SEC. 14. The Endangered Species Conservation Act of 1969 (sections 1 through 3 of the Act of October 15, 1966, and sections 1 through 6 of the Act of December 5, 1969; 16 U.S.C. 668aa—668cc–6), is repealed.

AUTHORIZATION OF APPROPRIATIONS

SEC. 15. Except as authorized in section 6 of this Act, there are authorized to be appropriated—

(A) not to exceed $4,000,000 for fiscal year 1974, not to exceed $8,000,000 for fiscal year 1975 and not to exceed $10,000,000 for fiscal year 1976, to enable the Department of the Interior to carry out such functions and responsibilities as it may have been given under this Act; and

(B) not to exceed $2,000,000 for fiscal year 1974, $1,500,000 for fiscal year 1975 and not to exceed $2,000,000 for fiscal year 1976, to enable the Department of Commerce to carry out such functions and responsibilities as it may have been given under this Act.

EFFECTIVE DATE

SEC. 16. This Act shall take effect on the date of its enactment.

MARINE MAMMAL PROTECTION ACT OF 1972

SEC. 17. Except as otherwise provided in this Act, no provision of this Act shall take precedence over any more restrictive conflicting provision of the Marine Mammal Protection Act of 1972.

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the title of the bill, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the amendment of the House to the title of the bill, insert the following: "An Act to provide for the conservation of endangered and threatened species of fish, wildlife, and plants, and for other purposes."

And the House agree to the same.

PHILIP A. HART,
JOHN V. TUNNEY,
TED STEVENS,
FRANK E. MOSS,
MARLOW W. COOK,
Managers on the Part of the Senate.
LEONOR K. SULLIVAN,
JOHN D. DINGELL,
GEORGE A. GOODLING,
Managers on the Part of the House.

Mr. TUNNEY. Mr. President, today, the Senate will complete action on the Endangered Species Act of 1973. Hopefully, the measure will soon clear the House and be sent to the President.

As floor manager of the bill last July, and as a Senate conferee, I know how much time and effort has gone into this bill. I believe the staff members of the Senate Commerce Committee and the House Merchant Marine and Fisheries Committee should be commended for their efforts. There were difficult problems to resolve because the legislation was technically and geographically complex. But I believe that the final product will greatly improve our ability to protect species of fish and wildlife which are in imminent danger.

The conferees recognized the fact that the Federal Government simply does not have the resources to implement the act immediately, and thus set up a system of grants-in-aid to the States which will have the initial responsibility for management of resident species.

An important provision of the bill delegates listing of endangered species to the managing agencies—the National Oceanographic and Atmospheric Administration and the Interior Department. The Commerce Department may list species, but is prohibited from delisting without NOAA and Interior concurrence.

The bill established provides stiff penalties for violations.

This bill has been long in coming and is urgent in nature. In this country alone, there are over 100 species listed as endangered. Each provides a service to the environment and represents a part of an immensely complicated ecological system.

Passage of this act means that the Congress has responded positively to the magnitude of the problem and has voiced its concern for the species which we have placed near extinction. The Endangered Species Act responds to our duty to restore and propagate what we have—through carelessness and lack of understanding—nearly destroyed forever.

Mr. STEVENS. Mr. President, I support this conference report.

In conference with the House, agreement was reached on S. 1983 which we recommend to the Senate as a means of providing for the conservation, protection, restoration, and propagation of threatened and endangered species of fish, wildlife and plants.

I wish to briefly outline the main provisions of the conference report before us.

First, the bill will define the term "conservation" to include all methods and procedures necessary to bring a threatened or endangered species to a point where the measures provided in this are no longer necessary.

There is an exception allowing exclusion from protection by the act where an otherwise endangered or threatened species of insect presents a serious risk to man. A new definition of "commercial activity" delineates types of activities, including trades and exchanges of animals or animal products involving profit, which are to be treated under the act.

The conference committee discussed at length the proper area of responsibility for the Departments of Interior and Commerce. Consequently, the act specifies that the Departments have responsibilities, in determining and changing the status of the species as endangered or threatened, along the lines of Reorganization Act No. 4 of 1970. The physical act of maintaining the list will remain, as it is now, with the Department of the Interior. The conferees ask that every effort be taken to avoid duplication of effort by the two agencies.

Considerable concern was demonstrated in conference over the necessity for effective Federal consultation with all affected parties in determining a species to be endangered or threatened. The Senate bill required a special advisory committee with heavy State representation, for this purpose. The House did not. The conferees agreed that the Advisory Committee be eliminated from the bill but that consultation be strengthened to include special notification of the Governors of the affected States, along with public notification, and that the State be given a minimum of 90 days to comment.

The conferees strengthened the procedures for public participation by requiring an extended period of public notice of proposed regulation, not less than 60 days, providing for discretionary hearings, and establishing procedures for emergency action.

Recognizing that effective programs for the conservation of endangered species requires the acquisition of habitat crucial to the species, both bills provided such authority. The Senate bill limited that authority to habitat for fish and wildlife alone. The conferees adopted the House version, which extends the authority to include plant habitat. Authority is extended to the Secretary of the Interior, but it is anticipated that he will consult with the Secretary of Commerce in cases involving marine species over which Commerce has sole jurisdiction under Reorganization Plan No. 4. Furthermore, nothing prevents the Secretary of Commerce from seeking specific legislative authority to acquire land needed for NOAA's programs.

Initially, the House bill placed basic responsibility for establishing and administering the endangered species program in the Federal Government, and provided for the development of cooperative programs with concerned agencies.

The Senate accepted this and added a new section 16 onto the bill to shift basic responsibility back to the States. The conferees approved a section giving the States the fundamental roles regarding resident species for up to 15 months, or 120 days after the relevant State legislature has adjourned. This, it is hoped, will encourage the States to develop their own strong programs.

Both bills provided grant programs for the States, but the Senate authorized \$10 million over a 3½ year period while the House provision was open-ended. The Senate version was accepted by the conferees.

The House and Senate bills each authorized international endangered species programs, but the Senate restricted the programs to countries where counterpart funds are available. The conferees adopted the House version which stipulates that where counterpart funds are available they will be used in preference to appropriated funds.

The conferees rewrote the section providing exceptions for certain Alaska natives generally following the lines of the Senate bill, which provides similar exceptions for certain non-native residents of native communities. The House receded to the Senate in allowing the State of Alaska to restrict native and non-native taken as part of a State operated endangered species program. Although the native exemption is not intended to supercede the Marine Mammal Protection Act of 1973 it does allow the taking of marine mammals under certain circumstances.

The conferees developed new language in the penalties and enforcement section, mainly to strengthen the delineation of penalties for knowing or commercial violation as opposed to erroneous casual purchase of items by tourists.

House language was adopted providing for agents of the Secretary of the Interior to inspect packages and crates upon importation or exportation, similar to the authority now exercised by customs agents. The Conferees stressed that they are prepared to reexamine this section in the near future, to ensure that the authority is not being abused.

The conferees accepted a House version of the bill assigning the Smithsonian Institution to study any problems in interstate commerce in endangered species of plants.

Mr. President, I ask this Senate to support this conference approved Endangered Species Act of 1973. There should be no further delay in extending protection for those animals which cannot fend for themselves against the destructive actions of mankind.

Mr. COOK. Mr. President, the Senator from Kentucky secured an amendment on this bill, as the Senator from California well knows, having been manager of the bill during that time. I would like to read into the Record certain language from page 18 of the report of the managers, which reads as follows:

> The Senate bill contained a section added on the Floor by Senator Cook which would have had the effect of prohibiting the construction of a public road through the Pioneer Weapons Hunting Area in the Daniel Boone National Forest. Opponents of the road fear that its construction will do irreparable damage to the area and urge the construction of a more expensive road to go around the Hunting Area.

By the way, I might say for the benefit of the record that the increased expense, as far as I know, would be in the neighborhood of \$6,000, out of a contract totaling approximately \$1,990,000.

> Proponents of the road respond that it will not destroy the character of the area and will be desirable. The House recently adopted an amendment to the Water Resources Development Act, which, if enacted, would allow construction of the road after public review of the final NEPA environmental impact statement.

In light of the considerable controversy on the subject, the conferees felt that this issue ought not be resolved by inclusion of this section in the bill, but that it would be more appropriate for full hearings to be held or the question by the proper Committees of Congress. Accordingly the section was stricken from the bill with the understanding and hope that such hearings might be expeditiously completed.

Mr. President, I am totally and completely in accord with the language of the conference report. I merely wished to read this statement into the Record for the purpose of reaffirming this Senator's position in regard to this project and its impact.

I thank the Senator from California that, during the course of the conference, we were able to work this arrangement out, and I have no objection to the immediate consideration of the conference report and its immediate passage.

Mr. TUNNEY. Mr. President, I would like to say, as the floor manager of the bill and one of the conferees, that I support hearings on the matter that was raised by the distinguished Senator from Kentucky at the earliest possible date next year. I do not see any reason why we could not do it in either January or February of next year, and then take that bill up in an expeditious fashion after hearings have been held. I know I am not only speaking for myself, but also for the other Senators on the majority side of our committee.

I am convinced that as a result of the understanding of the problem of the conference committee by the Senator from Kentucky, we were able to conclude that conference, and conclude it in a way that I think has justified not only the position of the Senator from Kentucky on the matter that he has related, but also the fact that the Senate and the Congress wanted to have this endangered species bill passed as quickly as possible, before the end of this year.

Mr. COOK. Mr. President, I thank the Senator from California, and I appreciate the indulgence of the President of the Senate.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

[From the Congressional Record, Dec. 20, 1973]

HOUSE AGREEMENT TO THE CONFERENCE REPORT

CONFERENCE REPORT ON S. 1981, ENDANGERED SPECIES ACT OF 1973

Mrs. SULLIVAN. Mr. Speaker, I call up the conference report on the Senate bill (S. 1983), to provide for the conservation, protection, restoration, and propagation of threatened and endangered species of fish, wildlife, and plants and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentlewoman from Missouri?

There was no objection.

The Clerk read the statement.

(For conference report and statement of managers see page 426.)

Mrs. **Sullivan** (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The **Speaker**. Is there objection to the request of the gentlewoman from Missouri?

There was no objection.

Mrs. **Sullivan**. Mr. Speaker, the report of the conferees which is now before the House for approval deserves the support of every Member. The conferees have managed to produce a compromise bill, within the rules of both Houses which is in most respects an improvement over both bills. It represents a sensible and sound approach to a very serious problem: The protection of endangered and threatened species which without that protection, might disappear. I am persuaded that this is an important problem, and that the solution of this problem proposed by the conferees is fair, workable, and desirable.

Time is very much a consideration in this bill. We have adopted language which encourages the States to participate fully in endangered species programs. Within a certain period of time after passage of our bill, the States must have adopted adequate conservation programs in order to preserve their initiative in this area. Unless this bill is signed into law before the 1st of January, State and Federal timetables may be seriously and adversely affected.

Earlier this year, an international treaty was negotiated to establish a worldwide system of protection for these species. The Senate has approved the treaty, and I understand that there is no obstacle to formal ratification by this country. Approval of the conference report will set in motion the remaining steps that can and should be taken by this country to implement the treaty and to create a strong but fair regulatory system upon U.S. citizens.

Mr. Speaker, I urge approval of the conference report.

Mr. **Goodling**. Mr. Speaker, I wish to associate myself with the remarks of my distinguished coconferees, the gentlewoman from Missouri and chairman of the Committee on Merchant Marine and Fisheries, Mrs. Sullivan, and the chairman of our Fish and Wildlife Subcommittee, Mr. Dingell, in support of the action of the conference committee in resolving the differing versions of this important legislation.

One of the principal issues confronting the conference committee centered around the responsibilities to be vested in the Secretaries of Interior and Commerce as a result of Reorganization Plan No. 4 of 1970, which transferred to the Secretary of Commerce authority for the protection of endangered species which inhabit the oceans or whose environment is predominantly marine-oriented. The conference committee decided, I believe wisely, that there should be only one list of endangered species to be maintained by the Department of Interior. The ministerial duties associated with formal promulgation of these lists will be handled by the Secretary of the Interior, but so far as the listing of species under the authority of the Secretary of Commerce is concerned, the Secretary of the Interior will have no discretion but will merely carry out the mandate of the Secretary of Commerce. Procedurally, the Secretary of Commerce will be responsible for all steps necessary leading to the listing of a specie under his jurisdiction on either the threatened or endangered list. Once he has made that decision or decides to upgrade the listing of a specie from threatened to endangered status, he shall so inform the Secretary of the Interior who will immediately take the necessary steps to see that the listing is effectuated.

The conference committee determined that with respect to the downgrading of a listing from endangered to threatened status, or in the case of removal totally, the Secretary of the Interior should have the final authority with respect to all species, including those otherwise under the jurisdiction of the Secretary of Commerce. In such a case, the Secretary of Commerce will transmit his determination that a specie should be downgraded or removed by way of recommendation to the Secretary of the Interior, and if the Secretary of the Interior concurs in the recommendation he shall implement the action. The determination to downgrade or remove a specie under the authority of the Secretary of Commerce may only, however, be initiated by the Secretary of Commerce.

The vesting of this veto power over the downgrading or delisting of species under the authority of the Secretary of Commerce was a reasonable compromise between those who advocate no role whatsoever for the Commerce Department in the protection of endangered species and those who favored a fully separate role for each department in the management of the species under their respective jurisdictions. In practice, I am confident that this arrangement will work quite satisfactorily. We fully expect the Secretaries of Interior and Commerce to work together harmoniously so that the objectives of this legislation will be realized, and I can assure my colleagues that we will be watching their performance very closely.

The second principal issue which confronted the conference committee involved the role of the States in the protection of the endangered and threatened species of resident wildlife. While the House placed the fundamental responsibility for establishing and overseeing programs for the protection of endangered and threatened species in the Federal Government, the other body has substantially amended the legislation to shift the basic responsibility for endangered species programs to the States. The conference committee retained language giving the States an opportunity to participate in the protection of endangered and threatened species in cooperation with the Federal Government.

The conference committee bill provides a transition period of up to 15 months following enactment during which time the prohibitions of this act will be held in abeyance pending the adoption by States and approval by the Secretary of cooperative management agreements. Where cooperative agreements have been entered into, they will control. We are confident that the States will take advantage of this opportunity to avoid Federal preemption. It should be noted that during the transitional period, the Federal Government may step in to enforce the act when requested to do so by a State, or when the Secretary determines that an emergency exists requiring full application of the act to protect a species.

Finally, Mr. Speaker, I wish to stress that the success of this program will depend not only upon the cooperation between the Secretaries of Interior and Commerce and upon cooperation between the Federal Government and the States, but also upon funding by the Federal Government of its share of the cost of management programs and the willingness of the States to bear their share of these costs. We are all too prone to decry the centralization of authority in Washington to the detriment of States, and yet when it comes down to specific proposals which would preserve State initiative, there seems to be a reluctance to assume the even relative modest financial burden that is an essential ingredient in the exercise of authority. As in the case of the interrelationship between the Federal departments involved in this program, we will be closely watching the performance of the States, and we will be monitoring the budgetary process to see that this program is fully funded. Mr. Speaker, I urge the adoption of the conference report on the Endangered Species Act of 1973.

Mr. BERGLAND. Mr. Speaker, will the gentlewoman yield?

Mrs. SULLIVAN. Mr. Speaker, I yield to the gentleman from Minnesota.

Mr. BERGLAND. Mr. Speaker, I ask for this time only to ask the gentlewoman some questions on this report, particularly as it affects the species normally known as the eastern timber wolf, which is an animal that has inhabited my State of Minnesota for literally thousands of years. This animal has, in the last 8 years, according to our State management experts, enlarged its range to about 25,000 square miles of land in the northern part of Minnesota.

In some instances, I am told by management experts, the population has reached the saturation level in the main range, with wolves numbering as many as one per 10 square miles.

This timber wolf is a problem for livestock producers in that region of the State and has caused great concern among sportsmen who are concerned about the maintenance of the deer herd. The wolf is known to consume about 20 deer per year, and our State has struggled for years in developing management programs to enlarge the herd of white-tailed deer. The wolf is a problem.

Mr. Speaker, I have some questions of the gentlewoman, if she would be so kind. I read the committee report, and I notice a distinction between endangered species and threatened species. My question, if the Secretary of the Interior were to designate the eastern timber wolf as an endangered species could a State such as Minnesota have that species classified as a threatened species and, therefore, treat it differently?

Mrs. SULLIVAN. Mr. Speaker, may I say that we have had a lot of discussion about the timber wolf. I would like to yield to the distinguished gentleman from Michigan (Mr. Dingell) to answer that.

Mr. DINGELL. Mr. Speaker, the answer is that the determination of whether a species is threatened or endangered lies in the hands of the Secretary of the Interior in the case of land species, and in certain respects in the case of marine species. In certain other instances with regard to marine species, in the hands of the Secretary of Commerce. The State would not have any discretion to reclassify species designated by the Secretary of the Interior as endangered. The State would have an opportunity to come forward with an appropriate management program, in the form of a cooperative agreement with the Secretary.

It would have a period of 15 months or 120 days after the legislative session of the State Legislature had ceased in which to develop a program governing the taking of resident species.

Mr. **Bergland.** Mr. Speaker, if the gentlewoman will yield further, could the Secretary, under the terms of this conference report, designate the timber wolf as an endangered species in all States of the Union except Minnesota?

Mr. **Dingell.** Mr. Speaker, if the gentlewoman from Missouri will yield, the answer to that question is that it could so do, if the population of wolves in question were to be found in Minnesota. He responsibility and discretion would extend to particular species, subspecies or populations of wolves and other kinds of endangered or threatened animals.

Mr. **Bergland.** Mr. Speaker, this has to do with similarity of appearances cases. On page 6, the report refers to protection of species similar to those that appear on the endangered list or on the threatened list.

In my State we have a species, commonly known as a brush wolf; also known as a coyote. It takes an expert to distinguish between the two species of wolves. The coyote and the brush wolf are a threat to the livestock production and deer management project as in other regions of the United States.

Will the gentlewoman explain this provision for me please?

Mrs. **Sullivan.** Mr. Speaker, again I will refer the question to the gentleman from Michigan (Mr. Dingell) to answer.

Mr. **Dingell.** Mr. Speaker, I would like to disagree with my good friend, the gentleman from Minnesota, in that the coyote or the brush wolf can be distinguished from the gray wolf or the Eastern wolf. The answer is that hunters and experts in this matter can and do make the distinction.

The legislation provides that where there is a strong similarity of appearance between the species and where there is such a close resemblance in appearance that only under the most difficult circumstances or under the most expert study can the difference be ascertained, and if that confusion poses an additional threat to the endangered species, then the Secretary may require the protection of both the endangered species and the species which resembles it.

I do not happen to believe, on the basis of my own information and knowledge—and I am familiar with both the coyote and the wolf—that this provision would come into play with regard to the coyote and the wolf. There are very visible differences in the characteristics of the two species.

Mr. **Bergland.** Mr. Speaker, I, like my friend and colleague, the gentleman from Michigan, have hunted deer for the past 25 years, and there have been many instances when I caught a fleeting glimpse of an animal which I knew was some type of a wolf or coyote, and I was never been able to distinguish the difference.

I am wondering if the Secretary would designate the coyote or the brush wolf to be on the endangered or the protected list.

Mr. **Dingell.** Mr. Speaker, the answer for the gentleman's question is that the coyote is not foreseeably going to be put on the endangered species list or on the threatened species list under this legislation. It simply will not happen.

Mr. **Bergland.** How about what we call the brush wolf?

Mr. **Dingell.** That is the coyote. It is not likely to be put on the endangered species list, I can asure the gentleman of that. We have plenty of coyotes.

Mr. **Bergland.** Mr. Speaker, I am relieved to hear that. On page 14 of the committee report, under the general heading, "Exceptions," I notice it says in the bottom paragraph, as follows:

> The Secretary may make further requirements for a showing of undue economic hardships as he deems fit.

Mr. Speaker, will the gentlewoman or her designee, the gentleman from Michigan, please explain this to me?

Does this apply only to those exceptions that are provided for in the State of Alaska?

Mr. **Dingell.** No. If the gentlewoman will yield further, the provision to which the gentleman refers alludes to the species which are endangered internationally, in other words, in other countries and on the high seas, and also to domestic species.

As a general rule, however, the hardship exemption applies mostly to importation and commercial activities. Usually it relates to commercial activities. However, it is conceivable that under certain circumstances it could also apply to taking of domestic animals.

Mr. **Bergland.** Mr. Speaker, the Department of Conservation in my State of Minnesota has developed a plan, with the advice and counsel of representatives of the U.S. Forest Service and the representatives of the Bureau of Sports Fisheries and Wildlife within the Department of Interior. This is commonly known as the Tri-Agency Plan.

It provides for a sanctuary in the northeast corner of Minnesota, where 2,500 miles of territory are provided in which the wolf will be protected, and in other areas, for instance, areas adjoining the northeastern corner, it would provide for some management and under some circumstances it would authorize some harvesting if the wolf was doing damage to the deer herd or to livestock or to farms in that general region.

I would certainly hope that the Secretary would accept that "Tri-Agency" plan, once authorized by the Minnesota Legislature.

I notice that the conference committee has recognized the need to have State input in the management of these kinds of problems. Does the gentlewoman have any comments on that plan?

Mrs. **Sullivan.** Yes. I understand the Department of the Interior is one of those agencies, so there would have to be that cooperation.

Mr. **Bergland.** I thank the gentlewoman for yielding.

Now, I certainly hope the Secretary of the Interior will accept that plan. It is terribly important, I think, if we are to protect the species that are truly in danger of extinction and, on the other hand, find a way of managing the predators so they do not destroy other of our valuable wildlife resources.

Mrs. **Sullivan.** Mr. Speaker. I yield such time as he may consume to the gentleman from Michigan (Mr. Dingell).

Mr. **Dingell.** Mr. Speaker, I urge approval of the conference report on this measure. Our committee has held many days of hearings on this matter, and has considered it extensively in open executive session. The bill is strongly supported by the conservation community, by wildlife groups and hunters, and by the administration. It would be no exaggeration to say that scarcely a voice has been heard in dissent. The report of the conference committee represents a substantial effort, and a successful effort, to blend the best features of both bills and deserves the support of the House.

The major issue before the conference was probably the assignment of responsibilities between the Interior Department, which is currently responsible for the endangered species program, and the Commerce Department, which has responsibility for certain species under the Reorganization Plan No. 4 of 1970. The issue was settled by assigning to Interior the overall responsibility for maintaining the lists of endangered and threatened species, and by requiring that each agency have primary jurisdiction for determining the status of species within their areas of responsibility. An exception to this rule was provided in the case of species assigned to the Department of Commerce, which is permitted to propose that species be added to the list, or upgraded from threatened to endangered status in which case Interior must so amend the list. In order for such a species to be removed or downgraded, however, it will be necessary for both agencies to agree.

A case in point, outlining this division of responsibility, might be the status of whales. If Commerce were to propose that another species than those now listed should be included, such as the minke whale, it could make the determination on the basis of the record, after complying with the procedural requirements of the act, and then inform Interior of that determination. Interior would have to comply, as promptly as possible.

If, on the other hand, Commerce were to propose that a whale now on the list, such as the humpback whale, should be taken off, or downgraded in status, it would go through the same procedural steps and then so recommend to Interior; in this case, however, Interior could either agree or disagree. In the latter case, the disagreement would create an impasse, and no action would be taken with respect to the species unless one agency receded.

The effect of this resolution of differences will be to make it somewhat easier to list species than it will be to take them off. We assume that in clear cases, there will be little or no disagreement; that any disagreement will take place, if at all, only in the close or difficult cases. In this situation, it seems appropriate that we should act cautiously—certainly the conservative thing to do would be to withhold action until the picture becomes clearer.

I am convinced that this will result in better decisions by both agencies.

Also added to the bill as it passed the House is a provision allowing Alaskan Natives a qualified exemption from the requirements of the act, in order to allow them to hunt for subsistence purposes. While I expect that their dependence upon these species will diminish with the passage of time, I also recognize that there may be particular problems at the moment which would make it inequitable to halt all taking at once. We have provided adequate flexibility in the act, however, to allow the Secretary or the State fish and game agency to step in and impose additional restrictions upon native taking, and I am satisfied that these powers are ample to protect the further endangement of any species which might otherwise be subject to unrestricted native taking in Alaska.

In recent oversight hearings on the Marine Mammal Protection Act, representatives of the State of Alaska testified that they found similar provisions in that act to be offensive and perhaps even violative of the Alaska constitution, which forbids discrimination among classes of Alaska citizens. If they continue to feel so with respect to endangered or threatened species, the bill allows that State to establish further restrictions upon native taking, as a part of or independent from a comprehensive endangered species conservation program. State laws may not be more lenient than the Federal law, but they can be more strict. Also, the bill specifically indicates that if there were to be any conflict between the requirements of this act and those of the Marine Mammal Protection Act, the stricter of the two will prevail.

Another important step which we have taken in this bill—and in this regard the two bills are virtually identical—is that we have substantially amplified the obligation of both agencies, and other agencies of Government as well; to take steps within their power to carry out the purposes of this act. A recent article in the Washington Post, dated December 14, illustrates the problem which might occur absent this new language in the bill. It appears that the whooping cranes of this country, perhaps the best known of our endangered species, are being threatened by Air Force bombing activities along the gulf coast of Texas. Under existing law, the Secretary of Defense has some discretion as to whether or not he will take the necessary action to see that this threat disappears—I hasten to say that I believe that Secretary Schlesinger, who I know to be a decent and honorable man, will take the proper steps whether or not the law is amended, but the point that I wish to make is that once the bill is enacted, he or any subsequent Secretary of Defense would be required to take the proper steps.

Another example has recently crossed my desk, having to do with the continental population of grizzly bears which may or may not be endangered, but which is surely threatened. An article by Michael Frome on this subject is printed in the current edition of Field and Stream. It points out certain steps that should be, but are not being, taken to see that these magnificent animals do not go the way of the passenger pigeon. Once this bill is enacted, the appropriate Secretary, whether of Interior, Agriculture or whatever, will have to take action to see that this situation is not permitted to worsen, and that these bears are not driven to extinction. The purposes of the bill include the conservation of the species and of the ecosystems upon which they depend, and every agency of Government is committed to see that those purposes are carried out. It is a pity that we must wait until a species is faced with extermination before we begin to do those things that we should have done much earlier, but at least when and if that unfortunate stage is reached, the agencies of Government can no longer plead that they can do nothing about it. They can, and they must. The law is clear.

Another important step taken in this act is the requirement that the decisionmaking process be opened up to public review and participation. On the whole, I believe that these programs have been reasonably open in the past, but I also believe that agency performance can be improved. Under the provisions of this legislation, the public will be specifically allowed to propose the listing or delisting of species, or to petition the Secretary to step in and declare an emergency requiring immediate Federal action in order to protect an endangered or threatened species. Hardship exemptions are permitted, under stringent controls, and here again the process will be opened up to public review. These requirements will do much to increase the confidence of the public in the working of their Government—a confidence which today is somewhat shaken with respect to many programs and officials.

The enforcement provisions of this legislation are extensive. It forbids taking and importing or exporting of endangered species as well as a number of other activities. The conference committee was concerned with the position of an innocent common carrier or other bailee who might be in possession of unmarked or mismarked packages containing endangered species or parts or products from such species and we developed language which we believe adequate to cover this situation.

With respect to the civil penalties which may be assessed under section 11(a), the Government must show, in order to validly assess a penalty of over $1,000, that the person charged with violating the act knew the essential facts of the violation. It is not necessary for the Government to show that the person charged knew that he was in violation at the time the offense was committed.

If a common carrier is told by a shipper that the goods contained in the shipment are something other than animal parts or products, and has no reason to believe otherwise, the carrier cannot be assessed a penalty under this section. If it is told that the goods are animal skins, then he has an obligation to make a reasonable inquiry to satisfy himself that the skins are not from endangered species; if he does so, he is once again shielded. If, on the other hand, he knows or in the circumstances can reasonably be expected to know that these are forbidden goods, then penalties may be assessed against him.

Similarly, the term "knowingly violates," as used in this section, is intended to refer to a conscious act or a conscious omission of the offender which amounts to a violation. It does not require that the offender know that the act which he consciously commits or omits constitutes a violation.

This question has been discussed with the Senate and it is my clear understanding that they are in entire agreement with this interpretation of the language of the bill.

Mr. Speaker, this legislation was considered at length by the House earlier this year. At that time it was overwhelmingly approved by a vote of 390 to 12, in substantially the same form. I ask that the House once again declare its support for this important legislation, and approve the conference report.

Mrs. SULLIVAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Louisiana (Mr. Breaux).

Mr. Breaux. I thank the distinguished chairman of my committee for yielding to me.

I would like to ask a question of the chairman or the distinguished chairman of the Subcommittee on Fish and Wildlife.

It is my impression under the presently existing law provisions that exist only allow the Department of the Interior to list species of one category that is the endangered species. This legislation allows the Department of the Interior, through the Secretary, to set up a second category of species that are a threatened species. Am I correct in that understanding?

Mrs. Sullivan. That is correct.

Mr. Breaux. Is this a provision that will affect the international treaty presently being considered and allowed us to have the species removed from the endangered category if it is shown to be necessary to place it in the second category?

Mrs. Sullivan. Our understanding is it implements the international convention.

Mr. Breaux. I thank the gentlewoman.

Mrs. Sullivan. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The Speaker. The question is on the conference report.

The question was taken, and the Speaker announced that the ayes appeared to have it.

Mr. Bell. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The Speaker. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 355, nays 4, not voting 73, as follows:

Mrs. Collins of Illinois with Mr. Jarman.
Mr. Delaney with Mr. Clancy.
Mr. Reid with Mr. Zwach.
Mrs. Griffiths with Mr. Quillen.
Mr. Moss with Mr. Collier.
Mr. Dulski with Mr. Harvey.
Mr. Evins of Tennessee with Mr. Scherle.
Mr. Dingell with Mr. Schneebeli.
Mr. Gray with Mr. Walsh.
Mr. Leggett with Mr. Mills of Arkansas.
Mr. Pepper with Mr. Ryan.
Mr. Satterfield with Mr. Smith of Iowa.
Mr. Van Deerlin with Mr. Ullman.
Mr. Vigorito with Mr. Wright.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

[From the Congressional Record, Dec. 21, 1973]

PRESENTED TO THE PRESIDENT FOR SIGNATURE

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, December 21, 1973, he presented to the President of the United States the following enrolled bills and joint resolutions:

* * * * * * *

S. 1983. An act to provide for the conservation of endangered and threatened species of fish, wildlife, and plants, and for other purposes.

* * * * * * *

PRESIDENTIAL STATEMENT ON SIGNING S. 1983 INTO LAW

ENDANGERED SPECIES ACT OF 1973

STATEMENT BY THE PRESIDENT UPON SIGNING THE BILL INTO LAW, DECEMBER 28, 1973

I have today signed S. 1983, the Endangered Species Act of 1973. At a time when Americans are more concerned than ever with conserving our natural resources, this legislation provides the Federal Government with needed authority to protect an irreplaceable part of our national heritage—threatened wildlife.

This important measure grants the Government both the authority to make early identification of endangered species and the means to act quickly and thoroughly to save them from extinction. It also puts into effect the Convention on International Trade in Endangered Species of Wild Fauna and Flora signed in Washington on March 3, 1973.

Nothing is more priceless and more worthy of preservation than the rich array of animal life with which our country has been blessed. It is a many-faceted treasure, of value to scholars, scientists, and nature lovers alike, and it forms a vital part of the heritage we all share as Americans. I congratulate the 93d Congress for taking this important step toward protecting a heritage which we hold in trust to countless future generations of our fellow citizens. Their lives will be richer, and America will be more beautiful in the years ahead, thanks to the measure that I have the pleasure of signing into law today.

NOTE: The Statement was released at San Clemente, Calif.

As enacted, the bill (S. 1983) is Public Law 93-205, approved December 28, 1973.

ANNOTATED BIBLIOGRAPHY OF HEARINGS

U.S. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment. Endangered Species. Hearings, 93d Congress, 1st session. Mar. 15, 26, 27, 1973. Washington, U.S. Govt. Print. Off., 1973. 388 p. "Serial no. 93-5"

Hearings on the following legislation to protect endangered species of fish and wildlife:

H.R. 37 and seven identical bills, H.R. 1461 and identical H.R. 4755, H.R. 2735, and the Administration bill H.R. 4758, all titled the Endangered Species Conservation Act of 1973, to provide for the conservation, protection, and propagation of species of subspecies of fish and wildlife that are threatened with extinction or likely within the foreseeable future to become threatened with extinct-on.

H.R. 2169, the Nature Protection Act, to implement the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere.

March 15, 1973 hearing receives and discusses report of the U.S. representatives to the Plenipotentiary Conference to Conclude an International Convention on Trade in Certain Species of Wildlife, signed March 3, 1973.

March 26, 1973 hearing includes submitted statements and testimony by: N. P. Reed (NDS), H. Pollock (NOAA), R. M. Housely (Nat'l Forest System), A. G. Gazlay (Mich. D.N.R.), C. E. Wilson (Nat'l Audubon Soc.), C. Stevens (Soc. for Protective Legislation), H. S. Irwin (N.Y. Botanical Gardens).

March 27, 1973 hearing includes statements and testimony from: Reps. F. Annunzio (Ill.), H. Helstoski (NJ), C. W. Young (Fla.), R. A. Roe (NJ), G. W. Whitehurst (VA), L. Coughlin (Penn.), B. B. Blackburn (GA); J. Grandy (Natl Parks and Conservation

Assoc.), L. S. Clapper (Natl Wildlife Federation), T. Garrett (Friends of the Earth), S. R. Seater (Defenders of Wildlife), M. Casey (Minn. D.N.R.), R. C. Hughes (Sierra Club), J. P. Corcoran (Asst. Att. Gen., NY).

Additional submitted statements and correspondence are included.

U.S. Congress. Senate. Committee on Commerce. Subcommittee on Environment. Endangered Species Act of 1973. Hearings, 93d Congress, 1st session, June 18 and 21, 1973. Washington, U.S. Gov. Print. Off., 1973. 153 p. "Serial No. 93-67"

Hearings on S. 1592. the Administration proposal, and S. 1983, both titled the Endangered Species Conservation Act of 1973, to provide for the conservation, protection, and propagation of endangered species. Also explores the relationship between proposed legislation and the Marine Mammal Protection Act of 1972. Includes additional correspondence and statement.

Hearing of June 18, 1973 includes testimony by: E. U. C. Bohlen (FWS), R. W. Schoning (NMFS), T. R. Garrett (Friends of the Earth), J. S. Gottschalk (International Association of Game, Fish, and Conservation Commissioners), J. W. Grandy (National Parks and Conservation Association), L. R. Jahn (Wildlife Management Institute).

Hearings of June 21, 1973 includes testimony by: H. A. Williams (Senator of New Jersey), B. Fensterwald (Committee for Humane Legislation), L. G. Regenstein (Fund for Animals), M. E. Rich (National Rifle Association), S. R. Seater (Defenders of Wildlife), C. E. Wilson (Audubon Society), H. D. Tiffany (Alaska Native Arts and Crafts Coop), J. R. Sharp (American Fur Merchants Association and Fur Conservation Institution of America), R. C. Hughes (Sierra Club).

PART II

LEGISLATIVE HISTORY OF 1976 AMENDMENTS TO THE ENDANGERED SPECIES ACT

ENDANGERED SPECIES ACT APPROPRIATION AUTHORIZATION EXTENSION, PUBLIC LAW 94–325

BACKGROUND

The following quoted material is taken from a review of fisheries and wildlife conservation legislation of the 94th Congress written by CRS and issued as a committee print by the Senate Committee on Interior and Insular Affairs (See: Congress and the Nation's Environment: Energy and Natural Resources Actions of the 94th Congress. January 1977. Committee Print. Senate Committee on Interior and Insular Affairs. Washington, U.S. Gov. Print. Off., pp. 112–1126):

> The purpose of this legislation [was] to extend the authorization for appropriations to the Department of Commerce and the Interior to carry out provisions of the Endangered Species Act of 1973. The Endangered Species Act of 1973 gave primary responsibility for the legislation's administration to the Department of Commerce and the Interior. General authorization for appropriations under the Act for the Departments to carry out functions and responsibilities, other than certain financial assistance to the States under Section 6, is provided for by Section 15 of the Act. The authorization for appropriations under Section 15 expired on June 30, 1976. Accordingly, the Secretaries of Commerce and Interior in June and May 1975, respectively, submitted proposed legislation to extend the authorizations for appropriations. H.R. 8092 was introduced by Mrs. Sullivan as a bill incorporating the requests of the two Secretaries. A hearing was held on the bill by the Subcommittee on Fisheries and Wildlife Conservation and the Environment on February 6, 1976 (Serial 94–30).
>
> Testimony given at three days of oversight hearings conducted by the House Subcommittee on the administration of the endangered species program (Serial 94–17) as well as that presented at the February 6, 1976 legislative hearing, bore stark evidence of serious limits on progress of identifying, classifying, and listing of endangered species of plants and animals and of designating critical habitats of endangered species. The chief limits to greater progress in meeting the obligations imposed by the Endangered Species Act of

1973 [the witnesses indicated, were] inadequate staff and inadequate budgets in both the Commerce and Interior Departments' endangered species offices.

The Department of the Interior proposed an authorization-appropriation of $10,000,000 for each of Fiscal Years 77 and 78, and the Department of Commerce proposed an authorization-appropriation of $2,000,000 for each of those fiscal years, as well as $500,000 for the transition period, July 1–September 30, 1976. Interior testified no extra transition period funds were required since it received authorization to continue all Fish and Wildlife Service programs during the transition period under its 1976 Appropriations Act (P.L. 94–165). Testimony elicited from representatives of both Departments during the Oversight and Legislative Hearings, as well as testimony submitted by interested non-government organizations, indicated that further increased authorizations would be extremely desirable and most definitely consistent with the programs' actual needs. Accordingly, H.R. 8092 was amended by the Committee to delete the transition period funding for the Department of the Interior, originally in the bill as drafted, to increase Interior's authorization for the two fiscal years by $5,000,000 for a total of $25,000,000, and to increase Commerce's authorization by $1,000,000 for a total for the 1977 and 1978 fiscal years of $5,000,000. The bill, as amended by the Committee, was brought before the House on the 15th of March and passed without debate.

In the Senate two bills were introduced reflecting the needs of the two departments for extended appropriations authorization for endangered species program work: S. 2334 for the Department of Commerce and S. 3122 for the Department of the Interior. The Senate Committee on Commerce's Subcommittee on the Environment held a day of hearings on this legislation, and on the House-passed bill (H.R. 8092 which combined provisions of the other two), on May 6, 1976 (Serial 94–82). On May 11, the full Committee in executive session approved a substitute text for S. 3122 in order to combine reauthorizations for the administration of the Act by both Departments. This bill also increased endangered species program funding authorizations for the Departments of Commerce and the Interior by the same amounts as did the House-passed bill, except the Senate bill kept in language authorizing $1.8 million for Interior for the transition period. The bill, as reported by the Committee, was then passed without debate by the Senate on May 18, 1976.

On June 17, 1976 the House then passed S. 3122 in lieu of its own previously passed bill, H.R. 8092. Mr. Leggett, Chairman of the Subcommittee on Fisheries and Wildlife Conservation and the Environment, noted on the floor in urging his colleagues' acceptance of the Senate version that Senate retention of the authorization for transition funding for Interior's endangered species program funding was merely duplicative of existing authority. He said it was thus not worth insisting that the Senate pass the earlier-passed House bill (as was the customary legislative practice) by substitution of S. 3122 language which would then require new House consideration of such a Senate amendment.

The bill was approved by the President on June 30, 1976 becoming Public Law 94–325.

CHRONOLOGY—PUBLIC LAW 93–325

June 20, 1975—H.R. 8092 introduced, referred to House Committee on Merchant Marine and Fisheries

Public Law 94-325
94th Congress, S. 3122
June 30, 1976

An Act

To extend the authorization for appropriations to carry out the Endangered Species Act of 1973.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended—

Endangered Species Act of 1973. Appropriation authorization, extension.

(1) by striking out "(A) not to exceed $4,000,000" and all that follows through "$10,000,000 for fiscal year 1976," in paragraph (A) thereof and inserting in lieu thereof "(1) not to exceed $10,000,000 for the fiscal year ending June 30, 1976, not to exceed $1,800,000 for the fiscal transitional period ending September 30, 1976, and not to exceed a total of $25,000,000 for the fiscal year ending September 30, 1977 and the fiscal year ending September 30, 1978,"; and

(2) by striking out "(B) not to exceed $2,000,000" and all that follows through "$2,000,000 for fiscal year 1976," in paragraph (B) thereof and inserting in lieu thereof "(2) not to exceed $2,000,000 for the fiscal year ending June 30, 1976, not to exceed $500,000 for the fiscal transitional period ending September 30, 1976, and not to exceed a total of $5,000,000 for the fiscal year ending September 30, 1977 and the fiscal year ending September 30, 1978,".

Approved June 30, 1976.

LEGISLATIVE HISTORY:

HOUSE REPORT No. 94-887 accompanying H.R. 8092 (Comm. on Merchant Marine and Fisheries).
SENATE REPORT No. 94-837 (Comm. on Commerce).
CONGRESSIONAL RECORD, Vol. 122 (1976):
Mar. 15, H.R. 8092 considered and passed House.
May 18, considered and passed Senate.
June 17, considered and passed House, in lieu of H.R. 8092.

94th CONGRESS
1st Session

H. R. 8092

IN THE HOUSE OF REPRESENTATIVES

June 20, 1975

Mrs. Sullivan (for herself, Mr. Leggett, Mr. Forsythe, Mr. Dingell, Mr. Anderson of California, Mr. Pritchard, Mr. de la Garza, Mr. Studds, Mr. Lent, Mr. Patterson of California, and Mr. Emery) introduced the following bill; which was referred to the Committee on Merchant Marine and Fisheries

---

A BILL

To extend the authorization for appropriations to carry out the Endangered Species Act of 1973.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended—

(1) by striking out "and not to exceed $10,000,000 for fiscal year 1976," in paragraph (A) thereof and inserting in lieu thereof ", not to exceed $10,000,000 for fiscal year 1976, not to exceed $2,500,000 for the period beginning July 1, 1976, and ending September

30, 1976, and not to exceed $10,000,000 for each of fiscal years 1977 and 1978,"; and

(2) by striking out "and not to exceed $2,000,000 for fiscal year 1976," in paragraph (B) thereof and inserting in lieu thereof ", not to exceed $2,000,000 for fiscal year 1976, not to exceed $500,000 for the period beginning July 1, 1976, and ending September 30, 1976, and not to exceed $2,000,000 for each of fiscal years 1977 and 1978,".

94th Congress
2d Session
HOUSE OF REPRESENTATIVES
Report
No. 94-887

ENDANGERED SPECIES ACT AUTHORIZATION

March 11, 1976.—Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

Mrs. Sullivan, from the Committee on Merchant Marine and Fisheries, submitted the following

REPORT

together with

DISSENTING VIEWS

[To accompany H.R. 8092]

The Committee on Merchant Marine and Fisheries, to whom was referred the bill (H.R. 8092) to extend the authorization for appropriations to carry out the Endangered Species Act of 1973, having considered the same, report favorably thereon with an amendment and recommend that the bill as amended do pass.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended—

(1) by striking out "and not to exceed $10,000,000 for fiscal year 1976," in paragraph (A) thereof and inserting in lieu thereof ", not to exceed $10,000,000 for fiscal year 1976, and not to exceed the total of $25,000,000 for fiscal years 1977 and 1978,"; and

(2) by striking out "and not to exceed $2,000,000 for fiscal year 1976," in paragraph (B) thereof and inserting in lieu thereof ", not to exceed $2,000,000 for fiscal year 1976, not to exceed $500,000 for the period beginning July 1, 1976, and ending September 30, 1976, and not to exceed the total of $5,000,000 for fiscal years 1977 and 1978,".

Purpose of the Legislation

The purpose of the legislation is to extend the authorization for appropriations to the Departments of Interior and Commerce to carry out the provisions of the Endangered Species Act of 1973.

Legislative Background

The Endangered Species Act of 1973 (16 U.S.C. 1531-1543) was passed in December 1973. Primary responsibility for this legislation was placed with the Departments of Commerce and the Interior. General authorization of appropriations under the act for the Departments to carry out functions and responsibilities, other than certain financial assistance to the States, is provided for by section 15 of the act. The authorization for appropriations under section 15 expires on June 30, 1976. Under this section, the act authorized an amount not to exceed $4 million for fiscal year 1974, $8 million for fiscal year 1975 and $10 million for fiscal year 1976 to enable the Department of the Interior to carry out functions and responsibilities of the act and authorized to the Department of Commerce $2 million for fiscal year 1974, $1.5 million for fiscal year 1975 and $2 million for fiscal year 1976.

Further, under section 6 which expires on June 30, 1977, the Endangered Species Act provides for grant-in-aid to States not to exceed $10 million for the first three years after date of enactment.

Accordingly, the Secretary of the Interior transmitted to Congress on May 19, 1975, proposed legislation to extend the authorizations for appropriations and on June 2, 1975, the Secretary of Commerce transmitted the same. On June 20, 1975, Mrs. Sullivan introduced legislation incorporating the two proposed extensions in the form of H.R. 8092. A hearing was held on February 6, 1976, to consider the bill.

Background and Need for Legislation

Man's activities threaten a growing number of species of plants and animals with extinction. Environmental change is taking place so rapidly that further delay in protection of endangered species and their habitats pushes certain species inevitably closer to the brink of extinction, making recovery more difficult and costly.

The Endangered Species Act of 1973 provided new and stronger authority for the Secretary of the Interior and the Secretary of Commerce to prevent the extinction of species. That authority included a broader responsibility to list species that are subject to provisions of the Act and also strengthened the Secretary's ability to protect and manage the listed species to the point where they are restored and can be removed from the list. The goal of the endangered species program is to maintain a healthy diversity of species and to preserve in their natural ecosystems species of animals and plants that are endangered with extinction or threatened with endangerment. Wherever possible, the program seeks to restore such species to the point at which it is once again a viable component of its ecosystem. Further, insofar as possible, it is the intent of the program to prevent other species from becoming endangered.

For fiscal year 1977, the President has requested the sum of $9,198,000 for the Department of Interior and $541,000 for the Department of Commerce under section 15 (A) and (B), respectively, to carry out the program.

In October, 1975, the Subcommittee on Fisheries and Wildlife Conservation and the Environment held three days of oversight hearings on the administration of the endangered species program. The Departmental presentations point out that the program sorely needs an infusion of additional funds in order to assure the responsible and effective management of this important Act.

Of particular importance is the listing of species as endangered or threatened and the designation of habitat critical to the survival of those species. Once an animal or plant is listed as endangered or threatened, the Act prohibits the taking, importing, exporting or interstate transport of the species and its parts or products. These protections against commercial exploitation have been instrumental in insuring the continued survival of dozens of endangered and threatened fauna. Unfortunately, the listing process has been severely restricted by the agencies' lack of resources.

At the present time the Department of Interior, for example, has only eight professional staff working parttime on the classification of species. The result is that 1) no plants have yet been listed as endangered or threatened, although the Smithsonian Institution recommended the listing of some 3,300 species of flora in December 1974; 2) approximately 200 species listed as endangered or threatened, pursuant to the Convention on International Trade in Endangered Species of Wild Fauna and Flora to which the United States is a signatory, have not been placed on the U.S. list; and 3) the Departments have information concerning several thousand additional species which may require protective listing, but which the Departments have not yet started to investigate.

Considering the importance of the Endangered Species Act and the volume of classification work which remains undone, a modest increase in the authorization provided the Departments of Commerce and Interior is, in the Committee's opinion, justified. It is anticipated that these funds will be utilized for the hiring of additional staff and for the completion of appropriate scientific studies.

The problems surrounding the designation of critical habitat pursuant to the Act are much the same as those surrounding the listing of species. It is the Committee's view that classifying a species as endangered or threatened is only the first step in insuring its survival. Of equal or more importance is the determination of the habitat necessary for that species' continued existence. Once a habitat is so designated, the Act requires that proposed Federal actions not adversely affect the habitat. If the protection of endangered and threatened species depends in large measure on the preservation of the species' habitat, then the ultimate effectiveness of the Endangered Species Act will depend on the designation of critical habitats.

Unfortunately, to date, no critical habitats have been designated under the Act. The Departments of Commerce and Interior have indicated the desire to study 108 high-priority designations and are currently working on nine. A primary reason for the Departments' poor record has been budgetary and staff limitations. In the case of the Department of Interior, the same 8 staff who are responsible for the classification of species are also charged with the responsibility for designating critical habitat. Neither Department, however, has sufficient financial resources to conduct the scientific studies and surveys which are prerequisite to determining a species' critical habitat.

Lack of funding also limited the Departments' ability to implement Section 8 and Section 9(d) of the Act. Section 8 establishes a program of assistance for foreign nations interested in developing programs designed for the protection of endangered species. Funds for implementing this program are derived from excess foreign currencies held by the United States and not from funds apropriated under the Endangered Species Act. In Fiscal Year 1977, it appears that approximately $600,000 in excess foreign currencies will be available for distribution to certain nations. To administer this program certain funds have ben provided under H.R. 8092.

Similarly, Section 9(d) of the Act, which establishes as an enforcement tool a registration program for importers and exporters of wildlife, has yet to be implemented. With the additional funding authorized under H.R. 8092, the Departments could begin to implement a registration program.

The Committee also perceived a need to authorize additional funds under the Endangered Species Act for the implementation of the International Convention which will enter into force during Fiscal Year 1977 or Fiscal Year 1978. The Convention charges each member nation with the responsibility for regulating the importation and exportation of flora and fauna listed as endangered or threatened pursuant to the Convention. The Convention also requires each member nation to establish a special scientific authority. The purpose of this authority is to advise the member nation on the merits of any application for the taking, or the importation or exportation of any listed species. When the Convention enters into force, the Departments of Commerce and Interior will incur certain expenses as a result of the establishment and operation of the scientific authority and will incur additional and significant enforcement responsibilities necessitating the expansion of the present enforcement program.

During the Committee's oversight hearings on the implementation of the Endangered Species and the hearings on H.R. 8092, it became clear that to fund the Endangered Species Act at the optimal level would require the expenditure of approximately $20 million in each of Fiscal Years 1977 and 1978. However, the Committee recognizes the finite limit on available resources and therefore supported only a relatively modest increase in the existing authorization. The funding authorized pursuant to H.R. 8092 represents the minimum amount necessary for the Departments of Interior and Commerce to fulfill their responsibilities under the Act.

THE AMENDMENT

The Department of Interior proposed an authorization-appropriation of $10,000,000 for FY 1977 and for 1978, while the Department of Commerce proposed an authorization-appropriation of $2,000,000 for each of fiscal years 1977 and 1978, and $500,000 for the transition period beginning July 1, 1976 and ending September 30, 1976. The Interior Department testified at the hearing that the transition period funding was not necessary for its Department since the Department received authorizations to continue all Fish and Wildlife Service programs during this transition period under their 1976 Appropriations Act, P.L. 94–165. Moreover, both Departments indicated during the hearings that increased authorizations would be highly desirable and consistent with their actual needs. Therefore, the Committee amended H.R. 8092 accordingly to delete the transition period funding for the Department of Interior, and increased the Department of Interior's authorization by $5,000,000, making a total of $25,000,000 for the next two fiscal years, and the Department of Commerce's authorization by $1,000,000, making a total of $5,000,000 for the next two fiscal years.

COST OF THE LEGISLATION

Pursuant to clause 7 of rule XIII, of the Rules of the House of Representatives, the Committee estimates the total cost of the legislation to be $500,000 for the transition period from July 1, 1976, to September 30, 1976, and $30 million for fiscal years 1977 and 1978. The Committee concluded that these costs are reasonable and consistent with the estimates made by the respective Departments.

COMPLIANCE WITH HOUSE RULE XI

(1) With respect to the requirements of Clause 2(1) (3) (A) of Rule XI, of the Rules of the House of Representatives, three days of oversight hearings were held by the Subcommittee on Fisheries and Wildlife Conservation and the Environment on October 1, 2, and 6, 1975 on the general subject matter of the Endangered Species Act of 1973. However, the Committee has not made any formal findings or recommendations at this time pursuant to those hearings.

(2) With respect to the requirements of clauses 2(l) (3) (B) and (C), of Rule XI of the Rules, the bill does not provide new budget authority or increased tax expenditures, and it has received no estimate and comparison prepared by the Director of the Congressional Budget Office. Consequently, no such information is supplied to meet these requirements.

(3) With respect to the requirements of clause 2(l) (3) (D), of Rule XI of the Rules, the Committee has received no report from the Committee on Government Operations on this subject.

(4) The Committee reports that enactment of H.R. 8092, as amended, would have no inflationary impact on prices and costs in the operation of the national economy.

DEPARTMENTAL REPORTS

H.R. 8092 was the subject of Executive Communication No. 1077 from the Department of the Interior and Executive Communication No. 1142 from the Department of Commerce. In addition, a report on the legislation was received from the Department of Interior. The material mentioned above follows herewith:

[Exec. Comm. No. 1142]

THE SECRETARY OF COMMERCE,
Washington, D.C.

Hon. CARL ALBERT,
Speaker of the House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Enclosed are six copies of a draft bill to amend section 15(B) of the Endangered Species Act of 1973 to extend the appropriation authorization, together with a statement of purpose and need in support thereof.

This proposed legislation has been reviewed by the Department in the light of Executive Order No. 11821 and has been determined not to be a major proposal requiring evaluation and certification as to its inflationary impact.

We have been advised by the Office of Management and Budget that there would be no objection to the submission of our draft bill to the Congress.

Sincerely,

ROGERS C. B. MORTON,
Secretary of Commerce

Enclosures.

A BILL To amend section 15(B) of the Endangered Species Act of 1973 to extend the appropriation authorization

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That the Endangered Species Act of 1973 (87 Stat. 884; 16 U.S.C. 1531, et seq.), is amended by striking in section 15(B) the words "fiscal year 1976," and inserting in lieu thereof the words "each of the fiscal years 1976 through 1978,".

STATEMENT OF PURPOSE AND NEED

The Endangered Species Act of 1973 (16 U.S.C. 1531–1543) was passed in December 1973. Primary responsibility for this legislation was placed with the Departments of Commerce and the Interior. General authorization of appropriations under the Act for the Departments to carry out functions and responsibilities, other than certain financial assistance to the States under Section 6, is provided for by Section 15 of the Act. The authorization for appropriations under Section 15 expires on June 30, 1976. Under this section, the Act authorized to the Department of Commerce $2 million for FY 1974, $1.5 million for FY 1975 and $2 million for FY 1976. The authorization for appropriations under Section 6 expires on June 30, 1977.

Under Section 15 of the Act, funds in the amount of $2.0 million will be required to carry out the program in FY 1977 and FY 1978. These figures represent the best estimate of our Department's needs to implement the program. There are many unknown factors involved in predicting the future costs of the program since our program costs are directly related to the animals and plants listed on the U.S. Endangered and Threatened Species Lists and those under consideration for possible future listing.

Amendatory legislation is vitally needed to continue the authorization under this landmark Act.

[Exec. Comm. No. 1077]

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., May 15, 1975.

Hon. CARL ALBERT,
Speaker of the House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Transmitted herewith is draft legislation to extend the authorizations for appropriations in the Endangered Species Act of 1973 (P.L. 93–205; 87 Stat. 884).

We recommend that this bill be referred to the appropriate Committee for consideration, and that it be enacted.

Man's activities threaten a growing number of species of plants and animals with extinction. Environmental change is taking place so rapidly that further delay in protection of endangered species and their habitats pushes certain species inevitably closer to the brink of extinction, making recovery more difficult and costly.

The Endangered Species Act of 1973 provided new and stronger authority for the Secretary of the Interior (and the Secretary of Commerce) to prevent the extinction of species. That authority included a broader responsibility to list species that are subject to provisions of the Act and also strengthened the Secretary's ability to protect and manage the listed species to the point where they are restored and can be removed from the list. The goal of the endangered species program is to maintain a healthy diversity of species and to preserve in their natural ecosystems species of animals and plants that are endangered with extinction or threatened with endangerment. Wherever possible, the program seeks to restore such species to the point at which it is once again a viable component of its ecosystem. Further, insofar as possible, it is our intent to prevent other species from becoming endangered.

In order to implement activities aimed at accomplishing these goals, the Endangered Species Act provides for grant-in-aid to States not to exceed $10 million for the first three years after enactment and a general authorization of an amount not to exceed $4 million for FY 1974, $8 million for FY 1975 and $10 million for FY 1976 to enable the Department of the Interior to carry out functions and responsibilities of the Act other than grant-in-aid.

Since December 28, 1973, we have taken these major steps in the implementation of the Act:

1. As prescribed by the Act, what were formerly the native list and foreign list of endangered species have been consolidated into one list and published.
2. Status surveys have been started and/or completed on the wolves of North America, green sea turtle, Sirenians, American Alligator, American crocodile, grizzly bear and spotted cats.
3. Guidelines on submission of cooperative agreements and model legislation for use by the States to develop endangered species laws in accordance with provisions of the 1973 Act have been prepared and distributed.
4. Recovery plans have been prepared through first draft for 29 species.
5. Seven workshops have been conducted for training Service, other Federal agency and State personnel in recovery plan preparation.
6. Orientation workshops were conducted in each Regional Office of the U.S. Fish and Wildlife Service for Service and other Federal and State personnel to explain the provisions and applications of the 1973 Act.

Approximately $7.37 million and 170 man-years of effort will be available in the Fish and Wildlife Service to carry out the endangered species program other than grant-in-aid and land acquisition in FY 1976. Our proposed bill would extend the authorization for appropriations at the FY 1976 level of $10 million for FY 1977 and for FY 1978.

This recommendation is consistent with the President's moratorium on new Federal spending programs other than those involving energy production, national defense, and certain humanitarian efforts, and his stated policy to avoid excessive growth of Federal spending in the long run.

We urge enactment of the proposed legislation in order to assure continuation of programs aimed at preventing the continued decline of our living natural resources.

The Office of Management and Budget has advised that there is no objection to the submission of this proposed legislation from the standpoint of the Administration's program.

Sincerely yours,

ROYSTON C. HUGHES,
Assistant Secretary of the Interior.

A BILL To amend the Endangered Species Act of 1973 to extend authorizations for appropriations, and for other purposes

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That the Endangered Species Act of 1973 (87 Stat. 884) is amended as described in Section 2 of this Act.

SEC. 2. Section 15(A) is amended by deleting the words "fiscal year 1976." and inserting in lieu thereof the words, "fiscal year 1976, 1977 and 1978,".

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., February 5, 1976.

Hon. LEONOR SULLIVAN
Chairman, Committee on Merchant Marine and Fisheries, U.S. House of Representatives, Washington, D.C.

DEAR MADAM CHAIRMAN: This is in response to the request of your Committee for the views of this Dpartment on H.R. 8092, a bill "To extend the authorization for appropriations to carry out the Endangered Species Act of 1973."

We recommend enactment of H.R. 8092 if it is amended as suggested herein.

H.R. 8092 would extend the authorization for appropriations at the FY 1976 level of $10 million for FY 1977 and for FY 1978. The bill also contains a transition period authorization of $2.5 million. The bill provides in subsection (2) an authorization for the Department of Commerce to carry out its function under the Endangered Species Act. This report does not address the Commerce authorization.

With the exception of the transition period authorization and the Commerce authorization, H.R. 8092 is identical to the provisions of the Administration's proposal for the extension of the authorization for appropriations to carry out the Endangered Species Act. The Administration's proposal was transmitted to the Congress on May 15, 1975. H.R. 8092 contains a transition period authorization of $2.5 million which is not included in the Administration's proposed legislation.

An authorization for the transition period is unnecessary as funds to cover this period have been included in the Department of the

Interior's fiscal year 1976 appropriations Act, P.L. 94–165. Therefore, we recommend the following amendment: strike all after "1976," on line 8, page 1, through "fiscal years" on line 2 page 2 of the bill.

The Office of Management and Budget has advised that there is no objection to the presentation of this report from the standpoint of the Administration's program.

Sincerely yours,

JOHN KYL,
Assistant Secretary of the Interior.

CHANGES IN EXISTING LAW

In compliance with clause 3 of rule XIII of the Rules of the House of Representatives, as amended, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic; existing law in which no change is proposed is shown in roman):

SECTION 15 OF THE ENDANGERED SPECIES ACT OF 1973

(16 U.S.C. 1542; P.L. 93–205)

AUTHORIZATION OF APPROPRIATIONS

SEC. 15. Except as authorized in section 6 of this Act, there are authorized to be appropriated—

(A) not to exceed $4,000,000 for fiscal year 1974, not to exceed $8,000,000 for fiscal year 1975 **[**and not to exceed $10,000,000 for fiscal year 1976,**]** , *not to exceed $10,000,000 for fiscal year 1976, and not to exceed the total of $25,000,000 for fiscal years 1977 and 1978*, to enable the Department of the Interior to carry out such functions and responsibilities as it may have been given under this Act; and

(B) not to exceed $2,000,000 for fiscal year 1974, $1,500,000 for fiscal year 1975 **[**and not to exceed $2,000,000 for fiscal year 1976,**]**, *not to exceed $2,000,000 for fiscal year 1976, not to exceed $500,000 for the period begining July 1, 1976, and ending September 30, 1976, and not to exceed the total of $5,000,000 for fiscal years 1977 and 1978*, to enable the Departmnet of Commerce to carry out such functions and responsibilities as it may have been given under this Act.

DISSENTING VIEWS ON H.R. 8092

The rapid and excessive growth of the national debt has caused such severe problems for this Nation that a new realism has developed. The essence of this new realism is that the Federal Government can no longer incur the large deficits which have characterized the recent past. Clearly the Congress and the Nation must accept the responsibility for restraining Government spending.

Recognizing that there is a limit on available resources which will result in the setting of priorities and while it is clear that environmental protection has a very high priority, it is also clear that the Nation cannot afford to fund these priorities at the maximum level at this point in time.

For these reasons, we cannot support H.R. 8092 as reported by the Merchant Marine and Fisheries Committee. This bill exceeds the President's budget request by approximately $3 million in fiscal year 1977. It is also likely the fiscal year 1978 authorization approved by the Committee will far exceed what the President has determined is necessary and appropriate for the Departments of Commerce and Interior to discharge their responsibilities under the Endangered Species Act.

GENE SNYDER.
BOB BAUMAN.

[From the Congressional Record, Mar. 15, 1976]

HOUSE CONSIDERATION AND PASSAGE OF H.R. 8092, AS AMENDED

ENDANGERED SPECIES ACT AUTHORIZATION

Mrs. SULLIVAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 8092) to extend the authorization for appropriations to carry out the Endangered Species Act of 1973, as amended.

The Clerk read as follows:

H.R. 8092

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended—

(1) by striking out "and not to exceed $10,000,000 for fiscal year 1976," in paragraph (A) thereof and inserting in lieu thereof ", not to exceed $10,000,000 for fiscal year 1976, and not to exceed the total of $25,000,000 for fiscal years 1977 and 1978,"; and

(2) by striking out "and not to exceed $2,000,000 for fiscal year 1976," in paragraph (B) thereof and inserting in lieu thereof ", not to exceed $2,000,000 for fiscal year 1976, not to exceed $500,000 for the period beginning July 1, 1976, and ending September 30, 1976, and not to exceed the total of $5,000,000 for fiscal years 1977 and 1978,".

The SPEAKER. Is a second demanded?

Mr. RUPPE. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentlewoman from Missouri (Mrs. Sullivan) is recognized.

Mrs. SULLIVAN. Mr. Speaker, H.R. 8092 extends the authorizations for appropriations to the Departments of Interior and Commerce to carry out the provisions of the Endangered Species Act of 1973. The existing authorizations for both Departments expire on June 30, 1976.

The Endangered Species Act of 1973 provided new and stronger authority for the Secretary of the Interior and the Secretary of Commerce to prevent the extinction of species. That authority included a broader responsibility to list species that are subject to provisions of the act and also strengthened the Secretary's ability to protect and manage the listed species to the point where they are restored and can be removed from the list. The goal of the endangered species program is to maintain a healthy diversity of species and to preserve in their natural ecosystems species of animals and plants that are endangered with extinction or threatened with endangerment. Wherever possible, the program seeks to restore such species to the point at which it is once again a viable component of its ecosystem. Further, insofar as possible, it is the intent of the program to prevent other species from becoming endangered.

The committee held 3 days of oversight hearings on the Endangered Species Act in October 1975, to examine its implementation and administration. Although substantial progress had been made in implementing parts of the act, the testimony presented indicated that there have been many problems and delays encountered in implementing the act.

Some of those problems were clearly the result of manpower and funding shortages. In addition, the International Convention on Endangered Species took effect on July 1, 1975, which now requires us to take steps to delineate the U.S. scientific and management authorities in order to implement our responsibilities. When these steps are taken, the Departments must be properly staffed and financially equipped to do their job.

For these reasons, the committee increased the authorized appropriations for both Departments for the next 2 fiscal years. Accordingly, the Department of the Interior was authorized a total of $25 million for fiscal year 1977 and fiscal year 1978, and the Department of Commerce a total of $5 million for the same period.

I would urge my colleagues to support this worthwhile legislation to insure the effective management of these unique living resources.

Mr. LEGGETT. Mr. Speaker, will the gentlewoman yield?

Mrs. SULLIVAN. I yield to the gentleman from California (Mr. Leggett).

Mr. LEGGETT. Mr. Speaker, I thank the gentlewoman for yielding to me.

Mr. Speaker, I rise in support of H.R. 8092 to extend authorizations for appropriations for the Departments of the Interior and Commerce pursuant to the Endangered Species Act of 1973.

The Endangered Species Act is a complex, far reaching, and forceful conservation law which was intended to provide special protection to the dwindling number of our unique and valuable living resources. This legislation was a recognition of the fact that the variety of species in our ecosystem provide not only a pleasing asethetic surrounding, but also an educational, scientific, and economic resource. The provisions of the Endangered Species Act have had to be implemented in a careful and judicious manner in order to achieve an effective and timely program of listing and delisting species, processing permits, cooperating with State conservation agencies, acquiring the critical habitat of endangered species, and assisting other countries in this endeavor.

The oversight hearings held by the Subcommittee on Fisheries and Wildlife Conservation and the Environment in October 1975, served to demonstrate the magnitude of the job yet to be done in implementing and administering this important act. The Department of the Interior has been playing catchup in listing endangered species since the enactment of the strengthened amendments in 1972, and have just started to consider the designation of areas of critical habitat for protection of these species. This habitat designation is perhaps the most important step to be taken to ensure that an endangered species is preserved.

The listing process in itself is meaningless unless the Departments take the appropriate steps to protect the species habitat. Although the Interior Department has received petitions to list some 24,000 species of plants and animals, the Department has initiated action on only about 15 percent of these species and have listed only 16 species since the 1973 act without designating one critical habitat. The Department estimates that it takes 36 professional person days and five clerical person days to list a species. Thus, the Department has a formidable task ahead.

Moreover, the act calls for an international program of financial assistance to foreign countries to develop and manage programs which the Secretary determines to be necessary and useful for the conservation of any endangered species. To date, the Department of the Interior stated that little progress has been made in this area because of funding and personnel shortages.

The most significant action yet to be taken by the United States to fulfill our international obligations pursuant to the Convention on International Trade in Endangered Species of Wild Fauna and Flora is the designation of implementing management and scientific authority. Apparently, the draft Executive order to implement this authority has been in the Office of Management and Budget for review for several months. The Department of the Interior recently indicated that they expect execution of this order momentarily. Once these authorities are established, the Department of the Interior must be prepared to carry out the additional responsibility contained in the International Convention.

I have only mentioned a few of the most important areas of unfinished work concerning the implementation and administration of the Endangered Species Act. Considering the importance of the Endangered Species Act and the volume of classification work which remains undone, a modest increase in the authorization provided the Departments of Commerce and Interior is, in the committee's opinion, justified. It is anticipated that these funds will be utilized for the hiring of additional staff and for the completion of appropriate scientific studies.

The Department of the Interior has requested $10 million for fiscal year 1977 while the Department of Commerce had requested $2 million for the same period. During our oversight hearings, both Departments indicated that although the requested funding level would be adequate, the program could not go forward at a desirable pace. Therefore, the committee made the determination that increased funding was not only desirable, but necessary to achieve an effective and workable program.

Finally, I might note that H.R. 8092 was further amended in committee to delete the transition period funding for the Department of the Interior since the Department has already received authorization for appropriations to continue all Fish and Wildlife Service programs during the transition period under the 1976 Appropriations Act.

Mr. Speaker, I would urge the Members to enact this legislation promptly so that the work of these agencies can go forward.

Mr. RUPPE. Mr. Speaker, the Earth's history is replete with examples of animal and plant species which became extinct. Until modern man's influence became felt, the primary forces threatening a species survival were the changing environment of a developing Earth and the process of natural selection. However, in today's world, man and his activities have replaced nature as the main factors threatening the survival of various species of flora and fauna.

The Endangered Species Act was born out of this Congress concern for the preservation and protection of the world's fauna and flora. The act, as has already been pointed out, has two key elements, the listing of species as endangered or threatened and the designation of habitats critical to the survival of those species. Once listed as endangered or threatened, the act prohibits the taking, importing, exporting, and interstate transport of endangered species or any parts and products thereof. These protections against commercial exploration have been a vital factor in the continued survival of hundreds of animals.

Listing, however, is only the first step toward a species protection. Of equal and perhaps greater importance is the determination of the habitat and the protection of the habitat critical to that species' survival.

Unfortunately, the Departments of Commerce and the Interior, which are charged with responsibility for implementing the Endangered Species Act, have been unable to perform their responsibilities at the optimal level.

Although many species of wildlife have been listed as endangered and threatened, the Departments have a backlog of several thousand species which they feel might require protection afforded by listing. Due to limitations on resources, the Departments have been unable to begin working on these species. The Department of the Interior for example employs only eight professionals part time to work on this listing process. Furthermore, due to limited resources, the Department has yet to list a single plant as endangered or threatened, although the Smithsonian Institute in December 1974, recommended that some 3,000 species of flora be considered for listing.

The Departments' record with respect to the designation of critical habitat has been more severely restricted by lack of resources. Although it has been determined that there are 108 species of fauna which should have a high priority in the designation of critical habitat, the Departments resources have only permitted them to begin work on nine. Again, the central limiting factor has been the lack of personnel and the lack of adequate funding necessary to undertake the necessary scientific research and surveys.

Recognizing the need to provide both the Department of Commerce and the Department of the Interior with the tools necessary to achieve the goals of the act, the Merchant Marine and Fisheries Committee approved legislation authorizing a modest increase in the authorization under the act. Although the Departments have estimated that the optimal funding of the endangered species program would be approximately $20 million in each of fiscal year 1977 and fiscal year 1978, the committee recognizes that there are only finite resources with which to fund existing governmental programs. Therefore, the committee-approved legislation provides for a modest increase in the fiscal year 1977 authorization, an increase which is well below the optimal funding the Departments estimate they require. The authorization provided in H.R. 8292 is, in my view, the minimum amount necessary for the agencies to meet their responsibilities and I urge my colleagues' support for the measure.

Mr. Speaker, I yield such time as he may consume to my distinguished colleague, the gentleman from New Jersey (Mr. Forsythe).

Mr. FORSYTHE. Mr. Speaker, I rise in support of the legislation.

Mr. Speaker, in the wake of man's progress are strewn the remains of many species, plants and animals, which have become extinct. Continued commercial exploration and the impact of habitat destruction now threatens hundreds of species with a similar fate. As my colleague from Michigan has pointed out, the essential elements of the Endangered Species Act are the listing of species as endangered or threatened and the designation of critical habitat.

However, there are other programs of the Endangered Species Act which have been underfunded. For example, the act contemplates the registration of all importers and exporters of wildlife as a necessary tool of enforcement. Unfortunately, due to a lack of resources, this element of the enforcement program has yet to be implemented.

Similarly, the act establishes a program of international assistance using excess foreign currencies held by the United States to assist nations desirous of establishing an endangered species program. It appears that in fiscal year 1977 approximately $600,000 in excess currencies will be available for distribution. Although none of the funds authorized in H.R. 8092 will be distributed overseas, certain of these funds will be used to administer this program.

Of greater importance, within the context of H.R. 8092, is the fact that the Convention on International Trade in Endangered Species of Wild Fauna and Flora, to which the United States is a signatory, will enter into force in fiscal year 1977 or fiscal year 1978. This convention charges each member nation with regulating the taking, importing, and exporting of all the species listed as endangered or threatened pursuant to the convention. Approximately 200 of these species are not yet on the U.S. list. The convention also directs that each member nation establish a scientific authority to evaluate the merits of the taking, importing, or exporting of these species. The establishment and operation of the scientific authority and the new enforcement responsibilities which will be placed on the departments require additional authorization which has been provided for in H.R. 8092. The Endangered Species Act is an important statute and I urge the adoption of H.R. 8092 which provides the minimum funding necessary for the implementation of that act.

Mr. CONTE. Mr. Speaker, I rise in support of the bill to extend the Endangered Species Act of 1973.

The goal of the endangered species program is to maintain a diversity of species of animals and plants that are endangered with extinction or threatened with endangerment. The eventual goal of the program is to restore such species to the point at which it is once again a viable component of its ecosystem.

So far, considering the limited funding, the legislation has been successful. However, the time has come to increase our efforts to enable full implementation of the act.

At face value, one naturally assumes that this legislation is designed to protect fish and wildlife. This legislation, however, is also designed to protect endangered plant life. Because of low funding, no plants have been listed as an endangered species as yet. This is a serious situation. The Smithsonian Association alone suggests that 3,000 species of the plant be put on the endangered list and come under protection of the act.

Now, I realize at first blush we might question the priority of funding efforts to protect 3,300 types of plant life. It is clear funding priorities must be considered. However, if a species of plant, which is an integral element of the diet of a species of wildlife, that species of plant must be protected. There is a natural ripple effect in the "balance of nature."

The additional funding levels in this bill would enable such valued plantlife to be protected. One of the main causes of animals extinction is the absence of adequate habitat and diet. This bill, fully implemented, would attack the problem at each direction.

I urge my colleagues to support this legislation.

Thank you, Mr. Speaker.

The Speaker. The question is on the motion offered by the gentlewoman from Missouri (Mrs. Sullivan) that the House suspend the rules and pass the bill H.R. 8092, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

[From the Congressional Record, June 17, 1976]

House Passage of S. 3122 in Lieu of H.R. 8092 as Previously Passed

Extending Authorization for Appropriations for Endangered Species Act of 1973

Mr. Leggett. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 3122) to extend the authorization for appropriations to carry out the Endangered Species Act of 1973, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The Speaker. Is there objection to the request of the gentleman from California?

Mr. Forsythe. Mr. Speaker, reserving the right to object, I will not object, but I take this time to ask the chairman of my subcommittee to explain just what the contents of this bill are.

Mr. Leggett. Mr. Speaker, will the gentleman yield?

Mr. Forsythe. I yield to the gentleman from California.

Mr. Leggett. Mr. Speaker, on March 15, 1976, the House passed H.R. 8092, a bill similar to S. 3122.

Mr. Speaker, H.R. 8092, as it passed the House, would amend the Endangered Species Act of 1973 to extend the authorization for appropriations to carry out the act. In this regard, the bill would authorize to be appropriated to the Secretary of the Interior $25 million for fiscal years 1977 and 1978. The bill would also authorize to be appropriated to the Secretary of Commerce $500,000 for the transition period—from July 1, 1976, to September 30, 1976—and $5 million for fiscal years 1977 and 1978.

Mr. Speaker, S. 3122 as it passed the Senate, is identical to the House passed bill, except S. 3122 would authorize to be appropriated to the Secretary of the Interior the sum of $1.8 million for the transition period.

Mr. Speaker, the Department of the Interior, in its report on the legislation, advised that it was unnecessary to provide an appropriation authorization for the transition period for the Department since funds to cover this period—amounting to $1.8 million—had been included in the Department's fiscal year 1976 appropriations pursuant to the authority contained in Public Law 94–144. Consequently, the appropriation authorization for the transition period for the Secretary of the Interior—as provided in S. 3122—is merely duplicative of the appropriation authorization contained in Public Law 99–144.

Mr. Speaker, the difference between the two versions of the bill is technical in nature and instead of insisting on the Senate passing the House bill, H.R. 8092, and substituting the language of S. 3122 as it passed the Senate and returning the House bill to the House for consideration, as it should have done, I am urging the House to adopt S. 3122, as it passed the Senate.

Mr. Speaker, it has been the practice in the past to send to the President for signature the bill which passed the House or Senate first and I realize the action I am recommending at this time is an exception to this practice. However, I am recommending that we take the Senate bill in this instance in order to avoid an extra step in the legislative process.

Mr. Speaker, S. 3122 would not result in any additional cost to the Federal Government and I urge its prompt passage.

Mr. Speaker, I hope the Senate will not make this unusual procedure necessary in the future.

Mr. Forsythe. Mr. Speaker, I withdraw my reservation of objection.

The Speaker. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 3122

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended—

(1) by striking out "(A) not to exceed $4,000,000" and all that follows through "$10,000,000 for fiscal year 1976," in paragraph (A) thereof and inserting in lieu thereof "(1) not to exceed $10,000,000 for the fiscal year ending June 30, 1976, not to exceed $1,800,000 for the fiscal transitional period ending September 30, 1976, and not to exceed a total of $25,000,000 for the fiscal year ending September 30, 1977, and the fiscal year ending September 30, 1978,"; and

(2) by striking out "(B) not to exceed $2,000,000" and all that follows through "$2,000,000 for fiscal year 1976," in paragraph (B) thereof and inserting in lieu thereof "(2) not to exceed $2,000,000 for the fiscal year ending June 30, 1976, not to exceed $500,000 for the fiscal transitional period ending September 30, 1976, and not to exceed a total of $5,000,000 for the fiscal year ending September 30, 1977, and the final year ending September 30, 1978,".

Mr. Ruppe. Mr. Speaker, I rise in support of this legislation to extend the authorizations for appropriations for the Departments of the Interior and Commerce to implement their respective responsibilities under the Endangered Species Act of 1973.

The Endangered Species Act was generated by Congress' concern for the preservation and protection of the world's fauna and flora. The act has two key elements, namely, the listing of species as endangered or threatened and the designation of habitats critical to the survival of those species. Once listed as endangered or threatened, the act prohibits the taking, importing, exporting, and interstate transport of endangered species or any parts and products there of. These protections against commercial exploration have been a vital factor in the continued survival of hundreds of animals. Of equal and perhaps greater importance than the listing of a species as endangered is the determination of the habitat and the protection of the habitat critical to that species' survival.

Unfortunately, the Departments of Commerce and the Interior have been unable to perform their responsibilities at the optimal level. Although many species of wildlife have been listed as endangered and threatened, the Departments have a backlog of several thousand species which they feel might require protections afforded by listing. Due to the lack of personnel and adequate funding, the Departments have been unable to begin working on those species.

The Departments' record with respect to the designation of critical habitat has been more severely restricted by lack of resources. Although it has been determined that there are 108 species of fauna which should have a high priority in the designation of critical habitat, the Departments' resources have only permitted them to begin work on nine. Again, the central limiting factor has been the lack of personnel and adequate funding necessary to undertake the scientific research and surveys.

Recognizing the need to provide both the Department of Commerce and the Department of the Interior with the tools necessary to achieve the objectives of the act, the Merchant Marine and Fisheries Committee approved and the House passed legislation authorizing a modest increase in the authorizations under the act. This increase is reflected in the legislation before us today. I urge my colleagues' support for this measure.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsideration was laid on the table.

[From the Congressional Record, Mar. 10, 1976]

REMARKS OF SENATOR MOSS ON INTRODUCTION OF S. 3122

By Mr. Moss (by request):

S. 3122. A bill to amend the Endangered Species Act of 1973 to extend authorizations for appropriations. Referred to the Committee on Commerce.

Mr. Moss. Mr. President, I introduce by request, for appropriate reference, a bill to amend the Endangered Species Act of 1973 to extend authorizations for appropriations, and for other purposes, and ask unanimous consent that the letter of transmittal be printed in the Record together with the text of the bill.

There being no objection, the bill and letter were ordered to be printed in the Record, as follows:

S. 3122

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, **That section 15(A) of the Endangered Species Act of 1973 (16 U.S.C. 1542(A)), is amended by deleting "fiscal year 1976" and inserting in lieu thereof, "fiscal years 1976, 1977, and 1978,".**

U.S. Department of the Interior,
Washington, D.C., May 15, 1975.

Hon. Nelson Rockefeller,
President of the Senate,
Washington, D.C.

Dear Mr. President: Transmitted herewith is draft legislation to extend the authorizations for appropriations in the Endangered Species Act of 1973 (P.L. 93-205; 87 Stat. 884).

We recommend that this bill be referred to the appropriate Committee for consideration, and that it be enacted.

Man's activity threaten a growing number of species of plants and animals with extinction. Environmental change is taking place so rapidly that further delay in protection of endangered species and their habitats pushes certain species inevitably closer to the brink of extinction, making recovery more difficult and costly.

The Endangered Species Act of 1973 provided new and stronger authority for the Secretary of the Interior (and the Secretary of Commerce) to prevent the extinction of species. That authority included a broader responsibility to list species that are subject to provisions of the Act and also strengthened the Secretary's ability to protect and manage the listed species to the point where they are restored and can be removed from the list. The goal of the endangered species program is to maintain a healthy diversity of species and to preserve in their natural ecosystems species of animals and plants that are endangered with extinction or threatened with endangerment. Wherever possible, the program seeks to restore such species to the point at which it is once again a viable component of its ecosystem. Further, insofar as possible, it is our intent to prevent other species from beginning endangered.

In order to implement activities aimed at accomplishing these goals, the Endangered Species Act provides for grant-in-aid to States not to exceed $10 million for the first three years after enactment and a general authorization of an amount not to exceed $4 million for FY 1974, $8 million for FY 1975 and $10 million for FY 1976 to enable the Department of the Interior to carry out functions and responsibilities of the Act other than grant-in-aid.

Since December 28, 1973, we have taken these major steps in the implementation of the Act:

1. As prescribed by the Act, what were formerly the native list and foreign list of endangered species have been consolidated into one list and published.
2. Status surveys have been started and/or completed on the wolves of North America, green sea turtle, Sirenians, American alligator, American crocodile, grizzly bear and spotted cats.
3. Guidelines on submission of cooperative agreements and model legislation for use by the States to develop endangered species laws in accordance with provisions of the 1973 Act have been prepared and distributed.
4. Recovery plans have been prepared through first draft for 29 species.
5. Seven workshops have been conducted for training Service, other Federal agency and State personnel in recovery plan preparation.
6. Orientation workshops were conducted in each Regional Office of the U.S. Fish and Wildlife Service for Service and other Federal and State personnel to explain the provisions and applications of the 1973 Act.

Approximately $7.37 million and 170 man-years of effort will be available in the Fish and Wildlife Service to carry out the endangered species program other than grant-in-aid and land acquisition in FY 1976. Our proposed bill would extend the authorization for appropriations at the FY 1976 level of $10 million for FY 1977 and for FY 1978.

This recommendation is consistent with the President's moratorium on new Federal spending programs other than those involving energy production, national defense, and certain humanitarian efforts, and his stated policy to avoid excessive growth of Federal spending in the long run.

We urge enactment of the proposed legislation in order to assure continuation of programs aimed at preventing the continued decline of our living natural resources.

The Office of Management and Budget has advised that there is no objection to the submission of this proposed legislation from the standpoint of the Administration's program.

Sincerely yours,

Royston C. Hughes,
Assistant Secretary of the Interior.

94TH CONGRESS
2D SESSION

S. 3122

[Report No. 94-837]

IN THE SENATE OF THE UNITED STATES

MARCH 10, 1976

Mr. Moss (by request) introduced the following bill; which was read twice and referred to the Committee on Commerce

MAY 14, 1976

Reported by Mr. Moss, with amendments

[Strike out all after the enacting clause and insert the part printed in italic]

A BILL

To amend the Endangered Species Act of 1973 to extend authorizations for appropriations.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, ~~That section 15(A) of the Endangered Species Act of 1973 (16 U.S.C. 1542(A)), is amended by deleting "fiscal year 1976" and inserting in lieu thereof, "fiscal years 1976, 1977, and 1978,".~~

That section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended—

(1) by striking out "(A) not to exceed $4,000,000" and all that follows through "$10,000,000 for fiscal year 1976," in paragraph (A) thereof and inserting in lieu

thereof "(1) not to exceed $10,000,000 for the fiscal year ending June 30, 1976, not to exceed $1,800,000 for the fiscal transitional period ending September 30, 1976, and not to exceed a total of $25,000,000 for the fiscal year ending September 30, 1977 and the fiscal year ending September 30, 1978,"; and

(2) by striking out "(B) not to exceed $2,000,000" and all that follows through "$2,000,000 for fiscal year 1976," in paragraph (B) thereof and inserting in lieu thereof "(2) not to exceed $2,000,000 for the fiscal year ending June 30, 1976, not to exceed $500,000 for the fiscal transitional period ending September 30, 1976, and not to exceed a total of $5,000,000 for the fiscal year ending September 30, 1977 and the fiscal year ending September 30, 1978,".

Amend the title so as to read: "A bill to extend the authorization for appropriations to carry out the Endangered Species Act of 1973.".

ENDANGERED SPECIES ACT OF 1973 REAUTHORIZATION

May 13, 1976.—Ordered to be printed

Mr. Moss, from the Committee on Commerce,
submitted the following

REPORT

[To accompany S. 3122]

The Committee on Commerce, to which was referred the bill (S. 3122) to amend the Endangered Species Act of 1973 to extend authorizations for appropriations, having considered the same, reports favorably thereon with an amendment in the nature of a substitute and recommends that the bill as amended do pass.

Purpose and Summary

The purpose of S. 3122 is to extend and increase the authorization for appropriations for the Department of the Interior and the Department of Commerce for administration of the Endangered Species Act of 1973.

The bill increases the current Interior Department funding level from $10 million per fiscal year to $1.8 million for the fiscal transitional period and a combined total of $25 million for the 2 fiscal years 1977 and 1978. The Commerce Department's current funding level of $2 million per fiscal year is increased to $500,000 for the fiscal transitional period and a combined total of $5 million for the 2 fiscal years 1977 and 1978.

Background and Need

The Endangered Species Act of 1973 strengthens its 1966 and 1969 predecessors to give the Secretary of Interior and the Secretary of

Commerce major new authority to protect species of plants and animals which are on the brink of extinction. Using the best scientific and commercial information available to him, the Secretary of the Interior, after consultation with the States, and when a marine mammal is under consideration, with the Secretary of Commerce, has the authority to determine when a species is either endangered (in imminent danger of extinction) or threatened (likely to be in danger of extinction in the near future) and to promulgate regulations for its protection. Once a species has been designated as endangered, the act makes it illegal to take, import, export, or engage in interstate or foreign commerce in that species or in its parts or products.

The act also provides the Secretary of the Interior with the authority to—

—designate habitat which is critical for the survival of an endangered or threatened species. Once critical habitat has been designated, no Federal agency may undertake projects which endanger the existence of these species, or result in the destruction of the habitat.

—provide financial assistance to the States for endangered species programs.

—provide assistance to other nations for endangered species programs.

—provide for the implementation of the Convention on International Trade in Endangered Species of Wild Fauna and Flora, to which the United States is a signatory.

The ultimate goal of the Endangered Species Act is to maintain a diversity of species and to preserve in their natural ecosystems both endangered and threatened species. Wherever possible, the program seeks to restore such species to the point where it is once again a viable component of its ecosystem. Further it is the intent of the act to prevent other species from becoming endangered through restoration of habitat, research, and other scientific resource management activities.

With the exception of the State grant-in-aid program which is authorized by section 6 of the act and which expires on June 30, 1977, funding for administration of the act by the Departments of Interior and Commerce is authorized by section 15 (A) and (B) respectively. Under this section, there is authorized to be appropriated not to exceed $4 million for fiscal year 1974, $8 million for fiscal year 1975, and $10 million for fiscal year 1976 for the Department of Interior to carry out its responsibilities under the act. An amount of $2 million for fiscal year 1974, $1.5 million for fiscal year 1975, and $2 million for fiscal year 1976 is authorized for expenditure by the Department of Commerce. Inasmuch as the authorizations expire on June 30, 1976, it is essential that Congress extend funding under the act in order to continue this important conservation program.

On May 6, 1976, the Subcommittee on the Environment held a hearing on three bills to extend the authorization for the Endangered Species Act, including S. 2334, introduced by request of the Department of Commerce, which continues the current Commerce Department funding level through fiscal year 1978; S. 3122, introduced by request of the Department of the Interior which, as introduced, continues the Department of the Interior's current funding level through fiscal year 1978; and H.R. 8092, which combines both authorizations.

increases Interior's authorization to a total of $25 million for fiscal years 1977 and 1978, and increases the Commerce Department's authorization to a total of $5 million for fiscal years 1977 and 1978, and $500,000 for the fiscal transitional period. At the hearing, representatives of the two Departments indicated that the funding levels contained in S. 2334 and S. 3122 would permit them to carry out adequately their endangered species programs for fiscal years 1977 and 1978.

Testimony received at the hearing indicated that implementation of the act has not occurred as rapidly as might be expected, due in part to a shortage of funding and personnel. For instance, although 10 species have been listed as endangered and 11 as threatened since passage of the act, the Department of Interior has information on another 20,000 species which they suspect may require protective listing. Before the species can be listed, however, the Department must carry out extensive investigations to determine their actual status. Furthermore, no plants have yet been listed as either endangered or threatened, although the Smithsonian Institute recommended the listing of some 3,000 species of flora in December of 1974. Approximately 200 species listed as endangered or threatened pursuant to the Convention on International Trade in Endangered Species of Wild Fauna and Flora, to which the United States is a signatory, have not yet been placed on the U.S. list. Finally, although the key to the survival of a species is the preservation of its habitat, only one critical habitat, that for the snail darter, has been designated under section 7 of the act. While the Departments of Commerce and Interior have indicated the desire to move ahead on all of these activities, to do so will require funding and personnel above currently authorized levels.

On May 11 the Senate Commerce Committee approved in executive session a substitute text for S. 3122 which combines the reauthorizations for the administration of the Endangered Species Act by the Interior Department and the Commerce Department. Interior Department funding is increased by a total of $6.8 million over the administration's request, including $1.8 million for the transitional period and a total increase of $5 million for fiscal years 1977 and 1978. The authorization for the Commerce Department is increased by a total of $1.5 million over the administration's request, including $500,000 for the transitional period and a total increase of $1 million for fiscal years 1977 and 1978. It is anticipated that the additional funds will be used by the Departments for scientific investigations and to implement more fully other provisions of the act. Finally, the bill combines two fiscal years' authorization into one amount in order to permit the Departments more flexibility in expenditure of these funds.

Legislative History

S. 3122 was introduced by request of the Department of the Interior on March 10, 1976 and referred to the Subcommittee on the Environment on March 17, 1976. On May 6 the Subcommittee held a day of hearings on this legislation and two other bills, H.R. 8092 and S. 2334, which reauthorize the Endangered Species Act of 1973. On May 11, 1976 the Senate Committee on Commerce ordered reported S. 3122 with a substitute text.

SECTION-BY-SECTION ANALYSIS

The bill extends and increases the authorization for appropriations for the Department of the Interior and the Department of Commerce for administration of the Endangered Species Act of 1973. The current Interior Department authorization of $10 million is increased to $1.8 million for the transitional period and a combined total of $25 million for fiscal years 1977 and 1978. The current Commerce Department authorization of $2 million per year is increased to $500,000 for the fiscal transitional period and a combined total of $5 million for fiscal years 1977 and 1978.

ESTIMATED COSTS

Pursuant to the requirements of section 252 of the Legislative Reorganization Act of 1969, the Committee estimates that in the event this legislation is enacted into law, the additional cost to the Federal Government would be as follows: $2.3 million for the fiscal transitional period and a combined total of $30 million for fiscal years 1977 and 1978.

CHANGES IN EXISTING LAW

In compliance with subsection (4) of rule XXIX of the Standing Rules of the Senate, changes in existing law made by the bill as reported are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

SECTION 15 OF THE ENDANGERED SPECIES ACT OF 1973

(16 U.S.C. 1542; Public Law 93-205)

AUTHORIZATION OF APPROPRIATIONS

SEC. 15. Except as authorized in section 6 of this Act, there are authorized to be appropriated—

[(A) not to exceed $4,000,000 for fiscal year 1974, not to exceed $8,000,000 for fiscal year 1975 and not to exceed $10,000,000 for fiscal year 1976.] *(1) not to exceed $10,000000 for the fiscal year ending June 30, 1976, not to exceed $1,800,000 for the fiscal transitional period ending September 30, 1976, and not to exceed a total of $25,000,000 for the fiscal year ending September 30, 1977 and the fiscal year ending September 30, 1978*, to enable the Department of the Interior to carry out such functions and responsibilities as it may have been given under this Act; and

[(B) not to exceed $2,000,000 for fiscal year 1974, $1,500,000 for fiscal year 1975 and not to exceed $2,000,000 for fiscal year 1976.] *(2) not to exceed $2.000,000 for the fiscal year ending June 30, 1976. not to exceed $500,000 for the fiscal transitional period ending September 30. 1976. and not to exceed a total of $5,000,000 for the fiscal year ending September 30, 1977 and the fiscal year ending September 30, 1978*, to enable the Department of Commerce to carry out such functions and responsibilities as it may have been given under this Act.

TEXT OF S. 3122, AS REPORTED

A BILL To extend the authorization for appropriations to carry out the Endangered Species Act of 1973.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended—

(1) by striking out "(A) not to exceed $4,000,000" and all that follows through "$10,000,000 for fiscal year 1976," in paragraph (A) thereof and inserting in lieu thereof "(1) not to exceed $10,000,000 for the fiscal year ending June 30, 1976, not to exceed $1,800,000 for the fiscal transitional period ending September 30, 1976, and not to exceed a total of $25,000,000 for the fiscal year ending September 30, 1977 and the fiscal year ending September 30, 1978,"; and

(2) by striking out "(B) not to exceed $2,000,000" and all that follows through "$2,000,000 for fiscal year 1976," in paragraph (B) thereof and inserting in lieu thereof "(2) not to exceed $2,000,000 for the fiscal year ending June 30, 1976, not to exceed $500,000 for the fiscal transitional period ending September 30, 1976, and not to exceed a total of $5,000,000 for the fiscal year ending September 30, 1977 and the fiscal year ending September 30, 1978,".

AGENCY COMMENTS

Inasmuch as S. 2334 and S. 3122 were introduced by request, the Committee received no agency comments on these bills. The Committee did receive one agency comment on H.R. 8092, which is similar to S. 3122, as reported. This is as follows:

GENERAL COUNSEL OF THE U.S. DEPARTMENT OF COMMERCE,
Washington, D.C., April 30, 1976.

Hon. WARREN G. MAGNUSON,
Chairman, Committee on Commerce,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in reply to your request for the views of this Department concerning H.R. 8092, an act to extend the authorization for appropriations to carry out the Endangered Species Act of 1973.

H.R. 8092 would amend the Endangered Species Act of 1973 by extending the authorization for appropriations to the Departments of Commerce and the Interior. The existing authorization for both Departments expires June 30, 1976.

The Department strongly supports enactment of legislation to extend the authorization of appropriations for the Department of Commerce under section 15(B) of the Endangered Species Act of 1973. Passage is imperative to the continuation of our program for the conservation of "endangered" and "threatened" species.

H.R. 8092, an act, increases the appropriation authorization under section 15(B) of the Endangered Species Act of 1973 for the Department of Commerce to $5 million for fiscal years 1977 and 1978. The Department has submitted to the Congress draft legislation authorizing extension of the authorization at the level of $2 million per year for fiscal years 1977 and 1978. This legislation has been introduced as S. 2334. We recommend that clause (2) of H.R. 8092 be amended to conform to the provisions of S. 2334. We would defer to the Department of the Interior as to clause (1) of H.R. 8092.

We have been advised by the Office of Management and Budget that there would be no objection to the submission of our report to the Congress from the standpoint of the administration's program.

Sincerely,

John Thomas Smith II,
General Counsel.

[From the Congressional Record, May 18, 1976]

SENATE CONSIDERATION AND PASSAGE OF S. 3122, AS AMENDED

ENDANGERED SPECIES ACT AUTHORIZATIONS

The Senate proceeded to consider the bill (S. 3122) to amend the Endangered Species Act of 1973 to extend authorizations for appropriations which had been reported from the Committee on Commerce with an amendment to strike out all after the enacting clause and insert:

That section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended—

(1) by striking out: "(A) not to exceed $4,000,000" and all that follows through "$10,000,000 for fiscal year 1976," in paragraph (A) thereof and inserting in lieu thereof "(1) not to exceed $10,000,000 for the fiscal year ending June 30, 1976, not to exceed $1,800,000 for the fiscal transitional period ending September 30, 1976, and not to exceed a total of $25,000,000 for the fiscal year ending September 30, 1977 and the fiscal year ending September 30, 1978,"; and

(2) by striking out "(B) not to exceed $2,000,000" and all that follows through "$2,000,000 for fiscal year 1976," in paragraph (B) thereof and inserting in lieu thereof "(2) not to exceed $2,000,000 for the fiscal year ending June 30, 1976, not to exceed $500,000 for the fiscal transitional period ending September 30, 1976, and not to exceed a total of $5,000,000 for the fiscal year ending September 30, 1977 and the fiscal year ending September 30, 1978,".

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to extend the authorization for appropriations to carry out the Endangered Species Act of 1973."

[From the Congressional Record, June 21, 1976]

S. 3122 PRESENTED TO THE PRESIDENT

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that today, June 21, 1976, he presented to the President of the United States the following enrolled bills:

* * * * * * *

S. 3122. An act to extend the authorization for appropriations to carry out the Endangered Species Act of 1973.

* * * * * * *

ANNOTATED BIBLIOGRAPHY OF HEARINGS

U.S. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment. Fish and Wildlife Miscellaneous, Part 4. Hearings, 94th Congress, 2d session. Washington, U.S. Govt. Print. Off., 1976. 354 p.

Hearings on Endangered Species Authorization held Feb. 5, 6, 1976. Hearings on reimbursement for livestock loss caused by endangered species held on Mar. 26, 1976. "Serial No. 94–30"

Hearings to consider eight bills pertaining to management of marine and wildlife resources, including:

H.R. 8092, to amend the Endangered Species Act to extend the authorization for appropriations at the fiscal year 1976 level for fiscal years 1977–78.

H.R. 12057 and identical H.R. 12554, to amend the Endangered Species Act to authorize the reimbursement for any loss of or injury to livestock or pets caused by any endangered or threatened species inhabiting an area under Interior Dept control.

Hearings on H.R. 8092 include testimony from: C. Stevens (Society for Animal Protective Legislation), C. E. Wilson (Aububon Society), J. W. Grandy (Defenders of Wildlife), J. S. Gottschalk (Intl Assn of Game, Fish, and Conservation Commrs), L. A. Greenwalt (FWS), J. W. Gehringer (NMFS).

Hearings on H.R. 12057 include testimony from: G. W. Milias (FWS), M. L. Cotner (USDA), R. Holmes (Minn DNR), J. W. Grandy (Defenders of Wildlife).

U.S. Congress. Senate. Committee on Commerce. Subcommittee on Environment. To amend the Endangered Species Act of 1973. Hearings, 94th Congress, 2d session, May 6, 1976. Washington, U.S. Govt. Print. Off., 1976. 190 p. "Serial No. 94–82"

Hearings to consider S. 2334 and similar S. 3211, H.R. 8092, to authorize fiscal year 1976 transition period, fiscal year 1977 and fiscal year 1978 appropriations for Commerce and/or Interior Departments administration of Endangered Species Act of 1973.

Hearing also considers oversight of the Endangered Species Act and S. 229 and similar H.R. 10229, to propose exemptions for the interstate sale of scrimshaw and whale products stockpiled prior to enactment of the Act.

Submitted articles, correspondence, and statements include:

a. Zimmerman, David, R. "That the Peregrine Shall Live" Audubon, Nov. 1975 (p. 133-141);

b. Cade, Tom J., "Plans for Managing the Survival of the Peregrine Falcon" Raptor Research Rpt., No. 2, 1974 (p. 141–151);

c. National Parks and Conservation Association, "Help Save Our Endangered Plants" reprints of articles from Environmental J. 1975 (p. 167–190).

Hearings on May 6 include testimony from L. M. Talbot (CEQ), and G. W. Milias (FWS).

Hearing on whale products includes J. W. Gehringer (MMGS), L. Brooks (GSA), K. L. Newman (Archer Daniels Midland Co.), A. S. Bistritzky (Scandinavian Oil Co.), W. Meckes (Werner G. Smith, Inc.), A. Wickham (Friends of the Earth), S. Stevens (Society for Animal Protective Legislation).

Hearings on programs oversight includes S. Whitney (Coll. of William and Mary), L. Hood (Calif. Native Plant Society, J. S. Gottschalk (Assn of Game, Fish and Conservation Commrs), M. Newman (Fund for Animals), T. Cooper (Defenders of Wildlife), J. W. Grandy (Defenders of Wildlife).

Hearings on zoo and circus animals includes R. Thrun (Ringling Bros-Barnum and Bailey Combined Shows), G. E. Steele (Zoological Action Committee).

Hearings on Peregrine falcons includes R. A. Graham (USAF), S. A. Marcus (North Amer Falconers Assn).

ENDANGERED SPECIES ACT AMENDMENTS, PUBLIC LAW 94-359

BACKGROUND

The following quoted material is taken from a review of fisheries and wildlife conservation legislation of the 94th Congress written by CRS and issued as a committee print by the Senate Committee on Interior and Insular Affairs. (See: Congress and the Nation's Environment: Energy and Natural Resources Actions of the 94th Congress, January 1977. Committee Print. Senate Committee on Interior and Insular Affairs. Washington, U.S. Govt. Print. Off. pp. 1127-1133):

> The purpose of this legislation was to improve management of the Endangered Species Act of 1973 and to allow for the limited disposal of pre-Act, legally-obtained endangered species parts and products. The enactment of the Endangered Species Act of 1973 considerably strengthened previously existing law to protect species which are endangered or becoming endangered. It set strict prohibitions on the import and export and interstate (but not intrastate) commerce in endangered species parts or products. Implementation and administration of the Act over the past three years had given the Departments of Commerce and the Interior sufficient experience in working with statutory provisions of the Act to identify certain problems related thereto. The two Departments in October 1975 thus submitted by Executive Communication proposed amendments to the Act to clarify and remedy the problem areas. While these proposals were not introduced in bill form until October 20, 1975 (as H.R. 10229), they were the general subject of discussion during oversight hearings which the House Subcommittee on Fisheries and Wildlife Conservation and the Environment held on October 1, 2, and 6, 1975 (Serial 94-17).
>
> More specific problem areas which had previously received attention related to inconsistencies between the Marine Mammal Protection Act of 1972 and the Endangered Species Act of 1973 with respect to endangered species parts and products, most particularly scrimshaw, sperm oil and spermaceti. The Marine Mammal Protection Act (P.L. 92-522) prohibits the importation and sale in interstate and foreign commerce of parts and products of marine mammals but the prohibitions do not apply to marine mammals taken prior to the effective date of the Act, December 21, 1972. The Endangered Species Act of 1973 (P.L. 93-205), however, lacked such retroactive exemptions. Hearing testimony indicated the inconsistency had led to confusion in the enforcement of the laws as well as financial hardship for scrimshanders and other artisans who

dealt in carved whale bone and teeth and who possessed sometimes substantial inventories of legally acquired materials used in their craft but who were then prohibited under the 1973 Act from marketing their finished products. Similarly, stockpiles of sperm whale oil held by the General Services Administration (GSA), acquired between 1948 and 1952 pursuant to the Strategic and Critical Materials Stockpiling Act, and declared surplus and no longer strategic in 1972 by the International Materials Stockpiling Act, were likewise kept from final commercial disposal. Both private persons and the government thus held sperm oil stocks, legally acquired, which they could not put into commercial use and which were costing significant funds in storage costs just to hold. Several bills had been introduced in the 93rd and 94th Congresses addressing these problems deriving from the inconsistency between the 1972 and 1973 Acts.

The House Subcommittee on Fisheries and Wildlife Conservation and Environment held hearings on June 9 and 10, 1975 (Serial 94-7) on several bills to amend the Endangered Species Act to provide for specific exemptions for pre-Act, legally obtained sperm oil and scrimshaw. Action on those bills was then held off until completion of the October 1975 oversight hearings resulting in ultimate action on a bill offering more general exemptions and including provisions of amendments as suggested by the Executive Communications of October 1, 1975, earlier referred to. The Senate Commerce Committee, having considered without action in the 93rd Congress bills to provide relief to scrimshanders, obtained departmental and public views—through a public comment period, but not by hearings—on a similar measure introduced in the 94th Congress and then reported a bill concerned with the scrimshaw problem alone.

Specifically, S. 229 was designed to preserve the art of scrimshaw. As introduced S. 229 would amend the Endangered Species Act of 1973 by providing the Secretary of Commerce authority to grant exemptions to the prohibitions on interstate commerce in marine mammal parts to persons "for stocks for inventories of bone and teeth of marine mammals of the order Cetacea, including parts of products thereof, lawfully held within the United States on December 21, 1972." The exemption would accompany subsequent sales of such parts and products to ultimate purchasers. The bill placed the burden of proof on seekers of such exemptions to demonstrate their qualifications for same, the legal presumption prior to such demonstration being that possession of marine mammal parts or products would be in violation of the Marine Mammal Protection Act of 1972. Because of various public and Senatorial concerns that actions taken in the interests of scrimshanders not reopen commercial markets which could encourage more illicit trade in marine mammal parts to the detriment of such animals and thus negate the intent of the Marine Mammal Protection Act, the Senate

Commerce Committee reported an amendment to S. 229 in the form of a substitute bill which contained a number of new provisions (see Senate Report 94–63, pp. 2 and 3).

The Senate Commerce Committee reported S. 229 on April 4, 1975; the full Senate approved it on April 14th after making one small amendment on the floor. Offered by Mr. Moss, the additional conforming amendment provided clarifying language to insure that with respect to exemptions granted for the sale and movement in commerce of finished scrimshaw products for personal use, that the persons wishing to sell those products must also demonstrate that they have been legally taken, legally acquired, and that the person has a right to carry it in interstate commerce or dispose of it. The amendment was not contested.

The House Merchant Marine and Fisheries Committee reported its bill, H.R. 10229, on February 11, 1976. The House suspended rules and passed the bill on February 17, 1976. As reported and subsequently passed, the bill amended the Endangered Species Act of 1973 to permit the Secretary of the Interior to react more quickly to emergency protection needs of resident endangered species by waiving in such cases the requirement for a 90 day waiting period for comments and recommendations regarding a given proposed emergency regulation. The bill allowed a limited exemption to the prohibitions contained in the Endangered Species Act for certain endangered species parts or products which were legally obtained and held in the United States prior to December 28, 1973 (i.e., sperm whale oil and scrimshaw). In allowing such exemptions, the amendments to the Act require that the Convention on International Trade in Endangered Species of Wild Flora and Fauna be adhered to, and that certain procedures and conditions be scrupulously followed. In general, the terms and conditions set forth in the House bill were more stringent than those in the Senate bill.

Following passage by the House of H.R. 10229, the Senate-passed bill, S. 229, was taken up, amended to replace the contents with those of H.R. 10229, and then the amended S. 229 was passed and sent back to the Senate. On June 24, 1976 the Senate accepted the House amendments with three additional clarifying amendments. These had the effect of further defining the scope of the bill, assuring that contracts which the General Services Administration had with private firms for the disposal of surplus stocks of sperm whale oil be performed as contemplated, and of making clear that the scope of limiting exemptions did not extend to exonerate any person for any act committed prior to the enactment of S. 229 in violation of the provisions for which exemptions were not being granted nor to immunize any person from prosecution for any such illegal act. The House then concurred in these Senate amendments to the House amendments to S. 229, on June 29, 1976 and the bill was signed into law (P.L. 94–359) on July 12, 1976.

CHRONOLOGY—PUBLIC LAW 94-359

January 17, 1975—S. 229 introduced and referred to Senate Committee on Commerce.

April 4, 1975—S. 229 reported to Senate by the Committee on Commerce with amendment, S. Rept. 94-63.

April 14, 1975—S. 229 passed Senate, amended.

April 15, 1975—S. 229 referred to House Committee on Merchant Marine and Fisheries.

October 20, 1975—H.R. 10229 introduced and referred to House Committee on Merchant Marine and Fisheries.

February 11, 1976—H.R. 10229 reported to House by the Committee on Merchant Marine and Fisheries with amendment, H. Rept. 94-823.

February 17, 1976—H.R. 10229 passed House, amended.

February 17, 1976—S. 229 passed House, amended, in lieu of H.R. 10229.

June 24, 1976—Senate agreed to House amendment to S. 229, with an amendment.

June 29, 1976—House agreed to Senate amendment to S. 229 as amended.

July 1, 1976—S. 229 presented to the President.

July 12, 1976—S. 229 signed into law (P.L. 94-359).

An Act

To amend the Endangered Species Act of 1973 in order to permit the disposal of certain endangered species products and parts lawfully held within the United States on the effective date of such Act.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4(f)(2)(B)(ii) of the Endangered Species Act of 1973 (16 U.S.C. 1533(f)(2)(B)(ii)) is amended by striking out "subsection (b) (A), (B), and (C)" and inserting in lieu thereof subsection (b)(1)(A)". Endangered Species Act of 1973, amendments.

SEC. 2. Section 10 of the Endangered Species Act of 1973 (16 U.S.C. 1539) is amended by adding at the end thereof the following new subsections:

"(f)(1) As used in this subsection— Definitions.

"(A) The term 'pre-Act endangered species part' means—

"(i) any sperm whale oil, including derivatives thereof, which was lawfully held within the United States on December 28, 1973, in the course of a commercial activity; or

"(ii) any finished scrimshaw product, if such product or the raw material for such product was lawfully held within the United States on December 28, 1973, in the course of a commercial activity.

"(B) The term 'scrimshaw product' means any art form which involves the etching or engraving of designs upon, or the carving of figures, patterns, or designs from, any bone or tooth of any marine mammal of the order Cetacea.

"(2) The Secretary, pursuant to the provisions of this subsection, may exempt, if such exemption is not in violation of the Convention, any pre-Act endangered species part from one or more of the following prohibitions: Exemption. ✓

"(A) The prohibition on exportation from the United States set forth in section 9(a)(1)(A) of this Act. 16 USC 1538.

"(B) Any prohibition set forth in section 9(a)(1) (E) or (F) of this Act.

"(3) Any person seeking an exemption described in paragraph (2) of this subsection shall make application therefor to the Secretary in such form and manner as he shall prescribe, but no such application may be considered by the Secretary unless the application— Application.

"(A) is received by the Secretary before the close of the one-year period beginning on the date on which regulations promulgated by the Secretary to carry out this subsection first take effect;

"(B) contains a complete and detailed inventory of all pre-Act endangered species parts for which the applicant seeks exemption;

"(C) is accompanied by such documentation as the Secretary may require to prove that any endangered species part or product claimed by the applicant to be a pre-Act endangered species part is in fact such a part; and

"(D) contains such other information as the Secretary deems necessary and appropriate to carry out the purposes of this subsection.

Exemption certification.
16 USC 1538.

"(4) If the Secretary approves any application for exemption made under this subsection, he shall issue to the applicant a certificate of exemption which shall specify—

"(A) any prohibition in section 9(a) of this Act which is exempted;

"(B) the pre-Act endangered species parts to which the exemption applies;

"(C) the period of time during which the exemption is in effect, but no exemption made under this subsection shall have force and effect after the close of the three-year period beginning on the date of issuance of the certificate; and

"(D) any term or condition prescribed pursuant to paragraph (5) (A) or (B), or both, which the Secretary deems necessary or appropriate.

Regulations.

"(5) The Secretary shall prescribe such regulations as he deems necessary and appropriate to carry out the purposes of this subsection. Such regulations may set forth—

"(A) terms and conditions which may be imposed on applicants for exemptions under this subsection (including, but not limited to, requirements that applicants register inventories, keep complete sales records, permit duly authorized agents of the Secretary to inspect such inventories and records, and periodically file appropriate reports with the Secretary); and

"(B) terms and conditions which may be imposed on any subsequent purchaser of any pre-Act endangered species part covered by an exemption granted under this subsection;

to insure that any such part so exempted is adequately accounted for and not disposed of contrary to the provisions of this Act. No regulation prescribed by the Secretary to carry out the purposes of this subsection shall be subject to section 4(f)(2)(A)(i) of this Act.

16 USC 6533.
Pre-Act endangered species parts, sales contract, validity.

"(6)(A) Any contract for the sale of pre-Act endangered species parts which is entered into by the Administrator of General Services prior to the effective date of this subsection and pursuant to the notice published in the Federal Register on January 9, 1973, shall not be rendered invalid by virtue of the fact that fulfillment of such contract may be prohibited under section 9(a)(1)(F).

"(B) In the event that this paragraph is held invalid, the validity of the remainder of the Act, including the remainder of this subsection, shall not be affected.

"(7) Nothing in this subsection shall be construed to—

"(A) exonerate any person from any act committed in violation of paragraphs (1)(A), (1)(E), or (1)(F) of section 9(a) prior to the date of enactment of this subsection; or

"(B) immunize any person from prosecution for any such act.

"(g) In connection with any action alleging a violation of section 9, any person claiming the benefit of any exemption or permit under this Act shall have the burden of proving that the exemption or permit is applicable, has been granted, and was valid and in force at the time of the alleged violation.".

Sec. 3. Section 10 of the Endangered Species Act of 1973 (16 U.S.C. 1539) is further amended—

(1) by striking out "subsection" in the first sentence of subsection (c) thereof and inserting in lieu thereof "section"; and

Waiver.

(2) by striking out the period at the end of the second sentence of subsection (c) thereof and inserting in lieu thereof the following: "; except that such thirty-day period may be waived by

the Secretary in an emergency situation where the health or life of an endangered animal is threatened and no reasonable alternative is available to the applicant, but notice of any such waiver shall be published by the Secretary in the Federal Register within ten days following the issuance of the exemption or permit.".

Notice, publication in Federal Register.

Enforcement.

SEC. 4. Section 11(e)(3) of the Endangered Species Act of 1973 (16 U.S.C. 1540(e)(3)) is amended—

(1) by inserting immediately before the words "execute and serve any arrest warrant," in the second sentence thereof the following: "make arrests without a warrant for any violation of this Act if he has reasonable grounds to believe that the person to be arrested is committing the violation in his presence or view, and may"; and

(2) by striking out the period at the end thereof and inserting in lieu thereof the following: ", but upon forfeiture of any such property to the United States, or the abandonment or waiver of any claim to any such property, it shall be disposed of (other than by sale to the general public) by the Secretary in such a manner, consistent with the purposes of this Act, as the Secretary shall by regulation prescribe.".

SEC. 5. Paragraph (1) of section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532(1)) is amended by striking the period and inserting in lieu thereof ": *Provided, however*, That it does not include exhibition of commodities by museums or similar cultural or historical organizations.".

Approved July 12, 1976.

June 24, Senate agreed to House amendment with amendments.
June 29, House concurred in Senate amendments.

94TH CONGRESS
1ST SESSION

H. R. 10229

IN THE HOUSE OF REPRESENTATIVES

OCTOBER 20, 1975

Mrs. SULLIVAN (for herself and Mr. ZEFERETTI) introduced the following bill; which was referred to the Committee on Merchant Marine and Fisheries

---

A BILL

To amend the Endangered Species Act of 1973.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Endangered Species Act of 1973 (87 Stat. 884; 16 U.S.C. 1531–1543) is amended as follows:

(a) Section 4(f)(2)(B)(ii) (87 Stat. 889) is amended by striking ", (B), and (C)" after "subsection (b)(A)".

(b) Section 10(b) (87 Stat. 896) is amended by adding new paragraphs (4), (5), and (6) as follows:

"(4) The Secretary may grant to any person subject to the jurisdiction of the United States, under such terms and conditions as he may prescribe, exemptions to the prohibitions on exportation in section 9(a)(1)(A) and to the prohibitions in sections 9(a)(1)(E) and (F) for stocks or inventories of parts or products of endangered species lawfully held within the United States on December 28, 1973, in the course of a commercial activity: *Provided*, That such an exemption shall not violate the Convention or other provisions of law: *Provided further*, That such an exemption may apply to such length of time as the Secretary may determine.

"(5) The Secretary may grant to any person subject to the jurisdiction of the United States, under such terms and conditions as he may prescribe, exemptions to the prohibitions in section 9(a)(1)(A), (E), and (F) for live endangered species of fish or wildlife lawfully held in captivity in the United States on December 28, 1973: *Provided*, That such exemption shall not violate the Convention or any other provisions of law: *Provided further*, That such an exemption may apply to such length of time as the Secretary may determine.

"(6)(A) Any such exemption may be granted under subparagraphs (4) and (5) of this subsection by such Secretary upon such terms and conditions as he shall prescribe, which may include, but are not limited to, requiring such persons to register inventories within a time certain to be set by the Secretary; to maintain complete sales records and such other documents and materials as the Secretary may prescribe; to permit duly authorized agents of such Secretary to inspect any such inventories and records; and to prepare and submit to such Secretary any reports requested by him: *Provided*, That if the Secretary requires such inventories under this subsection, he shall only grant an exemption pursuant to subparagraphs (4) and (5) for the holdings reported in such inventories: *Provided further*, That no regulations issued under this subsection shall be subject to the provisions of section 4(f)(2)(A)(i).

"(B) With respect to any act prohibited by section 9(a)(1)(A), (E), and (F) for live endangered species of fish or wildlife, or for stocks or inventories of parts or products of endangered species, there shall be a rebuttable presumption that the live endangered species of fish or wildlife, or the stocks or inventories of parts or products of endangered species involved in such act was not lawfully held within the United States on December 28, 1973.".

(c) Section 10(c) (87 Stat. 896) is amended by—

(1) striking the word "subsection" in the first sen-

tence and inserting in lieu thereof the word "section", and

(2) striking the period at the end of the second sentence and inserting in lieu thereof ", except that the thirty-day period may be waived by the Secretary in an emergency situation where the health or life of an endangered animal is threatened, and no reasonable alternative is available to the applicant. Notice of any emergency waivers granted pursuant to this subsection must be published in the Federal Register within ten days following the issuance of the permit".

(d) Section 11 (e) (3) (87 Stat. 899) is amended by—

(1) adding "make arrests without a warrant for any violation of this Act if they have reasonable grounds to believe that the person to be arrested is committing the violation in his presence or view, and" before the words "execute and serve any arrest warrant,"; and

(2) striking the period at the end of the subsection and inserting in lieu thereof "; upon forfeiture, or waiver, of any such property to the United States, it shall be disposed of by the Secretary in such a manner, consistent with the purposes of this Act, as the Secretary deems appropriate".

94TH CONGRESS } HOUSE OF REPRESENTATIVES { REPORT
2d Session } { No. 94–823

ENDANGERED SPECIES ACT AMENDMENTS

FEBRUARY 11, 1976.—Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

---

Mrs. SULLIVAN, from the Committee on Merchant Marine and Fisheries, submitted the following

REPORT

[To accompany H.R. 10229]

The Committee on Merchant Marine and Fisheries, to whom was referred the bill (H.R. 10229) to amend the Endangered Species Act of 1973, having considered the same, report favorably thereon with amendments and recommend that the bill as amended do pass.

The amendments are as follows:

Strike out all after the enacting clause and insert the following:

That section 4(f)(2)(B)(ii) of the Endangered Species Act of 1973 (16 U.S.C. 1533(f)(2)(B)(ii)) is amended by striking out "subsection (b)(A), (B), and (C)" and inserting in lieu thereof "subsection (b)(1)(A)".

SEC. 2. Section 10 of the Endangered Species Act of 1973 (16 U.S.C. 1539) is amended by adding at the end thereof the following new subsections:

"(f)(1) As used in this subsection—

"(A) The term 'pre-Act endangered species part' means—

"(i) any sperm whale oil which was lawfully held within the United States on December 28, 1973, in the course of a commercial activity; or

"(ii) any finished scrimshaw product, if such product or the raw material for such product was lawfully held within the United States on December 28, 1973, in the course of a commercial activity.

"(B) The term 'scrimshaw product' means any art form which involves the etching or engraving of designs upon, or the carving of figures, patterns, or designs from, any bone or tooth of any marine mammal of the order Cetacea.

"(2) The Secretary, pursuant to the provisions of this subsection, may exempt, if such exemption is not in violation of the Convention, any pre-Act endangered species part from one or more of the following prohibitions:

"(A) The prohibition on exportation from the United States set forth in section 9(a)(1)(A) of this Act.

"(B) Any prohibition set forth in section 9(a)(1)(E) or (F) of this Act.

"(3) Any person seeking an exemption described in paragraph (2) of this subsection shall make application therefor to the Secretary in such form and manner as he shall prescribe, but no such application may be considered by the Secretary unless the application—

"(A) is received by the Secretary before the close of the one year period beginning on the date on which regulations promulgated by the Secretary to carry out this subsection first take effect;

"(B) contains a complete and detailed inventory of all pre-Act endangered species parts for which the applicant seeks exemption;

"(C) is accompanied by such documentation as the Secretary may require to prove that any endangered species part or product claimed by the applicant to be a pre-Act endangered species part is in fact such a part; and

"(D) contains such other information as the Secretary deems necessary and appropriate to carry out the purposes of this subsection.

"(4) If the Secretary approves any application for exemption made under this subsection, he shall issue to the applicant a certificate of exemption which shall specify—

"(A) any prohibition in section 9(a) of this Act which is exempted;

"(B) the pre-Act endangered species parts to which the exemption applies;

"(C) the period of time during which the exemption is in effect, but no exemption made under this subsection shall have force and effect after the close of the 3-year period beginning on the date of issuance of the certificate; and

"(D) any term or condition prescribed pursuant to paragraph (5)(A) or (B), or both, which the Secretary deems necessary or appropriate.

"(5) The Secretary shall prescribe such regulations as he deems necessary and appropriate to carry out the purposes of this subsection. Such regulations may set forth—

"(A) terms and conditions which may be imposed on applicants for exemptions under this subsection (including, but not limited to, requirements that applicants register inventories, keep complete sales records, permit duly authorized agents of the Secretary to inspect such inventories and records, and periodically file appropriate reports with the Secretary); and

"(B) terms and conditions which may be imposed on any subsequent purchaser of any pre-Act endangered species part covered by an exemption granted under this subsection.

to ensure that any such part so exempted is adequately accounted for and not disposed contrary to the provisions of this Act. No regulation prescribed by the Secretary to carry out the purposes of this subsection shall be subject to section 4(f)(2)(A)(i) of this Act.

"(g) In connection with any action alleging a violation of section 9, any person claiming the benefit of any exemption or permit under this Act shall have the burden of proving that the exemption or permit is applicable, has been granted, and was valid and in force at the time of the alleged violation."

SEC. 3. Section 10 of the Endangered Species Act of 1973 (16 U.S.C. 1539) is further amended—

(1) by striking out "subsection" in the first sentence of subsection (c) thereof and inserting in lieu thereof "section"; and

(2) by striking out the period at end of the second sentence of subsection (c) thereof and inserting in lieu thereof the following: "; except that such 30-day period may be waived by the Secretary in an emergency situation where the health or life of an endangered animal is threatened and no reasonable alternative is available to the applicant, but notice of any such waiver shall be published by the Secretary in the Federal Register within 10 days following the issuance of the exemption or permit."

SEC. 4. Section 11(e)(3) of the Endangered Species Act of 1973 (16 U.S.C. 1540(e)(3)) is amended—

(1) by inserting immediately before the words "execute and serve any arrest warrant," in the second sentence thereof the following: "make arrests without a warrant for any violation of this Act if he has reasonable grounds to believe that the person to be arrested is committing the violation in his presence or view, and may"; and

(2) by striking out the period at the end thereof and inserting in lieu thereof the following: ", but upon forfeiture of any such property to the United States, or the abandonment or waiver of any claim to any such property, it shall be disposed of (other than by sale to the general public) by the Secretary in such a manner, consistent with the purposes of this Act, as the Secretary shall by regulation prescribe."

SEC. 5. Paragraph (1) of section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532(1)) is amended by striking the period and inserting in lieu thereof ", provided, however, that it does not include exhibition of commodities by museums or similar cultural or historical organizations."

Amend the title to read as follows:

A bill to amend the Endangered Species Act of 1973 in order to permit the disposal of certain endangered species products and parts lawfully held within the United States on the effective date of such Act.

PURPOSE OF THE LEGISLATION

The purpose of the legislation is to improve management of the Endangered Species Act of 1973 and to allow for the limited disposal of pre-Act, legally-obtained endangered species parts and products.

More specifically, the bill makes a number of minor changes to clarify certain ambiguities, avoid lapses of coverage, and unnecessary administrative burdens, and to create greater consistency with other similar conservation legislation, the Marine Mammal Protection Act of 1972.

LEGISLATIVE BACKGROUND

The enactment of the Endangered Species Act of 1973, significantly strengthened the existing law to protect species which are endangered or becoming endangered. Further, it set strict prohibitions on the import and export and interstate sale of endangered species parts or products. The Act did not restrict the intrastate sales of endangered species parts and products.

During the implementation and administration of the Act, the Departments of Interior and Commerce have gained considerable experience and have recognized certain problems in working with statutory provisions.

Therefore, on October 1, 1975, the two Departments submitted by Executive Communication amendments to the Act to clarify and remedy the problem areas. These amendments were the general subject of discussion during oversight hearings which were held by the Subcommittee on Fisheries and Wildlife Conservation and the Environment on October 1, 2, and 6, 1975. Earlier, the Subcommittee had held hearings on several bills which amended the Act to provide for specific exemptions for pre-Act, legally obtained scrimshaw (H.R. 2057) and whale oil (H.R. 3456) from the prohibitions of the Act. These bills were held in abeyance until completion of the oversight hearings, at which time the discussion centered on whether specific or general exemption should be granted.

On October 20, 1975, the Administration amendments were introduced in the form of H.R. 10229. Inasmuch as the substance of the bill had been considered during five days of previous hearings, the Subcommittee considered the bill in open markup on November 6 and 7, whereafter it was reported to the Full Committee with amendments. The Full Committee held an open mark-up session on February 4, 1976, and ordered the bill reported with one additional amendment to the Subcommittee's amended version.

BACKGROUND AND NEED FOR THE LEGISLATION

In 1973 Congress passed the Endangered Species Act of 1973 which strengthened its 1969 predecessor by prohibiting not only the importation but also the sale of endangered species and their parts and products in interstate and foreign commerce. The Endangered Species Act, however, contained no retroactive exemptions for the interstate sale of parts and products of endangered marine mammals which were legally held under the Marine Mammal Protection Act of 1972. As a result of this inconsistency between the two laws, a severe economic hardship was inflicted upon those individuals who were engaged in legitimate commercial activities and who were holding large inventories prior to the passage of the Act. Considerable testimony was presented to the Subcommittee during hearings which highlighted this problem with respect to scrimshaw and whale oil. Although the Committee felt that the commercial demand for endangered species should be eliminated and that the U.S. should take the lead by curtailing the demand of its citizens, at the same time the Committee felt that relief should be granted in these two instances.

In the case of scrimshaw, the Committee was concerned not only with the economic hardship caused by the Act but also with the preservation of the art of scrimshaw which was originated during the Nation's early years by New England whalers. These men etched designs in and carved figures from whale bone and teeth as a means of passing time during the long months spent away from home on whaling expeditions. As the Nation grew and expanded westward, the popularity of scrimshaw grew as well and today the artists practice throughout the country in New England and in areas such as the Pacific Northwest, the Southwest, Alaska and Hawaii. Today's artisans, in addition to practicing scrimshaw as it was originated in New England, have adapted the art and developed new innovations which reflect the heritage of other sections of the Nation and which are not restricted to nautical motifs.

Due to the prohibitions in the Endangered Species Act of 1973, many scrimshanders were forced to abandon their profession because the interstate market, which accounted for 85 to 95 percent of their sales, was now closed to them. Unable to dispose of their legally acquired stocks and unable to sell new scrimshaw except in intrastate commerce, these individuals turned to other professions. Although other media such as beef bone could be legally utilized, most artisans have not had sufficient time to adapt their craft to other materials. Thus, to permit these individuals to dispose of their legally acquired stocks and to assure the preservation of the art of scrimshaw, the Committee has established a special exemption from the Endangered Species Act for scrimshaw.

In respect to sperm whale oil, the legislation would permit the General Services Administration (GSA) to dispose of its stockpile of 14,739,520 pounds. This oil, which is derived from the endangered sperm whale and which is used primarily as a lubricant, was acquired between January, 1948, and June 1952, pursuant to the Strategic and Critical Materials Stockpiling Act. However, in late 1972 the Interdepartmental Materials Advisory Committee determined that sufficient substitutes existed for sperm oil and that it should not be considered a strategic material. This decision was concurred in by the Department of Defense.

At the time the stockpile was declared surplus to the Nation's needs, GSA had 23,400,000 pounds of oil in storage. Although some 8.7 million pounds have been disposed of, the prohibitions contained in the

Endangered Species Act have prevented GSA from contracting for further sale of the remainder.

The annual cost of storing this material is $38,568 per year and the total cost of storage since the oil was declared surplus has been $77,136. It is expected that the Government would realize a profit of approximately $2.7 million from the sale of the sperm whale oil. To eliminate this burden on the taxpayers and to permit persons who are now holding legally acquired stocks of sperm oil to dispose of that oil, the Committee in H.R. 10229 has provided a special exemption for the sale of this oil.

The additional sections of the bill were considered to be "housekeeping" changes required for effective management of the endangered species program.

Section-by-Section Analysis

Section 1 amends section 4(f)(2)(B)(ii) of the Act to waive the requirement that each state be allowed 90 days to submit its comments and recommendations on any regulations issued by the Secretary of the Interior or the Secretary of Commerce in regard to an emergency posing a significant risk to the well-being of any endangered or threatened species. As presently written, the Endangered Species Act mandates this 90-day delay before the emergency regulations may become effective. It seemed to the Committee that a 90-day comment period was incongruous with the need for prompt action in emergency situations. It should be noted, however, that the Committee left untouched that section of the Act which limits the duration of the emergency regulations to 120 days.

Section 2 amends the Endangered Species Act by adding new subsections (f) and (g) at the end of section 10. The new subsection (f) establishes a mechanism for granting exemptions under the Act for certain pre-act endangered species parts.

Subsection (f)(1)(A) defines for the purposes of this subsection the term "pre-act endangered species part" to mean 1) any sperm whale oil which was lawfully held in the United States on December 20, 1973, the effective date of the Endangered Species Act; and 2) any finished scrimshaw product or the raw material for such product, if such product or the raw material was lawfully held in the United States on December 20, 1973.

Subsection (f)(1)(B) further defines scrimshaw product to mean any art form which involves the etching or designs upon or the carving of figures, patterns, or designs from any bone or tooth from any mammal from the order Cetacea.

Subsection (f)(2) authorizing the Secretary of Commerce, who pursuant to the Act has management responsibility for scrimshaw and sperm whale oil, to grant an exemption for the exportation from the United States and for the interstate sale of legally-held scrimshaw and sperm whale oil.

Subsection (f)(3) directs that any person seeking an exemption shall apply to the Secretary, however, no such application may be considered unless the application is received within one year, contains a complete and detailed inventory of all pre-act endangered species parts for which the applicant seeks an exemption, is accompanied by appropriate documentation to prove that the parts were legally held on December 20, 1973, and contains such other information as the Secretary may require.

Subsection (f)(4) requires that any certificate of exemption issued by the Secretary shall specify the specific actions authorized by the permit, the parts and products to which the exemption applies, and the duration of the permit provided; however, that no permit may remain in effect for more than three years after issuance and any term or condition promulgated pursuant to section (f)(5) as the Secretary deems appropriate.

Subsection (f)(5) authorizes the Secretary to prescribe such regulations as he deems appropriate. Such regulations may set forth requirements that applicants register inventories, keep complete sales records, permit the inspection of such inventories and records, and file periodic reports with the Secretary. The Secretary may also impose conditions on any subsequent purchasers of any pre-act endangered species part covered by an exemption to insure that any such part is not disposed of contrary to the provisions of the Endangered Species Act.

Subsection (g), also added by section 2, provided for an affirmative defense where a prima facie violation of the Act is established whereby the holder must show that the permit or exemption is applicable, has been granted, and is valid and in force. A similar provision is found in the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 USC 855(b)) and the Act Prohibiting Foreign Fishing Vessels in the Territorial Waters of the United States (Bartlett Act) (16 USC 1082), and has been upheld in the Federal Court of Appeals.

Section 3(1) amends section 10(c) of the Endangered Species Act to clarify that notice of review of permit applications applies to the entire section 10 and not just subsection (c).

Section 3(2) makes a technical change in the Act by adding a new sentence to section 10(c) which provides that the 30-day comment period which must precede the issuance of any permit or exemption under the Act may be waived in an emergency situation where the health or life of an endangered animal was threatened and where no reasonable alternative is available to the applicant.

While the 30-day comment period has caused a lengthening of the time required to issue permits, it has apparently been generally accepted. However, there have been occasions during the past year where the health or life of an animal on the endangered species list has been threatened because of the lack of ability to waive the strict 30-day notice requirement.

The emergency waiver would not be available for the convenience of the applicant, or even to avoid serious economic loss to the applicant. It would be available only to protect the health or life of the endangered animal itself. The applicant would have to make a showing that no reasonable alternative was available. It should be noted, however, that an alternative would be considered reasonable even if it involved substantial economic loss to the applicant.

Section 4(1) amends section 11(e)(3) of the Act to permit duly authorized enforcement agents to make arrests without a warrant if the agent has reasonable grounds to believe that the person can be arrested for committing a violation in his presence or review. This authority was in the Endangered Species Conservation Act of 1969, is found in all other wildlife legislation, and was in the bills which were the basis of this Act. It appears to have been inadvertently omitted in the drafting process. It is a traditional law enforcement authority, and is necessary in the proper enforcement of this Act with its broad scope of prohibitions.

Section 4(2) further amends section 11(e)(3) of the Act to authorize the disposal other than by general sale to the public of any endangered species, parts, or products which have been forfeited to and stored by the government, thus sparing the taxpayers another unnecessary storage cost. Without these amendments the government lacks the authority to dispose of the forfeited items. The legislation makes it clear, however, that these items may not be disposed of by sale to the general public, thereby reducing the enforcement burden upon the Departments of Commerce and Interior and reducing the likelihood of the introduction of smuggled products into this Nation.

Finally, Section 5 would exclude from the definition of "commercial activity" in section 3 of the Act the exhibition of commodities by museums or smaller cultural or historical organizations. The effect of this amendment is to allow the interstate exchange of displays between such organizations without violating the Act.

COST OF THE LEGISLATION

The Committee estimates that no additional costs would be incurred in carrying out H.R. 10229, as amended, in the current fiscal year or in any of the years following this fiscal year.

COMPLIANCE WITH HOUSE RULE XI

(1) With respect to the requirements of cause 2(l)(3)(A) of Rule XI, of the Rules of the House of Representatives, three days of oversight hearings were held on the subject matter of this legislation in October 1975. Some 34 witnesses were heard by the Subcommittee on Fisheries and Wildlife Conservation and the Environment.

(2) With respect to the requirements of clauses 2(l)(3)(B) and (C), of Rule XI of the Rules, the bill does not provide new budget authority or increased tax expenditures, and it has received no estimate and comparison prepared by the Director of the Congressional Budget Office. Consequently, no such information is supplied to meet these requirements.

(3) With respect to the requirements of clause (2)(l)(3)(D), of Rule XI of the Rules, the Committee has received no report from the Committee on Government Operations on this subject.

(4) The Committee reports that enactment of H.R. 10229, as amended, would have no inflationary impact on prices and costs in the operation of the national economy.

DEPARTMENT REPORTS

The Department of the Interior transmitted to the Congress, as Executive Communication No. 1815, draft legislation which became

H.R. 10229 when introduced. This Executive Communication along with reports received from the Departments of the Interior, Commerce and State follow herewith:

[Ex. Comm. No. 1815]

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., September 30, 1975.

Hon. CARL B. ALBERT,
Speaker of the House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Transmitted herewith are the Department of the Interior's proposed amendments to the Endangered Species Act of 1973 (P.L. 93–205; 87 Stat. 884).

We recommend that this proposal be referred to the appropriate Committee and that it be enacted.

The Endangered Species Act of 1973 provided new and stronger authority for the Secretary of the Interior (and the Secretary of Commerce) to prevent the extinction of plants and animals. That authority included a broader responsibility to list species that are subject to provisions of the Act and also strengthen the Secretary's ability to protect and manage listed species.

The goal of the endangered species program is to maintain a healthy diversity of species and to preserve in their natural ecosystem species that are endangered with extinction or threatened with endangerment. Wherever possible the program seeks to restore such species to the point at which it is once again a viable component of its ecosystem. Further, insofar as possible, it is intended to prevent other species from becoming endangered or threatened.

Since enactment of the 1973 Endangered Species Act, we have become aware of a number of problems; certain provisions need clarification or modification to expedite management and to insure equity to those individuals impacted by the Act.

Enclosure: The draft bill is now H.R. 10229 as introduced.

Of great concern to the Department of the Interior is the situation where individuals legally possessed, prior to enactment of the 1973 Act, parts or products of endangered species for the purpose of sale or for other activities of a commercial nature. A similar situation exists with respect to live animals. For example, prior to enactment of the 1973 Endangered Species Act, zoos and circuses and various other types of live animal dealers regularly engaged in the sale and interstate transport of surplus or unneeded animals which were Federally listed as endangered. The Endangered Species Act of 1969 did not prohibit such commercial activity, but prohibited only the importation of species listed as endangered. With passage of the 1973 Act, such commercial activity was prohibited.

This Department fully supported this prohibition so as to reduce the demand for certain animals whose continued existence was, and is, in jeopardy. However, we recognize that such a prohibition has also caused economic hardship on many individuals who were engaged in legitimate commercial activities prior to passage of the 1973 Act.

It is our judgment that the commercial demand for endangered animals should be reduced, and the United States should take the lead by reducing the demand of its citizens. However, we believe that a gradual reduction of this demand would create less severe economic hardship for many legitimate commercial enterprises.

The amendments proposed in subsection (b) of the proposed legislation would resolve the problems with respect to live animals and their parts or products of endangered species. The remaining proposed amendments would: (1) eliminate the 90 day comment period in issuance of emergency regulations. Such regulations cease to be in effect after 120 days unless the standard regulatory procedure is applied. As provided for in the current law, such regulations may be promulgated only in the case of an "emergency posing a significant risk to the well being of any species of fish or wildlife" and only if the Secretary publishes in the Federal Register the "detailed reasons why such regulation is necessary;" (2) clarify that notice of review of permit applications applies to the entire section 10, not just subsection (c); (3) waive the 30 day notice requirement in issuance of a permit where the health or life of an animal on the endangered species list is threatened; (4) authorize law enforcement personnel to arrest, without a warrant, persons committing violations in their presence or view; and (5) provide the Secretary with authority to dispose of forfeited property.

We urge enactment of this proposed legislation in order to assure the efficient administration of the Endangered Species Act of 1973.

The Office of Management and Budget has advised that there is no objection to the presentation of this draft bill from the standpoint of the Administration's program.

Sincerely yours,

NATHANIEL P. REED,
Assistant Secretary of the Interior.

GENERAL COUNSEL OF THE DEPARTMENT OF COMMERCE,
Washington, D.C., November 18, 1975.

Hon. ROBERT L. LEGGETT,
Chairman, Fisheries and Wildlife Conservation and the Environment Subcommittee, Merchant Marine and Fisheries Committee, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to the urgent request of Subcommittee counsel for the views of the Department of Commerce on the Subcommittee amendments to H.R. 10229, a bill "To amend the Endangered Species Act of 1973."

H.R. 10229 is an Administration bill that was developed jointly by the Department of Commerce and the Department of the Interior. While H.R. 10229 and the amendment each aim to improve management and promote equitable treatment for certain individuals affected by the Endangered Species Act, the relief provided in the amended version is unduly circumscribed. For that reason, we recommend adoption of the original bill.

The Subcommittee amendment would require submission of applications for exemptions within a year after regulations are promulgated to put the amendments into effect. In addition, the exemptions granted under the amended bill would expire three years after the granting of an exemption. H.R. 10229 as introduced contains no such restrictions but would provide the Secretary discretion to limit the life of any exemption as appropriate. An arbitrary statute limitation may lead to inequitable administration. Furthermore, the amendment appears to contemplate the filing of applications for exemptions and the granting of certificates of exemption on a case-by-case basis. Such a process will undoubtedly increase the costs of administration and involve processing delays. Accordingly, we recommend adoption of the exemption procedures contemplated in H.R. 10229 as introduced. They are both fair and easy to administer.

The exemption granted by H.R. 10229 would apply to all parts and products of endangered species lawfully held in stock within the United States on December 28, 1973. The amendment would restrict the exemption to sperm whale oil (which includes spermaceti) and scrimshaw lawfully held within the United States on December 28, 1973, thereby removing the availability of the exemption from persons holding parts or products of endangered species other than those specified. The benefits of the exemption would be available to scrimshanders holding stocks or carved scrimshaw, but scrimshanders could not purchase raw materials for carving from suppliers having stock on hand. Indeed, the wording of the provision casts doubt on the ability of scrimshanders to carve and sell ivory that was in their possession as uncarved stock on December 28, 1973. We urge that the provision be expanded to encompass the exemptions included in H.R. 10229 as originally introduced.

The provision found in the original bill creating a rebuttable presumption that items were not lawfully held within the United States on the effective date of the Endangered Species Act is replaced in the amendment by a provision that any person claiming the benefit of an exemption would have the burden of proving its applicability, existence, and validity. We understand that the intent of both provisions is similar and is designed to ensure that in order to prove an offense under the Act, the Government is not required to prove that no exemption applies and that no permit was granted under the Act.

We note that the parenthetical phrase added to § 11(e)(3) of the Act by the amendment permits disposition of forfeited or abandoned property by the Secretary in a manner consistent with the purposes of the Act but specifically precludes sale to the general public. We believe the discretion of the Secretary is sufficiently circumscribed by requiring disposition consistent with the purposes of the Act, and we find no reason for precluding public sale by statute.

Finally, we note what we believe may be an oversight in the final line of page 5 of the amendment which refers to "section 4(f)(2)(A)(i)." We believe that the reference should be more appropriately "section 4(f)(2)(A)." Such a change would make the amendment consistent with the change of the word "subsection" in section 10(c) of the Act to "section."

The remaining provisions of the amendments are either identical to or closely parallel those contained in H.R. 10229.

We have been advised by the Office of Management and Budget that there would be no objection to the submission of our report to the Congress from the standpoint of the Administration's program.

Sincerely,

ROBERT B. ELLERT,
Acting General Counsel.

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., November 18, 1975.

Hon. LEONOR K. SULLIVAN,
Chairman, Merchant Marine and Fisheries Committee, House of Representatives, Washington, D.C.

DEAR MRS. SULLIVAN: This is in response to your request for our views on H.R. 10229 as reported with amendments by the Subcommittee on Fisheries and Wildlife Conservation and the Environment.

We oppose enactment of section 2 as amended to exempt from certain prohibited acts of the 1973 Endangered Species Act sperm whale oil and scrimshaw lawfully held in the course of a commercial activity prior to December 28, 1973.

We see no justifiable reason for providing an exemption for certain whale parts or products and not for other whale parts or products such as ambergris. Further, we see no justifiable reason for singling out dealers in whale oil and scrimshaw from dealers in other endangered animals or their parts or products likewise impacted by the 1973 Endangered Species Act.

There are individuals who legally possessed, prior to enactment of the 1973 Act, live endangered species and parts or products of endangered species for the purpose of sale or for other activities of a commercial nature. The Endangered Species Act of 1969 prohibited only the importation of species listed as endangered. Sale, interstate transport, export and other activities of a commercial nature were not prohibited. With passage of the 1973 Act such activity became illegal.

Tortoise, spotted cat and reptilian products exist in this country in commercial quantities, and we have some indication of commercial stocks in other endangered species parts or products lawfully acquired prior to the 1973 Act. Regardless of the extent or volume, the individuals in possession of such items should have the same opportunities as those in possession of scrimshaw or whale oil. Indeed, we question the constitutionality of the Subcommittee's amendment discriminating between two different classes of people essentially in the same situation without some rationale for the distinction.

We urge reconsideration of this action by the full Committee. The amendments proposed by the Administration and introduced by you and Congressman Zeferetti on October 20, 1975, would provide equitable treatment to all individuals lawfully possessing for commercial purposes pre-Act live endangered species or parts or products of such species.

We have no objections to the enactment of sections 1, 3 and 4 of the Subcommittee's reported bill. We note that the provisions contained in these sections are either similar or identical to sections (b), (c) and (d) of H.R. 10229 as introduced.

We hope these comments will be of value to you in consideration of this legislation by the full committee.

Sincerely yours,

DOUGLAS P. WHEELER,
Deputy Assistant Secretary for Fish and Wildlife Parks.

DEPARTMENT OF STATE,
Washington, D.C., January 30, 1976.

Hon. LEONOR K. SULLIVAN,
Chairman, Committee on Merchant Marine and Fisheries, House of Representatives, Washington, D.C.

DEAR MADAM CHAIRMAN: This is in response to your communication of October 23, 1975, regarding the views of the Department of State on H.R. 10229, a bill "to amend the Endangered Species Act of 1973." H.R. 10229 would permit certain waivers of the provisions of the Endangered Species Act with regard to endangered species or their parts of products lawfully held on December 28, 1973, provided that such waivers are consistent with U.S. obligations under the Convention on International Trade in Endangered Species of Wild Flora and Fauna (The Convention).

We understand that H.R. 10229 is not intended to alter or supersede any international legal obligations arising under the Convention. In this regard, we note the provisos in proposed subparagraphs 10(b)(4) and (5) that any exemptions granted pursuant to these provisions "shall not violate the Convention." Thus, a transaction otherwise eligible for an exemption under subparagraph 4 or 5 would not be so eligible if it was otherwise prohibited by the Convention. In such a case, if an exemption under Article VII of the Convention was not obtainable, then the provisions of the Convention regulating trade in specimens of that species would govern.

Other aspects of this legislation relate essentially to domsetic matters which are outside the responsibilities of this Department. Accordingly, we defer to the views of other interested agencies regarding the desirability of its adoption.

The Office of Management and Budget advises that from the standpoint of the Administration's program, there is no objection to the submission of this report.

Sincerely,

ROBERT J. MCCLOSKEY,
Assistant Secretary for Congressional Relations.

CHANGES IN EXISTING LAW

In compliance with clause 3 of rule XIII of the Rules of the House of Representatives, as amended, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

ENDANGERED SPECIES ACT OF 1973

(87 Stat. 884; Public Law 93-205)

* * * * * * *

Sec. 3. For the purposes of this Act—

(1) The term "commercial activity" means all activities of industry and trade, including, but not limited to, the buying or selling of commodities and activities conducted for the purpose of facilitating such buying and selling[.] *; provided, however, that it does not include exhibition of commodities by museums or similar cultural or historical organizations.*

* * * * * * *

Sec. 4. (a) General.—(1) The Secretary shall by regulation determine whether any species is an endangered species or a threatened species because of any of the following factors:

* * * * * * *

(f) Regulations.—* * *

(2)(B) Neither subparagraph (A) of this paragraph nor section 553 of title 5, United States Code, shall apply in the case of any of the following regulations and any such regulation shall, at the discretion of the Secretary, take effect immediately upon publication of the regulation in the Federal Register:

* * * * * * *

(ii) Any regulation (including any regulation implementing section 6(g)(2)(B)(ii) of this Act) issued by the Secretary in regard to any emergency posing a significant risk to the wellbeing of any species of fish or wildlife, but only if (I) at the time of publication of the regulation in the Federal Register the Secretary publishes therein detailed reasons why such regulation is necessary, and (II) in the case such regulation applies to resident species of fish and wildlife, the requirements of [subsection (b) (A), (B), and (C)] *subsection (b)(1)(A)* of this section have been complied with. Any regulation promulgated under the authority of this clause (ii) shall cease to have force and effect at the close of the 120-day period following the date of publication unless, during such 120-day period, the rulemaking procedures which would apply to such regulation without regard to this subparagraph are complied with.

* * * * * * *

Sec. 10 * * *

(c) Notice and Review.—The Secretary shall publish notice in the Federal Register of each application for an exemption or permit which is made under this [subsection.] *section.* Each notice shall invite the submission from interested parties, within thirty days after the date of the notice, written data, views, or arguments with respect to the application[.] *; except that such 30-day period may be waived by the Secretary in an emergency situation where the health or life of an* *endangered animal is threatened and no reasonable alternative is available to the applicant, but notice of any such waiver shall be published by the Secretary in the Federal Register within 10 days following the issuance of the exemption or permit.* Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.

* * * * * * *

Sec. 10. (e) * * *

(4) Notwithstanding the provisions of paragraph (1) of this supsection, whenever the Secretary determines that any species of fish or wildlife which is subject to taking under the provisions of this subsection is an endangered species or threatened species, and that such taking materially and negatively affects the threatened or endangered species, he may prescribe regulations upon the taking of such species by any such Indian, Aleut, Eskimo, or non-Native Alaskan resident of an Alaskan native village. Such regulations may be established with reference to species, geographical description of the area included, the season for taking, or any other factors related to the reason for establishing such regulations and consistent with the policy of this Act. Such regulations shall be prescribed after a notice and hearings in the affected judicial districts of Alaska and as otherwise required by section 103 of the Marine Mammal Protection Act of 1972, and shall be removed as soon as the Secretary determines that the need for their impositions has disappeared.

(f) (1) As used in this subsection—

(A) The term "pre-Act endangered species part" means—

(i) any sperm whale oil which was lawfully held within the United States on December 28, 1973, in the course of a commercial activity; or

(ii) any finished scrimshaw product, if such product or the raw material for such product was lawfully held within the United States on December 28, 1973, in the course of a commercial activity.

(B) The term "scrimshaw product" means any art form which involves the etching or engraving of designs upon, or the carving of figures, patterns, or designs from, any bone or tooth of any marine mammal of the order Cetacea.

(2) The Secretary, pursuant to the provisions of this subsection, may exempt, if such exemption is not in violation of the Convention, any pre-Act endangered species part from one or more of the following prohibitions:

(A) The prohibition on exportation from the United States set forth in section 9(a)(1)(A) of this Act.

(B) Any prohibition set forth in section 8(a)(1)(E) or (F) of this Act.

(3) Any person seeking an exemption described in paragraph (2) of this subsection shall make application therefor to the Secretary in such form and manner as he shall prescribe, but no such application may be considered by the Secretary unless the application—

(A) is received by the Secretary before the close of the one year period beginning on the date on which regulations promulgated by the Secretary to carry out this subsection first take effect;

(B) contains a complete and detailed inventory of all pre-Act endangered species parts for which the applicant seeks exemption;

(C) is accompanied by such documentation as the Secretary may require to prove that any endangered species part or product claimed by the applicant to be a pre-Act endangered species part is in fact such a part; and

(D) contains such other information as the Secretary deems necessary and appropriate to carry out the purposes of this subsection.

(4) If the Secretary approves any application for exemption made under this subsection, he shall issue to the applicant a certificate of exemption which shall specify—

(A) any prohibition in section 9(a) of this Act which is exempted;

(B) the pre-Act endangered species parts to which the exemption applies;

(C) the period of time during which the exemption is in effect, but no exemption made under this subsection shall have force and effect after the close of the 3-year period beginning on the date of issuance of the certificate; and

(D) any term or condition prescribed pursuant to paragraph (5)(A) or (B), or both, which the Secretary deems necessary or appropriate.

(5) The Secretary shall prescribe such regulations as he deems necessary and appropriate to carry out the purposes of this subsection. Such regulations may set forth—

(A) terms and conditions which may be imposed on applicants for exemptions under this subsection (including, but not limited to, requirements that applicants register inventories, keep complete sales records, permit duly authorized agents of the Secretary to inspect such inventories and records, and periodically file appropriate reports with the Secretary); and

(B) terms and conditions which may be imposed on any subsequent purchaser of any pre-Act endangered species part covered by an exemption granted under this subsection;

to ensure that any such part so exempted is adequately accounted for and not disposed of contrary to the provisions of this Act. No regulation prescribed by the Secretary to carry out the purposes of this subsection shall be subject to section 4(f)(2)(A)(i) of this Act.

(g) In connection with any action alleging a violation of section 9, any person claiming the benefit of any exemption or permit under this Act shall have the burden of proving that the exemption or permit is applicable, has been granted, and was valid and in force at the time of the alleged violation.

SEC. 11. (e) * * *

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, to enforce this Act may detain for inspection and inspect any package, crate, or other container, including its contents, and all accompanying documents, upon importation or exportation. Such person may *make arrests without a warrant for any violation of this Act if he has reasonable grounds to believe that the person to be*

arrested is committing the violation in his presence or view, and may execute and serve any arrest warrant, search warrant, or other warrant or civil or criminal process issued by any officer or court of competent jurisdiction for enforcement of this Act[.] , *but upon forfeiture of any such property to the United States, or the abandonment or waiver of any claim to any such property, it shall be disposed of (other than by sale to the general public) by the Secretary in such a manner, consistent with the purposes of this Act, as the Secretary shall by regulation prescribe.* Such person so authorized may search and seize, with or without a warrant, as authorized by law. Any fish, wildlife, property, or item so seized shall be held by any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such fish, wildlife, property, or item pursuant to paragraph (4) of this subsection; except that the Secretary may, in lieu of holding such fish, wildlife, property, or item, permit the owner or consignee to post a bond or other surety satisfactory to the Secretary.

[From the Congressional Record, Feb. 17, 1976]

HOUSE CONSIDERATION AND PASSAGE OF S. 10229, AS AMENDED

ENDANGERED SPECIES ACT AMENDMENTS

Mrs. SULLIVAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 10229) to amend the Endangered Species Act of 1973, as amended.

The Clerk read as follows:

H.R. 10229

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4(f)(2)(B)(ii) of the Endangered Species Act of 1973 (16 U.S.C. 1533(f)(2)(B)(ii) is amended by striking out "subsection (b) (A), (B), and (C)" and inserting in lieu thereof "subsection (b)(1)(A)."

SEC. 2. Section 10 of the Endangered Species Act of 1973 (16 U.S.C. 1539) is amended by adding at the end thereof the following new subsections:

"(f)(1) As used in this subsection—

"(A) The term 'pre-Act endangered species part' means—

"(i) any sperm whale oil which was lawfully held within the United States on December 28, 1973, in the course of a commercial activity; or

"(ii) any finished scrimshaw product, if such product or the raw material for such product was lawfully held within the United States on December 28, 1973, in the course of a commercial activity.

"(B) The term 'scrimshaw product' means any art form which involves the etching or engraving of designs upon, or the carving of figures, patterns, or designs from, any bone or tooth of any marine mammal of the order Cetacea.

"(2) The Secretary, pursuant to the provisions of this subsection, may exempt, if such exemption is not in violation of the Convention, any pre-Act endangered species part from one or more of the following prohibitions:

"(A) The prohibition on exportation from the United States set forth in section 9(a)(1)(A) of this Act.

"(B) Any prohibition set forth in section 9(a)(1)(E) or (F) of this Act.

"(3) Any person seeking an exemption described in paragraph (2) of this subsection shall make application therefor to the Secretary in such form and manner as he shall prescribe, but no such application may be considered by the Secretary unless the application—

"(A) is received by the Secretary before the close of the one-year period beginning on the date on which regulations promulgated by the Secretary to carry out this subsection first take effect;

"(B) contains a complete and detailed inventory of all pre-Act endangered species parts for which the applicant seeks exemption;

"(C) is accompanied by such documentation as the Secretary may require to prove that any endangered species part or product claimed by the applicant to be a pre-Act endangered species part is in fact such a part; and

"(D) contains such other information as the Secretary deems necessary and appropriate to carry out the purposes of this subsection.

"(4) If the Secretary approves any application for exemption made under this subsection, he shall issue to the applicant a certificate of exemption which shall specify—

"(A) any prohibition in section 9(a) of this Act which is exempted;

"(B) the pre-Act endangered species parts to which the exemption applies;

"(C) the period of time during which the exemption is in effect, but no exemption made under this subsection shall have force and effect after the close of the three-year period beginning on the date of issuance of the certificate; and

"(D) any term or condition prescribed pursuant to paragraph (5) (A) or (B), or both, which the Secretary deems necessary or appropriate.

"(5) The Secretary shall prescribe such regulations as he deems necessary and appropriate to carry out the purposes of this subsection. Such regulations may set forth—

"(A) terms and conditions which may be imposed on applicants for exemptions under this subsection (including, but not limited to, requirements that applicants register inventories, keep complete sales records, permit duly authorized agents of the Secretary to inspect such inventories and records, and periodically file appropriate reports with the Secretary); and

"(B) terms and conditions which may be imposed on any subsequent purchaser of any pre-Act endangered species part covered by an exemption granted under this subsection; to insure that any such part so exempted as adequately accounted for and not disposed of contrary to the provisions of this Act. No regulation prescribed by the Secretary to carry out the purposes of this subsection shall be subject to section 4(f)(2)(A)(i) of this Act.

"(g) In connection with any action alleging a violation of section 9, any person claiming the benefit of any exemption or permit under this Act shall have the burden of proving that the exemption or permit is applicable, has been granted, and was valid and in force at the time of the alleged violation.".

SEC. 3. Section 10 of the Endangered Species Act of 1973 (16 U.S.C. 1539) is further amended—

(1) by striking out "subsection" in the first sentence of subsection (c) thereof and inserting in lieu thereof "section"; and

(2) by striking out the period at the end of the second sentence of subsection (c) thereof and inserting in lieu thereof the following: "; except that such thirty-day period may be waived by the Secretary in an emergency situation where the health or life of an endangered animal is threatened and no reasonable alternative is available to the applicant, but notice of any such waiver shall be published by the Secretary in the Federal Register within ten days following the issuance of the exemption or permit.".

SEC. 4. Section 11(e)(3) of the Endangered Species Act of 1973 (16 U.S.C. 1540(e)(3)) is amended—

(1) by inserting immediately before the words "execute and serve any arrest warrant," in the second sentence thereof the following: "make arrests without a warrant for any violation of this Act if he has reasonable grounds to believe that the person to be arrested is committing the violation in his presence or view, and may"; and

(2) by striking out the period at the end thereof and inserting in lieu thereof the following: ", but upon forfeiture of any such property to the United States, or the abandonment or waiver of any claim to any such property to the United States, or the abandonment or waiver of any claim to any such property, it shall be disposed of (other than by sale of the general public) by the Secretary in such a manner, consistent with the purposes of this Act, as the Secretary shall by regulation prescribe.".

SEC. 5. Paragraph (1) of section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532(i)) is amended by striking the period and inserting in lieu thereof ": *Provided, however*, That it does not include exhibition of commodities by museums or similar cultural or historical organizations.".

The SPEAKER pro tempore. Is a second demanded?

Mr. FORSYTHE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentlewoman from Missouri (Mrs. Sullivan) and the gentleman from New Jersey (Mr. Forsythe) will be recognized for 20 minutes each.

The Chair recognizes the gentlewoman from Missouri (Mrs. Sullivan).

Mrs. SULLIVAN. Mr. Speaker, H.R. 10229 embodies several amendments to the Endangered Species Act of 1973 which should be expeditiously enacted to assure the effective management of this important act.

The amendments contained in H.R. 10229 were the subject of extended committee consideration and discussion with both the Federal agencies and those affected by the act. This bill would modify and clarify certain troublesome language in the 1973 act and would assist the responsible agencies in enforcing its provisions. Similar conservation legislation, the Marine Mammal Protection Act of 1972, was passed to provide special protection for marine mammals throughout the world by removing the U.S. market for the parts and products of these mammals. This act prohibited the importation and sale in interstate and foreign commerce of such parts and products, although these prohibitions did not apply to marine mammals taken prior to December 21, 1972, the effective date of the act.

The Endangered Species Act of 1973, unlike the Marine Mammal Protection Act, contained no retroactive exemption for the interstate sale of parts and products of endangered marine mammals which were legally held under the 1972 act. This inconsistency has caused considerable trouble in the enforcement of the laws and has created financial hardships for scrimshanders and other artisans who deal in carved whale bone and teeth as well as those who held large inventories of sperm whale oil.

With respect to such whale oil and scrimshaw, H.R. 10229 would remedy this inconsistency between the two acts. It would provide limited but adequate exemptions for the disposal of these items without sacrificing the intent or diminishing the effectiveness of the 1973 Endangered Species Act.

Finally, H.R. 10229 makes several essential changes in the Endangered Species Act to provide for more flexibility in the interpretation of key provisions controlling the promulgation of emergency regulations in cases of where the health or life of endangered species is threatened; the disposal by the Government of species, parts, or products which have been forfeited to the United States; and the enforcement of the act's prohibitions. These technical amendments were recommended and are supported by the administration in order to remedy a number of problems which have emerged over the past several years in the course of administering the provisions of the act.

I urge the support of all Members to enact H.R. 10229.

Mr. Leggett. Mr. Speaker, as chairman of the subcommittee that heard this matter, I rise in support of H.R. 10229. This bill is essential to the equitable and effective management of the Endangered Species Act of 1973.

The phrase "extinct is forever" emphasizes the unique and serious nature of the problem facing the world's endangered species. Unlike some problems which can be remedied after a mistake is made, the extinction of a species is irreversible. The occurrence of such a loss is not merely aesthetic, but educational, scientific, economic, and perhaps even ethical.

Between the years 1600 and 1850, only five domestic species became extinct. By contrast, 57 such species became extinct since 1850. At present, the estimated annual rate of animal extinction is between one and two species. This fact led to the enactment of a series of laws to protect the welfare of endangered species. The most recent legislation was the Endangered Species Act of 1973.

I would like to explain the significance and effect of the Endangered Species Act amendments contained in H.R. 10229. The 1973 act strengthened its 1969 predecessor by prohibiting not only the importation but also the sale of endangered species and their parts or products in interstate and foreign commerce. In addition, it provided for the establishment of specified comment periods for the issuance of new regulations affecting the determination of management of endangered species.

These new provisions along with others created a strong and a nearly unheralded law for the protection of such species. As the provisions of the 1973 act have been implemented by the agencies and applied to existing conditions, certain ambiguities and incidental problems have surfaced which now require our legislative attention. H.R. 10229 is designed to address these perturbations and clarify the act.

The first amendment contained in H.R. 10229 relates to the situation where an emergency condition poses a significant risk to the wellbeing of an endangered species of fish or wildlife. Under the existing act, if the jeopardized species is a resident species, the Secretary of Interior cannot issue emergency regulations until: First, notice is published in the Federal Register; second, notification of the contemplated action is given to the Governor of each State within which such species is then known to exist; third, 90 days is allowed after notification for each such State to submit its comments and recommendations, unless such period is otherwise shortened by agreement between the parties; and fourth, a summary of all such comments and recommendations received by the Secretary is published in the Federal Register. This procedure albeit worthwhile in the ordinary course of business, is inappropriate and cumbersome in an emergency situation which demands prompt action. Therefore, the first amendment would relieve the Secretary from waiting the required 90 days for comments and recommendations and the publication of a summary in the Federal Register for resident species in those instances where an emergency exists. However, this amendment leaves untouched the procedural safeguard that limits the force and effect of any such emergency regulations to 120 days unless, within the 120 days, the exempted 90-day comment period and required publications are complied with.

The second amendment in H.R. 10229 would allow a limited exemption to the prohibitions contained in the Endangered Species Act for certain endangered species parts or products which were legally obtained and held in the United States prior to its enactment on December 28, 1973. These exemptions apply only to sperm whale oil and to scrimshaw which is defined as the art form involving the carving or etching and engraving of designs upon the bone and teeth of marine mammals of the order Cetecea—Cē ta′ shēē a. As referred to earlier, the passage of the 1973 act, without the retroactive exemption similar to the one contained in the Marine Mammal Protection Act of 1972, caused severe economic hardship to those who heretofore could sell such pre-act endangered marine mammals parts or products in interstate or foreign commerce.

This amendment allows such exemptions, that is, the sale in interstate and foreign commerce or exportation so long as it does not violate the Convention on International Trade in Endangered Species of Wild Flora or Fauna. However, it also prescribes certain procedures and conditions which must be followed.

Any person seeking an exemption must make application to the Secretary before the close of the one 1-year period beginning on the date on which regulations promulgated by the Secretary first take effect: such application must contain a complete and detailed inventory of all preact endangered species parts for which the applicant seeks exemptions and must be accompanied by such documentation as the Secretary may require to prove that any endangered species part or product claimed by the applicant to be a preact endangered species part is in fact such a part.

Further, if the Secretary approves such an application, any certificate of exemption issued must detail the prohibition exempted, the preact endangered species parts to which the exemption applies, and the time period for such exemption which may in no case be longer than 3 years from the time of certification.

Finally, the Secretary shall prescribe such regulations as he deems necessary, including, but not limited to, terms and conditions which may be imposed on applicants for exemptions; requirements that applicants register inventories, keep complete sales records permit duly authorized agents of the Secretary to inspect such inventories and records, and periodically file appropriate reports with the Secretary. Further, terms and conditions may be imposed on any subsequent purchase of any preact endangered species part covered by any exemption granted to insure that any such part so exempted is adequately accounted for and not disposed of contrary to the provisions of this act.

I might note parenthetically that these conditions are more stringent than those set by the other body when it passed a similar amendment to the Endangered Species Act—S. 229—for a scrimshaw exemption.

The last subsection of this amendment provides an affirmative defense in connection with any action alleging a violation of the prohibition contained in section 9 of the act. In such a case, any person claiming the benefit of any exemption or permit has the burden of proving that the exemption or permit is applicable, has been granted, and was valid and in force at the time of the alleged violation—similar provisions are found in the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 885(b)) and in the act prohibiting foreign fishing vessels in the territorial waters of the United States.

Section 3(1) of H.R. 10229 is a technical amendment which clarifies the intent of the notice and review requirements to apply to all applications for an exemption or permit.

Section 3(2) of H.R. 10229 also applies to emergency situations, as discussed earlier where the health or life of an endangered species is threatened.

Under the existing provision, the Secretary must publish notice in the Federal Register of each application for an exemption or permit allowing 30 days for comments. The amendment would permit the Secretary to waive the 30-day comment period in emergency situations where no reasonable alternative is available to the applicant.

If the Secretary should waive the 30-day comment period, he must publish notice of such waiver within 10 days following the issuance of any emergency exemption or permit. It should be noted that this emergency waiver is not intended for the mere convenience of an applicant, or even to avoid serious economic loss.

Section 4(1) of H.R. 10229 amends the act to permit duly authorized enforcement agents to make arrests without a warrant if the agent has reasonable grounds to believe that the person to be arrested is committing the violation in his presence or view. Similar authority is found in other wildlife legislation, for example, Marine Mammal Protection Act of 1972 (16 U.S.C. § 1377(c)); Protection of Bald and Golden Eagles Act (16 U.S.C. § 668b.(a)); Administration of National Wildlife Refuge System Act (16 U.S.C. § 68dd(f)); and the Migratory Bird Treaty Act (16 U.S.C. 106). Moreover, it is traditional law enforcement authority and is necessary in the proper enforcement of this act with its broad scope of prohibition.

Section 4(2) also amends the enforcement section of the Endangered Species Act to authorize the disposal of endangered species, parts or products which have been forfeited to and stored by the Government. The manner of such disposal must be consistent with the purposes of the act. In that regard, the committee felt that disposal by public sale to the general public would tend to perpetrate the market and desire for such items, thus increasing the likelihood of contraband.

Last, section 5 of the bill deals with the problem of museums and similar cultural and historical organizations to exchange displays of endangered species, parts or products across State line for exhibition without violating the act. Interstate transfers are only prohibited if they are in the course of a commercial activity. Inasmuch as the definition of the term "commercial activity" in the act is broad and not all together precise, this amendment would clarify its meaning to specifically exclude the exhibition of commodities by museum and the like from its definition.

I would like to add one important point of clarification with respect to this definitional amendment. Recently, the Department of the Interior, by administrative regulation on September 26, 1975, further defined the term "industry and trade" as it is used in the act's definition of the term "commercial activity." The new DOI definition narrows the scope of those activities which are prohibited by the act, that is, activities which involve "the actual or intended transfer of wildlife or plants from one person to another person in the pursuit of gain or profit." This definition is broader than our amendment in the sense that it would probably permit other persons or institutions to make nonprofit transfers. However, our amendment was necessary because the Department of Commerce has not adopted the same definitions as the Department of the Interior. The amendment in H.R. 10229 is not intended to limit the Department of the Interior's definition.

Mr. FORSYTHE. Mr. Speaker, when the Endangered Species Act of 1973 was passed, many persons, including the U.S. Government, found themselves holding inventories of endangered species parts and products which suddenly they could not dispose of. Particularly hard-hit were American scrimshanders who were selling between 85 percent and 95 percent of their uniquely American art form in interstate commerce. H.R. 10229 recognizes the economic plight of these individuals by permitting them to dispose of their legally acquired stocks.

H.R. 10229 also recognizes that GSA is spending approximately $38,500 per year to maintain a sperm oil stockpile which the Intergovernmental Materials Advisory Committee has declared to be surplus to the Nation's needs. If GSA could dispose of this oil, the taxpayers would be spared unnecessary storage costs and would realize a gain of

$2.7 million from the sale. If enacted, H.R. 10229 would spare the taxpayers another unnecessary storage cost by authorizing the disposal of endangered species parts and products which have been forfeited to and stored by the Government. Without these amendments, the Government lacks the authority to dispose of the forfeited items.

H.R. 10229, however, makes other important and necessary changes in the Endangered Species Act. It is, as has been pointed out, incongruous to promulgate emergency regulations and then have to wait 90 days to implement them. It is also less than logical to require a 30-day comment period before granting an emergency permit for the treatment of a stranded or beached endangered species. Yet, technically, this is what the act now requires.

Mr. Speaker, H.R. 10229 is a simple and straight-forward bill which rights an economic wrong, saves the taxpayers money, and makes administration of an important statute easier.

Mr. Mosher. Mr. Speaker, I strongly support H.R. 10229, a bill to authorize amendment of the Endangered Species Act, to permit interstate commerce in sperm oil and scrimshaw products lawfully acquired prior to enactment of ESA.

I greatly appreciate the intelligent, sensitive, responsible way that this legislation has been perfected in the Merchant Marine Committee, thanks to the bipartisan leadership of our colleagues, Messrs. Leggett and Forsythe, and the cooperation of the chairlady from Missouri (Mrs. Sullivan).

Just a year ago, I introduced legislation—H.R. 3465—to authorize disposition by the Federal Government of certain sperm whale oil held in the national strategic stockpile.

This particular oil, most of which is now a quarter of a century old, was placed in storage by the Government after World War II because of its "strategic and critical" properties as a lubricant. However, in the course of the years, adequate substitutes have been developed for all essential uses of this oil, and 3 years ago the Government oil was declared surplus.

Consequently the General Services Administration entered into contracts during 1973 for the sale of the stockpiled oil for a total of approximately $7.5 million. As the first deliveries were being made to private companies the Endangered Species Act became effective. Its stringent technical provisions prohibited the sale or shipment of products derived from animals on the endangered species list blocked GSA from fulfilling its contracts. Since that time, this legal snafu has caused the bulk of the stockpiled oil to remain in storage—at a cost of more than $3,000 per month—and of no use to anyone.

As a strong supported of the Endangered Species Act, indeed, as one of its original cosponsors, I have no intention to weaken or dilute that important and valuable law.

My bill—H.R. 3465—was really a very simple one. What I hoped to accomplish was threefold; to save the American taxpayers an appreciable amount of money, to add revenue for the Federal Treasury, and to allow the Government to fulfill its contractual obligations.

In recent years commercial users of sperm whale oil are, one by one, switching irreversibly to using sperm oil substitutes instead of the genuine substance. As the oil's value continues to decline—as a result of diminishing demand—the Government continues to charge itself—and therefore the taxpayers—$38,500 annually for storage costs when it could bring an additional $3 million—the estimated value of the unsold oil—into the Treasury and inject almost $7 million into the private sector upon processing.

These are impressive figures, especially as we once again enter into the maze of the budgetary process. It certainly was not the intention of the Congress to create this tieup of the Government-held supply of 25-year-old sperm oil.

The question of privately stockpiled scrimshaw prohibited from interstate commerce arose as a related issue. Thus, during the thorough hearings by the Merchant Marine Committee's Subcommittee on Fisheries and Wildlife, the members indicated their desire to also address that issue as well as that of privately held sperm whale oil—amounting to some 8 million pounds. The committee chose to add these provisions to the clean bill that is before us today.

I hasten to note that while this bill does provide for the sale of publicly held sperm oil, it contains very stringent safeguards to assure that disposition of this oil is such that there is virtually no likelihood that this whale oil may become a commodity to be used in illicit trade or for export. Any fears of this nature are unwarranted.

Obviously, the intent of this bill does not contemplate killing more whales. It is bad enough that so many whales were killed more than two decades ago to obtain this oil. I do not see the sense in aggravating this situation now by continuing the impoundment of this oil from the sperm whales that have been dead for so many years.

There is an extremely limited, finite supply of this oil available for industrial use. The users realize this; in fact, a good many former users have indicated that they are irrevocably out of the sperm oil market. Once this supply is exhausted the users will turn to substitutes that are or will be available on the market.

My use of the future tense here reflects a very fortunate and documented scientific discovery in the Southwestern United States. The seed oil of the jojoba bush, an obscure and peculiar desert plant, has a remarkable chemical similarity to sperm whale oil and it is anticipated that upon processing the jojoba bean oil could be used as a sperm oil substitute for the complete range of uses.

However, it is time-consuming and expensive to harvest the wild beans, so plans call for jojoba bean plantations on certain Indian reservations in Arizona and California. A minimum 5-year lag is anticipated before the jojoba bean oil will be available on the commercial market. It is expected that the finite supply of sperm whale oil will be just about exhausted by then. This bill provides for the interim period. The oil will be generally available for this short time only and then it will be gone.

H.R. 10229 is an extremely practical measure. It signals the end of one type of industry and the transition to another, far more socially desirable industry.

Mr. Speaker, I know from my own research that it is necessary and beneficial for us to amend the Endangered Species Act to permit the sale of the surplus sperm whale oil held by the General Administration. And I trust the judgment of my fellow committee members that it is equally desirable to permit the sale of other sperm whale oil and scrimshaw that was properly acquired before the ESA was enacted. Thus, I support passage of H.R. 10229.

Mrs. SULLIVAN. Mr. Speaker, we have no further requests for time.

The SPEAKER pro tempore (Mr. McFall). The question is on the motion offered by the gentlewoman from Missouri (Mrs. Sullivan) that the House suspend the rules and pass the bill H.R. 10299, as amended.

The question was taken; and (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to amend the Endangered Species Act of 1973 in order to permit the disposal of certain endangered species products and parts lawfully held within the United States on the effective date of such Act."

A motion to reconsider was laid on the table.

[From the Congressional Record, Feb. 17, 1976]

HOUSE CONSIDERATION AND PASSAGE OF S. 229, AS AMENDED IN LIEU OF H.R. 10229

Mrs. SULLIVAN. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries be discharged from further consideration of the Senate bill (S. 229) to amend the Endangered Species Act of 1973 to assure the perpetuation of the art of scrimshaw, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Missouri?

There was no objection.

The Clerk read the Senate bill as follows:

S. 229

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Scrimshaw Art Preservation Act of 1975".

SEC. 2. (a) The Congress finds and declares that—

(1) All forms of art and culture which reflect this Nation's heritage should be preserved, as the United States prepares for its bicentennial year.

(2) Scrimshaw is an art form which was developed during the Nation's early years by New England whalers and others; it has been practiced by skilled American craftsmen and artisans ever since.

(3) The perpetuation of this part of the culture and heritage of the United States is threatened by the prohibition enacted in 1973 against the marketing of whale bone and teeth.

(b) It is the purpose of the Congress in this Act to exempt scrimshaw and scrimshaw products from the prohibitions of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

SEC. 3. Section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532) is amended by (1) redesignating paragraphs "(10)" through "(16)" thereof as paragraphs "(11)" through "(17)" thereof; and (2) by inserting therein the following new paragraph:

"(10) The term 'scrimshaw' means an art form which involves the etching or engraving of designs upon, or the carving of figures, patterns, or designs from, the bones and teeth of marine mammals of the order Cetacea.".

SEC. 4. Section 10(b) of the Endangered Species Act of 1973 (16 U.S.C. 1539 (b)) is amended by adding at the end thereof the following two new paragraphs:

"(4)(A) The Secretary of Commerce may exempt persons from the prohibitions contained in subparagraphs (E) and (F) of section 9(a)(1) of this Act—

"(i) with respect to the wholesale movement or sale of finished scrimshaw products, if such products or the raw materials for such products were held lawfully within the United States on December 21, 1972, except that no such exemption shall be granted or remain in effect more than two years after the date of enactment of this provision; and

"(ii) with respect to the retail sale of finished scrimshaw products for personal use by the purchasers thereof, if such products were held lawfully within the United States on December 21, 1972, except that no such exemption shall be granted or remain in effect more than seven years after the date of enactment of this provision.

As used in this paragraph, the term "lawfully" refers to the laws of the United States and to laws of the several States and political subdivisions thereof. Any such exemption may be granted by such Secretary upon such terms and conditions as he shall prescribe, including, but not limited to, requiring such persons to register inventories; to maintain complete sales records; to permit duly authorized agents of such Secretary to inspect any such inventories and records; and to prepare and submit to such Secretary any reports requested by him.

"(B) Any person who seeks an exemption pursuant to any provision of subparagraph (A) of this paragraph shall—

"(i) submit to such Secretary, within one hundred and twenty days after the date of enactment of this paragraph, a complete and detailed inventory, in such form and manner as such Secretary shall prescribe, of the quantity of bone and teeth of marine mammals of the order Cetacea and of parts of and products from such bone and teeth, which are held or otherwise controlled by such person. The Secretary of Commerce shall grant an exemption pursuant to such subparagraph only for the holdings reported in such inventories;

"(ii) apply to such Secretary for such exemption, in such form and manner and with such submission as such Secretary shall prescribe; and

"(iii) submit to such Secretary sales records, reports, and other documents and materials, to the extent reasonably necessary to establish that the holdings with respect to which an exemption is sought were acquired in accordance with the subparagraph (A).

"(C) There shall be a rebuttable presumption, in any action brought under this Act for a violation of a provision of section 9(a) of this Act, that no exemption authorized by this paragraph is applicable. Any person who claims the benefit of any exemption granted pursuant to this paragraph shall have the burden of rebutting such presumption in such an action. Regulations promulgated by the Secretary of Commerce with respect to exemptions pursuant to this paragraph shall be effective on the date of final publication, notwithstanding any other provision of this Act.

"(5) Within one hundred and twenty days after the date of enactment of this paragraph, the Secretary of the Interior, the Secretary of Commerce, and the Secretary of the Treasury shall establish an interagency task force to enforce the provisions of this Act applicable to the bone and teeth of marine mammals of the order Cetacea and parts of and products from such bone and teeth. This task force shall act in addition to, and not in lieu of, existing enforcement activities, and shall concentrate its activities in those regions and areas which are most susceptible to unlawful activity as a result of exemptions granted under paragraph (4) of this subsection. The Secretaries of the Interior, Commerce, and the Treasury shall report jointly to the Congress and the President, within twelve months after the date of enactment of this paragraph, on the extent to which the provisions of this Act have been violated with respect to the bone and teeth of such mammals and with respect to the effectiveness of this task force in preventing such violations.".

MOTION OFFERED BY MRS. SULLIVAN

Mrs. **Sullivan**. Mr. Speaker, I offer a motion.

Mrs. Sullivan moves to strike out all after the enacting clause of S. 299 and to insert in lieu thereof the provisions of H.R. 10229, as passed.

The motion was agreed to.

The Senate bill was ordered to be read a third time, and was read the third time, and passed.

The title was amended so as to read: "A bill to amend the Endangered Species Act of 1973 in order to permit the disposal of certain endangered species products and parts lawfully held within the United States on the effective date of such Act.".

A motion to reconsider was laid on the table.

A similar House bill (H.R. 10229) was laid on the table.

[From the Congressional Record, June 29, 1976]

House Concurrence in Senate Amendments to House Amendments to S. 229

Endangered Species Act of 1973 Amendments

Mr. **Leggett**. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (S. 229) to amend the Endangered Species Act of 1973 to assure the perpetuation of the art of scrimshaw, and for other purposes, with Senate amendments to the House amendments thereto, and concur in the Senate amendments to the House amendments.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendments to the House amendments, as follows:

Page 1, line 12, of the House engrossed amendment, after "oil" insert:, "including derivatives thereof,".

Page 4, after line 21 of the House engrossed amendment, insert:

"(6) (A) Any contract for the sale of pre-Act Endangered Species parts which is entered into by the Administrator of General Services prior to the effective date of this subsection and pursuant to the notice published in the Federal Register on January 9, 1973, shall not be rendered invalid by virtue of the fact that fulfillment of such contract may be prohibited under subsection 9(a) (1) (F).

"(B) In the event that this paragraph is held invalid, the validity of the remainder of the Act, including the remainder of this subsection, shall not be affected.

"(7) Nothing in this subsection shall be construed to—

"(A) exonerate any person from any act committed in violation of paragraphs (1) (A), (1) (E), or (1) (F) of section 9(a) prior to the date of enactment of this subsection; or

"(B) immunize any person from prosecution for any such act.".

The **Speaker**. Is there objection to the request of the gentleman from California?

Mr. **Rousselot**. Mr. Speaker, reserving the right to object, will the gentleman explain what this does?

Mr. **Leggett**. If the gentleman will yield, yes. The legislation very simply clarifies the term "sperm whale oil" by adding "including derivatives thereof" to the bill as it was passed by the House.

Second, it keeps in force and effect the GSA contracts and advises that any enforcement activities heretofore taking place will continue.

Mr. Rousselot. Mr. Speaker, further reserving the right to object, is there anything added by the Senate amendments?

Mr. Leggett. There is nothing added. We have the Senate amendments to the House amendments to the Senate bill, but the amendments are as I have just stated.

Mr. Rousselot. Mr. Speaker, I thank the gentleman.

I withdraw my reservation of objecton.

Mr. Leggett. Mr. Speaker, the House passed S. 229 on February 17, 1976, to amend the Endangered Species Act of 1973 to allow the limited disposal of preact, legally obtained endangered species parts and products. In addition, the House further amended S. 229 to include a number of minor technical changes to clarify certain ambiguities, to avoid lapses of coverage, and unnecessary administrative burdens in the original legislation.

As the Senate originally passed S. 229 on April 14, 1975, the bill only allowed certain exemptions for a limited period of time for the sale of finished scrimshaw products in interstate commerce. The House expanded the limited exemptions to include sperm whale oil as well as scrimshaw products and raw stocks normally held prior to December 28, 1973. The House amendments also included technical changes in the Endangered Species Act to:

First. Provide an affirmative defense for prima facie violations of section 9;

Second. Clarify the notice of review of permit of appllications provisions;

Third. Clarify the 30-day comment period preceding permit issuances;

Fourth. Strengthen and clarify the enforcement provision;

Fifth. Authorize the disposal of forfeited or confiscated endangered species parts or products; and

Sixth. Clarify the definition of "commercial activity."

After S. 229 was amended by the House and returned to the Senate, the Senate acted on June 24, 1976, by accepting the House amendments with three additional clarifying amendments as follows:

First. The first amendment clarified the term "sperm whale oil" by adding "including derivatives thereof" to cover such derivatives as spermacetti which is used by pharmaceutical companies as an ingredient in lotions, cosmetics, and the like.

Second. The second amendment responds to a request by the General Services Administration that the validity of the contracts entered into by GSA with private companies for the disposal of the Nation's stockpile of sperm whale oil be made clear.

Third. The third amendment is to resolve any uncertainty regarding previous enforcement actions or ongoing investigations. The amendment simply states that nothing in S. 229 shall be construed to: First, exonerate any person for any act committed, prior to the dates of the enactment of S. 229, in violation of the provisions for which exemptions are being granted; or second, to immunize any person from prosecution for any such act. Each of these additional clarifying amendments are consistent with the intent of the House when it originally acted upon S. 229 back in February of this year.

Because of the concerns of companies dealing in sperm whale oil and derivatives thereto, the Senate's first clarifying amendment adding "including derivatives thereto" helps define the scope of this bill. The second amendment by the Senate regarding the General Services Administration's contract concerning approximately 23,400,000 pounds of stockpiled sperm whale oil is necessary to assure that these contracts will be performed by the parties as contemplated.

And, finally, on account of several enforcement actions and ongoing investigations, we agree with the additional Senate language which clarifies the scope of limiting exemptions contained in S. 229. The House never intended in S. 229 to exonerate any person for any act committed prior to the enactment of S. 229 in violation of the provisions for which exemptions are being granted or to immunize any person from prosecution for any such act.

For these reasons, Mr. Speaker, I urge the House to concur in the Senate amendments to the House amendments on S. 229.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

Calendar No. 57

94th CONGRESS
1st Session

S. 229

[Report No. 94-63]

IN THE SENATE OF THE UNITED STATES

January 17, 1975

Mr. Kennedy (for himself and Mr. Brooke) introduced the following bill; which was read twice and referred to the Committee on Commerce

April 4, 1975

Reported, under authority of the order of the Senate of March 26, 1975, by Mr. Magnuson, with amendments

[Strike out all after the enacting clause and insert the part printed in italic]

A BILL

To amend the Endangered Species Act of 1973 to make it more consistent with the Marine Mammal Protection Act of 1972.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, ~~That section 10(h) of the Endangered Species Act of 1973 (87 Stat. 896; 16 U.S.C. 1539) is amended by adding at the end thereof a new subparagraph (4) to read as follows:~~

~~"(4) The Secretary of Commerce may grant, under such terms and conditions as he may prescribe (including, but not limited to, registration of inventories, keeping of~~

~~complete sales records, provision for duly authorized agents of the Secretary of Commerce to have the right to inspect inventories and records, and filing of such reports as the Secretary of Commerce may require), exemptions to the prohibitions in clauses (E) and (F) of section 9(a)(1) of this Act to persons for stocks or inventories of bone and teeth of marine mammals of the order Cetacea, including parts or products thereof, lawfully held within the United States on December 21, 1972. Subsequent purchasers of bone and teeth of marine mammals of the order Cetacea, including parts or products thereof, originally sold by a person granted an exemption pursuant to this paragraph shall be entitled to the same exemption. In connection with any action brought for a violation of the provisions of section 9(a) of the Act, there shall be a rebuttable presumption that the exemption provided for in this paragraph does not apply, and any person claiming the benefit of any such exemption shall have the burden of overcoming such presumption. Notwithstanding the provisions of section 4(f)(2)(A), regulations published by the Secretary of Commerce in connection with this exemption shall be effective on the date of publication."~~

That this Act may be cited as the "Scrimshaw Art Preservation Act of 1975".

SEC. 2. (a) The Congress finds and declares that—

(1) All forms of art and culture which reflect this Nation's heritage should be preserved, as the United States prepares for its bicentennial year.

(2) Scrimshaw is an art form which was developed during the Nation's early years by New England whalers and others; it has been practiced by skilled American craftsmen and artisans ever since.

(3) The perpetuation of this part of the culture and heritage of the United States is threatened by the prohibition enacted in 1973 against the marketing of whale bone and teeth.

(b) It is the purpose of the Congress in this Act to exempt scrimshaw and scrimshaw products from the prohibitions of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

SEC. 3. Section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532) is amended by (1) redesignating paragraphs "(10)" through "(16)" thereof as paragraphs "(11)" through "(17)" thereof; and (2) by inserting therein the following new paragraph:

"(10) The term 'scrimshaw' means an art form which involves the etching or engraving of designs upon,

or the carving of figures, patterns, or designs from, the bones and teeth of marine mammals of the order Cetacea.".

SEC. 4. Section 10(b) of the Endangered Species Act of 1973 (16 U.S.C. 1539(b)) is amended by adding at the end thereof the following two new paragraphs:

"(4)(A) The Secretary of Commerce may exempt persons from the prohibitions contained in subparagraphs (E) and (F) of section 9(a)(1) of this Act—

"(i) with respect to the wholesale movement or sale of finished scrimshaw products, if such products or the raw materials for such products were held lawfully within the United States on December 21, 1972, except that no such exemption shall be granted or remain in effect more than two years after the date of enactment of this provision; and

"(ii) with respect to the retail sale of finished scrimshaw products for personal use by the purchasers thereof, except that no such exemption shall be granted or remain in effect more than seven years after the date of enactment of this provision.

Any such exemption may be granted by such Secretary upon such terms and conditions as he shall prescribe, including, but not limited to, requiring such persons to register inventories; to maintain complete sales records; to permit duly authorized *agents of such Secretary to inspect any such inventories and records; and to prepare and submit to such Secretary any reports requested by him.*

"(B) Any person who seeks an exemption pursuant to any provision of subparagraph (A) of this paragraph shall—

"(i) submit to such Secretary, within one hundred and twenty days after the date of enactment of this paragraph, a complete and detailed inventory, in such form and manner as such Secretary shall prescribe, of the quantity of bone and teeth of marine mammals of the order Cetacea and of parts of and products from such bone and teeth, which are held or otherwise controlled by such person. The Secretary of Commerce shall grant an exemption pursuant to such subparagraph only for the holdings reported in such inventories;

"(ii) apply to such Secretary for such exemption, in such form and manner and with such submissions as such Secretary shall prescribe; and

"(iii) submit to such Secretary sales records, reports, and other documents and materials, to the extent necessary to establish that the holdings with respect to which an exemption is sought were acquired in accordance with the subparagraph (A).

"(C) There shall be a rebuttable presumption, in any action brought under this Act for a violation of a provision

of section 9(a) of this Act, that no exemption authorized by this paragraph is applicable. Any person who claims the benefit of any exemption granted pursuant to this paragraph shall have the burden of rebutting such presumption in such an action. Regulations promulgated by the Secretary of Commerce with respect to exemptions pursuant to this paragraph shall be effective on the date of final publication, notwithstanding any other provision of this Act.

"(5) Within one hundred and twenty days after the date of enactment of this paragraph, the Secretary of the Interior, the Secretary of Commerce, and the Secretary of the Treasury shall establish an interagency task force to enforce the provisions of this Act applicable to the bone and teeth of marine mammals of the order Cetacea and parts of and products from such bone and teeth. This task force shall act in addition to, and not in lieu of, existing enforcement activities, and shall concentrate its activities in those regions and areas which are most susceptible to unlawful activity as a result of exemptions granted under paragraph (4) of this subsection. The Secretaries of the Interior, Commerce, and the Treasury shall report jointly to the Congress and the President, within twelve months after the date of enactment of this paragraph, on the extent to which the provisions of this Act have been violated with respect to the bone and teeth of such mammals and with

respect to the effectiveness of this task force in preventing such violations.".

Amend the title so as to read: "A bill to amend the Endangered Species Act of 1973 to assure the perpetuation of the art of scrimshaw, and for other purposes."

SCRIMSHAW ART PRESERVATION ACT OF 1975

APRIL 4, 1975.—Ordered to be printed

Filed under authority of the order of the Senate of March 26, 1975

Mr. MAGNUSON, from the Committee on Commerce, submitted the following

REPORT

[To accompany S. 229]

The Committee on Commerce, to which was referred the bill (S. 229) to amend the Endangered Species Act of 1973 to make it more consistent with the Marine Mammal Protection Act of 1972, having considered the same, reports favorably thereon with a title amendment and an amendment in the nature of a substitute to the text of the bill and recommends that the bill as amended do pass.

PURPOSE

S. 229 is designed to preserve the art of scrimshaw, which originated during the nation's early years by New England whalers who etched designs in, and carved figures from whale bone and teeth as a means of passing the time during the long months spent away from home on whaling expeditions. As the nation grew and expanded westward, the popularity of scrimsaw grew as well, and today the art is practiced throughout the country, in areas such as the Pacific Northwest, the Southwest, Alaska and Hawaii. Today's artisans, in addition to practicing scrimshaw as it was originated in New England, have adapted the art and developed new innovations which reflect the heritage of other sections of the nation in addition to that of New England and which are not restricted to nautical motifs.

Due to the prohibitions of the Endangered Species Act of 1973, artisans are now prohibited from selling their finished scrimshaw products in interstate commerce. While other media, such as beef bone, could be legally utilized, most artisans have not had sufficient time to adapt their craft to other material. Thus, in order to assure the preservation of this art form, S. 229 permits the Secretary of Commerce, who administers the Endangered Species Act with respect to whales, to grant exemptions for a limited period of time for the sale of finished scrimshaw products in interstate commerce. This legislation would permit scrimshanders sufficient time to both dispose of their present inventories and to adapt their art to a new medium, without encouraging an endless trade in products of endangered species.

BACKGROUND AND NEED

The Marine Mammal Protection Act, which was passed by the Congress on October 21, 1972, was designed to prevent the further slaughter and depletion of marine mammals throughout the world by removing the United States' market for the parts and products of these mammals. The Act prohibited the importation and sale in interstate and foreign commerce of such parts and products, although these prohibitions did not apply to marine mammals taken prior to December 21, 1972, the effective date of the Act.

In 1973 Congress passed the endangered Species Act of 1973, which strengthened its 1969 predecessor by prohibiting not only the importation, but also the sale, of endangered species and their parts and products in interstate and foreign commerce. Unlike the Marine Mammal Act, however, the Endangered Species Act contains no retroactive exemptions for the interstate sale of parts and products of endangered marine mammals which were legally held under the 1972 Act. This inconsistency has resulted in a great deal of confusion in the enforcement of the laws and has created financial hardship for scrimshanders and other artisans who deal in carved whale bone and teeth. These individuals possess substantial inventories of legally acquired whale bone and teeth used in their craft but are prohibited from marketing their finished products under the 1973 Act. Since exemptions for the sale of these art objects cannot be granted administratively, legislation is needed to rectify the situation.

LEGISLATIVE HISTORY

During the 93d Congress, S. 3751 was introduced in the Senate on July 11, 1974 by Senator Edward M. Kennedy (D–Mass.) and Senator Edward R. Brooke (R–Mass.) and was referred to the Senate Commerce Committee on July 19. A revised bill, S. 4128 which was more limited in scope than S. 3751, was introduced by the same sponsors on October 10, 1974 and referred to the Senate Commerce Committee on October 19. No further action occurred with respect to either bill during the 93d Congress.

On January 17, 1975 Senators Kennedy and Brooke introduced S. 229, which was identical to S. 4128 of the 93d Congress. The bill was referred to the Senate Commerce Committee on January 17, 1975. After a comment period during which the public was asked to express its views on the bill, the Senate Commerce Committee reported an amendment to S. 229 in the form of a substitute bill. Following are the major new provisions in the amendment:

Delineation of Congressional Intent.—The amended version of S. 229 sets forth more clearly the intent of Congress in enacting the legislation—that is, to preserve the native American art of scrimshaw but not to promote or perpetuate the trade in products of endangered species. The Committee views this legislation as providing a transition period during which scrimshanders may sustain themselves through the marketing of their finished products in interstate commerce, while at the same time adapt their art to other media which are legal for interstate sale.

Limited Exemption Period.—Under the amended version of the bill, the Secretary of Commerce may grant for two years after the effective date of the Act exemptions for the wholesale sale and shipment in interstate commerce of finished scrimshaw products and for a period of seven years after the effective date exemptions for retail sale for personal use of finished scrimshaw products. The designation of a time during which exemptions may be granted is preferable to the open ended provisions of the original bill which might have encouraged smuggling of endangered species in the future when a market for scrimshaw products would still exist, but legally acquired stocks would have been depleted.

Reporting Procedures.—The amendment reported by the Committee sets forth specific reporting procedures which must be met by any individual seeking such an exemption. Among those requirements are the submission to the Secretary of Commerce within 120 days of the effective date of the amendment of a complete and detailed inventory of all holdings of whale bone and teeth. The Secretary may grant exemptions only for holdings thus reported.

In addition, any individual applying for an exemption must submit to the Secretary all available sales records, reports and other documents to show that the holdings for which the exemption is being sought were legally acquired. While the bill itself contains no penalties for the submission of falsified records, it should be noted that federal law (18 USC 1001) prohibits the submission of falsified documents and data in any matter within the jurisdiction of any department or agency of the United States. Violation of such prohibition is punishable by a fine of not more than $10,000 or imprisonment for not more than five years, or both.

It should also be made clear that in order for stocks of whale teeth and bone to have been legally acquired prior to December 21, 1972, it is not enough that these materials were purchased prior to that date. Rather, they must have been imported prior to the date when the subject whale was placed on the Endangered Species List pursuant to the Endangered Species Act of 1969.

Special Task Force.—In order to guard against violations of the Act, particularly with respect to smuggling, that may be encouraged by the granting of exemptions under this amendment, the Secretaries of Commerce, Interior and Treasury are directed to create a special task force to provide an intensive enforcement effort with respect to whale bone and teeth. The efforts of this task force are to be concentrated in those areas of the country which are most likely to be susceptible to violations of the Act as a result of the exemptions granted.

The Committee expects this task force to constitute a genuine effort on the part of the agencies involved to seek out and punish violators of the Act.

In their formal comments on the bill, the Departments of Commerce and Interior have recommended broadening the scope of the exemptions authorized under the Act. The Committee has taken no position on the merits of these proposals, but it feels that any additional exemptions should first be closely examined in public hearings and that it would be inappropriate to include them in these amendments, until a complete record has been developed showing that the same or similar narrow purposes would be served by further exemptions.

TEXT OF S. 229, AS REPORTED: To amend the Endangered Species Act of 1973 to assure the perpetuation of the art of scrimshaw, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Scrimshaw Art Preservation Act of 1975".

SEC. 2. (a) The Congress finds and declares that—

(1) All forms of art and culture which reflect this Nation's heritage should be preserved, as the United States prepares for its bicentennial year.

(2) Scrimshaw is an art form which was developed during the Nation's early years by New England whalers and others; it has been practiced by skilled American craftsmen and artisans ever since.

(3) The perpetuation of this art of the culture and heritage of the United States is threatened by the prohibition enacted in 1973 against the marketing of whale bone and teeth.

(b) It is the purpose of the Congress in this Act to exempt scrimshaw and scrimshaw products from the prohibitions of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

SEC. 3. Section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532) is amended by (1) redesignating paragraphs "(10)" through "(16)" thereof as paragraphs "(11)" through "(17)" thereof; and (2) by inserting therein the following new paragraph:

"(10) The term 'scrimshaw' means an art form which involves the etching or engraving of designs upon, or the carving of figures, patterns, or designs from, the bones and teeth of marine mammals of the order Cetacea.".

SEC. 4. Section 10(b) of the Engandered Species Act of 1973 (16 U.S.C. 1539(b)) is amended by adding at the end thereof the following two new paragraphs:

"(4)(A) The Secretary of Commerce may exempt persons from the prohibitions contained in subparagraphs (E) and (F) of section 9(a)(1) of this Act—

"(i) with respect to the wholesale movement or sale of finished scrimshaw products, if such products or the raw materials for such products were held lawfully within the United States on December 21, 1972, except that no such exemption shall be granted or remain in effect more than two years after the date of enactment of this provision; and

"(ii) with respect to the retail sale of finished scrimshaw products for personal use by the purchasers thereof, except that no such exemption shall be granted or remain in effect more than seven years after the date of enacement of this provision.

Any such exemption may be granted by such Secretary upon such terms and conditions as he shall prescribe, including, but not limited to, requiring such persons to register inventories; to maintain complete sales records; to permit duly authorized agents of such Secretary to inspect any such inventories and records; and to prepare and submit to such Secretary any reports requested by him.

"(B) Any persons who seeks an exemption pursuant to any provision of subparagraph (A) of this paragraph shall—

"(i) submit to such Secretary, within 120 days after the date of enactment of this paragraph, a complete and detailed inventory, in such form and manner as such Secretary shall prescribe, of the quantity of bone and teeth of marine mammals of the order of Cetacea and of parts of and products from such bone and teeth, which are held or otherwise controlled by such person. The Secretary of Commerce shall grant an exemption pursuant to such subparagraph only for the holdings reported in such inventories;

"(ii) apply to such Secretary for such exemption, in such form and manner and with such submissions as such Secretary shall prescribe; and

"(iii) submit to such Secretary sales records, reports, and other documents and materials, to the extent necessary to establish that the holdings with respect to which an exemption is sought were acquired in accordance with subparagraph (A).

"(C) There shall be a rebuttable presumption, in any action brought under this Act for a violation of a provision of section 9(a) of this Act, that no exemption authorized by this paragraph is applicable. Any person who claims the benefit of any exemption granted pursuant to this paragraph shall have the burden of rebutting such presumption in such an action. Regulations promulgated by the Secretary of Commerce with respect to exemptions pursuant to this paragraph shall be in effect on the date of final publication, nothwithstanding any other provision of this Act.

"(5) Within 120 days after the date of enactment of this paragraph, the Secretary of the Interior, the Secretary of Commerce, and the Secretary of the Treasury shall establish an inter-agency task force to enforce the provisions of this Act applicable to the bone and teeth of marine mammals of the order Cetacea and parts of and products from such bone and teeth. This task force shall act in addition to, and not in lieu of, existing enforcement activities, and shall concentrate its activities in those regions and areas which are most susceptible to unlawful activity as a result of exemptions granted under paragraph (4) of this subsection. The Secretaries of the Interior, Commerce, and the Treasury shall report jointly to the Congress and the President, within 12 months after the date of enactment of this paragraph, on the extent to which the provisions of this Act have been violated with respect to the bone and teeth of such mammals and with respect to the effectiveness of this task force in preventing such violations.".

SECTION BY SECTION ANALYSIS

Section 2.

This section declares the findings of Congress in enacting the legislation, namely, that in preparation for the Nation's bicentennial, every effort should be made to preserve all forms of art and cultures which reflect the nation's heritage. Among those art forms to be preserved is scrimshaw.

Section 3.

This section defines the term "scrimshaw".

Section 4.

This section amends section 10(b) of the Endangered Species Act of 1973 by adding two new paragraphs (4) and (5) at the end thereof.

Subparagraph (4)(a) permits the Secretary of Commerce to grant, under such conditions as he may prescribe, exemptions to the Endangered Species Act of 1973 for the sale in interstate commerce of finished scrimshaw products. These exemptions may be granted for 2 years from the effective date of the bill for the wholesale sale and shipment of finished scrimshaw and for 7 years after the effective date for the retail sale for personal use of finished scrimshaw.

Subparagraph (B) sets down certain reporting requirements which must be met by any person seeking such an exemption.

Subparagraph (C) creates a rebuttable presumption that in connection with any action brought for violation of the Act, the exemption provided for in section 4 does not exist.

Paragraph (5) directs the Secretaries of Commerce, Interior, and Treasury to create a special task force for intensive enforcement of these amendments. The efforts of this task force are to be concentrated in those areas of the country which may be susceptible to violations of the Act as a result of the exemptions granted.

COST ESTIMATE

In accordance with Section 252 of the Legislative Reorganization Act of 1970, the committee estimates that there would be no significant additional cost to the Federal Government if the proposed legislation were enacted.

CHANGES IN EXISTING LAW

There would be no change in existing law if the legislation were enacted.

AGENCY COMMENTS

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., March 24, 1975.

Hon. WARREN G. MAGNUSON,
Chairman, Committee on Commerce,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Your Committee has requested the views of this Department on S. 229, a bill "To amend the Endangered Species Act of 1973 to make it more consistent with the Marine Mammal Protection Act of 1972."

S. 229 would authorize the Secretary of Commerce to grant exemptions from the prohibitions of section 9(a)(1)(E) and (F) of the Endangered Species Act of 1973 to persons who lawfully held inventories of bone, teeth, or other parts or products of marine mammals of the order Cetacea prior to the effective date of the Marine Mammal Act of 1972. Exemptions thus granted would run with the article and apply to subsequent purchasers. In every action brought for a violation of the Endangered Species Act of 1973, there would be a rebuttable presumption that the exemption does not apply. Any person claiming the exemption in such a proceeding would have to bear the burden of establishing his right to it. The Secretary of Commerce could prescribe terms and conditions for the granting of an exemption, and any regulations published by the Secretary in connection with the exemption would be effective on the date of publication.

While we agree in principle with the proposed amendment, there are a number of other problem areas which have developed in the administration of the Act by this Department. We testified before the 93d Congress in regard to these. The Fish and Wildlife Service is currently studying the need for amendments to the Act, which would address these other problems. Since the Secretary of Commerce is responsible for administering the Endangered Species Act insofar as it relates to marine mammals of the order Cetacea, we defer to the views of the Commerce Department as to the need and availability of this particular bill.

The Office of Management and Budget has advised that there is no objection to the presentation of this report from the standpoint of the Administration's program.

Sincerely yours,

DOUGLAS P. WHEELER,
Acting Assistant Secretary of the Interior.

GENERAL COUNSEL OF THE DEPARTMENT OF COMMERCE,
Washington, D.C., March 20, 1975.

Hon. WARREN G. MAGNUSON,
Chairman, Senate Commerce Committee,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your request for the views of this Department with respect to S. 229, a bill to amend the Endangered Species Act of 1973 to make it more consistent with the Marine Mammal Protection Act of 1972.

S. 229 would amend Section 10(b) of the Endangered Species Act of 1973 (87 Stat. 896; 16 U.S.C. 1539) by adding a new subsection (4) to exempt from the prohibited acts identified in clauses (E) and (F) of Section 9(a)(1) of the Act stocks or inventories of bone and teeth of marine mammals of the order Cetacea, including parts or products thereof, lawfully held within the United States on December 21, 1972.

The "grandfather clause", section 9(b) of the Endangered Species Act, now prohibits certain commercial activities with respect to endangered species held in the course of a commercial activity on the effective date of the Act. This prohibition has resulted in the inability of certain businesses to utilize existing endangered species or parts thereof legally held at the time the Act became effective.

The Department recognizes the injustice of the present situation with respect to those businesses affected and supports the intent of this legislation. However, we feel that S. 229 will only paritally correct the problem by reason of its limited scope. We suggest that the bill be expanded to include all parts and products of marine mammals of the order Cetacea to alleviate the hardship caused various businesses which are unable to trade in interstate commerce any endangered species, or parts thereof, which were legally acquired and being held at the time the Act became effective. The objective of the Endangered Species Act is to prevent the taking of endangered species of fish and wildlife and to restrict trade that would lead to the killing of additional animals. The Department feels the amendment we are suggesting would insure both our commitment to the moratorium on taking additional animals and also our concern for the businessman.

We would like to have S. 229 amended further to ease the administrative burden of proving that the parts or products were acquired prior to the effective date of the Act. With regard to parts and products from those species under the jurisditcion of this Department, we believe that the ability of the Secretary to adequately enforce the Act as amended by S. 229 would be enhanced by modifying subsection 9(d)(2) to read as follows (brackets deleted; italic language added):

"(2) Any person required to obtain permission under paragraph (1) of this subsection *and any person who sells or offers for sale in interstate commerce any fish or wildlife listed pursuant to section 4 of this Act shall*—

"(A) keep such records as will fully and correctly disclose each portation or [exportation] *other acquisition* of fish, wildlife, or plants made by him and the subsequent *exportation, sale, or other* disposition made by him with respect to such fish, wildlife, or plants;

"(B) at all reasonable times upon notice by a duly authorized representative of the Secretary, afford such representative access to his places of business, an opportunity to examine his inventory of [imported] fish, wildlife, or plants and the records required to be kept under subparagraph (A) of this paragraph, and to copy such records; and

"(C) file such reports as the Secretary may require."

We take no position with respect to any problems which this amendment may raise with respect to species under the jurisdiction of the Department of the Interior.

We have been advised by the Office of Management and Budget that there would be no objection to the submission of our report to the Congress from the standpoint of the Administration's program.

Sincerely,

—— ——,
General Counsel.

[From the Congressional Record, April 14, 1975]

Senate Consideration and Passage S. 229, As Amended

Scrimshaw Art Preservation Act of 1975

Mr. Moss. Mr. President, I ask unanimous consent that we turn to Calendar No. 57, and proceed with that matter now, on which there is a unanimous-consent agreement.

Mr. William L. Scott. Mr. President, reserving the right to object, has the distinguished Senator's request been cleared with this side of the aisle?

Mr. Moss. It has been cleared with both sides of the aisle. The Senator from Alaska——

The Acting President pro tempore. Under the previous order, the Senate had already agreed to proceed to the consideration of S. 229.

Mr. Moss. That is correct.

The Acting President pro tempore. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 229) to amend the Endangered Species Act of 1973 to make it more consistent with the Marine Mammal Protective Act of 1972.

The Acting President pro tempore. Time for debate on this bill is limited to 1 hour to be equally divided and controlled by the majority and minority leaders or their designees, with 30 minutes on any amendment, and 20 minutes on any debatable motions or appeals.

The Senate proceeded to consider the bill which had been reported from the Committee on Commerce with an amendment to strike out all after the enacting clause and insert the following:

That this Act may be cited as the "Scrimshaw Art Preservation Act of 1975".

Sec. 2. (a) The Congress finds and declares that—

(1) All forms of art and culture which reflect this Nation's heritage should be preserved, as the United States prepares for its bicentennial year.

(2) Scrimshaw is an art form which was developed during the Nation's early years by New England whalers and others, it has been practiced by skilled American craftsmen and artisans ever since.

(3) The perpetuation of the part of the culture and heritage of the United States is threatened by the prohibition enacted in 1973 against the marketing of whale bone and teeth.

(b) It is the purpose of the Congress in this Act to exempt scrimshaw and scrimshaw products from the prohibitions of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

Sec. 3. Section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532) is amended by (1) redesignating paragraphs "(10)" through "(16)" thereof as paragraphs "(11)" through "(17)" thereof; and (2) by inserting therein the following new paragraph:

"(10) The term 'scrimshaw' means an art form which involves the etching or engraving of designs upon, or the carving of figures, patterns, or design from, the bones and teeth of marine mammals of the order Cetacea.".

Sec. 4. Section 10(b) of the Endangered Species Act of 1973 (16 U.S.C. 1539 (b)) is amended by adding at the end thereof the following two new paragraphs:

"(4) (A) The Secretary of Commerce may exempt persons from the prohibitions contained in subparagraphs (E) and (F) of section 9(a)(1) of this Act—

"(i) with respect to the wholesale movement or sale of finished scrimshaw products, if such products or the raw materials for such products were lawfully within the United States on December 21, 1972, except that no such exemption shall be granted or remain in effect more than two years after the date of enactment of this provision; and "(ii) with respect to the retail sale of finished scrimshaw products for personal use by the purchasers thereof, except that no such exemption shall be granted or remain in effect more than seven years after the date of enactment of this provision.

Any such exemption may be granted by such Secretary upon such terms and conditions as he shall prescribe, including, but not limited to, requiring such persons to register inventories; to maintain complete sales records; to permit duly authorized agents of such Secretary to inspect any such inventories and records; and to prepare and submit to such Secretary any reports requested by him.

"(B) Any person who wants an exemption pursuant to any provision of subparagraph (A) of this paragraph shall—

"(i) submit to such Secretary, within one hundred and twenty days after the date of enactment of this paragraph, a complete and detailed inventory, in such form and manner as such Secretary shall prescribe, of the quantity of bone and teeth of marine mammals of the order Cetacea and of parts of and products from such bone and teeth, which are held or otherwise controlled by such person. The Secretary of Commerce shall grant an exemption pursuant to such subparagraph only for the holdings reported in such inventories;

"(ii) apply to such Secretary for such exemption, in such form and manner and with such submisisons as such Secretary shall prescribe; and

"(iii) submit to such Secretary sales records, reports, and other documents and materials, to the extent necessary to establish that the holdings with respect to which an exemption is sought were acquired in accordance with the subparagraph (A).

"(C) There shall be a rebuttal presumption, in any action brought under this Act for a violation of a provision of section 9(a) of this Act, that no exemption authorized by this paragraph is applicable. Any person who claims the benefit of any exemption granted pursuant to this paragraph shall have the burden of rebutting such presumption in such an action. Regulations promulgated by the Secretary of Commerce with respect to exemptions pursuant to this paragraph shall be effective on the date of final publication, notwithstanding any other provision of this Act.

"(5) Within one hundred and twenty days after the date of enactment of this paragraph, the Secretary of the Interior, the Secretary of Commerce, and the Secretary of the Treasury shall establish an interagency task force to enforce the provisions of this Act applicable to the bone and teeth of marine mammals of the order Cetacea and parts of and products from such bone and teeth. This task force shall act in addition to, and not in lieu of, existing enforcement activities, and shall concentrate its activities in those regions and areas which are most susceptible to unlawful activity as a result of exemptions granted under paragraph (4) of this subsection. The Secretaries of the Interior, Commerce, and the Treasury shall report jointly to the Congress and the President, within twelve months after the date of enactment of this paragraph, on the extent to which the provisions of this Act have been violated with respect to the bone and teeth of such mammals and with respect to the effectiveness of this task force in preventing such violations.".

Mr. Moss. Mr. President, I ask unanimous consent that the amendment to S. 229 of the Committee on Commerce be considered as original text for the purpose of further amendment.

The Acting President pro tempore. Without objection, it is so ordered.

Mr. Moss. Scrimshaw is a unique American artform which was developed during the Nation's early years by New England whalers, who during the long months at sea took up carving designs on whale bone and teeth. As the Nation grew, so did the popularity of scrimshaw, and today the art is practiced by scrimshanders throughout the country. Perhaps the country's most famous collection of scrimshaw pieces was owned by President John F. Kennedy.

In recent years, however, the whale has been placed on the endangered species list, and scrimshaw itself has become endangered. Due to the prohibitions of the Endangered Species Act of 1973, scrimshanders and small businessmen are prevented from sustaining themselves and their art through the marketing of their products in interstate commerce. Unlike the Marine Mammal Protection Act of 1972, which extends protection only to whales taken after its date of enactment, the Endangered Species Act of 1973 prohibits the sale or movement in interstate commerce of products made from whale bone and teeth, even if they were legally acquired prior to December 21, 1972, the effective date of the Marine Mammal Act. S. 229 would conform the Endangered Species Act to the Marine Mammal Protection Act to alleviate the hardship that has been placed on artisans and small businessmen. By permitting the Secretary of Commerce to grant limited exemptions for a period of 7 years for the sale and movement in interstate commerce of legally acquired scrimshaw products made from legally acquired whale bone and teeth, the inequities should be avoided.

In order to guard against increased smuggling or other violations of the act which may result from the granting of these exemptions, any person seeking an exemption must supply the Secretary with any documents needed to prove that the holdings in question were legally acquired. In addition, the Secretaries of Interior, Commerce, and the Treasury are instructed to create a special task force to guard against smuggling that may occur as a result of these exemptions. The efforts of the task force are to be supplemented to existing enforcement activities.

Mr. President, in my view S. 229 will help to ensure the survival of the art of scrimshaw by giving artisans sufficient time to dispose of their inventories of whale ivory while adapting their art to other media, such as beef bone, which is legal for trade. This goal will be achieved without encouraging an endless trade in the products of an endangered species or threatening the live whale population. For that reason, I support the act.

Mr. KENNEDY. Mr. President, I thank the Committee on Commerce and its distinguished chairman, the Senator from Washington (Mr. Magnuson) and the Subcommittee on Environment and its distinguished chairman, the Senator from Michigan (Mr. Philip A. Hart) for all the time and effort they gave to this legislation which I introduced with the Senator from Massachusetts (Mr. Brooke) to preserve the art of scrimshaw. I am particularly grateful to the staff members of the committee for the enormous amount of work which they put into this bill in refining it to insure that our absolute commitment to end the slaughter of whales was not in any way weakened.

S. 229 which Senator Brooke and I introduced on January 17 permits the sale and shipment in interstate commerce of finished scrimshaw products. An exemption period of 2 years is granted for interstate sale and shipment at the wholesale level and for a period of 7 years for retail sale and shipment interstate.

This legislation preserves the art of scrimshaw developed by American whalemen during the period when this Nation was struggling to become independent and self-sufficient. It is particularly appropriate as we move toward the celebration of the Bicentennial that we preserve those art forms which reflect our heritage and our culture.

The distinguished author E. Norman Flayderman points out how scrimshaw art products reflect the spirit of an important time in our history:

> American whaling days are gone forever. Although the era can never be relived, the intriguing artifacts that remain are highly significant reminders of a wonderful era of our past that succeed in catching the spirit of a magnificent and departed period.

President Kennedy reflected that scrimshaw "tells us a very important part of our lives—our lives at sea." And it was President Kennedy's own collection of scrimshaw that reminded so many Americans of a courageous period in our history.

The legislation we act on today will allow our hundreds of scrimshaw artists sufficient time to learn their art on new materials. These artists are etching on beef bone and synthetic materials now in an effort to find a readily available material to continue their work. It will allow museums and collectors a chance to obtain scrimshaw products that are available in States other than their own prior to returning to the time when only sales within State borders will be allowed.

Two very important sections of this bill assure that this Nation's commitment to stop the killing of whales is in no way jeopardized or weakened. Any person seeking an exception must establish the whale's teeth or bone were taken legally. And the legislation sets up a special task force to insure compliance with these restrictions and end the smuggling of whale's teeth that continues even today.

We owe a special debt of gratitude to the environmental and animal protection groups, particularly representatives of the Fund for Animals who gave us so much of their time and their valuable suggestions to insure that this legislation did not weaken the Endangered Species Act of 1973 and who helped us strengthen the provisions to enforce compliance with the law to end activity in illegally taken teeth and whale bone. Without their help we would have been unable to develop the legislation we act on today reflecting both our commitment to end the killing of whales and our commitment to preserve scrimshaw as an American art form.

Any legislation which amends the Endangered Species Act, a law universally recognized as the strongest and most effective legislation in protecting animals threatened with extinction, must be very carefully and thoughtfully drawn to assure that the Congress' commitment to protecting endangered animals is not weakened. The amendment we consider today has been under consideration for 10 months, has been the subject of public hearings in the House, and has had the valuable input of the environmental and animal protection groups. And after all of that study and the enormous amount of work by the Commerce Committee and its staff, we were able to achieve an amendment which reaffirmed and strengthened the resolve of the Congress to protect the whales. For these reasons, I will oppose any amendment to this legislation to provide for other exceptions which have neither been studied nor considered and on which those most expert in protecting our endangered animals have had no opportunity to comment.

Again, I want to thank Senator Philip A. Hart, the Environment Subcommittee and the Commerce Committee for their report on this bill which means so much to the scrimshawers along our coasts.

Mr. Moss. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The Acting President pro tempore. The clerk will report.

The legislative clerk read as follows:

On page 4, strike line 18 and insert in lieu thereof "shaw products for personal use by the purchasers thereof, if such products were held lawfully within the United States on December 21, 1972."

On page 4, between lines 21 and 22, insert "As used in this paragraph, the term "lawfully" refers to the laws of the United States and to laws of the several states and political subdivisions thereof."

On page 5, line 20, immediately following "extent", insert "reasonably".

Mr. Moss. Mr. President, I ask unanimous consent that the amendments be considered en bloc. They occur in three places and, basically, in the same package.

The Acting President pro tempore. Without objection, it is so ordered.

Mr. Moss. Mr. President, the amendment is a minor conforming amendment which I have discussed with the Senator from Alaska and which I understand presents him with no problems.

The amendment insures that with respect to exemptions granted for the sale and movement in commerce of finished scrimshaw products for personal use, that the person wishing to sell those products must also demonstrate that they have been legally taken. This is an inadvertent omission from the bill and conforms it with the criteria for the exemption for wholesale movement or sale of finished scrimshaw products.

The insertions are simply to show that the scrimshaw was legally taken, legally acquired, and that the person, therefore, had a right to carry it in interstate commerce or dispose of it.

Does the Senator from Alaska understand that is the purpose of the amendment?

Mr. Stevens. I am happy to state to my friend, the Senator from Utah, that this amendment is a clarifying amendment that we have examined, Mr. President, and it is acceptable.

I think it does clarify the intent and purpose of the bill as it was originally introduced and reported from our committee.

Mr. Moss. I am happy to yield back the remainder of my time. Does the Senator yield back any time on this amendment?

Mr. Stevens. On this amendment, yes.

The Acting President pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. Stevens. Mr. President, yielding myself whatever time I need, this bill is a needed bill, and I do believe that it does clarify a problem with regard to the scrimshaw-type products.

I have introduced, and there is before the Senate, my amendment No. 338, which deals with a similar type problem. In all candor, we did not hold hearings on S. 229 because we felt that there was really no necessity to do so in view of the fact it was very limited, and an exemption with a purpose that no one had any objection to accomplishing.

My amendment deals with a similar type of situation with regard to any person who holds any fish or wildlife as a trophy if that trophy was taken before the effective date of the Endangered Species Act, and the Marine Mammal Protective Act of 1972 amendment.

I find I do not believe there is any opposition to clarifying this problem for these people, because they have taken their trophies at a time when it was lawful to take them, and they were sort of caught in midstream, so to speak, with items that were either taken abroad or taken within this country, and they were not presented to the taxidermist, which is also a form of art, I am sure the Senator from Utah will agree, and yet they have not been able to preserve their trophies on a permanent basis.

As one who supported both of these acts, the Marine Mammal Act and the Endangered Species Act, I felt it was not our intention to make it retroactive, but to protect the mammals and endangered species that were still alive, and that we recognized prior to it that under the act a person could have lawfully taken some of the species that are now protected.

I had intended to offer this amendment at this time and, Mr. President, I ask that the amendment be printed in the Record at the conclusion of my remarks.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit 1.)

Mr. STEVENS. I do not intend to offer the amendment at this time because we have now ascertained that there are two dates that are operable as far as this amendment is concerned, one being the lawful acquisition of such a trophy prior to the date of the Endangered Species Act. Under the regulation that was then in force, there still could have been some of these species brought into this country under certain circumstances.

After the date of the amendment, the importation of some of those animals that were lawfully taken was still made unlawful by the new act.

It really, Mr. President, does not cover many people and it is a difficult thing to even hold hearings on this type of thing. Primarily, it applies to those people who are able to take a safari, able to go into our neighboring country of Mexico and participate in a hunt. After the lawful and successful conclusion of that hunt, they found they could not bring their trophies back into the United States, because of passage of the act and its retroactive interpretation.

However, I have discussed this matter with my good friend from Utah. Even though at the time this bill was reported from our full committee, on my motion I might add, I thought that we had an understanding that this amendment to protect these few people would be in order, because of the technicalities involved, and in discussing an amendment to make certain we are not reopening a door that we all intended to close, and at the same time in order that we might frame an amendment to these two laws to make certain this limited number of people is not discriminated against in terms of intent of the Congress at the time those two acts were passed, I have asked the Senator from Utah and understand our committee is prepared to hold a hearing on the subject and determine exactly what language would be appropriate in order to grant this very limited exemption to these people.

As I said, I feel they were caught in midstream, as we did pass the two very significant acts, as far as the future is concerned.

So if my colleague agrees, and I understand he does, that we will hold hearings on the amendment which I shall introduce in the form of a bill, and I do not intend to offer it today at this point——

Mr. Moss. Will the Senator yield?

Mr. Stevens. I am happy to.

Mr. Moss. I would like to confirm what the Senator has said, that this matter has not been subject to hearings. This bill simply went through a 30-day comment period and no formal hearings were held. But I assure the Senator from Alaska that our committee will hold hearings early this year on the matter that he now has suggested in his amendment needs clarification.

I agree that it does need some clarification and we are anxious to hold a hearing so that we can frame the language properly to accomplish the purpose the Senator has indicated. I am happy to give him that assurance from the committee, that the hearings will be scheduled on this subject matter that he intends to introduce a bill shortly and we will dispose of this matter because it is of importance, even though it is limited in application to a relatively small number of people.

It is of considerable importance to them, and since we have passed these two acts that impinge on those people, we should clarify fully that we intended it to be prospective and not retroactive to a period of time that would be unfair to them.

Mr. Stevens. I thank the Senator from Utah.

Mr. President, in the case of species that were legally taken before the enactment of the Marine Mammal Act or the Endangered Species Act—and it has been interpreted that those acts now prohibit the lawful use of the animal which was taken prior to the prohibition set down by those acts—I feel that it is only right and just that we make certain that it is not a retroactive application to prevent the utilization of those animals that were, as I said, lawfully taken.

We had no intention—at least I had no intention—of placing a burden on those who had lawfully conducted themselves before the date of the act, either act, and it seems to me only the sensible course—as we are in the case of the scrimshaw amendment—to recognize that prior lawful conduct should not be penalized through an interpretation of the law that actually imposes a penalty for having possession and trying to utilize an animal that was lawfully taken.

I think that the amendment I have proposed is a reasonable one. It would give 120 days for these people to come forward and to establish on a reasonable basis that they had complied with the law at the time and give the Secretary discretion to administer this limited exemption.

It would also give him a balance of a year after the passage of the amendment I suggest to take care of any people who may not have heard of this new exemption. Sort of an extraordinary discretionary period—which is not unlike the bill before us, it has a 7-year period, as a matter of fact—since there are people, it does take time for them to understand that Congress has changed the interpretation that makes it retroactive.

I feel that it is sort of a technical failure of our original intent.

I understand that this bill does have clearance of the major conservation organizations and I am hopeful that they will realize that what I am trying to do is to also clarify the retroactive application of these two laws and not open the door, so to speak, to any taking of animals that are now on the endangered species list or covered by the Marine Mammal Protection Act.

As I said, on that basis, I do not intend to offer this amendment.

I do support the original bill. As a matter of fact, I believe I cosponsored it, because scrimshaw is an art that is well known.

We have similar forms of art coming out of my State now even under the provisions of the Marine Mammal Act and I think it is something that we should recognize as being a legitimate object of clarifying legislation to pass S. 229.

I might say to my friend from Utah who is managing the bill, to my knowledge, there is no Member of the Senate on my side of the aisle who has objected to the bill. I have no intention to ask for a rollcall vote even if the manager of the bill does not desire one.

So I am happy to endorse this bill and I am very pleased to have the assurance of our Commerce Committee that we will proceed with some dispatch to take care of this limited number of people. I understand less than 100 people would be covered by my amendment. On the other hand, I believe they are entitled to justice, too.

Exhibit 1

On page 3, line 14, immediately after "products" insert "and certain fish or wildlife trophies".

On page 4, line 6, strike out "two".

On page 6, line 2, immediately after "paragraph" insert "or paragraph (5)".

On page 6, line 3, strike out "this" and insert "any such".

On page 6, line 6, strike out "this" and insert "any such".

On page 6, between lines 8 and 9, insert the following:

"(5)(A) The Secretary may grant, under such terms and conditions as he may prescribe, exemptions to the prohibition in clause (A) of section 9(a)(1) of this Act to any person holding any fish or wildlife as a trophy, if such fish or wildlife was lawfully held by such person on the date immediately preceding December 28, 1973.

"(B) Any person seeking an exemption under subparagraph (A) of this paragraph shall—

> "(i) submit to the Secretary within one hundred and twenty days after the effective date of this paragraph a complete and detailed inventory of all such fish or wildlife held as trophies by such person;
>
> "(ii) apply to the Secretary in writing, in such form or manner as the Secretary may designate, for such exemption; and
>
> (iii) supply the Secretary with such records, reports, and other documents to show that such holdings for which the exemption is being sought were legally acquired in accordance with the requirements of subparagraph (A) of this paragraph.

"(C) The Secretary shall grant an exemption pursuant to this paragraph only for the holdings reported in such inventory required under subparagraph (B)(i) of this paragraph, except that notwithstanding subparagraph (B)(i) of this paragraph, the Secretary may, for good cause shown, extend, on a case-by-case basis, the time for filing such inventory for such period as he may determine to be reasonable, but in no event for a period in excess of the twelve-month period following the date of the enactment of this subparagraph."

On page 6, line 9, strike out "(5)" and insert "(6)".

On page 6, line 15, immediately before the period insert a comma and the following: "and any trophy referred to in paragraph (5)".

On page 6, line 19, immediately after "(4)" insert "or (5)".

On page 6, line 24, immediately after "mammals" insert "and trophies under paragraph (5),".

Mr. **Bentsen**. Mr. President, the Scrimshaw Art Preservation Act of 1975 is an important measure that will correct a serious oversight and injustice in the Endangered Species Act of 1973. S. 229 is designed to allow the many individuals who have large quantities of lawfully acquired carved whale bone and teeth to take their products to market. The Congress took a significant step toward meeting its rsponsibilities to preserve and protect the valuable and irreplaceable resource of marine life when it passed the Marine Mammal Protection Act of 1972. The act prohibited the importation and sale of parts and products of marine mammals in interstate and foreign commerce and clearly established legal protections to prevent the slaughter of such mammals as the whale and the dolphin. Significant in the Marine Mammal Protection Act is a provision that its prohibitions do not apply to marine mammals that were taken before the December 21, 1972 effective date of the act. The Endangered Species Act of 1973 added further protections by preventing the importation and sale of the parts and products of any animals placed on the endangered species list, but without respect to the time at which the animals were taken. The result has been that while products of marine mammals taken before December 21, 1972, were legally transported and sold under the 1972 protection act, dealers in products made from animals subsequently placed on the endangered species list, are now prevented from selling their products made from legally obtained materials. The whale is one of those animals that now appears on the endangered species list.

The art of scrimshaw carving in whalebone and teeth, is an ancient and respected art that is threatened by the oversight in the passage of the 1973 Endangered Species Act. The artisans and dealers of scrimshaw possess substantial inventories of legally acquired whalebone and teeth used in their craft, but they are prohibited from marketing the finished products. The Scrimshaw Art Preservation Act of 1975, S. 229, will allow the Secretary of Commerce to grant exemption for the sale and shipment of scrimshaw and scrimshaw products. This amendment to the Endangered Species Act will alleviate the substantial and unintended financial hardship currently experienced by scrimshaw artisans and dealers. The exemptions would not encourage continued slaughter of the whale, because they would apply only to finished products. S. 229 creates an elaborate reporting procedure that requires the Secretary of Commerce to determine positively that the raw materials were acquired legally before the effective date of the Marine Mammal Protection Act. S. 229 also places a firm time limitation on the extension of the allowed exemptions. Under the bill, the Secretary of Commerce may allow wholesale shipment and sale of finished scrimshaw products for a period of 2 years following passage of the act. The period for retail sale for the personal use of finished scrimshaw is 7 years. These time limitations make it clear that the purpose of this legislation is to allow scrimshaw dealers to move their presently held inventories of these products.

The art of scrimshaw was developed in the early days of our Nation's history by New England whalers who carved figures from and designs in whalebone and teeth to pass the long months at sea away from home. The popularity of scrimshaw grew from a pastime on whaling expeditions as the Nation expanded to the West. Today the art is practiced in the Pacific Northwest, the Southwest, Alaska, and

Hawaii. The traditional skills have been adapted to new methods and reflections of the culture and heritage of other regions beyond the original New England nautical motifs.

While other raw materials may be used for the scrimshaw art, most artisans have not had enough time to adapt their skills and methods to other media such as beef bone. As an important craft in the culture of many areas in our country, the art of scrimshaw should be given the opportunity to survive. The bill, S. 229, grants this opportunity.

In view of the cultural importance of this art and the financial hardship created through legislative oversight, I urge my colleagues to vote in favor of the Scrimshaw Art Preservation Act.

Mr. Brooke. Mr. President, this legislation is designed to allow trade in antique scrimshaw work to continue while assuring that no living whales will face any danger. When the 93d Congress enacted the Endangered Species Act a technical error prohibited interstate commerce in scrimshaw art. Many of our antique dealers were left with old and valuable pieces of scrimshaw art of which they could not dispose. These antiquarians are themselves firm environmentalists who would not for an instant tolerate any contemporary killing of the world's remaining whales; they deserve to be able to carry on their trade in examples of this art form which, under our new laws, is a thing of history.

Both Senator Kennedy and I worked hard for the passage of both the Marine Mammal Protection Act of 1972 and the Endangered Species Act of 1973. Our commitment to the preservation of the whale is total and unswerving. This legislation admits no possibility of changing or violating the moratorium on whale killing which is in effect, I hope, indefinitely. Neither the Marine Mammal Protection Act nor the Endangered Species Act is in any way weakened or threatened by this proposal. In fact, it simply makes the 1973 act technically consistent with the Marine Mammal Protection Act by permitting the trade of antique scrimshaw pieces. There is no way in which this objective is in conflict with protection of living whales, nor would I tolerate any move which did in fact endanger this, or any other, species.

I trust my colleagues will enact this relief for our antique dealers without delay.

Mr. Moss. Mr. President, I yield back the remainder of my time.

Mr. Stevens. Mr. President, I yield back the remainder of my time.

Mr. Moss. Mr. President, if there are no further amendments, I ask for third reading of the bill.

The Acting President pro tempore. The bill is open to further amendment. If there be no further amendments to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The Acting President pro tempore. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed as follows:

S. 229

AN ACT To amend the Endangered Species Act of 1973 to assure the perpetuation of the art of scrimshaw, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Scrimshaw Art Preservation Act of 1975".

SEC. 2. (a) The Congress finds and declares that—

(1) All forms of art and culture which reflect this Nation's heritage should be preserved, as the United States prepares for its bicentennial year.

(2) Scrimshaw is an art form which was developed during the Nation's early years by New England whalers and others; it has been practiced by skilled American craftsmen and artisans ever since.

(3) The perpetuation of this part of the culture and heritage of the United States is threatened by the prohibition enacted in 1973 against the marketing of whale bone and teeth.

(b) It is the purpose of the Congress in this Act to exempt scrimshaw and scrimshaw products from the prohibitions of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

SEC. 3. Section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532) is amended by (1) redesignating paragraphs "(10)" through "(16)" thereof as paragraphs "(11)" through "(17)" thereof; and (2) by inserting therein the following new paragraph:

"(10) The term 'scrimshaw' means an art from which involves the etching or engraving of designs upon, or the carving of figures, patterns, or designs from, the bones and teeth of marine mammals of the order Cetacea."

SEC. 4. Section 10(b) of the Endangered Species Act of 1973 (16 U.S.C. 1539 (b)) is amended by adding at the end thereof the following two new paragraphs:

"(4)(A) The Secretary of Commerce may exempt persons from the prohibitions contained in subparagraphs (E) and (F) of section 9(a)(1) of this Act—

"(i) with respect to the wholesale movement or sale of finished scrimshaw products, if such products or the raw materials for such products were held lawfully within the United States on December 21, 1972, except that no such exemption shall be granted or remain in effect more than two years after the date of enactment of this provision; and

"(ii) with respect to the retail sale of finished scrimshaw products for personal use by the purchasers thereof, if such products were held lawfully within the United States on December 21, 1972, except that no such exemption shall be granted or remain in effect more than seven years after the date of enactment of this provision. As used in this paragraph, the term 'lawfully' refers to the laws of the United States and to laws of the several States and political subdivisions thereof.

Any such exemption may be granted by such Secretary upon such terms and conditions as he shall prescribe, including, but not limited to, requiring such persons to register inventories; to maintain complete sales records; to permit duly authorized agents of such Secretary to inspect any such inventories and records; and to prepare and submit to such Secretary any reports requested by him.

"(B) Any person who seeks an exemption pursuant to any provision of subparagraph (A) of this paragraph shall—

"(i) submit to such Secretary, within one hundred and twenty days after the date of enactment of this paragraph, a complete and detailed inventory, in such form and manner as such Secretary shall prescribe, of the quantity of bone and teeth of marine mammals of the order Cetacea and of parts of and products from such bone and teeth, which are held or otherwise controlled by such person. The Secretary of Commerce shall grant an exemption pursuant to such subparagraph only for the holding reported in such inventories;

"(ii) apply to such Secretary for such exemption, in such form and manner and with such submissions as such Secretary shall prescribe; and

"(iii) submit to such Secretary sales records, reports, and other documents and materials, to the extent reasonably necessary to establish that the holdings with respect to which an exemption is sought were acquired in accordance with the subparagraph (A).

"(C) There shall be a rebuttable presumption, in any action brought under this Act for a violation of a provision of section 9(a) of this Act, that no exemption authorized by this paragraph is applicable. Any person who claims the benefit of any exemption granted pursuant to this paragraph shall have the burden of rebutting such presumption in such an action. Regulations promulgated by the Secretary of Commerce with respect to exemptions pursuant to this paragraph shall be effective on the date of final publication, notwithstanding any other provisions of this Act.

"(5) Within one hundred and twenty days after the date of enactment of this paragraph, the Secretary of the Interior, the Secretary of Commerce, and the Secretary of the Treasury shall establish an interagency task force to enforce the provisions of this Act applicable to the bone and teeth of marine mammals of the order Cetacea and parts of and products from such bone and teeth. This task force shall act in addition to, and not in lieu of, existing enforcement activities, and shall concentrate its activities in those regions and areas which are most susceptible to unlawful activity as a result of exemptions granted under paragraph (a) of this subsection. The Secretaries of the Interior, Commerce, and the Treasury shall report jointly to the Congress and the President, within twelve months after the date of enactment of this paragraph, on the extent to which the provisions of this Act have been violated with respect to the bone and teeth of such mammals and with respect to the effectiveness of this task force in preventing such violations.".

The title was amended so as to read:

A bill to amend the Endangered Species Act of 1973 to assure the perpetuation of the art of scrimshaw and for other purposes.

[From the Congressional Record, June 24, 1976]

SENATE CONCURRENCE IN HOUSE AMENDMENTS TO S. 229, WITH AMENDMENTS

SCRIMSHAW ART PRESERVATION ACT OF 1975

Mr. FORD. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 229.

The ACTING PRESIDENT pro tempore (Mr. Proxmire) laid before the Senate the amendments of the House of Representatives to the bill (S. 229) to amend the Endangered Species Act of 1973 to assure the perpetuation of the art of scrimshaw, and for other purposes, as follows:

Strike out all after the enacting clause, and insert: That section 4(f)(2)(B)(ii) of the Endangered Species Act of 1973 (16 U.S.C. 1533(f)(2)(B)(ii)) is amended by striking out "subsection (b)(A), (B), and (C)" and inserting in lieu thereof "subsection (b)(1)(A)".

SEC. 2. Section 10 of the Endangered Species Act of 1973 (16 U.S.C. 1539) is amended by adding at the end thereof the following new subsections:

"(f)(1) As used in this subsection—

"(A) The term 'pre-Act endangered species part' means—

"(i) any sperm whale oil which was lawfully held within the United States on December 28, 1973, in the course of a commercial activity; or

"(ii) any finished scrimshaw product, if such product or the raw material for such product was lawfully held within the United States on December 28, 1973, in the course of a commercial activity.

"(B) the term 'scrimshaw product' means any art form which involves the etching or engraving of designs upon, or the carving of figures, patterns, or designs from, any bone or tooth of any marine mammal of the order Cetacea.

"(2) The Secretary, pursuant to the provisions of this subsection, may exempt, if such exemption is not in violation of the Convention, any pre-Act endangered species part from one or more of the following prohibitions:

"(A) The prohibition on exportation from the United States set forth in section 9(a)(1)(A) of this Act.

"(B) Any prohibition set forth in section 9(a)(1)(E) or (F) of this Act.

"(3) Any person seeking an exemption described in paragraph (2) of this subsection shall make application therefor to the Secretary in such form and manner as he shall prescribe, but no such application may be considered by the Secretary unless the application—

"(A) is received by the Secretary before the close of the one-year period beginning on the date on which regulations promulgated by the Secretary to carry out this subsection first take effect;

"(B) contains a complete and detailed inventory of all pre-Act endangered species aparts for which the applicant seeks exemption;

"(C) is accompanied by such documentation as the Secretary may require to prove that any endangered species part or product claimed by the applicant to be a pre-Act endangered species part is in fact such a part; and

"(D) contains such other information as the Secretary deems necessary and appropriate to carry out the purposes of this subsection.

"(4) If the Secretary approves any application for exemption made under this subsection, he shall issue to the applicant a certificate of exemption which shall specify—

"(A) any prohibition in section 9(a) of this Act which is exempted;

"(B) the pre-Act endangered species parts to which the exemption applies;

"(C) the period of time during which the exemption is in effect, but no exemption made under this subsection shall have force and effect after the close of the three-year period beginning on the date of issuance of the certificate; and

"(D) any term or condition prescribed pursuant to paragraph (5) (A) or (B), or both, which the Secretary deems necessary or appropriate.

"(5) The Secretary shall prescribe such regulations as he deems necessary and appropriate to carry out the purposes of this subsection. Such regulations may set forth—

"(A) terms and conditions which may be imposed on applicants for exemptions under this subsection (including, but not limited to, requirements that applicants register inventories, keep complete sales records, permit duly authorized agents of the Secretary to inspect such inventories and records, and periodically file appropriate reports with the Secretary); and

"(B) terms and conditions which may be imposed on any subsequent purchaser of any pre-Act endangered species part covered by an exemption granted under this subsection; to insure that any such part so exempted is adequately accounted for and not disposed of contrary to the provisions of this Act. No regulation prescribed by the Secretary to carry out the purposes of this subsection shall be subject to section 4(f)(2)(A)(i) of this Act.

"(g) In connection with any action alleging a violation of section 9, any person claiming the benefit of any exemption or permit under this Act shall have the burden of proving that the exemption or permit is applicable, has been granted, and was valid and in force at the time of the alleged violation.".

Sec. 3. Section 10 of the Endangered Species Act of 1973 (16 U.S.C. 1539) is further amended—

(1) by striking out "subsection" in the first sentence of subsection (c) thereof and inserting in lieu thereof "section"; and

(2) by striking out the period at the end of the second sentence of subsection (c) thereof and inserting in lieu thereof the following: "; except that such thirty-day period may be waived by the Secretary in an emergency situation where the health or life of an endangered animal is threatened and no reasonable alternative is available to the applicant, but notice of any such waiver shall be published by the Secretary in the Federal Register within ten days following the issuance of the exemption or permit.".

Sec. 4. Section 11(e)(3) of the Endangered Species Act of 1973 (16 U.S.C. 1540(e)(3)) is amended—

(1) by insertinng immediately before the words "execute and serve any arrest warrant," in the second sentence thereof the following: "make arrests without a warrant for any violation of this Act if he has reasonable grounds to believe that the person to be arrested is committing the violation in his presence or view, and may"; and

(2) by striking out the period at the end thereof and inserting in lieu thereof the following: ", but upon forfeiture of any such property to the United States, or the abandonment or waiver of any claim to any such

property, it shall be disposed of (other than by sale to the general public) by the Secretary in such a manner, consistent with the purposes of this Act, as the Secretary shall by regulation prescribe.".

SEC. 5. Paragraph (1) of section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532(1)) is amended by striking the period and inserting in lieu thereof ": *Provided, however*, That it does not include exhibition of commodities by museums or similar cultural or historical organizations.".

Amend the title so as to read: "An Act to amend the Endangered Species Act of 1973 in order to permit the disposal of certain endangered species products and parts lawfully held within the United States on the effective date of such Act."

Mr. FORD. Mr. President, I understand that these amendments have been agreed to on both sides and all those who are interested have agreed to them.

Mr. President, the Senate and the House have approved differing versions of S. 229, which would create exemptions from certain trade prohibitions contained in the Endangered Species Act of 1973. The House version is now at the desk. In further amending the bill slightly and sending it back to the House, we will expedite the ultimate enactment of the legislation and clarify some of its provisions.

The Endangered Species Act was enacted to prohibit the importation and sale in interstate and foreign commerce, of any endangered species of animal or plant, or their parts and products. Congress had earlier enacted the Marine Mammal Protection Act on October 21, 1972 which contained such prohibitions with respect to species of marine mammals only.

The Marine Mammal Protection Act expressly provides that the interstate trade prohibitions do not apply to marine mammals taken prior to December 31, 1972, the effective date of the act. However, the Endangered Species Act contains no such "grandfather" clause. This discrepancy has resulted in the application of the Endangered Species Act prohibitions to marine mammal parts and products otherwise legally held or taken under the Marine Mammal Protection Act.

To remedy this situation with respect to scrimshaw, an art form using whale bone and teeth, the Senate Committee on Commerce approved, and the Senate passed S. 229. This bill would authorize the Secretary of Commerce, who administers the Endangered Species Act with respect to whales, to grant exemptions for a limited period of time for the sale of finished scrimshaw products in interstate commerce. This would permit scrimshaw artisans, known as scrimshanders, sufficient time both to dispose of their present inventories and to adapt their art to a new medium, without encouraging endless trade in whale products.

In its deliberations on the Senate-passed bill, the House Merchant Marine and Fisheries Committee expanded S. 229 to include additional authority for issuing exemptions for legally held sperm whale oil. The exemption for sperm whale oil was deemed necessary to allow those who legally held this oil on December 31, 1972, to dispose of it. This includes the General Services Administration which holds approximately 23,400,000 pounds of sperm whale oil in the national stockpile as well as several private companies. The committee also made several other minor changes in the Endangered Species Act at the request of the Interior Department to improve administration and enforcement of the act.

During a recent oversight hearing on the Endangered Species Act held by the Senate Commerce Committee, three minor modifications to the House-passed bill were suggested. Rather than going to conference, however, we can expedite the entire process by sending the amended bill back to the House for its expected early approval. By taking this course we would also avoid any potential "scope of conference" problems that might be encountered in a conference with respect to the inclusion of the amendments.

The first amendment simply clarifies that the exemption for sperm whale oil applies to derivatives of this substance as well, including, for instance, spermacetti which is used by pharmeceutical companies as an ingredient in lotions, cosmetics, and the like. While this is the intent of the House version, it is desirable to make this absolutely clear.

The second amendment responds to a request by the General Services Administration that the validity of the contracts entered into by GSA with private companies for the disposal of the Nation's stockpile of sperm whale oil be made clear. This provision would not, however, legalize trade that took place in this material prior to enactment of S. 229.

The third amendment speaks to the effect which enactment of S. 229 would have on the enforcement of the existing Endangered Species Act prohibitions. The Department of Commerce has been enforcing these prohibitions, and sanctions have been applied in several cases. In addition, investigations are presently underway in connection with both civil and criminal violations of the act by persons dealing in scrimshaw and sperm whale oil. The purpose of this amendment is to resolve any uncertainty regarding previous enforcement actions or on-going investigations. The amendment simply states that nothing in S. 229 shall be constructed to, first, exonerate any person for any act committed, prior to the date of enactment of S. 229, in violation of the provisions for which exemptions are being granted, or second, to immunize any person from prosecution for any such act.

The effect of S. 229 with these amendments will be to allow the interstate sale of legally held scrimshaw and sperm whale oil, but to preserve the right to prosecute persons who have violated existing provisions of the Endangered Species Act by trading in these whale products previous to these exemptions. The Commerce Committee is particularly concerned that persons who willfully ignored the act's provisions be subject to prosecution.

In its report on S. 229. the committee made clear that this would be a one-time exemption which would by no means encourage an endless trade in products of endangered species. I would like to reiterate that point at this time and assure my colleagues in the Senate that enactment of S. 229 and these amendments will in no way pose a threat to the living whale population.

With this assurance, I urge the adoption of the amendments.

Mr. President, I move that the Senate concur in the House amendment with two amendments which I send to the desk.

The ACTING PRESIDENT pro tempore. The amendments will be stated.

The assistant legislative clerk read as follows:

The Senator from Kentucky (Mr. Ford), for himself and Mr. Magnuson, proposes unprinted amendment No. 84:

Section 2 of the House amendment to the Senate bill is amended as follows:

Amend subsection 10(f)(1)(A)(i) by inserting after the term "sperm whale oil" the term ", including derivatives thereof,".

Section 2 of the House amendment to the Senate bill is amended as follows:

Amend subsection 10(f) by inserting at the end of paragraph (5) the following two new paragraphs:

"(6)(A) Any contract for the sale of pre-Act Endangered Species parts which is entered into by the Administrator of General Services prior to the effective date of this subsection and pursuant to the notice published in the Federal Register on January 9, 1973 shall not be rendered invalid by virtue of the fact that fulfillment of such contract may be prohibited under subsection 9(a)(1)(F).

"(B) In the event that this paragraph is held invalid, the validity of the remainder of the Act, including the remainder of this subsection, shall not be affected.

"(7) Nothing in this subsection shall be construed to—

"(A) exonerate any person from any act committed in violation of paragraphs (1)(A), (1)(E), or (1)(F) of section 9(a) prior to the date of enactment of this subsection; or

"(B) immunize any person from prosecution for any such act."

Mr. KENNEDY. Mr. President, I wish to thank the Commerce Committee Subcommittee on Environment and its most distinguished chairman, Senator Phil Hart, for the time and effort they have given to consideration of this legislation which I introduced to preserve the art of scrimshaw. I am particularly grateful to the staff members of the subcommittee, specially Kathi Korpon, for their work in refining this legislation to insure that our absolute commitment to end the slaughter of whales is in no way weakened by this amendment to the Endangered Species Act.

The legislation we act on today will permit the sale and shipment in interstate commerce of scrimshaw products for a limited period of time, 3 years, and under conditions which guarantee that no illegally obtained whale products are introduced into commercial activity.

It is particularly appropriate as we celebrate the Bicentennial that we preserve those art forms which reflect our unique heritage and culture. The noted author and scrimshaw expert E. Norman Flayderman points out:

> American whaling days are gone forever. Although the era can never be relived, the intriguing artifacts that remain are highly significant reminders of a wonderful era of our past that succeed in catching the spirit of a magnificent and departed period.

President Kennedy reflected that scrimshaw "tells us a very important part of our lives—our lives at sea." And it was President Kennedy's own collection of scrimshaw that reminded so many Americans of an exciting and courageous period in our history.

This legislation will allow our hundreds of scrimshaw artists sufficient time to learn their art on new materials. These artists are etching on beef bone and synthetic materials now in an effort to find a readily available material for their work. It will allow museums and collectors an opportunity to obtain scrimshaw products for their collections that are only available in states other than their own.

Most importantly, this bill will assure that this Nation's commitment to stop the killing of whales is in no way jeopardized. Any person seeking an exemption must establish that the whale products were taken legally. These inventories of legally held products will assist the Department of Commerce in their efforts to enforce provisions of the

Endangered Species Act to end the smuggling of illegally taken products.

We owe a special debt of gratitude to the environmental and animal protection groups, particularly representatives of the Fund for Animals who gave us so much of their time and their valuable suggestions to insure that this legislation did not weaken the Endangered Species Act and who helped us strengthen provisions to enforce compliance with the law to end activity in illegally taken teeth and whale bone. Without their help we would not have been able to develop the legislation we act on today reflecting both our commitment to end the killing of whales and our commitment to preserve scrimshaw as an American art form.

Any legislation which amends the Endangered Species Act, a law universally recognized as the strongest and most effective legislation in protecting animals in danger of extinction, must be carefully and thoughtfully drawn to assure that the Congress commitment to the protection of endangered animals is not diminished. The amendment we approve today has been under consideration for a year and a half, has been the subject of public hearings, and has had the most valuable input of the animal protection groups. As a result we were able to draft this amendment to the Endangered Species Act which reaffirmed and strengthened the resolve of the Congress to protect the whale.

Mr. President, I share with my colleagues in the Senate a deep sense of regret that the slaughter of the sperm whale continues in record numbers even today. The largest quota permitted for the world's whaling nations is for the killing of the sperm whale. The United States is absolutely committed to end the whale slaughter and we renew our efforts to encourage other nations to follow our lead.

We are all too familiar with the pattern which recognizes the danger to our marine mammals and wildlife only after it is too late. I again assure all those citizens who have worked so hard to end the killing of the sperm whale that they have my strongest support. And I am hopeful that we in the Congress, working together with these citizens, can be successful in protecting the sperm whale for generations to come.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion to concur in the House amendment with the Senate amendments.

The motion was agreed to.

[From the Congressional Record, July 1, 1976]

S. 229 PRESENTED TO THE PRESIDENT

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that today, July 1, 1976, he presented to the President of the United States the following enrolled bills:

S. 299. An act to amend the Endangered Species Act of 1973 in order to permit the disposal of certain endangered species products and parts lawfully held within the United States on the effective date of such Act.

[From the Congressional Record, July 19, 1976]

S. 229 Signed Into Law (Public Law 94–359)

Approval of Bills and Joint Resolutions

A message from the President of the United States announced that he has approved and signed the following bills and joint resolutions:

* * * * * * *

On July 12, 1976:

S. 229. An act to amend the Endangered Species Act of 1973 in order to permit the disposal of certain endangered species products and parts lawfully held within the United States on the effective date of such Act.

Annotated Bibliography of Hearings

U.S. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment. Fish and Wildlife Misc., Part 5, 1974. Washington, U.S. Print Off., 1974. 228 p. "Serial no. 93–46."

Continuation of hearings on miscellaneous fish and wildlife conservation proposals, including briefing on implementation of Endangered Species Act of 1973. Includes correspondence throughout.

Hearing on Nov. 22, 1974 includes testimony from L. A. Greenwalt (FWS), J. W. Gehringer (NMF).

U.S. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment. Whaling, Whale Oil, and Scrimshaw. Hearings, 94th Congress, 1st session. May 13, 14, June 9, 10, 13, 1975. Washington, U.S. Govt. Print. Off., 1975 p. "Serial No. 94–7."

Hearings on legislation relating to the protection of whales. June 9, 10 hearings consider the following bills to provide exemptions to the Endangered Species Act of 1973:

H.R. 3465, authorizing disposal of sperm oil from the national stockpile.

H.R. 2057, to exempt stocks and inventories of whale bones and teeth acquired prior to 1973 from prohibitions under the Endangered Species Act of 1973. Also considers similar S. 229.

Includes submitted statements, correspondence, reports, and "Economic Impact of Suggested Options for Import Sanctions Against Countries Disregarding the Conservation Measures of the International Convention for the Regulation of Whaling" by CRS.

June 9 witnesses include: C. A. Mosher (Rep. Ohio), T. M. Thawley (GSA), A. S. Bistritsky (Scandinavian Oil Co., W. Meckes (Werner G. Smith Co.).

June 10 witnesses include: A. Wickham, (Friends of the Earth), C. Stevens (Society for Animal Protection Legislation) C. E. Koury (Fund for Animals), M. M. Kaufman (Let Live, Inc.), J. Risk (Animal Proection Inst), M. A. Lipman (New Bedford, Mass., Area Scrimshanders), E. U. C. Bohlen (FWS), J. W. Gehringer (NMFS).

U.S. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment. Endangered Species Oversight. Hearings, 94th Congress, 1st session. Oct. 1, 2, 6, 1975. Washington, U.S. Govt. Print. Off., 1975. 367 p. Implementation and Administration of the Endangered Species Act and its amendments, and to review the problems and issues encountered. Serial No. 94–17.

Hearings on implementation of Endangered Species Act of 1973 provisions prohibiting interstate or foreign commerce in endangered animals of destruction of their critical habitats and of the Convention on International Trade in Endangered Species of Wild Fauna and Flora of 1975.

Oct. 2 and Oct. 6 hearings include informal sessions with participation by members of the audience. Earl Baysinger (FWS) participates in discussions; George Steele (Zoological Actions Committee), Bruce MacBride, Peter Kelsey (Solicitor, Interior Dept.), Ruby Compton (Natural Resource Defense Council), and Gerard Bertrand (CEQ) participate in questioning of Federal agency witnesses during the Oct. 6 hearings.

Supplementary material includes submitted statements, articles, correspondence, and a list of faunal and floral taxa which Interior Dept. has been petitioned to add to endangered or threatened species' list.

Hearing on October 1 includes testimony from L. A. Greenwalt (FWS), K. M. Schreiner (Dept. of Interior), C. R. Bavin (Dept. of Interior), J. W. Gehringer (NMFS), L. M. Talbot (CEQ).

Hearing on October 2 includes testimony from R. K. Yancey (La. Wildlife and Fisheries Commission), J. E. Poser (Amer. Fur. Merchants Assn.), K. L. Newman (Archer-Daniels-Midland Co.).

Hearing on October 3 includes testimony from R. Bitely (Intl. Assn. of Game, Fish and Conservation Commrs.), T. D. Jarvis (Natl. Parks and Conservation Assn.).

Hearing on October 6 includes testimony from: L. A. Greenwalt (FWS).

Testimony from wildlife conservation groups includes: J. W. Grandy (Defenders of Wildlife, Sierra Club, N.Y. Zoological Soc. and Animal Protection Inst.), C. Stevens (Society for Animal Protective Legislation), L. Regenstein (Fund for Animals), D. A. Poole (WMI), M. M. Kaufmann (Monitor, Inc., Let Live, Inc.).

Testimony from captive animal owners includes: J. T. Wilds (Natl. Congress of Animal Trainers and Breeders), L. D. Harris (Circus Fans Assn.), G. E. Steele (Zoological Actions Committee), G. S. Lentz (Busch Gardens), K. J. Feld (Ringling Bros.-Barnum and Bailey Combined Shows), R. Thrun (general counsel), P. Quinn (Lion Country Safari), U. Seal (Minn. Zoological Garden and Amer. Assn. of Zoological Parks and Aquariums), R. O. Wagner (Amer. Assn. of Zoological Parks and Aquariums), W. P. Braker (Shedd Aquarium), C. L. Bieler (San Diego Zoo), T. Hunt (Zoological Animal Suppliers), F. S. Todd (Sea World, Inc.).

PART III

LEGISLATIVE HISTORY OF 1977 AMENDMENTS TO THE ENDANGERED SPECIES ACT

ENDANGERED SPECIES ACT, SECTION 6, EXTENSION OF APPROPRIATION AUTHORIZATION, PUBLIC LAW 95-212

BACKGROUND

The purpose of this legislation was to extend authorization for the Federal grant-in-aid programs (to the States), established by the ESA of 1973. Section 6 of the Act provides Federal assistance for state conservation programs which meet specific requirements. Under the original provisions of the Act, a number of states failed to qualify for section 6 funds because their state fish and wildlife agency did not possess the authority to provide blanket protection for any species listed as endangered or threatened by the Secretary of the Interior. Such agencies, instead, had authority to protect only certain categories of species, such as vertebrates, rather than all species. This amendment allow states to qualify for cooperative agreements if they satisfy some of the original requirements and have plans to devote immediate attention to those species most urgently in need of conservation programs.

Authorization for appropriations under section 6 expired on June 30, 1977. S. 1316 was introduced by Mr. Culver on April 29. 1977 and referred to the Committee on Environment and Public Works. The bill was reported to the Senate from the Committee with amendment on May 16, 1977 (S. Rept. 95-186). Hearings held by the Subcommittee on Resource Protection on April 21, 1977 (Serial 95-H19) included testimony from the National Marine Fisheries Service, International Association of Fish and Wildlife Agencies, and the Fish and Wildlife Service, all of which indicated the importance of state participation in endangered species management, and indicated strong support for reauthorization of section 6.

H.R. 4741, the predecessor bill to H.R. 6405, was introduced on March 9, 1977, by Mr. Leggett and cosponsored by Mr. Forsythe. The legislation was referred to the Departments of the Interior and Commerce for comment. The Subcommittee on Fisheries, Wildlife Conservation and the Environment held hearings on the legislation on March 22, 1977. The subcommittee received testimony from the Department of the Interior, the Department of Commerce, and the International Association of Fish and Wildlife Agencies. All of the witnesses appearing before the Subcommittee expressed support for continuing the authorization for the cooperative agreement section of the Act. The Department of Commerce witnesses indicated they were unable to take a position on the adequacy of the authorization for fiscal years 1979 and 1980 since they had not been allocated funds for section 6 in the President's fiscal year 1978 budget.

The witness from the International Association of Fish and Wildlife Agencies suggested an amendment to the bill to facilitate the development of cooperative agreements with the individual States. On March 30, 1977, the subcommittee adopted an amendment in the form of a substitute offered by Mr. Leggett and ordered a clean bill, H.R. 6405, reported to the full committee. On May 16, 1977, the Committee on Merchant Marine and Fisheries reported to the House H.R. 6405, without amendment (H. Rept. 95-333).

The Senate bill as reported out of Committee was a simple extension of the grant-in-aid program, providing $3 million for each fiscal year 1978 through 1980. The bill was amended on the floor to authorize a total of $12 million through fiscal year 1980, $9 million of which was for the Secretary of the Interior, and $3 million for use by the Secretary of Commerce. S. 1316 passed the Senate on May 25, 1977.

The House bill as reported out of Committee extended the authorization through fiscal year 1981 and provided a $16 million appropriation, which did not designate specific amounts for the two Secretaries. The House bill also contained language to facilitate qualification by the States for financial assistance under section 6 of the Endangered Species Act. The bill passed the House, unamended, on October 18, 1977. The measure was then laid on the table and S. 1316 was passed in lieu.

The Conference Committee adopted the House provisions for reauthorization of section 6 programs, and modified the qualifications for financial assistance to assure consistency with prohibitions set forth in other sections of the Act (S. Rept. 95-607). The final version of the bill authorized $10 million through September 30, 1977; and $16 million for the period beginning October 1, 1977, and ending September 30, 1981. An alternative set of requirements to be met by the States to qualify for financial assistance did not require a State conservation agency to have the authority to conserve all resident threatened or endangered species. The agency, however, requested plans to devote immediate attention to those species most urgently in need of conservation programs. An additional provision guaranteed the continued enforcement of certain prohibitions regarding the taking of resident endangered or threatened species when a cooperative agreement is entered into. The Senate agreed to the conference report on November 29, 1977. House agreement occurred on November 30, 1977. The bill was signed into law (Public Law 95-212) on December 19, 1977.

CHRONOLOGY—PUBLIC LAW 95-212

April 20, 1977—H.R. 6405 introduced and referred to House Committee on Merchant Marine and Fisheries.

April 20, 1977—S. 1316 introduced and referred to Senate Committee on Environment and Public Works.

May 16, 1977—H.R. 6405 reported to House by the Committee on Merchant Marine and Fisheries, H. Rept. 95-333.

May 16, 1977—S. 1316 reported to Senate, with amendment, by the Committee on Environment and Public Works, S. Rept. 95–186.

May 25, 1977—S. 1316 passed Senate, amended.

October 18, 1977—H.R. 6405 passed House.

October 18, 1977—S. 1316 passed House, amended, in lieu of H.R. 6405.

November 29, 1977—Senate agreed to conference report, S. Rept. 95–607.

November 30, 1977—House agreed to conference report, H. Rept. 95–823.

December 7, 1977—S. 1316 presented to the President.

December 12, 1977—S. 1316 signed into law (Public Law 95–212).

Public Law 95-212
95th Congress

An Act

To authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973.

Dec. 19, 1977
[S. 1316]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6 of the Endangered Species Act of 1973 (16 U.S.C. 1535) is amended—

Endangered Species Act of 1973, amendment.
Cooperative agreements.

(1) by striking out the period at the end of subsection (c) and inserting in lieu thereof "; or", and by adding at the end of such subsection the following:

"that under the State program—

"(A) the requirements set forth in paragraphs (3), (4), and (5) of this subsection are complied with, and

"(B) plans are included under which immediate attention will be given to those resident species of fish and wildlife which are determined by the Secretary or the State agency to be endangered or threatened and which the Secretary and the State agency agree are most urgently in need of conservation programs; except that a cooperative agreement entered into with a State whose program is deemed adequate and active pursuant to subparagraph (A) and this subparagraph shall not affect the applicability of prohibitions set forth in or authorized pursuant to section 4(d) or section 9(a)(1) with respect to the taking of any resident endangered or threatened species."; and

16 USC 1533.
16 USC 1538.

(2) by amending subsection (i) to read as follows:

Appropriation authorization.

"(i) Appropriations.—For the purposes of this section, there are authorized to be appropriated not to exceed the following sums:

"(1) $10,000,000 through the period ending September 30, 1977.

"(2) $16,000,000 for the period beginning October 1, 1977, and ending September 30, 1981.".

Approved December 19, 1977.

LEGISLATIVE HISTORY:

HOUSE REPORTS: No. 95-333 accompanying H.R. 6405 (Comm. on Merchant Marine and Fisheries) and No. 95-823 (Comm. of Conference).

SENATE REPORTS: No. 95-186 (Comm. on Environment and Public Works) and No. 95-607 (Comm. of Conference).

CONGRESSIONAL RECORD, Vol. 123 (1977):
May 25, considered and passed Senate.
Oct. 18, considered and passed House, amended, in lieu of H.R. 6405.
Nov. 29, Senate agreed to conference report.
Nov. 30, House agreed to conference report.

Union Calendar No. 170

95TH CONGRESS
1ST SESSION

H. R. 6405

[Report No. 95-333]

IN THE HOUSE OF REPRESENTATIVES

APRIL 20, 1977

Mr. LEGGETT (for himself, Mr. FORSYTHE, Mr. RUPPE, Mr. DE LA GARZA, Mr. BREAUX, Mr. MCCLOSKEY, Mr. BOWEN, Mr. AUCOIN, Mr. EMERY, Mr. OBERSTAR, Mr. HUGHES, Mr. TRIBLE, and Mr. AKAKA) introduced the following bill; which was referred to the Committee on Merchant Marine and Fisheries

MAY 16, 1977

Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

---

A BILL

To amend the Endangered Species Act of 1973 regarding the requirements for State cooperative programs thereunder and to authorize appropriations through fiscal year 1981 to carry out such programs.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6 of the Endangered Species Act of 1973 (16 U.S.C. 1535) is amended—

(1) by striking out the period at the end of subsection (c) and inserting in lieu thereof "; or", and by adding at the end of such subsection the following: "that under the State program—

"(A) the requirements set forth in paragraphs (3), (4), and (5) of this subsection are compiled with, and

"(B) plans are included under which immediate attention will be given to those resident species of fish and wildlife which are determined by the Secretary or the State agency to be endangered or threatened and which the Secretary and the State agency agree are most urgently in need of conservation programs."; and

(2) by amending subsection (i) to read as follows:

"(i) APPROPRIATIONS.—For the purposes of this section, there are authorized to be appropriated not to exceed the following sums:

"(1) $10,000,000 through the period ending September 30, 1977.

"(2) $16,000,000 for the period beginning October 1, 1977, and ending September 30, 1981.".

95TH CONGRESS } HOUSE OF REPRESENTATIVES { REPORT
1st Session } { No. 95-333

AUTHORIZATION OF SECTION 6 OF THE ENDANGERED SPECIES ACT OF 1973

MAY 16, 1977.—Committeed to the Committee of the Whole House on the State of the Union and ordered to be printed

Mr. MURPHY of New York, from the Committee on Merchant Marine and Fisheries, submitted the following

REPORT

[Including Cost of Estimate of the Congressional Budget Office]

[To accompany H.R. 6405]

The Committee on Merchant Marine and Fisheries, to whom was referred the bill (H.R. 6405) to amend the Endangered Species Act of 1973 regarding the requirements for State cooperative programs thereunder and to authorize appropriations through fiscal year 1981 to carry out such programs, having considered the same, report favorably thereon without amendment and recommend that the bill do pass.

PURPOSE OF THE LEGISLATION

The purpose of H.R. 6405 is to extend the authorization period for section 6 of the Endangered Species Act of 1973, and increase the authorized level of appropriations under Section 6 of the Act. In addition, the bill would amend section 6 of the Act to facilitate the development of cooperative endangered species programs with the individual States.

LEGISLATIVE BACKGROUND

H.R. 4741, the predecessor bill to H.R. 6405, was introduced on March 9, 1977 by Mr. Leggett and co-sponsored by Mr. Forsythe. The legislation was referred to the Departments of the Interior and Commerce for comments.

The Department of the Interior, in its report of March 25, 1977, strongly recommended enactment of the legislation if it was amended to conform with the Department's suggestions. The Department of the Interior suggested amending the bill to provide that the authorization for grant-in-aid in section 6(i) of the Endangered Species Act of 1973 be extended for four fiscal years at a total amount for all years not to exceed $12 million. H.R. 4741, as introduced, would provide for a three year authorization period and a ceiling on the authorization of appropriations for all three years of $9 million.

The Department of the Interior indicated that the amendment was needed in order to provide an incentive for other States to enter into the program and ultimately to return to the States authority for the management of resident endangered and threatened species.

The Subcommittee on Fisheries, Wildlife Conservation and the Environment held hearings on the legislation on March 22, 1977. The Subcommittee received testimony from the Department of the Interior, the Department of Commerce, and the International Association of Fish and Wildlife Agencies. All of the witnesses appearing before the Subcommittee expressed support for continuing the authorization for the cooperative agreement section of the Act. The Department of Commerce witnesses indicated that they were unable to take a position on the adequacy of the authorization for fiscal years 1979 and 1980 since they had not been allocated funds for section 6 in the President's fiscal year 1978 budget.

The witness for the International Association of Fish and Wildlife Agencies suggested an amendment to the bill to facilitate the development of cooperative agreements with the individual States. This proposal would amend section 6(c) of the Act to permit State endangered species programs to qualify for section 6(i) grant-in-aid funds if they satisfy the requirements of paragraphs (3), (4) and (5) of section 6(c) and if the Secretary finds that the State program includes plans to devote attention to resident endangered species of fish and wildlife most urgently in need of conservation programs. The bill, H.R. 6405, as ordered reported by the Committee included this amendment, with technical changes. This amendment is described further in the section-by-section analysis of this report.

The subcommittee gave careful consideration to the evidence presented at the hearings and the departmental reports. On March 30, 1977 the subcommittee adopted an amendment in the form of a substitute offered by Mr. Leggett and ordered a clean bill, H.R. 6405, reported to the full committee. On March 3, 1977, the Committee on Merchant Marine and Fisheries, by voice vote, unanimously reported to the House H.R. 6405, without amendment.

BACKGROUND AND NEED FOR THE LEGISLATION

The Endangered Species Act of 1973 was enacted to provide a program for the protection of endangered and threatened species, and the conservation of the ecosystems on which endangered and threatened species depend.

Section 6 of the Act establishes a mechanism for the development of cooperative endangered species programs with the individual States. Section 6 places the fundamental responsibility for establishing and overseeing an endangered species program in the Federal Government. However, section 6 mandates that the appropriate Secretary, depending upon the species involved, cooperate with the States in carrying out the endangered species program. The cooperation envisioned by section 6 includes consultation with the States concerned before acquiring any land or water under the Act, and the development of cooperative management agreements with States that establish an adequate and active program for the conservation of endangered and threatened species.

Section 6 resulted from the realization that the successful development of an endangered species program depended upon a good working arrangement between the Federal and States agencies. Although the Federal agencies have the broad policy perspective and authority to carry out the Act, the State agencies have the physical facilities and the personnel to see that State and Federal endangered species policies are properly executed.

Section 6 of the Act authorizes the Secretaries to provide financial assistance to any State which has entered into a cooperative agreement with the Federal agency under the terms of the Act. Such Federal financial assistance, however, cannot exceed 66⅔ percent of any State's estimated program cost. Federal funding can be increased to 75 percent when two or more States enter into a joint cooperative agreement with the Federal agency. Funds allocated to the States under section 6 remain available for two years. If the funds are unobligated after two years, the funds revert to the Secretary and can be allocated to other programs under section 6.

Section 6(i) of the Act authorizes to be appropriated $10 million for fiscal years 1974 through 1977. No money was appropriated under section 6(i) in fiscal year 1974 or fiscal year 1975; $2 million was appropriated to the Department of the Interior in fiscal year 1976, and $1 million in fiscal year 1977. In addition the President has requested a supplemental appropriation of $3 million in fiscal year 1977 for the Department of the Interior. This $3 million was included in the supplemental appropriation bill passed by the House on March 15, 1977 (H.R. 4877).

The Congress, in passing the Endangered Species Act of 1973, considered the State cooperative agreement program to be a vital element of the Act as a whole. Unfortunately, the development of cooperative agreements has developed much slower than originally hoped. To date, only 17 States have signed cooperative agreements with the Department of the Interior and have thereby qualified for grant-in-aid funds. The Department of Commerce has never entered into a cooperative agreement with an individual State largely because the Department has not been budgeted funds under section 6(i) of the Endangered Species Act.

Witnesses for the Department of Commerce indicated to the Committee that there are a number of endangered species under their jurisdiction that could be the subject of cooperative agreements with individual States. These witnesses also indicated that if cooperative agreements were signed with States regarding these species, some of the management duties now performed by the Federal Government could be accomplished by the State agencies.

The Committee feels that Department of Commerce activities under section 6 should now be funded. Accordingly, the Committee has included an additional $4 million in the authorization for Department of Commerce activities. The Department of Commerce has indicated to the Committee that this level of authorization will permit them to adequately establish and fund a cooperative agreement program over the next four years.

One of the greatest impediments to the development of an active cooperative agreement program has been the five requirements of section 6(c) necessary to be satisfied before a State qualified for grant-in-aid funds. A number of States are reluctant to enter into a cooperative agreement with the Federal Government because of the language of paragraphs (1) and (2) of section 6(c).

Paragraph (1) provides that before a State is eligible to receive Federal funds the Secretary must determine that the State agency has authority to conserve resident species of fish or wildlife determined by the Secretary to be endangered or threatened. Paragraph (2) requires the State agency to establish acceptable conservation programs for all resident endangered or threatened fish or wildlife which are deemed by the Secretary to be endangered or threatened. In essence, these paragraphs require States to provide blanket protection for any species listed as endangered or threatened by the Secretary.

A number of States have failed to qualify for section 6 funds because they have been unwilling to grant to their State agency the broad authority required by paragraphs (1) and (2) of section 6(c). The Committee feels that the requirements of section 6(c) should be modified to facilitate the development of cooperative agreements with the thirty-three States not now participating in the program. Some of the States not participating in a program with the Federal Government have a significant number of endangered and threatened species under their jurisdiction. The Committee believes that it is important that these States be brought into the program in order to properly preserve these species.

H.R. 6405 would satisfy the major objections raised by the States to the requirements of section 6(c). Under H.R. 6405, States could qualify for cooperative agreement funds if they satisfied the requirements of paragraphs (3), (4), and (5) of section 6(c) and if the State has plans to devote immediate attention to those species most urgently in need of conservation programs. The Department of the Interior has indicated that they are in support of this change in section 6(c).

Paragraph (3) of section 6(c) requires the State agency to be authorized to conduct investigations to determine the status and requirements for survival of resident species. Paragraph (4) requires the State agency to be authorized to establish programs for the consideration of resident endangered or threatened species. Paragraph (5) requires a finding that the State program provide for public participation in designating resident species as endangered or threatened.

Following is a list of States with cooperative agreements with the Federal Government under section 6 of the Endangered Species Act: Arkansas, California, Colorado, Delaware, Florida, Maine, Maryland, Michigan, Missouri, New Jersey, New Mexico, New York, South Carolina, South Dakota, Virginia, Washington and Wisconsin.

What the Legislation Does

The following is a section-by-section summary of H.R. 6405 accompanied by discussion where appropriate:

SECTION (1)

Section (1) would provide an alternative set of requirements to be satisfied by the individual States before they can qualify for Federal grant-in-aid funds under section 6 of the Endangered Species Act. The alternative requirements would be those listed in paragraphs (3), (4), and (5) of section 6(c) and that the State has plans under which immediate attention will be given to those resident species of fish and wildlife most urgently in need of conservation programs.

As explained in the background section of this report, this section is necessary to facilitate the development of cooperative endangered species programs with those States that are reluctant to grant broad authority to their State agency to conserve any resident species which may be determined by the Federal Government to be endangered or threatened.

SECTION (2)

Section (2) would amend section 6(i) of the Act to extend the authorization period from October 1, 1977 through September 30, 1981. This section would also establish a $16 million level of funding authorized to be appropriated during the four-year period.

The current authorization of appropriations under section 6(i) of the Act expires on September 30, 1977. As originally enacted, the Act authorized $10 million to be appropriated between 1974 and September 30, 1977.

Cost of the Legislation

In the event the legislation is enacted into law and the authorized funding is fully appropriated, the maximum cost to the Federal Government for fiscal years 1978 through 1981 would be $16 million.

Inflationary Impact Statement

Pursuant to clause 2(1) of Rule XI of the Rules of the House of Representatives, the Committee estimates that the enactment of H.R. 6405 would have no significant inflationary'impact on the prices and cost in the national economy.

Compliance With Clause 2(1)(3) of Rule XI

With respect to the requirements of clause 2(1)(3) of Rule XI of the Rules of the House of Representatives:

(A) No oversight hearings were held on the administration of this Act during this session of the Congress, beyond the one day of hearings on the predecessor legislation, H.R. 4741, held by the Subcommittee on Fisheries, Wildlife Conservation and the Environment on March 22, 1977. The Subcommitee does intend to hold oversight hearings on the administration of this act from time to time during the 95th Congress.

(B) The requirements of section 308(a) of the Congressional Budget Act of 1974 are not applicable to this legislation.

(C) The Committee on Government Operations has sent no report to the Committee on Merchant Marine and Fisheries pursuant to clause 2(b)(2) of Rule X.

(D) A letter was received from the Director of the Congressional Budget Office, pursuant to section 403 of the Congressional Budget Act of 1974 in reference to H.R. 6405 and follows herewith:

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., May 5, 1977.

Hon. JOHN M. MURPHY,
Chairman, Committee on Merchant Marine and Fisheries, U.S. House of Representatives, Longworth House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for H.R. 6405, a bill to amend the Endangered Species Act of 1973, regarding the requirements for State cooperative programs thereunder and to authorize appropriations through fiscal year 1981 to carry out such programs.

Should the committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ALICE M. RIVLIN, *Director.*

Attachment.

CONGRESSIONAL BUDGET OFFICE—COST ESTIMATE

MAY 5, 1977.

1. Bill number: H.R. 6405.
2. Bill title: To amend the Endangered Species Act of 1973 regarding the requirements for state cooperative programs thereunder and to authorize appropriations through fiscal year 1981 to carry out such programs.
3. Bill status: As reported by the House Committee on Merchant Marine and Fisheries.
4. Bill purpose: The purpose of the bill is to amend the Endangered Species Act of 1973 regarding the requirements for state cooperative programs and to authorize appropriation of $16 million for the period fiscal year 1978 through fiscal year 1981. This bill is authorizing legislation which requires subsequent appropriation action.
5. Budget impact:

	Millions
Fiscal year 1978:	
Authorization level	$16
Estimated costs	2
Fiscal year 1979:	
Authorization level	16
Estimated costs	3

	Millions
Fiscal year 1980:	
Authorization level	$16
Estimated costs	4
Fiscal year 1981:	
Authorization level	16
Estimated costs	5
Fiscal year 1982:	
Authorization level	0
Estimated costs	2

The costs of this bill fall in budget subfunction 303.

6. Basis for estimate: The authorization level is that stated in the bill. For the purpose of this estimate it is assumed that this legislation and the necessary fiscal year 1978 appropriation legislation will be enacted prior to fiscal year 1978. The estimated costs of this legislation are based on agency plans for this program at a $16 million authorization/appropriation level and historical spendout rates. The planned obligation level for this program would be: $3 million in fiscal year 1978; $3 million in fiscal year 1979; $5 million in fiscal year 1980; and $5 million in fiscal year 1981.
7. Estimate comparison: None.
8. Previous CBO estimate: None.
9. Estimate prepared by Terry Nelson (225-7760).
10. Estimate approved by:

C. G. Nuckols
(For James L. Blum,
Assistant Director for Budget Analysis).

DEPARTMENTAL REPORT

H.R. 4741, a predecessor of H.R. 6405, was the subject of a report from the Department of the Interior and follows herewith:

U.S. Department of the Interior,
Office of the Secretary,
Washington, D.C., March 25, 1977.

Hon. John M. Murphy,
Chairman, Committee on Merchant Marine and Fisheries, House of Representatives, Washington, D.C.

Dear Mr. Chairman: This responds to the request of your Committee for the views of this Department on H.R. 4741, a bill "To authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973."

We recommend the enactment of H.R. 4741, if it is amended as described herein.

H.R. 4741 amends section 6(i) of the Endangered Species Act to provide for an authorization of appropriations for grant-in-aids to States of $3,000,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980.

The Endangered Species Act of 1973 provided new and stronger authority for the Secretary of the Interior (and the Secretary of

Commerce) to prevent the extinction of species. That authority included a broader responsibility to list species that are subject to provisions of the Act and also strengthen the Secretary's ability to protect and manage the listed species to the point where they are restored and can be removed from the list. The goal of the endangered species program is to maintain a healthy diversity of species and to preserve in their natural ecosystems species of animals and plants that are endangered with extinction or threatened with endangerment. Wherever possible, the program seeks to restore such species to the point at which it is once again a viable component of its ecosystem. Further, insofar as possible, it is our intent to prevent other species from becoming endangered.

In order to implement activities aimed at accomplishing these goals, the Endangered Species Act provides in section 6(i) an authorization for grant-in-aid to States not to exceed $10 million for the first three years after enactment and a general authorization to carry out other provisions of the Act is contained in section 15. The section 6(i) authorization requires extension in order to provide grant funds to qualified States after fiscal year 1977. Section 15 funds do not expire until the close of fiscal year 1978.

The Endangered Species Act of 1973 contains a strong Federal commitment for closer coordination and cooperation with State fish and wildlife agencies than has been the case under the Endangered Species Preservation Act of 1966, as amended by the Endangered Species Conservation Act of 1969 and repealed by the 1973 Act. This commitment takes the form of cooperative agreements and a grant-in-aid program with the States in addition to cooperative development and execution of species recovery plans. Section 6 of the Act authorizes the Secretary to enter into cooperative agreements with the States to further the purpose of the Act. The grant-in-aid provisions of section 6 provide the means of accomplishing this cooperative approach to the management of endangered and threatened species. Only States that have entered into cooperative agreements with the Secretary are eligible for grant-in-aid.

To date 17 States have qualified for grant-in-aid funds and three more are imminent. Some 48 States have contacted the Fish and Wildlife Service for advice and assistance in reaching a cooperative agreement, and we anticipate signing 25 cooperative agreements in fiscal year 1978. The expertise, manpower and cooperation of the States are essential if we are to attain the goal of the Endangered Species Act of effecting the recovery of species. Federal financial assistance in this endeavor is essential.

In fiscal year 1976, $2,000,000 were appropriated to remain available until expended for grant-in-aid to the States. The fiscal year 1977 appropriation contained an additional $1,000,000. A supplemental request has been sent to Congress requesting an additional $3 million. Of the funds appropriated in fiscal year 1976, $1,165,000 were allocated to the following States: California, Colorado, Florida, South Carolina, Michigan, Maryland, New York, Missouri, Washington, Arkansas, Virginia, New Jersey, Delaware, Maine and Wisconsin. It is anticipated that all funds appropriated under this authorization will be obligated by September 30, 1977. Examples of the types of activities for which the funds are used by the States are: to acquire the critical habitat of the Morro Bay kangaroo rat; conduct peregrine falcon nesting success surveys; to develop a gate that will pass Indiana bats but prevent people from entering certain key bat caves; to accomplish bald eagle status surveys; and to propagate peregrine falcons for release into the wild.

In order to provide an incentive for other States to enter into the program and ultimately to return to the States authority for the management of resident endangered and threatened species, we recommend that H.R. 4741 be amended to provide that the authorization for grant-in-aid in section 6(i) of the Endangered Species Act be extended for four fiscal years at a total amount for all years not to exceed $12 million. Therefore, we recommend that H.R. 4741 be amended to delete lines 10–12, and insert in lieu thereof: "(2) for the fiscal year beginning October 1, 1977, through fiscal year 1981, there is authorized to be appropriated an amount not to exceed $12,000,000".

We urge enactment of H.R. 4741 as amended above in order to assure continuation beginning the fiscal year 1978 of programs aimed at preventing the continued decline of our living natural resources.

The Office of Management and Budget has advised that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

CECIL D. ANDRUS, *Secretary.*

CHANGES IN EXISTING LAW

In compliance with clause 3 of rule XIII of the Rules of the House of Representatives, as amended, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

SECTION 6 OF THE ENDANGERED SPECIES ACT OF 1973 (16 U.S.C. 1535; PUBLIC LAW 93–205)

SEC. 6. * * *

(c) COOPERATIVE AGREEMENTS.—In furtherance of the purposes of this Act, the Secretary is authorized to enter into a cooperative agreement in accordance with this section with any State which establishes and maintains an adequate and active program for the conservation of endangered species and threatened species. Within one hundred and twenty days after the Secretary receives a certified copy of such a proposed State program, he shall make a determination whether such program is in accordance with this Act. Unless he determines, pursuant to this subsection, that the State program is not in accordance with this Act, he shall enter into a cooperative agreement with the State for the purpose of assisting in implementation of the State program. In order for a State program to be deemed an adequate and active program for the conservation of endangered species and threatened species, the Secretary must find, and annually thereafter reconfirm such finding, that under the State program—

(1) authority resides in the State agency to conserve resident species of fish or wildlife determined by the State agency or the Secretary to be endangered or threatened;

(2) the State agency has established acceptable conservation programs, consistent with the purposes and policies of this Act, for all resident species of fish or wildlife in the State which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

(3) the State agency is authorized to conduct investigations to determine the status and requirements for survival of resident species of fish and wildlife;

(4) the State agency is authorized to establish program, including the acquisition of land or aquatic habitat or interests therein, for the conservation of resident endangered species or threatened species; and

(5) provision is made for public participation in designating resident species of fish or wildlife as endangered or threatened [.]*; or*

that under the State program—

(A) the requirements set forth in paragraphs (3), (4), and (5) of this subsection are complied with, and

(B) plans are included under which immediate attention will be given to those resident species of fish and wildlife which are determined by the Secretary or the State agency to be endangered or threatened and which the Secretary and the State agency agree are most urgently in need of conservation programs.

* * * * * * *

[(i) APPROPRIATIONS.—For the purposes of this section, there is authorized to be appropriated through the fiscal year ending June 30, 1977, not to exceed $10,00,000.]

(i) APPROPRIATIONS.—For the purposes of this section, there are authorized to be appropriated not to exceed the following sums:

(1) $10,000,000 through the period ending September 30, 1977.

(2) $16,000,000 for the period beginning October 1, 1977, and ending September 30, 1981.

[From the Congressional Record, Oct. 18, 1977]

HOUSE CONSIDERATION AND PASSAGE OF H.R. 6405

ENDANGERED SPECIES ACT AMENDMENTS

Mr. MURPHY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6405) to amend the Endangered Species Act of 1973 regarding the requirements for State cooperative programs thereunder and to authorize appropriations through fiscal year 1981 to carry out such pograms.

The Clerk read as follows:

H.R. 6405

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6 of the Endangered Species Act of 1973 (16 U.S.C. 1535) is amended—

(1) by striking out the period at the end of subsection (c)and inserting in lieu thereof "; or", and by adding at the end of such subsection the following: "that under the State program—

"(A) the requirements set forth in paragraphs (3), (4), and (5) of this subsection are complied with, and

"(B) plans are included under which immediate attention will be given to those resident species of fish and wildlife which are determined by the Secretary or the State agency to be endangered or threatened and which the Secretary and the State agency agree are most urgently in need of conservation programs."; and

(2) by amending subsection (1) to read as follows:

"(i) APPROPRIATIONS.—For the purposes of this section, there are authorized to be appropriated not to exceed the following sums:

"(1) $10,000,000 through the period ending September 30, 1977.

"(2) $16,000,000 for the period beginning October 1, 1977, and ending September 30, 1981.".

The SPEAKER pro tempore (Mr. Yates). Is a second demanded?

Mr. FORSYTHE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York (Mr. Murphy) and the gentleman from New Jersey (Mr. Forsythe) are recognized for 20 minutes.

The Chair recognizes the gentleman from New York (Mr. Murphy).

Mr. MURPHY of New York. Mr. Speaker, in 1973, Congress passed the Endangered Species Act in an attempt to slow the alarming rate at which wildlife species were becoming extinct in the United States and around the world. The Endangered Species Act provided for the development of a program for the protection of endangered and threatened species, and the conservation of the ecosystems on which endangered and threatened species depend. H.R. 6405 reauthorizes one small, but nevertheless vital, element of this historic act.

This legislation would authorize appropriations of $16 million under section 6 of the Endangered Species Act. In addition, the bill would amend section 6(c) of the act to facilitate the development of cooperative agreement programs with the States.

Section 6 of the Endangered Species Act is a little known, but highly important part of the act. It established a mechanism for the development of cooperative endangered species programs with the individual

States. The cooperation envisioned by section 6 includes consultation with the States concerned before acquiring any land or water under the Endangered Species Act, and the development of cooperative management agreements with States that establish a program for the conservation of endangered species. Those States that qualify under the act are eligible to receive section 6 matching grants on a 2-to-1 basis.

Section 6 of the Endangered Species Act expresses the congressional realization that a successful endangered species program depends upon a good working relationship with the States. Although the Federal agencies have the broad policy perspective and authority to carry out the Endangered Species Act, the States have the physical facilities and the personnel to see that State and Federal endangered species policies are properly executed.

Traditionally, State fish and game departments have had the primary responsibility for managing resident species of fish and wildlife. Section 6 of the Endangered Species Act insured that the States would continue to play an important role in the management of resident endangered and threatened species despite the Federal Government's assertion of general authority in the endangered species area. We recognized in 1973, as we do now, that if we want an endangered species program that works in fact, as well as on paper, it is imperative that the States be given authority to manage their resident species which are classified as endangered or threatened.

Unfortunately, the cooperative agreement program of the Endangered Species Act has not developed as rapidly as we had originally hoped. To date, only 17 States have signed cooperative agreements with the Federal Government and have qualified for Federal matching funds under the act. It is hoped that the changes proposed in this legislation, along with an increase in funding for State endangered species programs, will bring around the 33 States not now participating in the endangered species program.

Mr. Speaker, I would like to emphasize the noncontroversial nature of this legislation. It was reported out of the Committee on Merchant Marine and Fisheries without a single dissenting voice. This bill has nothing whatsoever to do with some of the more controversial aspects of the Endangered Species Act which have received press attention in recent months. Specifically, this bill has nothing to do with the conflict between some water development projects and the designation of critical habitat for a variety of endangered species.

Mr. Leggett. Mr. Speaker, I rise in support of H.R. 6405. This legislation authorizes appropriations of $16 million through fiscal year 1981 to carry out a small but important part of the Endangered Species Act of 1973. That act stands as the most far-reaching Federal effort to slow and prevent the destruction of hundreds of fish and wildlife species that are facing extinction as a result of man's activities. The important goal of the Endangered Species Act is the maintenance of a healthy diversity of wildlife species, and to conserve the all important ecosystems on which the wildlife species of the world depend for survival.

Although the Endangered Species Act expressed the preeminent authority of the Federal Government in the management of endangered species, it recognized that any effective conservation program demands active State involvement. Thus, section 6 of the Endangered Species Act established a mechanism for continuing State involvement in the management of resident threatened and endangered species.

Under the act, the Federal Government is authorized to enter into cooperative agreements with individual States that develop a qualifying endangered species program. Once a State has developed an acceptable endangered species program, it is eligible to receive Federal matching funds to carry out its program. In the past, these matching funds have been used for such activities as conducting peregrine falcon and bald eagle surveys, developing special gates to protect Indiana bats and propagating falcons for release into the wild.

The goal of this section is clear—the management of resident endangered species at the State level by those wildlife biologists best equipped to insure continued protection of the most beleagured members of the animal kingdom. Unfortunately, we are not close to achieving this goal.

Only 17 States have signed cooperative agreements with the Federal Government under section 6. What is worse, some of the States with the greatest number of species under their jurisdiction have not yet joined the program. Many States have not qualified for Federal financial assistance because they are frankly unwilling to provide blanket protection for any species which may be listed as endangered or threatened. The existing law requires the States to authorize such blanket protection before they can qualify for any Federal assistance.

H.R. 6405 would ease the requirements of existing law and encourage the remaining 33 States to join this all important program. I want to emphasize that this bill in no way diminishes the force or effect of the Endangered Species Act. In fact, if anything, the proposed amendment of section 6 should help to insure the full implementation of the act by encouraging the full participation of State agencies.

[1] Proposed in H.R. 6405.

STATES SIGNING COOPERATIVE ENDANGERED SPECIES AGREEMENTS

Arkansas, California, Colorado, Delaware, Florida, Maine, Maryland, Michigan, Missouri, New Jersey, New Mexico, New York, South Carolina, South Dakota, Virginia, Washington, and Wisconsin.

Mr. FORSYTHE. Mr. Speaker, I rise today in support of the legislation, H.R. 6405, which would authorize section 6 of the Endangered Species Act of 1973. This bill has three purposes. First, it would extend the authorization section for section 6 of the act from October 1, 1977, through September 30, 1981. Second, the bill would establish a funding level of $16 million which would be authorized to be appropriated during the 4-year period October 1, 1977, through September 30, 1981. Third, it would amend section 6 of the act to facilitate development of cooperative and endangered species programs with the individual States.

H.R. 6405 has the broadest bipartisan support. Since 1973 we have made a great deal of progress as a nation under the Endangered Species Act in our efforts to provide a program for the protection of endangered and threatened species and the conservation of ecosystems on which endangered and threatened species depend. Much work remains to be done. In addition to extending the authorization period of the act, this bill concentrates its attention in an area which is very important to me.

The successful development of an endangered species program depends on a good working arrangement between Federal and State agencies. Federal agencies have broad powers and perspective to carry out their authority under the act. State agencies, however, must have the physical facilities and personnel to see that the policies which are set by State and Federal interaction are properly executed. Without this strong State role, no endangered species program will be fully effective.

However, one of the greatest impediments to the development of cooperative agreements between the States and Federal Governments has been the five requirements found in section 6(c) of the act. These requirements must be met before a State can qualify for a grant in aid funds. In essence these paragraphs require States to provide blanket protection for any species listed as endangered or threatened by the Secretary.

A number of States have failed to qualify for funds under section 6 because for internal policy reasons they have been unwilling to grant their State agency the broad authority required under the present wording of the act. Under H.R. 6405, States would be able to qualify for cooperative agreement funds if they met the requirement of present paragraphs 3, 4, and 5 under section 6(c) and if the State has a plan which would result in immediate attention being given to those species most urgently in need of conservation programs.

Mr. Speaker, I urge my colleagues to join with me in approving the authorization of these much-needed funds.

Mr. MURPHY of New York. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. Murphy) that the House suspend the rules and pass the bill H.R. 6405.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

[From the Congressional Record, Oct. 18, 1977]

HOUSE CONSIDERATION AND PASSAGE OF S. 1316, AS AMENDED

Mr. **MURPHY** of New York. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1316) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973, a similar bill to H.R. 6405, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The **SPEAKER** pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1316

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6(i) of the Endangered Species Act of 1973 (16 U.S.C. 1535(i)) is amended to read as follows:

"(i) APPROPRIATION.—For the purposes of this section, there are authorized to be appropriated not to exceed the following sums:

"(1) $10.000,000 through the period ending September 30, 1977;

"(2) $9,000,000 to the Secretary of the Interior through the period ending September 30, 1980; and

"(3) $3,000,000 to the Secretary of Commerce through the period ending September 30, 1980.".

MOTION OFFERED BY MR. MURPHY OF NEW YORK

Mr. **MURPHY** of New York. Mr. Speaker, I offer a motion.

The Clerk read as follows:

> Mr. **MURPHY** of New York moves to strike out all after the enacting clause of the Senate bill (S. 1316) and to insert in lieu thereof the provisions of H.R. 6405, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "To amend the Endangered Species Act of 1973 regard the requirements for State cooperative programs thereunder and to authorize appropriations through fiscal year 1981 to carry out such programs."

A motion to reconsider was laid on the table.

A similar House bill, H.R. 6405, was laid on the table.

95TH CONGRESS
1ST SESSION

S. 1316

IN THE SENATE OF THE UNITED STATES

APRIL 20 (legislative day, FEBRUARY 21), 1977

MR. CULVER introduced the following bill; which was read twice and referred to the Committee on Environment and Public Works

---

A BILL

To authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6(i) of the Endangered Species Act of 1973 (16 U.S.C. 1535(i)) is amended to read as follows:

"(i) APPROPRIATIONS.—For the purposes of this section, there are authorized to be appropriated not to exceed the following sums:

"(1) $10,000,000 through the period ending September 30, 1977.

"(2) $3,000,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980.".

ENDANGERED SPECIES ACT AUTHORIZATIONS

MAY 16, 1977.—Ordered to be printed

Mr. RANDOLPH (for Mr. CULVER), from the Committee on Environment and Public Works, submitted the following

REPORT

[To accompany S. 1316]

The Committee on Environment and Public Works, to which was referred the bill (S. 1316), a bill to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973, having considered the same, reports favorably thereon with an amendment and recommends that the bill as amended do pass.

GENERAL STATEMENT

The purpose of this bill is to extend until September 30, 1978 the authorization under section 6(i) of the Endangered Species Act of 1973.

This section currently provides an authorization of $10 million to the Secretaries of the Interior and Commerce for assisting the States in the development of programs for the protection of threatened and endangered species of fish, wildlife, and plants. The Federal share may be as high as 66 percent for projects conducted by one State, or 75 percent for projects conducted by two or more States. To date, seventeen States have signed cooperative agreements with the Interior Department and are therefore qualified to receive grants under this provision. No State has received funding from the Commerce Department because funds have not been allocated to the National Marine Fisheries Service for this purpose.

S. 1316 would extend the authorization for section 6(i) programs through fiscal year 1980 at a rate of $9 million for the Department of the Interior and $3 million for the Department of Commerce. The

Committee hopes that the Department of Commerce will use these funds to assist the various States with programs protecting endangered and threatened marine fisheries.

The Committee is aware that considerable concern exists with respect to the implementation of the Endangered Species Act. For this reason the extension of the section 6(i) program is being approved with the understanding that the Subcommittee on Resource Protection will conduct comprehensive oversight hearings on the Act during the summer. It is hoped that S. 1316 will not be used as a vehicle for addressing these other concerns.

ROLLCALL VOTES

There were no rollcall votes during the Committee's consideration of this bill. The Committee ordered the bill reported by unanimous voice vote.

ESTIMATES OF COST

Section 252(a)(1) of the Legislative Reorganization Act of 1970 requires publication in this report of the Committee's estimate of costs of the reported legislation, together with estimates prepared by any Federal agency. The $12 million authorization contained in S. 1316 is based on requests submitted by the Department of Interior and the Department of Commerce.

Section 403 of the Congressional Budget and Impoundment Control Act requires each bill to contain a statement of the cost of such bill prepared by the Congressional Budget Office. This report follows:

Congressional Budget Office,
U.S. Congress,
Washington, D.C., May 13, 1977.

Hon. Jennings Randolph,
Chairman, Committee on Environmental and Public Works,
U.S. Senate, Washington, D.C.

Dear Mr. Chairman: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for S. 1316, a bill to amend the Endangered Species Act of 1973, to authorize appropriations through fiscal year 1980 to carry out state cooperative programs.

Should the committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

Alice M. Rivlin, *Director.*

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

May 13, 1977.

1. Bill number: S. 1316.
2. Bill title: To amend the Endangered Species Act of 1973 to authorize appropriations through fiscal year 1980.
3. Bill status: As ordered reported by the Senate Committee on Environment and Public Works, May 11, 1977.

4. Bill purpose: The purpose of the bill is to amend the Endangered Species Act of 1973 to authorize appropriation of $9 million to the Department of Interior and $3 million to the Department of Commerce for the period fiscal year 1978 through fiscal year 1980. This bill is authorizing legislation which requires subsequent appropriation action.

5. Budget impact:

[In millions of dollars]

Authorization level:	
Fiscal year 1978	12.
Fiscal year 1979	12.
Fiscal year 1980	12.
Fiscal year 1981	—
Fiscal year 1982	—
Estimated costs:	
Fiscal year 1978	2.3
Fiscal year 1979	3.9
Fiscal year 1980	4.5
Fiscal year 1981	1.3
Fiscal year 1982	—

The costs of this bill fall in budget subfunction 303.

6. Basis for estimate: For the purpose of this estimate, it assumed that this legislation and the necessary fiscal year 1978 appropriation legislation will be enacted prior to fiscal year 1978. The estimated costs of this legislation are based on each agency's plans for each program assuming appropriations equal to the full authorization level, and assuming historical spendout rates.

The Department of Interior spendout schedule is as follows:

[In millions of dollars]

Estimated costs:	
Fiscal year 1978	2
Fiscal year 1979	3
Fiscal year 1980	3
Fiscal year 1981	1
Fiscal year 1982	-----

The Department of Commerce spendout schedule is as follows:

Estimated costs:	
Fiscal year 1978	0.3
Fiscal year 1979	.9
Fiscal year 1980	1.5
Fiscal year 1981	.3
Fiscal year 1982	-----

7. Estimate comparison: None.

8. Previous CBO estimate: None.

9. Estimate prepared by Terry Nelson and Barbara Schilberg.

10. Estimate approved by James L. Blum, Assistant Director for Budget Analysis.

REGULATORY IMPACT STATEMENT

Paragraph 5(a) of rule XXIX of the Standing Rules of the Senate requires the inclusion of a regulatory impact statement in Committee reports on proposed legislation. Regulations implementing the Endangered Species Act have been promulgated. This legislation neither adds to nor subtracts from that body of regulations.

CHANGES IN EXISTING LAW

In the opinion of the Committee, it is necessary to dispense with the requirements of subsection (4) of rule XXIX of the Standing Rules of the Senate in order to expedite the business of the Senate.

[From the Congressional Record, May 25, 1977]

SENATE CONSIDERATION AND PASSAGE OF S. 1316, AS AMENDED

ENDANGERED SPECIES ACT AUTHORIZATIONS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 160.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

> The bill (S. 1316) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia?

There being no objection, the Senate proceeded to consider the bill (S. 1316) which had been reported from the Committee on Environment and Public Works with an amendment on page 1, beginning with line 10, strike through and including page 2, line 2, and insert the following in lieu thereof:

> "(2) $9,000,000 to the Secretary of the Interior through the period ending September 30, 1980; and
>
> "(3) $3,000,000 to the Secretary of Commerce through the period ending September 30, 1980.".

So as to make the bill read:

> *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That section 6(i) of the Endangered Species Act of 1973 (16 U.S.C. 1535(i)) is amended to read as follows:
>
> "(i) APPROPRIATIONS.—For the purposes of this section, there are authorized to be appropriated not to exceed the following sums:
>
> "(1) $10,000,000 through the period ending September 30, 1977.
>
> "(2) $9,000,000 to the Secretary of the Interior through the period ending September 30, 1980; and
>
> "(3) $30,000,000 to the Secretary of Commerce through the period ending September 30, 1980.".

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

95th Congress
1st Session

SENATE

Report
No. 95-607

ENDANGERED SPECIES ACT AUTHORIZATIONS

November 29 (legislative day, November 1), 1977.—Ordered to be printed

Mr. Culver, from the committee of conference,
submitted the following

CONFERENCE REPORT

[To accompany S. 1316]

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1316) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

That section 6 of the Endangered Species Act of 1973 (16 U.S.C. 1535) is amended—

(1) by striking out the period at the end of subsection (c) and inserting in lieu thereof "; or", and by adding at the end of such subsection the following:

"that under the State program—

"(A) the requirements set forth in paragraphs (3), (4), and (5) of this subsection are complied with, and

"(B) plans are included under which immediate attention will be given to those resident species of fish and wildlife which are determined by the Secretary or the State agency to be endangered or threatened and which the Secretary and the State agency agree are most urgently in need of conservation programs; except that a cooperative agreement entered into with a State whose program is deemed adequate and active pursuant to subparagraph (A) and this subparagraph shall not affect the applicability of prohibitions set forth in or authorized pursuant to section 4(d) or section 9(a)(1) with respect to the taking of any resident endangered or threatened species."; and

(2) by amending subsection (i) to read as follows:

"(i) APPROPRIATIONS.—For the purposes of this section, there are authorized to be appropriated not to exceed the following sums:

"(1) $10,000,000 through the period ending September 30, 1977.

"(2) $16,000,000 for the period beginning October 1, 1977, and ending September 30, 1981.".

And the House agrees to the same.

JOHN CULVER,
EDMUND S. MUSKIE,
MALCOLM WALLOP,
Managers on the Part of the Senate.
JOHN M. MURPHY,

DANIEL K. AKAKA,
DAVID E. BONIOR,
BO GINN,
PHILIP RUPPE,
EDWIN B. FORSYTHE,
Managers on the Part of the House.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the Senate and the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1316) authorizing appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973, submit the following joint statement to the Senate and the House in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

The House amendment struck out all after the enacting clause and inserted a substitute text. The differences between the Senate bill and the House amendment are noted below, and the substitute agreed to in conference is discussed. Minor, technical and clarifying changes are not discussed.

REAUTHORIZATION OF THE SECTION 6 PROGRAM

Senate bill

The Senate bill is a simple extension of the State grant-in-aid program authorized under section 6 of the Endangered Species Act of 1973. A total of $12 million through fiscal year 1980 is provided for this purpose. Of this amount, $9 million is earmarked for the Secretary of the Interior and $3 million to the Secretary of Commerce.

House amendment

Paragraph (1) of the House amendment provides a total of $16 million through fiscal year 1981 for the section 6 program. No specific amount is made available to either the Secretary of the Interior or the Secretary of Commerce.

Conference report

The conferees agreed to adopt the House provision.

According to administration estimates, a $16 million authorization over a 4-fiscal-year period will best meet the States' projected funding needs for their endangered species conservation programs under section 6. In addition, a combined authorization for the Departments of Interior and Commerce will permit more flexibility in the expenditure of these funds.

The House and Senate conferees are dismayed that the Secretary of Commerce has not yet negotiated any cooperative agreements with the States for protecting threatened and endangered marine species under section 6. The Department of Commerce should intensify its efforts in this regard to promote increased cooperation with State programs for the conservation of threatened or endangered species. In addition, the conferees urge the Office of Management and Budget to assure that sufficient funding is provided in the budget for the Department to initiate and maintain such programs.

QUALIFICATION BY THE STATES FOR FINANCIAL ASSISTANCE

Senate bill

No provision.

House amendment

The House amendment contains language to facilitate qualification by the States for financial assistance under section 6 of the Endangered Species Act.

Before a State may enter into a cooperative agreement with, and receive financial assistance from, the Federal Government pursuant to section 6, it must have the authority to conserve all resident species of fish and wildlife which the Secretary determines to be threatened or endangered. A number of State fish and wildlife agencies do not possess such broad authority and are, therefore, not eligible for these benefits. In certain instances, a State conservation agency may have authority only to protect certain categories of species, such as vertebrates, rather than all species. Under the House amendment such a State could qualify for cooperative agreement funds if it satisfies all other requirements set forth in the act and has plans to devote immediate attention to those species most urgently in need of conservation programs.

Conference report

The conferees wish to assure that adoption of the House language does not have the effect of withdrawing protection for species listed by the Secretary. Therefore, the conference committee has agreed to a modification which guarantees that applicable prohibitions set forth in or authorized pursuant to sections 4(d) and 9(a)(1) of the Endangered Species Act with respect to the taking of resident endangered or threatened species remain in effect when a State enters into a cooperative agreement under the alternative language of the House amendment.

SENATE AGREEMENT TO CONFERENCE REPORT

ENDANGERED SPECIES ACT AUTHORIZATIONS—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, on behalf of the Senator from Iowa (Mr. Culver), I submit a report of the committee of conference on S. 1316, and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1316) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

[From the Congressional Record, Nov. 30, 1977]

HOUSE AGREEMENT TO CONFERENCE REPORT

CONFERENCE REPORT ON S. 1316, ENDANGERED SPECIES ACT AUTHORIZATIONS

Mr. MURPHY of New York. Mr. Speaker. I ask unanimous consent for the immediate consideration of the conference report on the bill (S. 1316) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that the statement of the managers be read in lieu of the report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the statement.

The SPEAKER pro tempore. The gentleman from New York (Mr. Murphy) and the gentleman from New Jersey (Mr. Forsythe) will be recognized for 30 minutes each.

The Chair recognizes the gentleman from New York (Mr. Murphy).

Mr. MURPHY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conference report on S. 1316 adopts all of the provisions of the House-passed legislation with only one minor modification. As agreed by the conferees, the bill would authorize $16 million over 4 years to fund State cooperative endangered species programs.

Under the Endangered Species Act, the Federal Government is authorized to enter into cooperative agreements with individual States that develop a qualifying endangered species program. Once a State has developed an acceptable endangered species program, it is eligible to receive Federal matching funds to carry out its program. In the past, these matching funds have been used for such activities as conducting bald eagle surveys and propagating falcons for release into the wild.

In addition, S. 1316 amends the requirements that States must meet before they become eligible for these matching funds. This change in law was added by the House and agreed to by the conferees in an attempt to encourage participation in the endangered species program by the large number of States who have not signed agreements with the Federal Government.

The conferees have added only one small modification to the bill as passed by the House. This modification simply insures that the prohibitions in the Endangered Species Act will continue to apply to resident endangered and threatened species in those States qualifying for Federal funding under the new qualifying requirements specified in the bill. Without this modification, some endangered species could have been left unprotected by both the provisions of the Endangered Species Act and the provisions of the State endangered species program.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Mississippi.

Mr. WHITTEN. Mr. Speaker, this comes at a time when we have not had much preparation for it. I do not know whether the committee went into the situation that we faced in the Public Works appropriation hearings and as well as in the Interior Committee appropriation hearings, but it developed upon those hearings that the present act, in my opinion, at least, the Department of the Interior or parts thereof had held species endangered without any evidence that it was a species and not a variety.

Further hearings disclosed that in the Tellico Dam they had to seek out the so-called snail darter, not to save the species, but to find one whereby they could stop a dam within 5 percent of being completed and which would have furnished energy to 30,000 homes. In the south end of my State where I live they held up an interstate highway because of the sandhill crane. It develops that the sandhill crane is in many parts of the United States. We have had them declared a species endangered without determining whether they are a species of a variety, as history will show, without any evidence that they might exist in other States, to see whether they were plentiful.

Down in Tennessee they went to the bottom of the stream and found a darter, where the citizens who filed an injunction could not identify or separate them from two other darters. The only thing we could see as Members of Congress was a little slight dot for two of them, what you would call a minnow. Nobody heard of them until they set out to stop the dam.

I wonder if the gentleman has made an effort to see what damage they are doing to the country's ability to look after itself in the name of protecting something that is worthwhile.

As I said earlier, we have had this endangered species from the time of the dinosaurs, or we would not be here.

They are not carrying out the law as it should be according to the evidence before us, so I have understood.

Can the gentleman give any information about what they have done and whether they are going to put the country back as it was at the time of the Indians?

Mr. **Murphy** of New York. Mr. Speaker, I thank the gentleman for bringing this up. Of course, the gentleman's inquiry refers to section 7 of the act and what we are dealing with here is section 6 of the act. We do not in any way in this legislation deal with the designation of critical habitat under section 7 of the Endangered Species Act. It is under section 7 that the Sixth Circuit Court of Appeals enjoined the completion of the Tellico Dam. This particular conference report has nothing to do with the problems that some public works projects face as a result of the Endangered Species Act.

Mr. **Whitten**. Mr. Speaker, if the gentleman will yield further, I have high regard for my friend, the gentleman from New York. I just wonder if the gentleman would not be better spending his time going to work on section 7 and straightening it out before we write some other sections?

Mr. **Murphy** of New York. We have already started working on section 7. The committee has had the General Accounting Office do a study of the Tellico Dam situation. It has also directed a set of questions to the Department of the Interior in order to determine the potential impact of section 7 on public works programs across the country. We do plan to deal with the critical habitat question early next session.

Mr. **Whitten**. Mr. Speaker, if the gentleman will yield further, those things that are dear to us and valuable to us we are in favor of, but where this is being used to stop the development of this country, we cannot afford it, in view of the present situation.

PARLIAMENTARY INQUIRY

Mr. **Whitten**. Mr. Speaker, a parliamentary inquiry.

The **Speaker** pro tempore. The gentleman will state it.

Mr. **Whitten**. Mr. Speaker, does it require unanimous consent for the consideration of the conference report?

The **Speaker** pro tempore. The Chair is advised that unanimous consent has already been obtained for the consideration of the conference report.

Mr. **Whitten**. I am sorry, Mr. Speaker, I was not aware that was done here. I certainly would hope that the gentleman would defer this until we have a meeting of the minds between the committees that deal with it, because it is doing untold damage by being misconstrued in carrying out what I understand are the terms of the law.

Mr. **Murphy** of New York. Mr. Speaker, I want the gentleman to know that we are specifically addressing ourselves to section 7. Next year the remainder of the Endangered Species Act including section 7 will be reauthorized. We want specific answers to the specific questions that the gentleman has just raised and this conference report has nothing to do with the inquiry of the gentleman.

Mr. Whitten. Mr. Speaker, I would like to insist that we read the statement on the part of the managers.

The Speaker pro tempore (Mr. Foley). The Chair wishes to advise the gentleman from Mississippi that unanimous consent was obtained for the consideration of the conference report, to read the statement of the managers in lieu of the report, and to dispense with further reading of the statement of the managers.

Mr. Whitten. I thank the Speaker.

Mr. Watkins. Mr. Speaker, will the gentleman yield?

Mr. Murphy of New York. I yield to the gentleman from Oklahoma.

Mr. Watkins. Could the gentleman explain to me on the amendment here about the provision requiring an acceptable endangered species program be developed by the States? It has to be acceptable to whom, and to what group or agency?

Mr. Murphy of New York. The States are required to initiate a conservation program for those species most in need of protection before than can qualify for matching funds.

Mr. Watkins. If the gentleman will yield further, what concerns me about this provision is that, like the gentleman from Mississippi, I have a cousin or mutation of the snail darter, a black darter called the leopard darter, in my district which blocked construction of a dam. To our knowledge, it is a mutation, about three or four crosses away. We cannot figure out how it can be endangered. I am deeply concerned about who is saying what about this endangered species in my State, whether it is the Federal Government or whom.

Mr. Murphy of New York. The Department of the Interior determines whether a species is threatened or endangered after input from biologists and the public at large.

I might say that we could use some cooperation from the Fish and Wildlife Service. They recently tried to transfer the snail darter upstream to another habitat where it probably could have survived but the Fish and Wildlife Service provided nets that were contaminated and they did away with the snail darters under transfer. That is the type of agency cooperation we are trying to prevent, but I want my colleague from Oklahoma, and also my colleague from Mississippi, to know that we understand this problem. We are not going to impede programs because some people may feel that a species is endangered. We are going into this whole question in section 7, and the entire House will have the opportunity next year in the authorization process to bring this up. We do not impact on those areas in this section 6 conference report.

Mr. Watkins. I am deeply concerned about this because the power of this particular agency has grown here. I think there should be some very close scrutiny because they are about to stop any type of public works project or any program receiving Federal funds. There is a serious possibility that a mutation or long-distant cousin of the snail darter or something in my district will prevent any type of economic growth for our people.

Mr. Murphy of New York. The intent is not to impede public works projects, but to protect bona fide endangered species. We are going into that whole question of endangered species and the definition of them in section 7 next year. This conference report does not deal with that issue at this time.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield further?

Mr. MURPHY of New York. I will be happy to yield.

Mr. WHITTEN. As the gentleman knows, we had no advance notice, and of course in the closing days we are accustomed to that happening—otherwise, I would have been better prepared to have made an objection had I been on the floor. But, I would ask the gentleman if, in his contemplation, endangered species is something that is sought for the purpose, not of protecting species, but of finding one that comes under the provisions of the law so as to stop a dam which is 95 percent complete, and for which $96 million has already been spent, to provide energy for 30,000 homes. In this instance, they went out and found something that was not known to exist.

I do not see how they could say it was endangered until they made a thorough survey over the United States.

And may I say, for the record, that the witness in the courtroom, when the judge issued the injunction, could not identify the snail from some others.

I just hope that we can call on our friend to help straighten this matter out so that our country can continue to exist and continue to to prosper and to grow.

Mr. MURPHY of New York. In no way would the snail darter come under any aspect of this conference report, because we are dealing strictly with section 6. Section 7 will be dealt with separately next year in the authorization. The committee and the members of the committee from Tennessee were very careful to insure that this question was raised in the appropriate hearings.

Mr. FORSYTHE. Mr. Speaker, I rise in support of the conference report on S. 1316, a bill to amend the Endangered Species Act of 1973 regarding the requirements for State cooperative programs and to authorize appropriations through fiscal year 1981 to carry out such programs.

The Senate conferees have agreed to recommend that the Senate recede from its disagreement to the amendment of the House which enlarged and strengthened the role of States in our Nation's endangered species program. This is a very positive step, as the successful development of our Nation's overall endangered species program depends on the good working arrangement between Federal and State agencies. Without the strong State role added to the bill by the House, no endangered species program could ever be fully realized.

The only real change in the House-passed version of the bill which has come out of the conference is one which I can fully support. During the conference it became apparent that the protection of some species might be inadvertently lost when a State program became effective. The change brought about in conference will insure that all endangered species will continue to be protected.

Mr. Speaker, I urge my colleagues to join with me in approving this authorization so that funds are available for this much-needed program.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from Mississippi.

Mr. **Whitten**. I thank the gentleman for yielding.

Mr. Speaker, the Committee on Appropriations, may I say, has provided funds with which to transfer the so-called endangered species from one point to the other. And the act, as I interpret it—speaking off the cuff, because I did not know this was coming up—provides that they be protected and not used to prevent the development of the country. So if the act were carried out as it reads, if the courts would so interpret it, it would be one thing; but as I point out, when we have someone making a study, trying to find something to be used to stop a project, something that was not known to exist, something that there is no evidence now that it is not of a different variety, then we can see that the act itself is being misused.

Mr. Speaker, I hope the gentleman will devote his attention to seeing that this is carried out as it is now, and then we would not have anything like the damage that has occurred.

Mr. **Forsythe**. Mr. Speaker, that is the issue, and, as I say, that matter will apparently go all the way to the Supreme Court. But then the legislative process will follow that, as the chairman of the committee said, when we look at the rest of the legislation.

Mr. **Watkins**. Mr. Speaker, will the gentleman yield?

Mr. **Forsythe**. I yield to the gentleman from Oklahoma.

Mr. **Watkins**. Mr. Speaker, what concerns me is the fact that we have stated here that the States must develop an acceptable program.

A program acceptable to whom? The Federal Government, the Federal bureaucracy, which has stopped many of us in the States flat in our tracks from developing opportunities for our people?

Mr. **Forsythe**. Mr. Speaker, for the State to get a cooperative program, it would deal with the Department of the Interior and the Department of Commerce, yes, where the species would be, for example, a marine mammal. There is a split jurisdiction by species, and obviously the Federal agency has to go by the Federal law in terms of this: Does that State cooperative agreement comply with the Federal statute?

But this piece of legislation even helps make that more possible, because one of the problems in the existing law, without this legislation, was that a State had to have a program to cover all species, whether they were resident or involved or not. This permits them to protect those species under an agreement with the Federal Government that are involved in that single State.

Mr. **Murphy** of New York. Mr. Speaker, will the gentleman yield?

Mr. **Forsythe**. I yield to the chairman of the committee.

Mr. **Murphy** of New York. Mr. Speaker, I want to assure my colleague, the gentleman from Oklahoma (Mr. Watkins), that the purpose of this legislation is to bring the 33 States into this program, and get them to take over the protection of resident endangered species.

We have broadened the program, and we have added more money so that the States will be able to protect endangered species and have the funds to do it. Thus they will not have to rely on what is minimal funding in many States.

That is the very thrust of this legislation, and it is not meant to impede any project. There is no project that would be impeded by this legislation.

As I assured the gentleman from Mississippi (Mr. Whitten)—and I refer to section 7—what we are doing is simply broadening the power of the States to, No. 1, get funding, and, No. 2, to be responsible for the endangered species within the States.

Mr. WATKINS. Mr. Speaker, will the gentleman yield further?

Mr. FORSYTHE. I yield to the gentleman from Oklahoma.

Mr. WATKINS. Mr. Speaker, the concern I have is that in the State of Oklahoma a water project was halted. Under the guise of the Endangered Species Act we were protecting two species, one called the snail darter and the other one called the leopard darter, a mutation. They stopped the project. They did this, we understood, to save the environment from the results of the project.

The choice was exercised by the Federal bureaucracy, and they did not allow this project to be completed. This was done by the choice of those individuals in the Federal Government and not by the choice of the people in that area of the country, that area of the State of Oklahoma, and it was impossible to continue that project.

Mr. FORSYTHE. Mr. Speaker, as the committee chairman has said, these issues are not dealt with in the legislation we are addressing today. Those are issues that will be dealt with when we look at the rest of the Endangered Species Act. That is the time we will be anxious to hear from the gentleman further.

Mr. LEGGETT. Mr. Speaker, I urge the adoption of the conference report S. 1316. The conferees have agreed to all of the provisions of the legislation as passed by the House. They have merely added some modifying language which plugs a potential loophole in the law.

Under the existing law, when a State signs a cooperative agreement with the Federal Government covering resident wildlife, the prohibitions in the Endangered Species Act are waived. This makes a good deal of sense since the continuation of Federal prohibitions would only duplicate the protection afforded under the cooperative agreement.

S. 1316, however, changes the existing law slightly by no longer requiring blanket protection for each and every species listed by the Federal Government. Thus, in some instances, there may be a need for continued Federal protection for those species not covered by the cooperative agreement. The modification adopted by the conferees guarantees that those species not covered by the cooperative agreement will continue to receive protection under the Endangered Species Act.

Mr. MURPHY of New York. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

MOTION OFFERED BY MR. MURPHY OF NEW YORK

Mr. MURPHY of New York. Mr. Speaker, I offer a motion.

The Clerk read as follows:

> **Mr. MURPHY of New York moves that the House recede from its amendment to the title of the Senate bill, S. 1316.**

The motion was agreed to.

A motion to reconsider was laid on the table.

[From the Congressional Record, Dec. 7, 1977]

S. 1316 PRESENTED TO THE PRESIDENT

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, December 7, 1977, he presented to the President of the United States the following enrolled bills:

S. 1316. An act to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973; and

* * * * * * *

ANNOTATED BIBLIOGRAPHY OF HEARINGS

U.S. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment. Fish and Wildlife Miscellaneous, Part 1. Hearings, 95th Congress, 1st session. Washington, U.S. Government Printing Office, 1977. 383 p. Hearings on Endangered Species Authorization held Mar. 22, 1977; hearings on Amendments held on Oct. 26, 1977. "Serial No. 95-18."

Hearings to consider six bills relating to various aspects of fish and wildlife conservation, including:

H.R. 4741, to extend through fiscal year 1980 Endangered Species Act of 1973 cooperative programs with State for endangered species conservation.

H.R. 4658, to exempt from Endangered Species Act of 1973 import prohibitions on antique articles composed of endangered or threatened species.

Hearing of March 22, 1977 includes submitted statements and testimony from: J. S. Gottschalk (IAFWA), L. A. Greenwalt (FWS), J. W. Gehringer (NMFS).

Hearing of October 26, 1999 includes submitted statements and testimony from: L. Boggs (Rep, LA), G. A. Bertrand (CEQ), L. A. Greenwalt (FWS), J. W. Gehringer (NMFS).

U.S. Congress. Senate. Committee on Environment and Public Works. Subcommittee on Resource Protection. Authorization for the Endangered Species Act and for Three Wildlife Refuges. Hearings, 95th Congress, 1st session, Apr. 21, 1977. Washington. U.S. Government Printing Office, 1977. 59 p. "Serial No. 95-H19."

Hearings to consider two bills including:

S. 1316, to extend authorization of appropriations through fiscal year 1980 for Federal-State cooperative programs under the Endangered Species Act of 1973.

Hearing testimony includes: L. A. Greenwalt (FWS), J. W. Gehringer (NMFS), J. S. Gottschalk (IAFWA).

U.S. Congress. Senate. Committee on Environment and Public Works. Subcommittee on Resource Protection. Endangered Species Act Oversight. Hearings, 95th Congress, 1st session, July 20, 21, and 28, 1977. Washington, U.S. Govt. Print. Off., 1977. 1025 p. "Serial no. 95-H33"

Hearings in implementation of the Endangered Species Act of 1973, which authorizes a national program for conservation of endangered or threatened species of fish, wildlife and plants, and directs the Interior and Commerce Departments to identify endangered species and issue appropriate regulations for their protection.

Focusses on ESA Section 7 provisions requiring protection of critical habitat, and prohibiting damage to critical habitat by federally assisted projects. At time of hearing, the federally assisted TVA Tellico Dam Project completion on the Little Tennessee River, Tenn. had been interdicted by Interior Department as dam closure threatened critical habitat of the snail darter fish.

Includes witnesses' prepared statements, submitted statements and correspondence, and submitted responses to questions, including:

a. Michigan DNR, "Michigan's Endangered and Threatened Species Program" with annotated species lists;

b. TVA, weekly construction force reports, Tellico Dam Project, 1974–76.

c. TVA, "Tellico Project Economic Analysis" Sept. 22, 1971;

d. TVA, "Comments on Revised GAO Report on the Tellico Project" Aug. 1977;

e. TVA, "Snail Darter Conservation Program Situation Assessment. Population Age Structure and Distribution: Little Tennessee and Hiwasee Rivers" Feb. 1977.

Includes testimony from Tennessee Representatives, Administration and Government agency personnel, environmental organizations and others; and discusses arguments pro and con completing Tellico, and amending the Endangered Species Act.

PART IV

ENDANGERED SPECIES ACT AMENDMENTS OF 1978, PUBLIC LAW 95-632

BACKGROUND

The major purposes of this legislation were to reauthorize appropriations for implementation of the Endangered Species Act of 1973, and to amend the Act to establish a procedure for the application for, and review of, an exemption from the prohibition against agency actions which jeopardize endangered or threatened species or their critical habitat. Other provisions of the law were intended to improve the process whereby species or their critical habitats are designated. These include requirements for improved public notice and hearings, for analysis of the economic impact of critical habitat designations, and for the periodic review of previously listed species. Proposals to list any new species as threatened or endangered must now contain specification of critical habitat proposed for designation for final listing.

The appropriation authorization extension provided for in 1976 (PL 94-325) expired September 30, 1978. Oversight hearings held by the Senate Subcommittee on Resource Protection in July 1977 (Serial 95-H33) revealed additional substantive issues connected with the Act's administration which prompted amendment to the original Act. S. 2899 was introduced by Mr. Culver and others on April 12, 1978 and referred to the Senate Committee on Environment and Public Works. Hearings on the bill were held by the Subcommittee on Resource Protection on April 13 and 14 (Serial 95-60). Testimony indicated that a substantial number of Federal actions currently underway may result in irresolvable conflict within the provisions of the Act. It was feared that the number of such conflicts may increase significantly in the future as the Fish and Wildlife Service continued to list additional species and critical habitats. The Committee felt these circumstances illustrated the need for an amendment to the Act which would provide flexibility in its administration, while maintaining protection for threatened and endangered species. S. 2899 was reported out of committee with amendment on May 15, 1978 (S. Rept. 95-874). The bill was further amended during its three-day consideration on the Senate Floor, and was finally passed on July 19, 1978.

H.R. 10883, a bill to authorize appropriations to carry out the Endangered Species Act during fiscal years 1979 through 1981 was introduced on February 9, 1978 by Mr. Murphy of New York and others. This simple authorization measure was reported to the House by the Merchant Marine and Fisheries Committee on March 31, 1978. The Committee did not seek consideration of this measure in the House, however, until formal oversight hearings on the Endangered Species Act could be conducted.

89-690 O - 82 - 42

Between May 24 and June 28, 1978, the Committee conducted eight days of oversight hearings on the Act (Serials 95–39 and 95–40), receiving testimony from nearly seventy witnesses. Following these hearings, Mr. Leggett introduced H.R. 13807. This bill proposed a Presidential exemption procedure for projects which come into conflict with threatened and endangered species. H.R. 13807 was considered by the Subcommittee in open markup sessions on August 15, 16, and 17, and September 11 and 13. On September 13, the Subcommittee unanimously adopted an amendment in the nature of a substitute to H.R. 13807 and ordered the bill, as amended, reported to the full Committee in the form of the clean bill, H.R. 14104. This clean bill was introduced on September 18, 1978 by Mr. Leggett and Mr. Murphy and 15 other members of the Committee.

The Committee considered H.R. 14104 in open markup session and unanimously ordered the bill reported to the House with amendments on September 25, 1978 (H. Rept. 95–1625). H.R. 14104 represented the Committee's attempt to retain the integrity of the Endangered Species Act, while introducing some flexibility into the Act to permit some exemptions from certain of its requirements.

The exemption procedure provided in H.R. 14104, as reported by the Committee paralleled the exemption procedure adopted by the Senate in S. 2899. In both versions, the final determination of whether a project should receive an exemption from the Act would be made by a cabinet level committee. H.R. 14104 differed from S. 2899 in the make-up of the cabinet level committee, votes needed for an exemption, and the hearing process leading to the exemption decision by the cabinet level committee. In addition, H.R. 14104 addressed a number of other issues not considered by the Senate. These included: the lack of notice to local communities affected by a proposed listing of a species or the designation of critical habitat; and the failure to conduct public hearings in the local area on a proposed listing.

H.R. 14104 passed the House on October 14, 1978. The House adopted a number of amendments to the bill including specific project exemptions for the Tellico Dam and Reservoir in Tennessee and the Grayrocks Project in Wyoming. The House inserted the language of H.R. 14104, as amended, into S. 2899 and requested a conference with the Senate.

The House and Senate conferees met on October 4 to resolve the differences between the Senate bill and the House amendments do it. Both the House and the Senate agreed to the conference report on S. 2899 on the same day, October 14 (H. Rept. 95–1804).

As finally passed by both Houses, S. 2899 would do the following:

1. Require Federal agencies to insure that their actions do not jeopardize the continued existence of an endangered species or adversely modify its critical habitat.

2. Establish a procedure under which Federal agencies can be considered for exemptions from the Act. The Federal agency, the Governor, or the permit and license applicant can apply for an exemption.

a. Exemption applications would initially be considered by a three member review board composed of an individual appointed by the Secretary of the Interior; an individual nominated by the Governor of the affected State and appointed by the President; and an Administrative Law Judge.

b. The review board would initially determine whether the Federal agency had consulted in good faith with the Department of the Interior and had attempted to resolve the conflict.

c. Having made a positive determination that the agency consulted in good faith, the review board would proceed to conduct a formal adjudicatory hearing on the merits of any exemption. The review board would make a report to the Endangered Species Committee within 180 days.

d. An Endangered Species Committee was established to rule on applications for exemption from the Act. The Committee would be composed of:

(1) Secretary of Agriculture;

(2) Secretary of the Army;

(3) Chairman of the Council of Economic Advisors;

(4) Administrator of Environmental Protection Agency;

(5) Secretary of the Interior (Chairman);

(6) Administrator of National Oceanic and Atmospheric Administration; and

(7) Individual nominated by the Governor of the affected State and appointed by the President.

e. The Committee could grant an exemption if five of the seven members find that:

(1) there are no reasonable or present alternatives to the agency action;

(2) the benefits of the action clearly outweigh the benefits of alternative courses of action consistent with conserving the species or its critical habitat, and such action is in the public interest; and

(3) the action is of national or regional significance.

f. The Tellico Dam project in Tennessee and the Grayrocks project in Wyoming would receive an expedited consideration by the Endangered Species Committee.

g. At the time of an exemption determination, the Committee must also establish reasonable mitigation and enhancement measures as necessary to mitigate the adverse effects of the agency action upon the endangered species, or critical habitat concerned.

h. Three exceptions to the exemption review process are provided for:

(1) The Secretary of State may prohibit exemption consideration for actions that would violate any international treaty obligations of the United States;

(2) The Secretary of Defense can exempt actions from the provisions of section 7 if he finds that the actions are necessary for national defense;

(3) The President may grant exemptions for declared major disaster areas.

i. An exemption shall not be considered a major Federal action for purposes of the National Environmental Policy Act of 1969.

j. The procedure for judicial review of Committee decisions was set forth.

3. Revise the notice procedures in the Act to improve public notice of proposals to list species as endangered or threatened and designate critical habitat.

4. Require public hearings in areas affected by a designation of critical habitat.

5. Establish a grant-in-aid program for States which have developed an adequate and active program for the conservation of endangered and threatened plants.

6. Revise the penalty provisions of the Act by reducing the strict liability penalty for others than importers and exporters to $500, making criminal violations of the Act a general rather than a specific intent crime, and subjecting importers and exporters of fish and wildlife and plants to strict liability penalties of up to $10.000.

7. Provide the Secretary of Agriculture with authority to acquire land for the conservation of endangered and threatened species with Land and Water Conservation Funds;

8. Provide exceptions from the Act's requirements for the progeny of legally held captive raptors and antique articles made before 1830.

9. Revise the procedures to be followed by the Secretary of the Interior in issuing regulations under the Endangered Species Act of 1973 and direct the Secretary to review the endangered species list at least once every five years and to publish, in the Federal Register, any final regulation which adds a species to the endangered list, not later than two years after the date of the regulations.

10. Authorize appropriations of $40.4 million through March 31, 1980 to carry out the purposes of the Act.

11. Require the Secretary of the Interior to develop and implement plans for the conservation and survival of endangered and threatened species.

12. Direct the Secretary in determining the critical habitat of any endangered or threatened species to consider the economic impact of specifying the area as part of a critical habitat, unless it is determined that failure to designate such an area as critical habitat will result in the extinction of the species.

The bill was signed into law (P.L. 95-632) on November 10, 1978.

CHRONOLOGY—PUBLIC LAW 95-632

April 12, 1978—S. 2899 introduced and referred to Senate Committee on Environment and Public Works.

May 15, 1978—S. 2899 reported, with amendment, to Senate by the Committee on Environment and Public Works, S. Rept. 95-874.

July 17, 1978—S. 2899 considered in Senate.

July 18, 1978—S. 2899 considered in Senate.

July 19, 1978—S. 2899 considered in Senate; passed with amendments.

September 18, 1978—H.R. 14104 introduced and referred to the Committee on Merchant Marine and Fisheries.

September 25, 1978—H.R. 14104 reported, with amendment, to House by the Committee on Merchant Marine and Fisheries, H. Rept. 95-1625.

October 14, 1978—H.R. 14104 passed House with amendment.

October 14, 1978—S. 2899 passed House, with amendment, in lieu of H.R. 14104.

October 14, 1978—House agreed to Conference Report (H. Rept. 95-1804).

October 14, 1978—Senate agreed to Conference Report (H. Rept. 95-1804).

October 26, 1978—S. 2899 presented to the President.

November 10, 1978—S. 2899 signed into law (Public Law 95-632).

Public Law 95-632
95th Congress

An Act

To amend the Endangered Species Act of 1973 to establish an Endangered Species Interagency Committee to review certain actions to determine whether exemptions from certain requirements of that Act should be granted for such actions.

Nov. 10, 1978
[S. 2899]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Endangered Species Act Amendments of 1978".

Endangered Species Act Amendments of 1978.
16 USC 1531 note.

SEC. 2. Section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532) is amended—

Definitions.

(1) by inserting before paragraph (1) thereof the following new paragraph:

"(1) The term 'alternative courses of action' means all alternatives and thus is not limited to original project objectives and agency jurisdiction.";

(2) by inserting after paragraph (4) as redesignated by paragraph (7) of this section the following new paragraph:

"(5)(A) The term 'critical habitat' for a threatened or endangered species means—

"(i) the specific areas within the geographical area occupied by the species, at the time it is listed in accordance with the provisions of section 4 of this Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) which may require special management considerations or protection; and

16 USC 1533.

"(ii) specific areas outside the geographical area occupied by the species at the time it is listed in accordance with the provisions of section 4 of this Act, upon a determination by the Secretary that such areas are essential for the conservation of the species.

"(B) Critical habitat may be established for those species now listed as threatened or endangered species for which no critical habitat has heretofore been established as set forth in subparagraph (A) of this paragraph.

"(C) Except in those circumstances determined by the Secretary, critical habitat shall not include the entire geographical area which can be occupied by the threatened or endangered species.";

(3) by inserting after paragraph (6), as redesignated by paragraph (7) of this section the following new paragraph:

"(7) The term 'Federal agency' means any department, agency, or instrumentality of the United States.";

(4) by inserting after paragraph (10), as redesignated by paragraph (7) of this section, the following new paragraphs:

"(11) The term 'irresolvable conflict' means, with respect to any action authorized, funded, or carried out by a Federal agency, a set of circumstances under which, after consultation as required in section 7(a) of this Act, completion of such action would (A) jeopardize the continued existence of an endangered or threatened species, or (B) result in the adverse modification or destruction of a critical habitat.

Post, p. 3752.

"(12) The term 'permit or license applicant' means, when used with respect to an action of a Federal agency for which exemption is sought under section 7, any person whose application to such agency for a permit or license has been denied primarily because of the application of section 7(a) to such agency action.";

Infra.

(5) by striking out paragraph (16), as redesignated by paragraph (7) of this section, and inserting in lieu thereof the following:

"(16) The term 'species' includes any subspecies of fish or wildlife or plants, and any distinct population segment of any species of vertebrate fish or wildlife which interbreeds when mature.";

(6) by striking out paragraph (18), as redesignated by paragraph (7) of this section, and inserting in lieu thereof the following:

"(18) the term 'State agency' means any State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish, plant, or wildlife resources within a State."; and

(7) by redesignating paragraphs (1) through (3) as paragraphs (2) through (4), respectively, by redesignating paragraph (4) as paragraph (6), by redesignating paragraphs (5) through (7) as paragraphs (8) through (10), respectively, and by redesignating paragraphs (8) through (16) as paragraphs (13) through (21), respectively.

SEC. 3. Section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1536) is amended to read as follows:

"INTERAGENCY COOPERATION

Review.

"SEC. 7. (a) CONSULTATION.—The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act. Each Federal agency shall, in consultation with and with the assistance of the Secretary, insure that any action authorized, funded, or carried out by such agency (hereinafter in this section referred to as an 'agency action') does not jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical, unless such agency has been granted an exemption for such action by the Committee pursuant to subsection (h) of this section.

16 USC 1533.

"(b) SECRETARY'S OPINION.—Consultation under subsection (a) with respect to any agency action shall be concluded within 90 days after the date on which initiated or within such other period of time as is mutually agreeable to the Federal agency and the Secretary. Promptly after the conclusion of consultation, the Secretary shall provide to the Federal agency concerned a written statement setting forth the Secretary's opinion, and a summary of the information on which the opinion is based, detailing how the agency action affects the species or its critical habitat. The Secretary shall suggest those reasonable and

Statement and
summary.

prudent alternatives which he believes would avoid jeopardizing the continued existence of any endangered or threatened species or adversely modifying the critical habitat of such species, and which can be taken by the Federal agency or the permit or license applicant in implementing the agency action.

"(c) Biological Assessment.—To facilitate compliance with the requirements of subsection (a), each Federal agency shall, with respect to any agency action of such agency for which no contract for construction has been entered into and for which no construction has begun on the date of enactment of the Endangered Species Act Amendments of 1978, request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action. If the Secretary advises, based on the best scientific and commercial data available, that such species may be present, such agency shall conduct a biological assessment for the purpose of identifying any endangered species or threatened species which is likely to be affected by such action. Such assessment shall be completed within 180 days after the date on which initiated (or within such other period as is mutually agreed to by the Secretary and such agency) and, before any contract for construction is entered into and before construction is begun with respect to such action. Such assessment may be undertaken as part of a Federal agency's compliance with the requirements of section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332).

"(d) Limitation on Commitment of Resources.—After initiation of consultation required under subsection (a), the Federal agency and the permit or license applicant shall not make any irreversible or irretrievable commitment of resources with respect to the agency action which has the effect of foreclosing the formulation or implementation of any reasonable and prudent alternative measures which would avoid jeopardizing the continued existence of any endangered or threatened species or adversely modifying or destroying the critical habitat of any such species.

Endangered Species Committee.

"(e)(1) Establishment of Committee.—There is established a committee to be known as the Endangered Species Committee (hereinafter in this section referred to as the 'Committee').

Applications, review.

"(2) The Committee shall review any application submitted to it pursuant to this section and determine in accordance with subsection (h) of this section whether or not to grant an exemption from the requirements of subsection (a) of this section for the action set forth in such application.

Membership.

"(3) The Committee shall be composed of seven members as follows:

"(A) The Secretary of Agriculture.

"(B) The Secretary of the Army.

"(C) The Chairman of the Council of Economic Advisors.

"(D) The Administrator of the Environmental Protection Agency.

"(E) The Secretary of the Interior.

"(F) The Administrator of the National Oceanic and Atmospheric Administration.

Presidential appointment.

"(G) The President, after consideration of any recommendations received pursuant to subsection (g)(2)(B) shall appoint one individual from each affected State, as determined by the Secretary, to be a member of the Committee for the consideration of the application for exemption for an agency action with respect to which such recommendations are made, not later than 30 days after an application is submitted pursuant to this section.

"(4)(A) Members of the Committee shall receive no additional pay on account of their service on the Committee.

Travel allowance.

"(B) While away from their homes or regular places of business in the performance of services for the Committee, members of the Committee shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

Quorum.

"(5)(A) Five members of the Committee or their representatives shall constitute a quorum for the transaction of any function of the Committee, except that, in no case shall any representative be considered in determining the existence of a quorum for the transaction of any function of the Committee if that function involves a vote by the Committee on any matter before the Committee.

Chairman.

"(B) The Secretary of the Interior shall be the Chairman of the Committee.

Meetings.

"(C) The Committee shall meet at the call of the Chairman or five of its members.

"(D) All meetings and records of the Committee shall be open to the public.

"(6) Upon request of the Committee, the head of any Federal agency is authorized to detail, on a nonreimbursable basis, any of the personnel of such agency to the Committee to assist it in carrying out its duties under this section.

"(7)(A) The Committee may for the purpose of carrying out its duties under this section hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Committee deems advisable.

"(B) When so authorized by the Committee, any member or agent of the Committee may take any action which the Committee is authorized to take by this paragraph.

5 USC 552a note.

"(C) Subject to the Privacy Act, the Committee may secure directly from any Federal agency information necessary to enable it to carry out its duties under this section. Upon request of the Chairman of the Committee, the head of such Federal agency shall furnish such information to the Committee.

"(D) The Committee may use the United States mails in the same manner and upon the same conditions as a Federal agency.

"(E) The Administrator of General Services shall provide to the Committee on a reimbursable basis such administrative support services as the Committee may request.

Rules and regulations.

"(8) In carrying out its duties under this section, the Committee may promulgate and amend such rules, regulations, and procedures, and issue and amend such orders as it deems necessary.

Subpenas.

"(9) For the purpose of obtaining information necessary for the consideration of an application for an exemption under this section the Committee may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents.

"(10) Except in the case of a member designated pursuant to paragraph (3)(G) of this subsection, no member shall designate any person to serve as his or her representative unless that person is, at the time of such designation, holding a Federal office the appointment to which is subject to the advice and consent of the United States Senate. In no case shall any representative, including a representative of a member designated pursuant to paragraph (3)(G) of this subsection, be eligible to cast a vote on behalf of any member.

Applications, submittal.

"(f) REGULATIONS.—Not later than 90 days after the date of enactment of the Endangered Species Act Amendments of 1978, the Secretary shall promulgate regulations which set forth the form and manner in which applications for exemption shall be submitted to the Secretary and the information to be contained in such applications. Such regulations shall require that information submitted in an application by the head of any Federal agency with respect to any agency action include, but not be limited to—

"(1) a description of the consultation process carried out pursuant to subsection (a) of this section between the head of the Federal agency and the Secretary; and

"(2) a statement describing why such action cannot be altered or modified to conform with the requirements of subsection (a) of this section.

"(g) APPLICATION FOR EXEMPTION AND CONSIDERATION BY REVIEW BOARD.—(1) A Federal agency, the Governor of the State in which an agency action will occur, if any, or a permit or license applicant may apply to the Secretary for an exemption for an agency action of such agency if, after consultation under subsection (a), the Secretary's opinion under subsection (b) indicates that the agency action may jeopardize the continued existence of any endangered or threatened species or destroy or adversely modify the critical habitat of such species. An application for an exemption shall be considered initially by a review board in the manner provided in this subsection, and shall be considered by the Endangered Species Committee for a final determination under subsection (h) after a report is made by the review board. The applicant for an exemption shall be referred to as the 'exemption applicant' in this section.

"(2)(A) An exemption applicant shall submit a written application to the Secretary, in a form prescribed under subsection (f) of this section, not later than 90 days after the completion of the consultation process. Such application shall set forth the reasons why the exemption applicant considers that the agency action meets the requirements for an exemption under this subsection.

Notification.

"(B) Upon receipt of an application for exemption for an agency action under paragraph (1), the Secretary shall promptly notify the Governor of each affected State, if any, as determined by the Secretary, and request the Governors so notified to recommend individuals to be appointed to the review board to be established under paragraph (3) and to the Endangered Species Committee for consideration of such application.

Review board, establishment.

"(3)(A) A review board shall be established for purposes of considering an application for exemption and submitting a report to the Endangered Species Committee under this subsection as follows:

"(i) One individual shall be appointed to the board by the Secretary not later than 15 days after an application is submitted pursuant to paragraph (2).

Appointment.

"(ii) One individual shall be appointed to the board by the President, not later than 30 days after an application is submitted pursuant to paragraph (2) and after consideration of any recommendations received pursuant to paragraph (2)(B). An individual appointed by the President under this subparagraph shall be a resident of a State, if any, in which the agency action will be, or is being, carried out.

"(iii) One administrative law judge shall be selected to serve on the board by the Civil Service Commission in the same manner as administrative law judges are selected under section 3344 of title 5 of the United States Code to be detailed to an agency which occasionally or temporarily is insufficiently staffed with administrative law judges. The use by the review board of such an administrative law judge shall be on a reimbursable basis.

Compensation.

"(B) Members of a review board who are full-time officers or employees of the United States shall receive no additional pay on account of their service on the board. All other members shall be entitled to receive an amount not to exceed the daily equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day during which they are engaged in the actual performance of duties vested in the board. While away from their homes or regular places of business in the performance of services for a review board, members of the board shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

5 USC 5332 note.
Per diem and travel allowances.

"(4) The Secretary shall submit the application to the review board immediately after its appointment under paragraph (3), and the Secretary shall submit to the review board, in writing, his views and recommendations with respect to the application within 60 days after receiving a copy of any application under paragraph (2).

Determination.

"(5) It shall be the duty of a review board appointed under paragraph (3) to make a full review of the consultation carried out under subsection (a), and within 60 days after its appointment or within such longer time as is mutually agreed upon between the exemption applicant and the Secretary, to make a determination, by a majority vote, (1) whether an irresolvable conflict exists and (2) whether such exemption applicant has—

"(A) carried out its consultation responsibilities as described in subsection (a) in good faith and made a reasonable and responsible effort to develop and fairly consider modifications or reasonable and prudent alternatives to the proposed agency action which will avoid jeopardizing the continued existence of an endangered or threatened species or result in the adverse modification or destruction of a critical habitat;

"(B) conducted any biological assessment required of it by subsection (c); and

"(C) refrained from making any irreversible or irretrievable commitment of resources prohibited by subsection (d).

Any determination by the review board that an irresolvable conflict does not exist or that the exemption applicant has not met the requirements of subparagraph (A), (B), or (C) shall be considered final agency action for purposes of chapter 7 of title 5 of the United States Code.

5 USC 701 *et seq.*

"(6) If the review board determines that an irresolvable conflict exists and makes positive determinations under subparagraphs (A), (B), and (C) of paragraph (5), it shall proceed to prepare the report to be submitted under paragraph (7).

Report to Committee.

"(7) Within 180 days after making the determinations under paragraph (6), the review board shall submit to the Committee a report discussing—

"(A) the availability of reasonable and prudent alternatives to the agency action, and the nature and extent of the benefits of the agency action and of alternative courses of action consistent with conserving the species or the critical habitat;

"(B) a summary of the evidence concerning whether or not the agency action is in the public interest and is of national or regional significance;

"(C) appropriate reasonable mitigation and enhancement measures which should be considered by the Committee.

"(8) To the extent practicable within the time required for action under subsection (g) of this section, and except to the extent inconsistent with the requirements of this section, the consideration of any application for an exemption under this section and the conduct of any hearing under this subsection shall be in accordance with sections 554, 555, and 556 (other than subsection (b)(3) of section 556) of title 5, United States Code.

"(9) In carrying out its duties under this subsection, a review board may, and any member of a review board if so authorized by the review board, may—

"(A) sit and act at such times and places, take such testimony, and receive such evidence, as the review board deems advisable;

5 USC 552a note.

"(B) subject to the Privacy Act of 1974, request of any Federal agency or applicant information necessary to enable it to carry out such duties, and upon such request the head of such Federal agency shall furnish such information to the review board; and

"(C) use the United States mails in the same manner and upon the same conditions as a Federal agency.

"(10) Upon request of a review board, the head of any Federal agency is authorized to detail, on a nonreimbursable basis, any of the personnel of such agency to the review board to assist it in carry out its duties under this section.

"(11) The Administrator of the General Services Administration shall provide to a review board, on a reimbursable basis, such administrative support services as the review board may request.

"(12) All meetings and records of review boards shall be open to the public.

Determination.

"(h) EXEMPTION.—(1) The Committee shall make a final determination whether or not to grant an exemption within 90 days of receiving the report of the review board under subsection (g)(7). The Committee shall grant an exemption from the requirements of subsection (a) for an agency action if, by a vote of not less than five of its members voting in person—

"(A) it determines on the record, based on the report of the review board and on such other testimony or evidence as it may receive, that—

"(i) there are no reasonable and prudent alternatives to the agency action;

"(ii) the benefits of such action clearly outweigh the benefits of alternative courses of action consistent with conserving the species or its critical habitat, and such action is in the public interest; and

"(iii) the action is of regional or national significance; and

"(B) it establishes such reasonable mitigation and enhancement measures, including, but not limited to, live propagation, transplantation, and habitat acquisition and improvement, as are necessary and appropriate to minimize the adverse effects of the agency action upon the endangered species, threatened species, or critical habitat concerned.

Any final determination by the Committee under this subsection shall be considered final agency action for purposes of chapter 7 of title 5 of the United States Code.

5 USC 701 *et seq.*

"(2)(A) Except as provided in subparagraph (B), an exemption for an agency action granted under subsection (h) shall constitute a permanent exemption with respect to all endangered or threatened species for the purposes of completing such agency action: *Provided*, That a biological assessment has been conducted under subsection (c).

"(B) An exemption shall not be permanent under subparagraph (A) if the Secretary finds, based on the best scientific and commercial data available, that such exemption would result in the extinction of the species. If the Secretary so finds, the Committee shall determine within 30 days after such finding whether to grant an exemption for the agency action notwithstanding the Secretary's finding.

Certification.

"(i) Review by Secretary of State.—Notwithstanding any other provision of this Act, the Committee shall be prohibited from considering for exemption any application made to it, if the Secretary of State, after a review of the proposed agency action and its potential implications, and after hearing, certifies, in writing, to the Committee within 60 days of any application made under this section that the granting of any such exemption and the carrying out of such action would be in violation of an international treaty obligation or other international obligation of the United States. The Secretary of State shall, at the time of such certification, publish a copy thereof in the Federal Register.

Publication in Federal Register.

Exemption.

"(j) Notwithstanding any other provision of this Act, the Committee shall grant an exemption for any agency action if the Secretary of Defense finds that such exemption is necessary for reasons of national security.

"(k) Special Provisions.—An exemption decision by the Committee under this section shall not be a major Federal action for purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.): *Provided*, That an environmental impact statement which discusses the impacts upon endangered species or threatened species or their critical habitats shall have been previously prepared with respect to any agency action exempted by such order.

"(l) Committee Orders.—(1) If the Committee determines under subsection (h) that an exemption should be granted with respect to any agency action, the Committee shall issue an order granting the exemption and specifying the mitigation and enhancement measures established pursuant to subsection (h) which shall be carried out and paid for by the exemption applicant in implementing the agency action. All necessary mitigation and enhancement measures shall be authorized prior to the implementing of the agency action and funded concurrently with all other project features.

"(2) The applicant receiving such exemption shall include the costs of such mitigation and enhancement measures within the overall costs of continuing the proposed action. Notwithstanding the preceding sentence the costs of such measures shall not be treated as project costs for the purpose of computing benefit-cost or other ratios for the proposed action. Any applicant may request the Secretary to carry out such mitigation and enhancement measures. The costs incurred by the Secretary in carrying out any such measures shall be paid by the applicant receiving the exemption. No later than one year after the granting of an exemption, the exemption applicant shall submit to the Council on Environmental Quality a report describing its compliance with the mitigation and enhancement measures prescribed by this section. Such a report shall be submitted annually until all such mitigation and enhancement measures have been completed. Notice of the public availability of such reports shall be published in the Federal Register by the Council on Environmental Quality.

Report to Council on Environmental Quality.

Report availability, publication in Federal Register.

"(m) Notice.—The 60-day notice requirement of section 11(g) of this Act shall not apply with respect to review of any final determination of the Committee under subsection (h) of this section granting an exemption from the requirements of subsection (a) of this section.

16 USC 1540.

"(n) Judicial Review.—Any person, as defined by section 3(13) of this Act, may obtain judicial review, under chapter 7 of title 5 of the United States Code, of any decision of the Endangered Species Committee under subsection (h) in the United States Court of Appeals for (1) any circuit wherein the agency action concerned will be, or is being, carried out, or (2) in any case in which the agency action will be, or is being, carried out outside of any circuit, the District of Columbia, by filing in such court within 90 days after the date of issuance of the decision, a written petition for review. A copy of such petition shall be transmitted by the clerk of the court to the Committee and the Committee shall file in the court the record in the proceeding, as provided in section 2112, of title 28, United States Code. Attorneys designated by the Endangered Species Committee may appear for, and represent the Committee in any action for review under this subsection.

16 USC 1532.
5 USC 701 *et seq.*

"(o) Exception on Taking.—Notwithstanding sections 4(d) and 9(a) of this Act or any regulations promulgated pursuant to such sections, any action for which an exemption is granted under subsection (h) of this section shall not be considered a taking of any endangered or threatened species with respect to any activity which is necessary to carry out such action.

16 USC 1533, 1538.

"(p) Exemptions in Presidentially Declared Disaster Areas.—In any area which has been declared by the President to be a major disaster area under the Disaster Relief Act of 1974, the President is authorized to make the determinations required by subsections (g) and (h) of this section for any project for the repair or replacement of a public facility substantially as it existed prior to the disaster under section 401 or 402 of the Disaster Relief Act of 1974, and which the President determines (1) is necessary to prevent the recurrence of such a natural disaster and to reduce the potential loss of human life, and (2) to involve an emergency situation which does not allow the ordinary procedures of this section to be followed. Notwithstanding

42 USC 5121 note.

42 USC 5171, 5172.

any other provision of this section, the Committee shall accept the determinations of the President under this subsection.

"(q) Authorization.—There is authorized to be appropriated to the Secretary to assist review boards and the Committee in carrying out their functions under subsections (e), (f), (g), and (h) of this section not to exceed $600,000 for fiscal year 1979, and not to exceed $300,000 for the period beginning October 1, 1979, and ending March 31, 1980. The Chairman of the Committee shall report to the Congress before the end of fiscal year 1979 with respect to the adequacy of the budget authority contained in this subsection.".

Report to Congress.

Sec. 4. Section 9(b) of the Endangered Species Act (16 U.S.C. 1538) is amended by inserting "(1)" after "(b) Species Held in Captivity or Controlled Environment.—" and by adding the following new paragraph:

"(2)(A) This section shall not apply to—

"(i) any raptor legally held in captivity or in a controlled environment on the effective date of the Endangered Species Act Amendments of 1978; or

"(ii) any progeny of any raptor described in clause (i);

until such time as any such raptor or progeny is intentionally returned to a wild state.

Regulation.

"(B) Any person holding any raptor or progeny described in subparagraph (A) must be able to demonstrate that the raptor or progeny does, in fact, qualify under the provisions of this paragraph, and shall maintain and submit to the Secretary, on request, such inventories, documentation, and records as the Secretary may by regulation require as being reasonably appropriate to carry out the purposes of this paragraph. Such requirements shall not unnecessarily duplicate the requirements of other rules and regulations promulgated by the Secretary.".

Sec. 5. Section 10 of the Endangered Species Act of 1973 (16 U.S.C. 1539) is amended by adding at the end thereof the following new subsections:

16 USC 1533.

"(h) Certain Antique Articles.—(1) Sections 4(d), 9(a), and 9(c) do not apply to any article (other than scrimshaw) which—

"(A) was made before 1830;

"(B) is composed in whole or in part of any endangered species or threatened species listed under section 4;

"(C) has not been repaired or modified with any part of any such species on or after the date of the enactment of this Act; and

"(D) is entered at a port designated under paragraph (3).

Documentation submittal, regulations.

"(2) Any person who wishes to import an article under the exception provided by this subsection shall submit to the customs officer concerned at the time of entry of the article such documentation as the Secretary of the Treasury, after consultation with the Secretary of the Interior, shall by regulation require as being necessary to establish that the article meets the requirements set forth in paragraph (1)(A), (B), and (C).

Port designation, consultation.

"(3) The Secretary of the Treasury, after consultation with the Secretary of the Interior, shall designate one port within each customs region at which articles described in paragraph (1)(A), (B), and (C) must be entered into the customs territory of the United States.

Ante, p. 3751.

"(4) Any person who imported, after December 27, 1973, and on or before the date of the enactment of the Endangered Species Act Amendments of 1978, any article described in paragraph (1) which—

"(A) was not repaired or modified after the date of importation with any part of any endangered species or threatened species listed under section 4; 16 USC 1533.

"(B) was forfeited to the United States before such date of the enactment, or is subject to forfeiture to the United States on such date of enactment, pursuant to the assessment of a civil penalty under section 11; and *Infra.*

"(C) is in the custody of the United States on such date of enactment;

may, before the close of the one-year period beginning on such date of enactment, make application to the Secretary for return of the article. Application shall be made in such form and manner, and contain such documentation, as the Secretary prescribes. If on the basis of any such application which is timely filed, the Secretary is satisfied that the requirements of this paragraph are met with respect to the article concerned, the Secretary shall return the article to the applicant and the importation of such article shall, on and after the date of return, be deemed to be a lawful importation under this Act.

Exemption.

"(i)(1) TELLICO AND GRAYROCKS PROJECTS.—Notwithstanding any other provision of this Act, the Committee shall, within 30 days of the date of the enactment of the Endangered Species Act Amendments of 1978, proceed to consider the exemption of the Tellico Dam and Reservoir Project and the Grayrocks Dam and Reservoir Project from the requirements of section 7(a). For the purposes of such consideration, the Committee shall grant an exemption to such projects if the criteria of section 7(h)(1)(A)(i) and 7(h)(1)(A)(ii) are met. A decision on any such exemption shall be made within 90 days after the date of the enactment of the Endangered Species Act Amendments of 1978. If no decision is made within such 90-day period, such project shall be deemed to be exempted from the requirements of section 7(a). *Ante*, p. 3752.

Project modifications.

"(2) Following the rendering of a biological opinion by the United States Fish and Wildlife Service concerning the effect, if any, of the operation of the Missouri Basin Power Project on endangered species or their critical habitat, the responsible officers of the Rural Electrification Administration, the Secretary of the Interior, and the Secretary of the Army, shall require such modifications in the operation or design of the project as they may determine are required to insure that actions authorized, funded, or carried out by them, relating to the Missouri Basin Power Project do not jeopardize the continued existence of such endangered species or result in the destruction or adverse modification of habitat of such species which is or has been determined to be critical by the Secretary of the Interior, after consultation as appropriate with the affected States.".

Civil penalties.

SEC. 6. Section 11 of the Endangered Species Act of 1973 (16 U.S.C. 1540) is amended—

(1) in the first and second sentences of subsection (a)(1) by striking out "or who knowingly commits an act in the course of a commercial activity which violates" each place it appears and inserting in lieu thereof "and any person engaged in business as an importer or exporter of fish, wildlife, or plants who violates";

(2) in the third sentence of subsection (a)(1) by striking out "$1,000" and inserting in lieu thereof "$500";

(3) in subsection (b)(1) by striking out "willfully commits an act which" each place it appears and inserting in lieu thereof "knowingly";

(4) in subsection (b)(2) by inserting "a person to import or export fish, wildlife, or plants, or to operate a quarantine station for imported wildlife, or authorizing" after "authorizing".

SEC. 7. Section 11(a) of the Endangered Species Act of 1973 (16 U.S.C. 1540) is amended by adding a new paragraph at the end thereof as follows:

"(3) Notwithstanding any other provision of this Act, no civil penalty shall be imposed if it can be shown by a preponderance of the evidence that the defendant committed an act based on a good faith belief that he was acting to protect himself or herself, a member of his or her family, or any other individual from bodily harm, from any endangered or threatened species.".

SEC. 8. Section 11(b) of the Endangered Species Act of 1973 (16 U.S.C. 1540) is amended by adding a new paragraph at the end thereof as follows:

"(3) Notwithstanding any other provision of this Act, it shall be a defense to prosecution under this subsection if the defendant committed the offense based on a good faith belief that he was acting to protect himself or herself, a member of his or her family, or any other individual, from bodily harm from any endangered or threatened species.".

SEC. 9. Section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

15 USC 1535. *Ante*, p. 3752.

"SEC. 15. Except as authorized in sections 6 and 7 of this Act, there are authorized to be appropriated—

"(1) not to exceed $25,000,000 for the fiscal year ending September 30, 1977, and the fiscal year ending September 30, 1977, and the fiscal year September 30, 1978, not to exceed $23,000,000 for the fiscal year ending September 30, 1979, and not to exceed $12,500,000 for the period beginning October 1, 1979, and ending March 31, 1980.

"(2) not to exceed $5,000,000 for the fiscal year ending September 30, 1977, and the fiscal year ending September 30, 1978, not to exceed $2,500,000 for the fiscal year ending September 30, 1979, not to exceed $12,500,000 for the period beginning October 1, 1979 and ending March 31, 1980, to enable the Department of Commerce to carry out such functions and responsibilities as it may have been given under this Act.".

SEC. 10. Section 6(c) of the Endangered Species Act of 1973 (16 U.S.C. 1535(c)) is amended—

(1) by inserting "(1)" after "(c) COOPERATIVE AGREEMENTS.—";

(2) by redesignating paragraphs (1) through (5) as subparagraphs (A) through (E), respectively;

(3) by redesignating subparagraphs (A) and (B) as clauses (i) and (ii), respectively;

(4) by striking out "subsection" in the matter preceding subparagraph (A) (as so redesignated) and inserting in lieu thereof "paragraph";

(5) by striking out "endangered species or threatened species" in subparagraph (D) (as so redesignated) and inserting in lieu thereof "endangered or threatened species of fish or wildlife";

(6) by striking out "paragraphs (3), (4), and (5) of this subsection" in clause (i) (as so redesignated) and inserting in lieu thereof "subparagraphs (C), (D), and (E) of this paragraph";

(7) by striking out "subparagraph (A) and this subparagraph" in clause (ii) (as so redesignated) and inserting in lieu thereof "clause (i) and this clause"; and

(8) by adding at the end thereof the following new paragraph:

Cooperative agreement.
16 USC 1535.

Determination.

State program, annual reconfirmations.

"(2) In furtherance of the purposes of this Act, the Secretary is authorized to enter into a cooperative agreement in accordance with this section with any State which establishes and maintains an adequate and active program for the conservation of endangered species and threatened species of plants. Within one hundred and twenty days after the Secretary receives a certified copy of such a proposed State program, he shall make a determination whether such program is in accordance with this Act. Unless he determines, pursuant to this paragraph, that the State program is not in accordance with this Act, he shall enter into a cooperative agreement with the State for the purpose of assisting in implementation of the State program. In order for a State program to be deemed an adequate and active program for the conservation of endangered species of plants and threatened species of plants, the Secretary must find, and annually thereafter reconfirm such finding, that under the State program—

"(A) authority resides in the State agency to conserve resident species of plants determined by the State agency or the Secretary to be endangered or threatened;

"(B) the State agency has established acceptable conservation programs, consistent with the purposes and policies of this Act, for all resident species of plants in the State which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

Investigations.

"(C) the State agency is authorized to conduct investigations to determine the status and requirements for survival of resident species of plants; and

Public participation.

"(D) provision is made for public participation in designating resident species of plants as endangered or threatened; or

that under the State program—

"(i) the requirements set forth in subparagraphs (C) and (D) of this paragraph are complied with, and

"(ii) plans are included under which immediate attention will be given to those resident species of plants which are determined by the Secretary or the State agency to be endangered or threatened and which the Secretary and the State agency agree are most urgently in need of conservation programs; except that a cooperative agreement entered into with a State whose program is deemed adequate and active pursuant to clause (i) and this clause shall not affect the applicability of prohibitions set forth in or authorized pursuant to section 4(d) or section 9(a)(1) with

16 USC 1533, 1538.

respect to the taking of any resident endangered or threatened species.".

Regulation.

SEC. 11. Section 4 of the Endangered Species Act of 1973 (16 U.S.C. 1533) is amended—

(1) by adding at the end of subsection (a)(1) the following new sentence: "At the time any such regulation is proposed, the Secretary shall also by regulation, to the maximum extent prudent, specify any habitat of such species which is then considered to be critical habitat. The requirement of the preceding sentence shall not apply with respect to any species which was listed prior to enactment of the Endangered Species Act Amendments of 1978.";

Ante, p. 3751.

(2) by amending subsection (c)(1) by striking out "and shall", and by inserting immediately before the *final* period the following: ", and specify any critical habitat within such range";

(3) in subsection (c) by inserting at the end thereof the following new paragraph:

Review and determination.

"(4) The Secretary shall—

"(A) conduct, at least once every five years, a review of all species included in a list which is published pursuant to paragraph (1) and which is in effect at the time of such review; and

"(B) determine on the basis of such review whether any such species should—

"(i) be removed from such list;

"(ii) be changed in status from an endangered species to a threatened species; or

"(iii) be changed in status from a threatened species to an endangered species.

Each determination under subparagraph (B) shall be made in accordance with the provisions of subsections (a) and (b).".

(4) by amending subsection (f)—

(A) in paragraph (2)(A) by striking out "In" and inserting in lieu thereof "Except as provided in subparagraph (B), in";

(B) by inserting after subparagraph (A) of paragraph (2) the following new subparagraph:

Regulations.

"(B) In the case of any regulation proposed by the Secretary to carry out the purposes of this section with respect to the determination and listing of endangered or threatened species and their critical habitats in any State (other than regulations to implement the Convention), the Secretary—

Publication in Federal Register.

"(i) shall publish general notice of the proposed regulation (including the complete text of the regulation), not less than 60 days before the effective date of the regulation—

"(I) in the Federal Register, and

"(II) if the proposed regulation specifies any critical habitat, in a newspaper of general circulation within or adjacent to such habitat;

"(ii) shall offer for publication in appropriate scientific journals the substance of the Federal Register notice referred to in clause (i)(I);

Notice.

"(iii) shall give actual notice of the proposed regulation (including the complete text of the regulation), and any environmental assessment or environmental impact statement prepared on the proposed regulation, not less than 60 days before the effective date of the regulation to all general local governments located within or adjacent to the proposed critical habitat, if any; and

"(iv) shall—

Public meetings and hearing.

"(I) if the proposed regulation does not specify any critical habitat, promptly hold a public meeting on the proposed regulation within or adjacent to the area in which the endangered or threatened species is located, if request therefor is filed with the Secretary by any person within 45 days after the date of publication of general notice under clause (i)(I), and

"(II) if the proposed regulation specifies any critical habitat, promptly hold a public meeting on the proposed regulation within the area in which such habitat is located in each State, and, if requested, hold a public hearing in each such State.

If a public meeting or hearing is held on any regulation, the regulation may not take effect before the 60th day after the date on which the meeting or hearing is concluded, and if more than one public meeting or hearing is held, before the 60th day after the date on which the last such meeting or hearing is concluded. Any accidental failure to provide actual notice under clause (ii) to all general local governments required to be given notice shall not invalidate the proposed regulation.";

(C) by redesignating subparagraph (B) of paragraph (2) as subparagraph (C), and by inserting "or (B)" after "Neither subparagraph (A)" in such subparagraph; and

(D) by adding at the end thereof the following new paragraphs:

16 USC 1533.

Publication in Federal Register.

"(4) Any proposed or final regulation which specifies any critical habitat of any endangered species or threatened species shall be based on the best scientific data available, and the publication in the Federal Register of any such regulation shall, to the maximum extent practicable, be accompanied by a brief description and evaluation of those activities (whether public or private) which, in the opinion of the Secretary, if undertaken may adversely modify such habitat, or may be impacted by such designation.

Regulations or withdrawal notice, publication in Federal Register.

"(5) A final regulation adding a species to any list published pursuant to subsection (c) shall be published in the Federal Register not later than two years after the date of publication of notice of the regulation proposing such listing under paragraph (B)(i)(I). If a final regulation is not adopted within such two-year period, the Secretary shall withdraw the proposed regulation and shall publish notice of such withdrawal in the Federal Register not later than 30 days after the end of such period. The Secretary shall not propose a regulation adding to such a list any species for which a proposed regulation has been withdrawn under this paragraph unless he determines that sufficient new information is available to warrant the proposal of a regulation. No proposed regulation for the listing of any species published before the date of the enactment of the Endangered Species

Act Amendments of 1978 shall be withdrawn under this paragraph before the end of the one-year period beginning on such date of enactment."; and

16 USC 1533.

(5) by adding at the end thereof the following new subsection:

"(g) RECOVERY PLANS.—The Secretary shall develop and implement plans (hereinafter in this subsection referred to as 'recovery plans') for the conservation and survival of endangered species and threatened species listed pursuant to this section, unless he finds that such a plan will not promote the conservation of the species. The Secretary, in developing and implementing recovery plans, may procure the services of appropriate public and private agencies and institutions, and other qualified persons. Recovery teams appointed pursuant to this subsection shall not be subject to the Federal Advisory Committee Act.";

5 USC app.

(6) in subsection (c)(2)—

(A) by striking out "upon" and inserting in lieu thereof "within 90 days of the receipt of";

Publication in Federal Register.

(B) by inserting "and publish in the Federal Register" after "conduct";

(C) by inserting "the status of" after "a review of"; and

(D) by inserting at the end thereof the following: "Such review and finding shall be made and published prior to the initiation of any procedures under subsection (b)(1).".

Critical habitat determination, considerations.

(7) by adding at the end of subsection (b) the following new paragraph:

"(4) In determining the critical habitat of any endangered or threatened species, the Secretary shall consider the economic impact, and any other relevant impacts, of specifying any particular area as critical habitat, and he may exclude any such area from the critical habitat if he determines that the benefits of such exclusion outweigh the benefits of specifying the area as part of the critical habitat, unless he determines, based on the best scientific and commercial data available, that the failure to designate such area as critical habitat will result in the extinction of the species.".

Establishment and implementation.

SEC. 12. That portion of subsection (a) of section 5 of the Endangered Species Act of 1973 (16 U.S.C. 1534) which precedes paragraph (1) is amended to read as follows:

"(a) PROGRAM.—The Secretary, and the Secretary of Agriculture with respect to the National Forest System, shall establish and implement a program to conserve fish, wildlife, and plants, including those which are listed as endangered species or threatened species pursuant

16 USC 1533.

to section 4 of this Act. To carry out such a program, the appropriate Secretary—".

Summary, publication in Federal Register.

SEC. 13. Paragraph (3) of section 4(f) of the Endangered Species Act of 1973 (16 U.S.C. 1533) is amended to read as follows:

"(3) The publication in the Federal Register of any proposed or final regulation which is necessary or appropriate to carry out the purposes of this Act shall include a summary by the Secretary of the data on which such regulation is based and shall show the relationship of such data to such regulations.".

Dr. Eugene L. Vickery, exception.

SEC. 14. Notwithstanding any provision of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) or any regulation promulgated or policy established thereunder, the Secretary of the Interior is authorized and directed to release to Doctor Eugene L. Vickery of Lena, Illinois, a narwhale (Monodon monocerus) tusk cane contained in a shipment consigned to him that was seized by agents of the United States Fish and Wildlife Service at O'Hare International Airport, Chicago, Illinois, on November 30, 1977. For purposes of section 9 and section 11 of such Act, Doctor Vickery shall be considered not to have violated any provision of such Act with respect to the importation of such narwhale tusk cane.

Ante, pp. 3760, 3761.

Approved November 10, 1978.

95TH CONGRESS
2D SESSION

H. R. 14104

IN THE HOUSE OF REPRESENTATIVES

SEPTEMBER 18, 1978

Mr. LEGGETT (for himself, Mr. MURPHY of New York, Mr. DINGELL, Mr. RUPPE, Mr. FORSYTHE, Mr. BOWEN, Mr. OBERSTAR, Mr. DE LA GARZA, Mr. YOUNG of Alaska, Mr. AUCOIN, Mr. EMERY, Mr. HUGHES, Mr. AKAKA, Mr. DORNAN, Mr. EVANS of Delaware, Mr. TRIBLE, and Mr. ROONEY) introduced the following bill; which was referred to the Committee on Merchant Marine and Fisheries

---

A BILL

To authorize appropriations to carry out the Endangered Species Act of 1973 through fiscal year 1981, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Endangered Species Act Amendments of 1978".

SEC. 2. Section 4 of the Endangered Species Act of 1973 (16 U.S.C. 1533) is amended—

(1) by adding at the end of subsection (a)(1) the following new sentence: "At the time any such regulation is proposed, the Secretary shall also by regulation, to the maximum extent prudent, specify any habitat of such species which is then considered to be critical habitat. The requirement of the preceding sentence shall not apply with respect to any species which was listed prior to enactment of the Endangered Species Act Amendments of 1978.";

(2) by adding at the end of subsection (b) the following new paragraph:

"(4) In determining the critical habitat of any endangered or threatened invertebrate animal species, the Secretary shall consider the economic impact, and any other relevant impacts, of specifying any particular area as critical habitat, and he may exclude any such area from the critical habitat if he determines that the benefits of such exclusion outweigh the benefits of specifying the area as part of the critical habitat."

(3) by amending subsection (c)(1) by striking out "and shall", and by inserting immediately before the period the following: ", and specify any critical habitat within such range";

(4) by amending subsection (f)—

(A) by amending paragraph (2)(A) to read as follows:

"(2)(A) In the case of any regulation proposed by the Secretary to carry out the purposes of this section with respect to the determination and listing of endangered or threatened species and their critical habitats in any State (other than regulations to implement the Convention), the Secretary—

"(i) shall publish notice of the proposed regulation (including the complete text of the regulation), not less than 60 days before the effective date of the regulation—

"(I) in the Federal Register, and

"(II) if the proposed regulation specifies any critical habitat, in a newspaper of general circulation within or adjacent to such habitat; and

"(ii) shall give actual notice of the proposed regulation (including the complete text of the regulation), and any environmental assessment or environmental impact statement prepared on the proposed regulation, not less than 60 days before the effective date of the regulation to all general local governments located within or adjacent to the proposed critical habitat;

"(iii) shall—

"(I) if the proposed regulation does not specify any critical habitat, promptly hold a public meeting on the proposed regulation, if request therefor is filed with the Secretary by any person within 45 days after the date of publication of general notice under clause (i)(I), and

"(II) if the proposed regulation specifies any critical habitat, promptly hold a public meeting on the proposed regulation within the area in which such habitat is located in each State, and, if requested, hold a public hearing in each such State.

If a public meeting or hearing is held on any regulation, the regulation may not take effect before the 60th day after the date on which the meeting or hearing is concluded, and if more than one public meeting or hearing is held, before the 60th day after the date on which the last such meeting or hearing is concluded. Any accidental failure to provide actual notice under clause (ii) to all general local governments required to be given notice shall not invalidate the proposed regulation."; and

(B) by adding at the end thereof the following new paragraph:

"(4) Any proposed or final regulation which specifies any critical habitat of any endangered species or threatened species shall be based on the best scientific data available, and the publication in the Federal Register of any such regulation shall, to the maximum extent practicable, be accompanied by a brief description and evaluation of those activities (whether public or private) which, in the opinion of the Secretary, if undertaken may adversely modify such habitat, or may be impacted by such designation."; and

(5) by adding at the end thereof the following new subsection:

"(g) Recovery Plans.—The Secretary shall develop and implement plans (hereinafter in this subsection referred to as 'recovery plans') for the conservation or survival of endangered species and threatened species listed pursuant to this section. The Secretary, in developing and implementing recovery plans, may procure the services of appropriate public and private agencies and institutions, and other qualified persons. Recovery teams appointed pursuant to this subsection shall not be subject to the Federal Advisory Committee Act.".

Sec. 3. Section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1536) is amended to read as follows:

"INTERAGENCY COOPERATION

"Sec. 7. (a) Review by Secretary.—The Secretary shall review all other programs administered by him and utilize such programs in furtherance of the purposes of this Act.

"(b) AGENCY CONSERVATION PROGRAMS.—Each Federal agency shall, after consultation with and with the assistance of the Secretary, utilize its authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4.

"(c) AGENCY ACTION.—(1) Each Federal agency shall insure that any action authorized, funded, or carried out by the agency (hereinafter in this section referred to as an 'agency action') does not result in species or habitat degradation unless an exemption has been granted by the Endangered Species Committee under subsection (f) with respect to such agency action.

"(2) If any Federal agency—

"(A) considers that any agency action over which it has jurisdiction may result in species or habitat degradation; or

"(B) is notified by the Secretary that the Secretary considers that such agency action may have such a result;

the Federal agency and the Secretary shall undertake immediate consultation with respect to the matter, including, but not limited to, consultation to determine if reasonable and prudent alternatives are available. Consultation under this paragraph with respect to any agency action shall be concluded within 90 days after the date on which initiated or within such other period of time as is mutually agreeable to the Federal agency and the Secretary. Promptly after the conclusion of consultation, the Secretary shall provide to the Federal agency concerned a written statement setting forth the Secretary's opinion, and a summary of the information on which the opinion is based, detailing whether the agency action may result in species or habitat degradation and whether there are reasonable and prudent alternatives which would avoid species or habitat degradation which can be taken by the Federal agency in implementing the agency action.

"(3) To facilitate compliance with the requirements of paragraph (2)(A), each Federal agency shall, with respect to any action of such agency for which no contract for construction has been entered into and for which no construction has begun on the date of enactment of the Endangered Species Act Amendments of 1978, request of the Secretary information whether any listed species may be present in the area of such proposed action. If the Secretary advises, based on the best scientific and commercial data available, that such species may be present, such agency shall conduct a biological assessment for the purpose of identifying any endangered species or threatened species which is likely to be affected by such action. Such assessment shall be completed before any contract for construction is entered into and before construction is begun with respect to such action. Such assessment may be undertaken as part of a Federal agency's compliance with the requirements of section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332).

"(4) After initiation of consultation required under paragraph (2), the Federal agency shall not make any irreversible or irretrievable commitment of resources with respect to the agency action which has the effect of foreclosing the formulation or implementation of any reasonable and prudent alternative measures which would avoid species or habitat degradation.

"(d) APPLICATION FOR EXEMPTION AND CONSIDERATION BY REVIEW BOARD.—(1) A Federal agency, the Governor of the State in which the Federal agency action will occur, or a permit or license applicant may apply to the Secretary for an exemption for an agency action of such agency if after consultation under subsection (c)(2) the Secretary's opinion indicates that the agency action may result in species or habitat degradation. An application for an exemption shall be considered initially by a review board in the manner provided in this subsection, and shall be considered by the Endangered Species Committee for a final determination under subsection (f) after a recommendation is made by the review board.

"(2)(A) Any Federal agency, Governor, or permit or license applicant seeking an exemption under this subsection shall submit a written application to the Secretary, in a form prescribed by the Secretary, not later than 90 days after the completion of the consultation process. Such application shall set forth the reasons why the Federal agency, Governor, or permit or license applicant considers that the agency action meets the requirements for an exemption under this subsection.

"(B) Upon receipt of the application for exemption referred to in paragraph (1), the Secretary shall promptly notify the Governor or Governors of the affected States and request that they appoint a member of the review board to be established under paragraph (3) in accordance with the provisions of such paragraph.

"(3)(A) A review board consisting of three members shall be established for purposes of considering an application for exemption and making recommendations to the Endangered Species Committee under this subsection as follows:

"(i) The Secretary and the Governor of the affected State shall each appoint one individual to the board not later than 15 days after a request is submitted pursuant to paragraph (2). If more than one State is affected by the agency action, the Governors of such States shall appoint one individual collectively.

"(ii) The two individuals appointed under clause (i) shall appoint one individual not later than 15 days after both of them have been appointed.

"(B) Members of a review board who are full-time officers or employees of the United States shall receive no additional pay on account of their service on the board. All other members shall be entitled to receive an amount not to exceed the daily equivalent of the annual rate of basic pay in effect for grade GS–18 of the General Schedule for each day during which they are engaged in the actual performance of duties vested in the board. While away from their homes or regular places of business in the performance of services for a review board, members of the board shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

"(4) The Secretary shall submit the application to the review board immediately after its appointment under paragraph (3), and the Secretary shall submit to the review board, in writing, his views and recommendations with respect to the application within 60 days after receiving a copy of any application under paragraph (2).

"(5) It shall be the duty of a review board appointed under paragraph (3) to make a full review of the consultation carried out under subsection (c)(2), and within 60 days after its appointment or within such longer time as is mutually agreed upon between the agency and the Secretary, to make a determination, by a majority vote, whether such agency has—

"(A) carried out its consultation responsibilities in good faith and made a reasonable and responsible effort to develop and fairly consider modifications or reasonable and prudent alternatives to its proposed action which will avoid species or habitat degradation;

"(B) conducted any biological assessment required of it by subsection (c)(3); and

"(C) refrained from making any irreversible or irretrievable commitment of resources prohibited by subsection (c)(4).

Any determination by the review board that the agency has not met the requirements of subparagraph (A), (B), or (C) shall be considered final agency action for purposes of chapter 7 of title 5 of the United States Code.

"(6) If the review board makes positive determinations under subparagraphs (A), (B), and (C) of paragraph (5), it shall proceed to consider the application for exemption. In considering any application for an exemption, a review board shall take into account the reasons for an exemption set forth in the application of the Federal agency, Governor, or permit or license applicant, the views of the Secretary submitted under paragraph (4), and the views of other Federal and State agencies and appropriate persons. The review board shall recommend an exemption from the requirements of subsection (c)(1) for any agency action if, by a majority vote, it determines on the record after an opportunity for a hearing held in accordance with sections 554, 555, and 556 (other than subsection (b)(3) of section 556) of title 5 of the United States Code, that—

"(A) there are no feasible and prudent alternatives to the agency action;

"(B) the benefits of such action clearly outweigh the benefits of alternative courses of action consistent with conserving the species or its critical habitat, and such action is in the public interest; and

"(C) the action is of national or regional significance.

The review board shall recommend to the Endangered Species Committee whether or not to grant an exemption within 180 days after the hearing described in this paragraph is initiated, or within such other time as is mutually agreed upon by the applicant and a majority of the review board. If the review board recommends an exemption it shall include with its recommendation any reasonable mitigation and enhancement measures which should be considered by the Endangered Species Committee under subsection (f). The review board shall transmit the record of its proceedings and its recommendation to the Committee.

"(7) In carrying out its duties under this subsection, a review board may, and any member of a review board if so authorized by the review board, may—

"(A) sit and act at such times and places, take such testimony, and receive such evidence, as the review board deems advisable;

"(B) subject to the Privacy Act of 1974, request of any Federal agency information necessary to enable it to carry out such duties, and upon such request the head of such Federal agency shall furnish such information to the review board; and

"(C) use the United States mails in the same manner and upon the same conditions as other Federal agencies.

"(8) Upon request of a review board, the head of any Federal agency is authorized to detail, on a nonreimbursable basis, any of the personnel of such agency to the review board to assist it in carrying out its duties under this section.

"(9) The Administrator of the General Services shall provide to a review board, on a reimbursable basis, such administrative support services as the review board may request.

"(10) All meetings and records of review boards shall be open to the public.

"(e) ESTABLISHMENT OF COMMITTEE.—(1) There is established a Committee to be known as the Endangered Species Committee (hereinafter in this section referred to as the 'Committee').

"(2) The Committee shall be composed of six members as follows:

"(A) The Secretary of Agriculture.

"(B) The Secretary of the Army.

"(C) The Secretary of the Interior.

"(D) The Administrator of the National Oceanic and Atmospheric Administration.

"(E) The Chairman of the Council on Environmental Quality.

"(F) The Governor of the State in which the Federal agency action for which an exemption is sought under this section will occur (or in the case of any agency action which will occur in more than one State, the Governors of all such States who shall cast collectively a single vote on the Committee).

"(3) The Chairman of the Council on Environmental Quality shall be the Chairman of the Committee.

"(4) Members of the Committee shall receive no additional pay on account of their service on the Committee;

except that while away from their homes or regular places of business in the performance of services for the Committee, members of the Committee shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in Government service are allowed expenses under section 5703 of title 5 of the United States Code.

"(5) The Committee shall meet at the call of the Chairman or four of its members.

"(6) All meetings and records of the Committee shall be open to the public.

"(7) The Committee may for the purpose of carrying out its duties under this section hold such hearings, sit and act at such times and places, take such testimony and receive such evidence as the Committee deems desirable.

"(f) EXEMPTION.—The Committee shall make a final determination whether or not to grant an exemption within 90 days of receiving the recommendation of the review board under subsection (d)(6). The Committee shall grant an exemption from the requirements of subsection (c)(1) for an agency action if, by a vote of not less than four of its members voting in person—

"(1) it determines on the record, based on the recommendation and the record of the review board and on such other testimony or evidence as it may receive, that—

"(A) there are no feasible and prudent alternatives to the agency action;

"(B) the benefits of such action clearly outweigh the benefits of alternative courses of action consistent with conserving the species or its critical habitat, and such action is in the public interest; and

"(C) the action is of regional or national significance; and

"(2) it establishes such reasonable mitigation and enhancement measures, including, but not limited to, live propagation, transplantation, and habitat acquisition and improvement, as are necessary and appropriate to minimize the adverse effects of the agency action upon the endangered species, threatened species, or critical habitat concerned.

Any final determination by the Committee under this subsection shall be considered final agency action for purposes of chapter 7 of title 5 of the United States Code.

"(g) REVIEW BY SECRETARY OF STATE.—Notwithstanding any other provision of this Act, the Committee shall be prohibited from considering for exemption any application made to it, if the Secretary of State, after a review of the proposed agency action and its potential implications, and after hearing, certifies, in writing, to the Committee within 60 days of any application made under this section that the granting of any such exemption and the carrying out of such action would be in violation of an international treaty obligation or other international obligation of the United States. The Secretary of State shall, at the time of such certification, publish a copy thereof in the Federal Register.

"(h) COMMITTEE ORDERS.—(1) If the Committee determines under subsection (f) that an exemption should be granted with respect to any agency action, the Committee shall issue an order granting the exemption and specifying the mitigation and enhancement measures established pursuant to subsection (f) which shall be carried out and paid for by the Federal agency in implementing the agency action. All necessary mitigation and enhancement measures shall be authorized prior to the implementing of the agency action and funded concurrently with all other project features.

"(2) The Federal agency receiving such exemption shall include the costs of such mitigation and enhancement measures within the overall costs of continuing the proposed action. Notwithstanding the preceding sentence the costs of such measures shall not be treated as project costs for the purpose of computing benefit-cost or other ratios for the proposed action. Any Federal agency may request the Secretary to carry out such mitigation measures. The costs incurred by the Secretary in carrying out any such measures shall be paid by the agency receiving the exemption. No later than one year after the granting of an exemption, the agency to which the exemption was granted shall submit to the Council on Environmental Quality a report describing its compliance with the mitigation and enhancement measures prescribed by this section. Such a report shall be submitted annually until all such mitigation and enhancement measures have been completed. Notice of the public availability of such reports shall be published in the Federal Register by the agency preparing such reports.

"(i) JUDICIAL REVIEW.—Any person, as defined by section 3(8) of this Act, may obtain judicial review, under chapter 7 of title 5 of the United States Code, of any decision of the Endangered Species Committee under subsection (f) in the district court of the United States for any district wherein the agency action concerned will be, or is being, carried out by filing in such court within 90 days after the date of issuance of the decision, a written petition for review. Attorneys designated by the Endangered Species Committee may appear for, and represent the Committee in, any action for review under this subsection.

"(j) EXEMPTIONS IN PRESIDENTIALLY DECLARED DISASTER AREAS.—In any area which has been declared by the President to be a major disaster area under the Disaster Relief Act of 1974, the President is authorized to make the determinations required by subsection (f) of this section for any project for the repair or replacement of a public facility substantially as it existed prior to the disaster under section 401 or 402 of the Disaster Relief Act of 1974, and which the President determines (1) is necessary to prevent the recurrence of such a natural disaster and to reduce the potential loss of human life, and (2) to involve an emergency situation which does not allow the ordinary procedures of this section to be followed. Notwithstanding any other provision of this section, the Committee shall accept the determinations of the President under this subsection.

"(k) SPECIAL PROVISIONS.—(1) An exemption decision by the Committee under this section shall not be a major Federal action for purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.): *Provided*, That an environmental impact statement which discusses the impacts upon endangered species or threatened species or their critical habitats shall have been previously prepared with respect to any agency action exempted by such order.

"(2) Notwithstanding sections 4(d) and 9(a), or any regulation issued to carry out such sections, no act or activity engaged in which is necessary to carry out any agency action for which an exemption is granted under this section shall be considered to be a taking of any endangered species or threatened species.

"(l) AUTHORIZATION.—There is authorized to be appropriated to the Secretary to assist review boards and the Committee in carrying out their functions under subsections (d), (e), and (f) of this section not to exceed $500,000 for fiscal year 1979, not to exceed $500,000 for fiscal year 1980, and not to exceed $500,000 in fiscal year 1981.".

SEC. 4. Section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 15. Except as authorized in section 6 of this Act, there are authorized to be appropriated—

"(1) not to exceed $25,000,000 for the fiscal year ending September 30, 1977, and the fiscal year ending September 30, 1978, not to exceed $23,000,000 for the fiscal year ending September 30, 1979, not to exceed $25,000,000 for the fiscal year ending September 30, 1980, and not to exceed $27,000,000 for the fiscal year ending September 30, 1981, to enable the Department of the Interior to carry out such functions and responsibilities as it may have been given under this Act; and

"(2) not to exceed $5,000,000 for the fiscal year ending September 30, 1977, and the fiscal year ending

September 30, 1978, not to exceed $2,500,000 for the fiscal year ending September 30, 1979, not to exceed $3,000,000 for the fiscal year ending September 30, 1980, and not to exceed $3,500,000 for the fiscal year ending September 30, 1981, to enable the Department of Commerce to carry out such functions and responsibilities as it may have been given under this Act.".

SEC. 5. Section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532) is amended—

(1) by inserting after paragraph (4) thereof the following new paragraphs:

"(5) The term 'Federal agency' means any department, agency, or instrumentality of the United States.

"(6) The term 'critical habitat' for an endangered species or threatened species means any air, land, or water area (exclusive of those existing manmade structures or settlements which are not necessary to the survival and recovery of a listed species) and constituent elements thereof, the loss of which would significantly decrease the likelihood of conserving such species."; and

(2) by striking out paragraph (13), as redesignated by paragraph (5) of this section, and inserting in lieu thereof the following:

"(13) The term 'species' includes any subspecies of fish or wildlife or plants, and any distinct segment of the population of any species of vertebrate fish or wildlife which interbreeds when mature.";

(3) by striking out paragraph (15), as redesignated by paragraph (5) of this section, and inserting in lieu thereof the following:

"(15) The term 'State agency' means any State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish, plant, or wildlife resources within a State.";

(4) by inserting at the end thereof the following new paragraphs:

"(19) The term 'species or habitat degradation' means either or both of the following effects:

"(A) The placing in jeopardy of the continued existence of any endangered species or threatened species listed pursuant to section 4.

"(B) The destruction or adverse modification of any critical habitat of any endangered species or threatened species so listed.

"(20) The term 'permit or license applicant' means, when used with respect to an action of a Federal agency for which exemption is sought under section 7, any person whose application to such agency for a permit or license has been denied because of the application of section 7(c)(1) to such agency action;

(5) by redesignating paragraphs (5) through (16) as paragraphs (7) through (18), respectively, and by redesignating any references thereto accordingly.

SEC. 6. Paragraph (3) of section 4(f) of the Endangered Species Act of 1973 (16 U.S.C. 1533) is amended to read as follows:

"(3) The publication in the Federal Register of any proposed or final regulation which is necessary or appropriate to carry out the purposes of this Act shall include a summary by the Secretary of the data on which such regulation is based and shall show the relationship of such data to such regulations.".

SEC. 7. Section 6(c) of the Endangered Species Act of 1973 (16 U.S.C. 1535(c)) is amended—

(1) by inserting "(1)" after "(c)";

(2) by redesignating paragraphs (1) through (5) as subparagraphs (A) through (E), respectively;

(3) by redesignating subparagraphs (A) and (B) as clauses (i) and (ii), respectively;

(4) by striking out "subsection" in the matter preceding subparagraph (A) (as so redesignated) and inserting in lieu thereof "paragraph";

(5) by striking out "endangered species or threatened species" in subparagraph (D) (as so redesignated) and inserting in lieu thereof "endangered or threatened species of fish or wildlife";

(6) by striking out "paragraphs (3), (4), and (5) of this subsection" in clause (i) (as so redesignated) and inserting in lieu thereof "subparagraphs (C), (D), and (E) of this paragraph";

(7) by striking out "subparagraph (A) and this subparagraph" in clause (ii) (as so redesignated) and inserting in lieu thereof "clause (i) and this clause"; and

(8) by adding at the end thereof the following new paragraph:

"(2) In furtherance of the purposes of this Act, the Secretary is authorized to enter into a cooperative agreement in accordance with this section with any State which establishes and maintains an adequate and active program for the conservation of endangered species and threatened species of plants. Within one hundred and twenty days after the Secretary receives a certified copy of such a proposed State program, he shall make a determination whether such program is in accordance with this Act. Unless he determines, pursuant to this paragraph, that the State program is not in accordance with this Act, he shall enter into a cooperative agreement with the State for the purpose of assisting in implementation of the State program. In order for a State program to be deemed an adequate and active program for the conservation of endangered species of plants and threatened species of plants, the Secretary must find, and annually thereafter reconfirm such finding, that under the State program—

"(A) authority resides in the State agency to conserve resident species of plants determined by the State agency or the Secretary to be endangered or threatened;

"(B) the State agency has established acceptable conservation programs, consistent with the purposes and policies of this Act, for all resident species of plants in the State which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

"(C) the State agency is authorized to conduct investigations to determine the status and requirements for survival of resident species of plants; and

"(D) provision is made for public participation in designating resident species of plants as endangered or threatened; or that under the State program—

"(i) the requirements set forth in subparagraphs (C) and (D) of this paragraph are complied with, and

"(ii) plans are included under which immediate attention will be given to those resident species of plants which are determined by the Secretary or the State agency to be endangered or threatened and which the Secretary and the State agency agree are most urgently in need of conservation programs; except that a cooperative agreement entered into with a State whose program is deemed adequate and active pursuant to clause (i) and this clause shall not affect the applicability of prohibitions set forth in or authorized pursuant to section 4(d) or section 9(a)(1) with respect to the taking of any resident endangered or threatened species.".

SEC. 8. Section 11 of the Endangered Species Act of 1973 (16 U.S.C. 1540) is amended—

(1) in the first and second sentences of subsection (a)(1) by striking out "or who knowingly commits an act in the course of a commercial activity which violates" each place it appears and inserting in lieu thereof "and any person engaged in business as an importer or exporter of fish, wildlife, or plants who violates";

(2) in the third sentence of subsection (a)(1) by striking out "$1,000" and inserting in lieu thereof "$500";

(3) in subsection (b)(1) by striking out "willfully commits an act which" each place it appears and inserting in lieu thereof "knowingly";

(4) in subsection (b)(2) by inserting "a person to import or export fish, wildlife, or plants, or to operate a quarantine station for imported wildlife, or authorizing" after "authorizing";

(5) in subsection (a) by adding at the end thereof the following new paragraph:

"(3) Notwithstanding any other provision of this Act, no civil penalty shall be imposed if it can be shown by a preponderance of the evidence that the defendant committed an act based on a good-faith belief that he was acting to protect himself or herself, a member of his or her family, or any other individual from bodily harm, from any endangered or threatened species.";

(6) in subsection (b) by adding at the end thereof the following new paragraph:

"(3) Notwithstanding any other provision of this Act, it shall be a defense to prosecution if the defendant committed the offense based on a good-faith belief that he was acting to protect himself or herself, a member of his or her family, or any other individual from bodily harm, from any endangered or threatened species."; and

(7) in paragraph (4) of subsection (g) by striking out "any party" and inserting in lieu thereof "the prevailing party".

SEC. 9. That portion of subsection (a) of section 5 of the Endangered Species Act of 1973 (16 U.S.C. 1534) which precedes paragraph (1) is amended to read as follows:

"(a) The Secretary, and the Secretary of Agriculture with respect to the National Forest System, shall establish and implement a program to conserve fish, wildlife, and plants including those which are listed as endangered species or threatened species pursuant to section 4 of this Act. To carry out such a program, the appropriate Secretary—".

SEC. 10. Section 9(b) of the Endangered Species Act (16 U.S.C. 1538) is amended by inserting "(1)" after "(b)" and by adding the following new paragraph:

"(2)(A) This section shall not apply to—

"(i) any raptor legally held in captivity or in a controlled environment on the effective date of the Endangered Species Act Amendments of 1978; or

"(ii) any progeny of any raptor described in clause (i);

until such time as any such raptor or progeny is intentionally returned to a wild state.

"(B) Any person holding any raptor or progeny described in subparagraph (A) must be able to demonstrate that the raptor or progeny does, in fact, qualify under the provisions of this paragraph, and shall maintain and submit to the Secretary, on request, such inventories, documentation, and records as the Secretary may by regulation require as being reasonably appropriate to carry out the purposes of this paragraph. Such requirements shall not unnecessarily duplicate the requirements of other rules and regulations promulgated by the Secretary.".

Union Calendar No. 873

95TH CONGRESS
2D SESSION

H. R. 14104

[Report No. 95–1625]

IN THE HOUSE OF REPRESENTATIVES

SEPTEMBER 18, 1978

Mr. LEGGETT (for himself, Mr. MURPHY of New York, Mr. DINGELL, Mr. RUPPE, Mr. FORSYTHE, Mr. BOWEN, Mr. OBERSTAR, Mr. DE LA GARZA, Mr. YOUNG of Alaska, Mr. AUCOIN, Mr. EMERY, Mr. HUGHES, Mr. AKAKA, Mr. DORNAN, Mr. EVANS of Delaware, Mr. TRIBLE, and Mr. ROONEY) introduced the following bill; which was referred to the Committee on Merchant Marine and Fisheries

SEPTEMBER 25, 1978

Reported with amendments, committed to the Committee of the Whole House on the State of the Union, and ordered to be printed

[Omit the part struck through and insert the part printed in italic]

A BILL

To authorize appropriations to carry out the Endangered Species Act of 1973 through fiscal year 1981, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Endangered Species Act Amendments of 1978".

SEC. 2. Section 4 of the Endangered Species Act of 1973 (16 U.S.C. 1533) is amended—

(1) by adding at the end of subsection (a)(1) the following new sentence: "At the time any such regulation is proposed, the Secretary shall also by regulation, to the maximum extent prudent, specify any habitat of such species which is then considered to be critical habitat. The requirement of the preceding sentence shall not apply with respect to any species which was listed prior to enactment of the Endangered Species Act Amendments of 1978.";

(2) by adding at the end of subsection (b) the following new paragraph:

"(4) In determining the critical habitat of any endangered or threatened invertebrate animal species, the Secretary shall consider the economic impact, and any other relevant impacts, of specifying any particular area as critical habitat, and he may exclude any such area from the critical habitat if he determines that the benefits of such exclusion outweigh the benefits of specifying the area as part of the critical habitat."

(3) by amending subsection (c)(1) by striking out "and shall", and by inserting immediately before the *final* period the following: ", and specify any critical habitat within such range";

(4) in subsection (c) by inserting at the end thereof the following new paragraph:

"(4) The Secretary shall—

"(A) conduct, at least once every five years, a review of all species included in a list which is published pursuant to paragraph (1) and which is in effect at the time of such review; and

"(B) determine on the basis of such review whether any such species should—

"(i) be removed from such list;

"(ii) be changed in status from an endangered species to a threatened species; or

"(iii) be changed in status from a threatened species to an endangered species.

Each determination under subparagraph (B) shall be made in accordance with the provisions of subsections (a) and (b).".

~~(4)~~ *(5)* by amending subsection (f)—

(A) by amending paragraph (2)(A) to read as follows:

"(2)(A) In the case of any regulation proposed by the Secretary to carry out the purposes of this section with respect to the determination and listing of endangered or threatened species and their critical habitats in any State (other than regulations to implement the Convention), the Secretary—

"(i) shall publish notice of the proposed regulation (including the complete text of the regulation), not less than 60 days before the effective date of the regulation—

"(I) in the Federal Register, and

"(II) if the proposed regulation specifies any critical habitat, in a newspaper of general circulation within or adjacent to such habitat; and

"(ii) shall give actual notice of the proposed regulation (including the complete text of the regulation), and any environmental assessment or environmental impact statement prepared on the proposed regulation, not less than 60 days before the effective date of the regulation to all general local governments located within or adjacent to the proposed critical habitat;

"(iii) shall—

"(I) if the proposed regulation does not specify any critical habitat, promptly hold a public meeting on the proposed regulation, if request therefor is filed with the Secretary by any person within 45 days after the date of publication of general notice under clause (i)(I), and

"(II) if the proposed regulation specifies any critical habitat, promptly hold a public meeting on the proposed regulation within the area in which such habitat is located in each State, and, if requested, hold a public hearing in each such State.

If a public meeting or hearing is held on any regulation, the regulation may not take effect before the 60th day after the date on which the meeting or hearing is concluded, and if more than one public meeting or hearing is held, before the 60th day after the date on which the last such meeting or hearing is concluded. Any accidental failure to provide actual notice under clause (ii) to all general local governments required to be given notice shall not invalidate the proposed regulation."; and

(B) by adding at the end thereof the following new ~~paragraph:~~ *paragraphs:*

"(4) Any proposed or final regulation which specifies any critical habitat of any endangered species or threatened species shall be based on the best scientific data available, and the publication in the Federal Register of any such regulation shall, to the maximum extent practicable, be accompanied by a brief description and evaluation of those activities (whether public or private) which, in the opinion of the Secretary, if undertaken may adversely modify such habitat, or may be impacted by such designation.~~"; and~~

"(5) A final regulation adding a species to any list published pursuant to subsection (c) shall be published in the Federal Register not later than two years after the date of publication of notice of the regulation proposing such listing under paragraph (2)(A)(i). If a final regulation is not adopted within such two-year period, the Secretary shall withdraw the proposed regulation and shall publish notice of such withdrawal in the Federal Register not later than 30 days after the end of such period. The Secretary shall not propose a regulation adding to such a list any species for which a proposed regulation has been withdrawn under this paragraph unless he determines that sufficient new information is available to warrant the proposal of a regulation. No proposed regulation for the listing of any species published before the date of the enactment of the Endangered Species Act Amendments of 1978 shall be withdrawn under this paragraph before the end of the one-year period beginning on such date of enactment.".

~~(5)~~*(6)* by adding at the end thereof the following new subsection:

"(g) RECOVERY PLANS.—The Secretary shall develop and implement plans (hereinafter in this subsection referred to as 'recovery plans') for the conservation or survival of endangered species and threatened species listed pursuant to this section. The Secretary, in developing and implementing recovery plans, may procure the services of appropriate public and private agencies and institutions, and other qualified persons. Recovery teams appointed pursuant to this subsection shall not be subject to the Federal Advisory Committee Act.".

SEC. 3. Section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1536) is amended to read as follows:

"INTERAGENCY COOPERATION

"SEC. 7. (a) REVIEW BY SECRETARY.—The Secretary shall review all other programs administered by him and utilize such programs in furtherance of the purposes of this Act.

"(b) AGENCY CONSERVATION PROGRAMS.—Each Federal agency shall, after consultation with and with the assistance of the Secretary, utilize its authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4.

"(c) AGENCY ACTION.—(1) Each Federal agency shall insure that any action authorized, funded, or carried out by the agency (hereinafter in this section referred to as an 'agency action') does not result in species or habitat degradation unless an exemption has been granted by the Endangered Species Committee under subsection (f) with respect to such agency action.

"(2) If any Federal agency—

"(A) considers that any agency action over which it has jurisdiction may result in species or habitat degradation; or

"(B) is notified by the Secretary that the Secretary considers that such agency action may have such a result;

the Federal agency and the Secretary shall undertake immediate consultation with respect to the matter, including, but not limited to, consultation to determine if reasonable and prudent alternatives are available. Consultation under this paragraph with respect to any agency action shall be concluded within 90 days after the date on which initiated or within such other period of time as is mutually agreeable to the Federal agency and the Secretary. Promptly after the conclusion of consultation, the Secretary shall provide to the Federal agency concerned a written statement setting forth the Secretary's opinion, and a summary of the information on which the opinion is based, detailing whether the agency action may result in species or habitat degradation and whether there are reasonable and prudent alternatives which would avoid species or habitat degradation which can be taken by the Federal agency in implementing the agency action.

"(3) To facilitate compliance with the requirements of paragraph ~~(2)(A),~~ *(1),* each Federal agency shall, with respect to any action of such agency for which no contract for construction has been entered into and for which no construction has begun on the date of enactment of the Endangered Species Act Amendments of 1978, request of the Secretary information whether any listed species may be present in the area of such proposed action. If the Secretary advises, based on the best scientific and commercial data available, that such species may be present, such agency shall conduct a biological assessment for the purpose of identifying any endangered species or threatened species which is likely to be affected by such action. Such assessment shall be completed before any contract for construction is entered into and before construction is begun with respect to such action. Such assessment may be undertaken as part of a Federal agency's compliance with the requirements of section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332).

"(4) After initiation of consultation required under paragraph (2), the Federal agency shall not make any irreversible or irretrievable commitment of resources with respect to the agency action which has the effect of foreclosing the formulation or implementation of any reasonable and prudent alternative measures which would avoid species or habitat degradation.

"(d) APPLICATION FOR EXEMPTION AND CONSIDERATION BY REVIEW BOARD.—(1) A Federal agency, the Governor of the State in which the Federal agency action will occur, or a permit or license applicant may apply to the Secretary for an exemption for an agency action of such agency if after consultation under subsection (c)(2) the Secretary's opinion indicates that the agency action may result in species or habitat degradation. An application for an exemption shall be considered initially by a review board in the manner provided in this subsection, and shall be considered by the Endangered Species Committee for a final determination under subsection (f) after a recommendation is made by the review board.

"(2)(A) Any Federal agency, Governor, or permit or license applicant seeking an exemption under this subsection shall submit a written application to the Secretary, in a form prescribed by the Secretary, not later than 90 days after the completion of the consultation process. Such application shall set forth the reasons why the Federal agency, Governor, or permit or license applicant considers that the agency action meets the requirements for an exemption under this subsection.

"(B) Upon receipt of the application for exemption referred to in paragraph (1), the Secretary shall promptly notify the Governor or Governors of the affected States, *as determined by the Secretary,* and request that they appoint a member of the review board to be established under paragraph (3) in accordance with the provisions of such paragraph.

"(3)(A) A review board consisting of three members shall be established for purposes of considering an application for exemption and making recommendations to the Endangered Species Committee under this subsection as follows:

"(i) The Secretary and the Governor of the affected State shall each appoint one individual to the board not later than 15 days after a request is submitted pursuant to paragraph (2). If more than one State is affected by the agency action, the Governors of such States shall appoint one individual collectively.

"(ii) The two individuals appointed under clause (i) shall appoint one individual not later than 15 days after both of them have been appointed. *If no appointment is made within such 15-day period, the Endangered Species Committee shall appoint, by a vote of a majority of the members of the Committee, one individual not later than 30 days after the end of such 15-day period.*

"(B) Members of a review board who are full-time officers or employees of the United States shall receive no additional pay on account of their service on the board. All other members shall be entitled to receive an amount not to exceed the daily equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day during which they are engaged in the actual performance of duties vested in the board. While away from their homes or regular places of business in the performance of services for a review board, members of the board shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

"(4) The Secretary shall submit the application to the review board immediately after its appointment under paragraph (3), and the Secretary shall submit to the review board, in writing, his views and recommendations with respect to the application within 60 days after receiving a copy of any application under paragraph (2).

"(5) It shall be the duty of a review board appointed under paragraph (3) to make a full review of the consultation carried out under subsection (c)(2), and within 60 days after its appointment or within such longer time as is mutually agreed upon between the agency and the Secretary, to make a determination, by a majority vote, whether such agency has—

"(A) carried out its consultation responsibilities in good faith and made a reasonable and responsible effort to develop and fairly consider modifications or reasonable and prudent alternatives to its proposed action which will avoid species or habitat degradation;

"(B) conducted any biological assessment required of it by subsection (c)(3); and

"(C) refrained from making any irreversible or irretrievable commitment of resources prohibited by subsection (c)(4).

Any determination by the review board that the agency has not met the requirements of subparagraph (A), (B), or (C) shall be considered final agency action for purposes of chapter 7 of title 5 of the United States Code.

"(6) If the review board makes positive determinations under subparagraphs (A), (B), and (C) of paragraph (5), it shall proceed to consider the application for exemption. In considering any application for an exemption, a review board shall take into account the reasons for an exemption set forth in the application of the Federal agency, Governor, or permit or license applicant, the views of the Secretary submitted under paragraph (4), and the views of other Federal and State agencies and appropriate persons. The review board shall recommend an exemption from the requirements of subsection (c)(1) for any agency action if, by a majority vote, it determines on the record after an opportunity for a hearing held in accordance with sections 554, 555, and 556 (other than subsection (b)(3) of section 556) of title 5 of the United States Code, that—

"(A) there are no feasible and prudent alternatives to the agency action;

"(B) the benefits of such action clearly outweigh the benefits of alternative courses of action consistent with conserving the species or its critical habitat, and such action is in the public interest; and

"(C) the action is of national or regional significance.

The review board shall recommend to the Endangered Species Committee whether or not to grant an exemption within 180 days after the hearing described in this paragraph is initiated, or within such other time as is mutually agreed upon by the applicant and a majority of the review board. If the review board recommends an exemption it shall include with its recommendation any reasonable mitigation and enhancement measures which should be considered by the Endangered Species Committee under subsection (f). The review board shall transmit the record of its proceedings and its recommendation to the Committee.

"(7) In carrying out its duties under this subsection, a review board may, and any member of a review board if so authorized by the review board, may—

"(A) sit and act at such times and places, take such testimony, and receive such evidence, as the review board deems advisable;

"(B) subject to the Privacy Act of 1974, request of any Federal agency information necessary to enable it to carry out such duties, and upon such request the head of such Federal agency shall furnish such information to the review board; and

"(C) use the United States mails in the same manner and upon the same conditions as ~~other Federal agencies.~~ *a Federal agency.*

"(8) Upon request of a review board, the head of any Federal agency is authorized to detail, on a nonreimbursable basis, any of the personnel of such agency to the review board to assist it in carrying out its duties under this section.

"(9) The Administrator of the General Services shall provide to a review board, on a reimbursable basis, such administrative support services as the review board may request.

"(10) All meetings and records of review boards shall be open to the public.

"(e) ESTABLISHMENT OF COMMITTEE.—(1) There is established a Committee to be known as the Endangered

Species Committee (hereinafter in this section referred to as the 'Committee').

"(2) The Committee shall be composed of six members as follows:

"(A) The Secretary of Agriculture.

"(B) The Secretary of the Army.

"(C) The Secretary of the Interior.

"(D) The Administrator of the National Oceanic and Atmospheric Administration.

"(E) The Chairman of the Council on Environmental Quality.

"(F) The Governor of the State in which the Federal agency action for which an exemption is sought under this section will occur (or in the case of any agency action which will occur in more than one State, the Governors of all such States who shall cast collectively a single vote on the Committee).

"(3) The Chairman of the Council on Environmental Quality shall be the Chairman of the Committee.

"(4) Members of the Committee shall receive no additional pay on account of their service on the Committee; except that while away from their homes or regular places of business in the performance of services for the Committee, members of the Committee shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in Government service are allowed expenses under section 5703 of title 5 of the United States Code.

"(5) The Committee shall meet at the call of the Chairman or four of its members.

"(6) All meetings and records of the Committee shall be open to the public.

"(7) The Committee may for the purpose of carrying out its duties under this section hold such hearings, sit and act at such times and places, take such testimony and receive such evidence as the Committee deems desirable.

"(f) EXEMPTION.—The Committee shall make a final determination whether or not to grant an exemption within 90 days of receiving the recommendation of the review board under subsection (d)(6). The Committee shall grant an exemption from the requirements of subsection (c)(1) for an agency action if, by a vote of not less than four of its members voting in person—

"(1) it determines on the record, based on the recommendation and the record of the review board and on such other testimony or evidence as it may receive, that—

"(A) there are no feasible and prudent alternatives to the agency action;

"(B) the benefits of such action clearly outweigh the benefits of alternative courses of action consistent with conserving the species or its critical habitat, and such action is in the public interest; and

"(C) the action is of regional or national significance; and

"(2) it establishes such reasonable mitigation and enhancement measures, including, but not limited to, live propagation, transplantation, and habitat acquisition and improvement, as are necessary and appropriate to minimize the adverse effects of the agency action upon the endangered species, threatened species, or critical habitat concerned.

Any final determination by the Committee under this subsection shall be considered final agency action for purposes of chapter 7 of title 5 of the United States Code.

"(g) REVIEW BY SECRETARY OF STATE.—Notwithstanding any other provision of this Act, the Committee shall be prohibited from considering for exemption any application made to it, if the Secretary of State, after a review of the proposed agency action and its potential implications, and after hearing, certifies, in writing, to the Committee within 60 days of any application made under this section that the granting of any such exemption and the carrying out of such action would be in violation of an international treaty obligation or other international obligation of the United States. The Secretary of State shall, at the time of such certification, publish a copy thereof in the Federal Register.

"(h) COMMITTEE ORDERS.—(1) If the Committee determines under subsection (f) that an exemption should be granted with respect to any agency action, the Committee shall issue an order granting the exemption and specifying the mitigation and enhancement measures established pursuant to subsection (f) which shall be carried out and paid for by the Federal agency in implementing the agency action. All necessary mitigation and enhancement measures shall be authorized prior to the implementing of the agency action and funded concurrently with all other project features.

"(2) The Federal agency receiving such exemption shall include the costs of such mitigation and enhancement measures within the overall costs of continuing the proposed action. Notwithstanding the preceding sentence the costs of such measures shall not be treated as project costs for the purpose of computing benefit-cost or other ratios for the proposed action. Any Federal agency may request the Secretary to carry out such mitigation measures. The costs incurred by the Secretary in carrying out any such measures shall be paid by the agency *or the permit or license applicant* receiving the exemption. No later than one year after the granting of an exemption, the agency to which the exemption was granted shall submit to the Council on Environmental Quality a report describing its compliance with the mitigation and enhancement measures prescribed by this section. Such a report shall be submitted annually until all such mitigation and enhancement measures have been completed. Notice of the public availability of such reports shall be published in the Federal Register by the agency preparing such reports.

"(i) JUDICIAL REVIEW.—Any person, as defined by section 3(8) of this Act, may obtain judicial review, under chapter 7 of title 5 of the United States Code, of any decision of the Endangered Species Committee under subsection (f) in the district court of the United States for any district wherein the agency action concerned will be, or is being, carried out by filing in such court within 90 days after the date of issuance of the decision, a written petition for review. Attorneys designated by the Endangered Species Committee may appear for, and represent the Committee in, any action for review under this subsection. *Any action for review under this subsection shall receive preference over other matters before the court and shall be heard and determined as expeditiously as the court considers practicable.*

"(j) EXEMPTIONS IN PRESIDENTIALLY DECLARED DISASTER AREAS.—In any area which has been declared by the President to be a major disaster area under the Disaster

Relief Act of 1974, the President is authorized to make the determinations required by subsection (f) of this section for any project for the repair or replacement of a public facility substantially as it existed prior to the disaster under section 401 or 402 of the Disaster Relief Act of 1974, and which the President determines (1) is necessary to prevent the recurrence of such a natural disaster and to reduce the potential loss of human life, and (2) to involve an emergency situation which does not allow the ordinary procedures of this section to be followed. Notwithstanding any other provision of this section, the Committee shall accept the determinations of the President under this subsection.

"(k) SPECIAL PROVISIONS.—(1) An exemption decision by the Committee under this section shall not be a major Federal action for purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.): *Provided*, That an environmental impact statement which discusses the impacts upon endangered species or threatened species or their critical habitats shall have been previously prepared with respect to any agency action exempted by such order.

"(2) Notwithstanding sections 4(d) and 9(a), or any regulation issued to carry out such sections, no act or activity engaged in which is necessary to carry out any agency action for which an exemption is granted under this section shall be considered to be a taking of any endangered species or threatened species.

"(l) AUTHORIZATION.—There is authorized to be appropriated to the Secretary to assist review boards and the Committee in carrying out their functions under subsections (d), (e), and (f) of this section not to exceed $500,000 for fiscal year 1979, not to exceed $500,000 for fiscal year 1980, and not to exceed $500,000 in fiscal year 1981.".

SEC. 4. Section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 15. Except as authorized in section 6 of this Act, there are authorized to be appropriated—

"(1) not to exceed $25,000,000 for the fiscal year ending September 30, 1977, and the fiscal year ending September 30, 1978, not to exceed $23,000,000 for the fiscal year ending September 30, 1979, not to exceed $25,000,000 for the fiscal year ending September 30, 1980, and not to exceed $27,000,000 for the fiscal year ending September 30, 1981, to enable the Department of the Interior to carry out such functions and responsibilities as it may have been given under this Act; and

"(2) not to exceed $5,000,000 for the fiscal year ending September 30, 1977, and the fiscal year ending

September 30, 1978, not to exceed $2,500,000 for the fiscal year ending September 30, 1979, not to exceed $3,000,000 for the fiscal year ending September 30, 1980, and not to exceed $3,500,000 for the fiscal year ending September 30, 1981, to enable the Department of Commerce to carry out such functions and responsibilities as it may have been given under this Act.".

SEC. 5. Section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532) is amended—

(1) by inserting after paragraph (4) thereof the following new paragraphs:

"(5) The term 'Federal agency' means any department, agency, or instrumentality of the United States.

"(6) The term 'critical habitat' for an endangered species or threatened species means any air, land, or water area (exclusive of those existing manmade structures or settlements which are not necessary to the survival and recovery of a listed species) and constituent elements thereof, the loss of which would significantly decrease the likelihood of conserving such species."; and

(2) by striking out paragraph (13), as redesignated by paragraph (5) of this section, and inserting in lieu thereof the following:

"(13) The term 'species' includes any subspecies of fish or wildlife or plants, and any distinct segment of the population of any species of vertebrate fish or wildlife which interbreeds when mature.";

(3) by striking out paragraph (15), as redesignated by paragraph (5) of this section, and inserting in lieu thereof the following:

"(15) The term 'State agency' means any State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish, plant, or wildlife resources within a State.";

(4) by inserting at the end thereof the following new paragraphs:

"(19) The term 'species or habitat degradation' means either or both of the following effects:

"(A) The placing in jeopardy of the continued existence of any endangered species or threatened species listed pursuant to section 4.

"(B) The destruction or adverse modification of any critical habitat of any endangered species or threatened species so listed.

"(20) The term 'permit or license applicant' means, when used with respect to an action of a Federal agency for which exemption is sought under section 7, any person whose application to such agency for a permit or license has been denied because of the application of section 7(c)(1) to such agency ~~action;~~ *action."*

(5) by redesignating paragraphs (5) through (16) as paragraphs (7) through (18), respectively, and by redesignating any references thereto accordingly.

SEC. 6. Paragraph (3) of section 4(f) of the Endangered Species Act of 1973 (16 U.S.C. 1533) is amended to read as follows:

"(3) The publication in the Federal Register of any proposed or final regulation which is necessary or appropriate to carry out the purposes of this Act shall include a summary by the Secretary of the data on which such regulation is based and shall show the relationship of such data to such regulations.".

SEC. 7. Section 6(c) of the Endangered Species Act of 1973 (16 U.S.C. 1535(c)) is amended—

(1) by inserting "(1)" after ~~"(c)";~~ *"(c) COOPERATIVE AGREEMENTS.—";*

(2) by redesignating paragraphs (1) through (5) as subparagraphs (A) through (E), respectively;

(3) by redesignating subparagraphs (A) and (B) as clauses (i) and (ii), respectively;

(4) by striking out "subsection" in the matter preceding subparagraph (A) (as so redesignated) and inserting in lieu thereof "paragraph";

(5) by striking out "endangered species or threatened species" in subparagraph (D) (as so redesignated) and inserting in lieu thereof "endangered or threatened species of fish or wildlife";

(6) by striking out "paragraphs (3), (4), and (5) of this subsection" in clause (i) (as so redesignated) and inserting in lieu thereof "subparagraphs (C), (D), and (E) of this paragraph";

(7) by striking out "subparagraph (A) and this subparagraph" in clause (ii) (as so redesignated) and inserting in lieu thereof "clause (i) and this clause"; and

(8) by adding at the end thereof the following new paragraph:

"(2) In furtherance of the purposes of this Act, the Secretary is authorized to enter into a cooperative agreement in accordance with this section with any State which establishes and maintains an adequate and active program for the conservation of endangered species and threatened species of plants. Within one hundred and twenty days after the Secretary receives a certified copy of such a proposed State program, he shall make a determination whether such program is in accordance with this Act. Unless he determines, pursuant to this paragraph, that the State program is not in accordance with this Act, he shall enter into a cooperative agreement with the State for the purpose of assisting in implementation of the State program. In order for a State program to be deemed an adequate and active program for the conservation of endangered species of plants and threatened species of plants, the Secretary must find, and annually thereafter reconfirm such finding, that under the State program—

"(A) authority resides in the State agency to conserve resident species of plants determined by the State agency or the Secretary to be endangered or threatened;

"(B) the State agency has established acceptable conservation programs, consistent with the purposes and policies of this Act, for all resident species of plants in the State which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

"(C) the State agency is authorized to conduct investigations to determine the status and requirements for survival of resident species of plants; and

"(D) provision is made for public participation in designating resident species of plants as endangered or threatened; or

that under the State program—

"(i) the requirements set forth in subparagraphs (C) and (D) of this paragraph are complied with, and

"(ii) plans are included under which immediate attention will be given to those resident species of plants which are determined by the Secretary or the State agency to be endangered or threatened and which the Secretary and the State agency agree are most urgently in need of conservation programs; except that a cooperative agreement entered into with a State whose program is deemed adequate and active pursuant to clause (i) and this clause shall not affect the applicability of prohibitions set forth in or authorized pursuant to section 4(d) or section 9(a)(1) with respect to the taking of any resident endangered or threatened species.".

SEC. 8. Section 11 of the Endangered Species Act of 1973 (16 U.S.C. 1540) is amended—

(1) in the first and second sentences of subsection (a)(1) by striking out "or who knowingly commits an act in the course of a commercial activity which violates" each place it appears and inserting in lieu

thereof "and any person engaged in business as an importer or exporter of fish, wildlife, or plants who violates";

(2) in the third sentence of subsection (a)(1) by striking out "$1,000" and inserting in lieu thereof "$500";

(3) in subsection (b)(1) by striking out "willfully commits an act which" each place it appears and inserting in lieu thereof "knowingly";

(4) in subsection (b)(2) by inserting "a person to import or export fish, wildlife, or plants, or to operate a quarantine station for imported wildlife, or authorizing" after "authorizing";

(5) in subsection (a) by adding at the end thereof the following new paragraph:

"(3) Notwithstanding any other provision of this Act, no civil penalty shall be imposed if it can be shown by a preponderance of the evidence that the defendant committed an act based on a good-faith belief that he was acting to protect himself or herself, a member of his or her family, or any other individual from bodily harm, from any endangered or threatened species.";

(6) in subsection (b) by adding at the end thereof the following new paragraph:

"(3) Notwithstanding any other provision of this Act, it shall be a defense to prosecution if the defendant committed the offense based on a good-faith belief that he was acting to protect himself or herself, a member of his or her family, or any other individual from bodily harm, from any endangered or threatened species."; and

(7) in paragraph (4) of subsection (g) by striking out "any party" and inserting in lieu thereof "the prevailing party".

SEC. 9. That portion of subsection (a) of section 5 of the Endangered Species Act of 1973 (16 U.S.C. 1534) which precedes paragraph (1) is amended to read as follows:

"(a) *PROGRAM.*—The Secretary, and the Secretary of Agriculture with respect to the National Forest System, shall establish and implement a program to conserve fish, wildlife, and plants including those which are listed as endangered species or threatened species pursuant to section 4 of this Act. To carry out such a program, the appropriate Secretary—".

SEC. 10. Section 9(b) of the Endangered Species Act (16 U.S.C. 1538) is amended by inserting "(1)" after ~~"(b)"~~ *"(b) SPECIES HELD IN CAPTIVITY OR CONTROLLED ENVIRONMENT.—"* and by adding the following new paragraph:

"(2)(A) This section shall not apply to—

"(i) any raptor legally held in captivity or in a controlled environment on the effective date of the Endangered Species Act Amendments of 1978; or

"(ii) any progeny of any raptor described in clause (i);

until such time as any such raptor or progeny is intentionally returned to a wild state.

"(B) Any person holding any raptor or progeny described in subparagraph (A) must be able to demonstrate that the raptor or progeny does, in fact, qualify under the provisions of this paragraph, and shall maintain and submit to the Secretary, on request, such inventories, documentation, and records as the Secretary may by regulation require as being reasonably appropriate to carry out the purposes of this paragraph. Such requirements shall not unnecessarily duplicate the requirements of other rules and regulations promulgated by the Secretary.".

SEC. 11. Section 10 of the endangered Species Act of 1973 (16 U.S.C. 1539) is amended by adding at the end thereof the following new subsection:

"(h) CERTAIN ANTIQUE ARTICLES.—(1) Sections 4(d) and 9(a) do not apply to any article (other than scrimshaw) which—

"(A) was made before 1830;

"(B) is composed in whole or in part of any endangered species or threatened species listed under section 4;

"(C) has not been repaired or modified with any part of any such species on or after the date of the enactment of this Act; and

"(D) is entered at a port designated under paragraph (3).

"(2) Any person who wishes to import an article under the exception provided by this subsection shall submit to the customs officer concerned at the time of entry of the article such documentation as the Secretary of the Treasury, after consultation with the Secretary of the Interior, shall by regulation require as being necessary to establish that the article meets the requirements set forth in paragraph (1)(A), (B), and (C).

"(3) The Secretary of the Treasury, after consultation with the Secretary of the Interior, shall designate one port within each customs region at which articles described in paragraph (1)(A), (B), and (C) must be entered into the customs territory of the United States.".

95th Congress } HOUSE OF REPRESENTATIVES { **Report**
2d Session } { No. 95-1625

ENDANGERED SPECIES ACT AMENDMENTS OF 1978

September 25, 1978.—Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

---

Mr. Murphy of New York, from the Committee on Merchant Marine and Fisheries, submitted the following

REPORT

together with

ADDITIONAL VIEWS

[To accompany H.R. 14104]

[Including cost estimate of the Congressional Budget Office]

The Committee on Merchant Marine and Fisheries, to whom was referred the bill (H.R. 14104) to authorize appropriations to carry out the Endangered Species Act of 1973 through fiscal year 1981, and for other purposes, having considered the same, report favorably thereon with amendments and recommend that the bill as amended do pass.

The amendments are as follows:

Page 2, line 23, insert "final" after "the".

Page 2, after line 25, insert the following:

(4) in subsection (c) by inserting at the end thereof the following new paragraph:

> (4) The Secretary shall—
>
> (A) conduct, at least once every five years, a review of all species included in a list which is published pursuant to paragraph (1) and which is in effect at the time of such review; and
>
> (B) determine on the basis of such review whether any such species should—
>
> (i) be removed from such list;
>
> (ii) be changed in status from an endangered species to a threatened species; or
>
> (iii) be changed in status from a threatened species to an endangered species.

Each determination under subparagraph (B) shall be made in accordance with the provisions of subsections (a) and (b).

Page 3, line 1, strike out "(4)" and insert in lieu thereof "(5)".

Page 4, line 22, strike out "paragraph" and insert in lieu thereof "paragraphs".

Page 5, line 6, strike out all that follows the period.

Page 5, after line 6, insert the following:

> (5) A final regulation adding a species to any list published pursuant to subsection (c) shall be published in the Federal Register not later than two years after the date of publication of notice of the regulation proposing such listing under paragraph (2)(A)(i). If a final regulation is not adopted within such two-year period, the Secretary shall withdraw the proposed regulation and shall publish notice of such withdrawal in the Federal Register not later than 30 days after the end of such period. The Secretary shall not propose a regulation adding to such a list any species for which a proposed regulation has been withdrawn under this paragraph unless he determines that sufficient new information is available to warrant the proposal of a regulation. No proposed regulation for the listing of any species published before the date of the enactment of the Endangered Species Act Amendments of 1978 shall be withdrawn under this paragraph before the end of the one-year period beginning on such date of enactment.

Page 5, line 7, strike out "(5)" and insert in lieu thereof "6".

Page 7, line 14, strike out "(2)(A)," and insert in lieu thereof "(1),".

Page 9, line 12, insert ", as determined by the Secretary," after "States".

Page 10, line 3, insert after the period the following:

> If no appointment is made within such 15-day period, the Endangered Species Committee shall appoint, by a vote of a majority of the members of the Committee, one individual not later than 30 days after the end of such 15-day period.

Page 13, beginning on line 16, strike out "other Federal agencies." and insert in lieu thereof "a Federal agency.".

Page 18, line 3, insert "or the permit or license applicant" after "agency".

Page 18, line 23, insert after the period the following:

> Any action for review under this subsection shall receive preference over other matters before the court and shall be heard and determined as expeditiously as the court considers practicable.

Page 23, line 3, strike out "action;" and insert in lieu thereof "action." and closing quotation marks.

Page 23, line 18, strike out "(c)" and insert in lieu thereof "(c) Cooperative Agreements.—".

Page 28, line 9, insert "PROGRAM.—" after "(a)".

Page 28, line 16, strike out "(b)" and insert in lieu thereof "(b) SPECIES HELD IN CAPTIVITY OR CONTROLLED ENVIRONMENT.—".

Page 29, after line 10, insert the following:

SEC. 11. Section 10 of the Endangered Species Act of 1973 (16 U.S.C. 1539) is amended by adding at the end thereof the following new subsection:

(h) CERTAIN ANTIQUE ARTICLES.—(1) Sections 4(d) and 9(a) do not apply to any article (other than scrimshaw) which—

(A) was made before 1830;

(B) is composed in whole or in part of any endangered species or threatened species listed under section 4;

(C) has not been repaired or modified with any part of any such species on or after the date of the enactment of this Act; and

(D) is entered at a port designated under paragraph (3).

(2) Any person who wishes to import an article under the exception provided by this subsection shall submit to the customs officer concerned at the time of entry of the article such documentation as the Secretary of the Treasury, after consultation with the Secretary of the Interior, shall by regulation require as being necessary to establish that the article meets the requirements set forth in paragraph (1)(A), (B), and (C).

(3) The Secretary of the Treasury, after consultation with the Secretary of the Interior, shall designate one port within each customs region at which articles described in paragraph (1)(A), (B), and (C) must be entered into the customs territory of the United States.

PURPOSE OF THE LEGISLATION

The purpose of the legislation is to authorize appropriations to carry out the Endangered Species Act, and to introduce some flexibility into the Act.

To accomplish this purpose, the legislation adopts a procedure through which Federal agencies may be considered for an exemption from the Act's mandate that they not jeopardize the continued existence of any endangered or threatened species or adversely modify the critical habitat of such species.

LEGISLATIVE BACKGROUND

H.R. 13870, the predecessor bill to H.R. 14104, was introduced on August 9, 1978, by Mr. Leggett, following eight days of oversight hearings on the operation and administration of the Endangered Species Act by the Subcommittee on Fisheries and Wildlife Conservation and the Environment. H.R. 13807 was considered by the subcommittee in open markup sessions on August 21, 22, and 23, and September 11 and 13. On September 13, 1978, the subcommittee unanimously adopted an amendment in the nature of a substitute to H.R. 13807 and ordered the bill, as amended, reported to the Full Committee in the form of the clean bill, H.R. 14104.

H.R. 14104 was introduced on September 18, 1978 by Mr. Leggett and cosponsored by Mr. Murphy of New York, Mr. Dingell, Mr. Ruppe, Mr. Forsythe, Mr. Bowen, Mr. Oberstar, Mr. de la Garza, Mr. Young of Alaska, Mr. AuCoin, Mr. Emery, Mr. Hughes, Mr. Akaka, Mr. Dornan, Mr. Evans of Delaware, Mr. Trible and Mr. Rooney.

The Committee considered H.R. 14104 in open markup session on September 19 and unanimously ordered the bill reported to the House with amendments.

H.R. 14104, in addition to a number of other provisions, authorizes appropriations to the Departments of the Interior and Commerce to carry out the Endangered Species Act through Fiscal Year 1981. To that extent the bill is identical to H.R. 10883 reported to the House by the Committee on March 31, 1978 in order to comply with Section 402 of the Congressional Budget Act.

Briefly explained H.R. 14104, as ordered reported to the House, would do the following:

1. Revise the notice procedures in the Act to improve public notice of proposals to list species as endangered or threatened and designate critical habitat;
2. Require public hearings in areas affected by a designation of critical habitat;
3. Establish a procedure whereby Federal agencies can receive exemptions from the requirements of the Act through a six member cabinet level committee;
4. Establish a grant-in-aid program for States which have developed an adequate and active program for the conservation of endangered and threatened plants;
5. Revise the penalty provisions of the Act by reducing the strict liability penality for others than importers and exporters to $500, making criminal violations of the Act a general rather than a specific intent crime, and subjecting importers and exporters of fish and wildlife and plants to strict liability penalties of up to $10,000;
6. Provide the Secretary of Agriculture with authority to acquire land for the conservation of endangered and threatened species with Land and Water Conservation Funds;
7. Provide exceptions from the act's requirements for the progeny of legally held captive raptors and antique articles made before 1830;
8. Require a review of the endangered species list at least once every 5 years; and
9. Authorize appropriations of $25.5 million in fiscal year 1979; $28 million in fiscal year 1980; and $30.5 million in fiscal year 1981 to carry out the purposes of the act.

BACKGROUND AND NEED FOR THE LEGISLATION

1. OVERVIEW OF THE ENDANGERED SPECIES ACT OF 1973

Congressional concern about rapidly deteriorating fish, wildlife and plant habitat, indiscriminate utilization of plants and animals and increasing numbers of species threatened with extinction resulted in a series of legislative actions culminating in the enactment of the Endangered Species Act of 1973. The act repealed the Endangered Species Conservation Act of 1969, broadened Federal responsibilities to list species and increased the Federal authorization and programs for insuring the survival of species.

The primary purpose of the Endangered Species Act of 1973 is to prevent animal and plant species endangerment and extinction caused by man's influence on ecosystems, and to return the species to the point where they are viable components of their ecosystems. The Department of the Interior estimates that there are 20 species becoming extinct per decade in the United States and an even greater number entering the endangered category. If this rate applies worldwide an estimated 300 extinctions occur per decade.

The process of extinction, of course, is a natural phenomenon. Throughout the hsitory of the world species of animals and plants have appeared, changed and disappeared. In recent time the "extinction experience" has changed dramatically. All available evidence suggests that the rate of extinction of many species of plants and animals has increased significantly in the post-industrial era. In many cases the process of extinction has been associated with an increase in man's ability to alter natural habitats for his own devices. The loss of habitat for many species is universally cited as the major cause for the extinction of species worldwide.

A. Listing of endangered and threatened species

The protections provided to animal and plant species threatened with extinction are activated by the listing of a species as "endangered" or "threatened." The endangered category refers to those species which are threatened with extinction through all or a significant portion of its range, while threatened species are those that are likely to become endangered within the foreseeable future. The various prohibitions provided in the Act may vary depending on whether a species is listed as "endangered" or "threatened."

Species are added to the endangered and threatened species list in two different ways. A member of the public may petition the Secretary for a listing, or the listing process may be initiated by the Department of the Interior or Commerce on the basis of the best scientific and commercial data available. If a private citizen petitions the Secretary to list a species, and presents substantial evidence in support of the petition, the Secretary is required to conduct a review of the species. Although the Department of the Interior uses a priority system to determine which of the hundreds of unlisted endangered species should be acted on first, the petitioning process interrupts the Department's priority system by requiring immediate review.

The act provides five criteria for determining whether a species is endangered or threatened. These are:

1. The present or threatened destruction, modification, or curtailment of the species habitat or range;
2. Overutilization for commercial, sporting, scientific, or educational purposes;
3. Disease or predation;

4. The inadequacy of existing regulatory mechanism; or
5. Other natural or manmade factors affecting its continued existence.

Any proposed listing, delisting, or reclassification is published in the Federal Register, and the public is given at least 60 days in which to comment. Individuals may request a public hearing on a proposed listing, but the Secretary has the discretion to deny the hearing request. The Department has held six public hearings on listing proposals, and they have denied five requests for hearings. The Director of the Fish and Wildlife Service recently announced that all future proposed designations of critical habitat would be accompanied by a hearing in the local area.

Following the review of comments and evaluation of the best available biological data the Department may publish a notice of final rulemaking in the Federal Register. Regulatory proposals generally become effective 30 days after publication of the final determination in the Federal Register.

As of August 1978, the endangered and threatened species list contained 228 domestic and 457 foreign species. An additional 137 animal species and 1,850 plant species have been formally proposed for listing as endangered or threatened (See table 1).

TABLE 1

Category	Endangered and threatened species		
	United States	Foreign	Total
Mammals	34	245	279
Birds	71	144	215
Reptiles and amphibians	26	55	81
Fishes	41	10	51
Snails	7	1	8
Clams	23	2	25
Crustaceans	1	0	1
Insects	8	0	8
Plants	17	0	17
Total	228	457	685

Although most of the Department's actions under the Act have involved the listing of species, the act also authorizes the Secretary to delist or reclassify species in much the same manner as the initial listing. Certain species that closely resemble listed endangered or threatened species can also be listed under the act if the Secretary finds that the listing of the physically similar species will facilitate enforcement of the act. The ultimate goal of the Endangered Species Act is to focus sufficient attention on listed species so that, in time, they can be returned to a healthy state and removed from the list.

B. *Prohibited activities*

Once an animal or plant species has been listed as endangered, the act prohibits a number of activities involving the listed species unless an exception applies or a permit is granted. These prohibitions include:

1. The taking of endangered animal species;
2. The importing or exporting of listed species;

3. The selling or delivering any species which are illegally taken; or

4. The sale of listed species in interstate or foreign commerce.

These prohibitions apply to live or dead species; to their parts or products; to all progeny of animals born on or after December 28, 1973; and to animals held at that time for sale or barter.

All of these prohibitions apply automatically in the case of a species which is listed as endangered. In contrast, when a species is listed as threatened, the Secretary has the discretion to proscribe actions as he deems necessary to provide for the conservation of the species.

C. Exceptions

Although the act established a number of stringent protections for animals and plants listed as endangered, it also provided for some exceptions to the general prohibitions. These include:

1. An exemption for listed animals that were in captivity or a controlled environment on December 28, 1973, and not held in the course of a commercial activity; and
2. An exception which permits Alaskan Natives to take listed species for subsistence purposes, and which permits them to sell native handicrafts fashioned from the nonedible byproducts of listed species.

The act also authorizes the Secretary to permit acts otherwise prohibited by the statute for scientific purposes or to enhance the propagation or survival of the affected species.

D. Penalties and enforcement

The act established a three-tiered civil and criminal penalty provision for violations of the statute. Any person violating the act is subject to a maximum strict liability penalty of $1,000. If a person knowingly violates a provision of the act he can be fined up to $10,000 for each violation; and any person who willfully commits an act which violates the statute can be fined up to $20,000 or imprisoned up to one year.

In addition the civil and criminal penalty provisions provided already discussed, the act authorizes any person, private entity, as well as any State or Federal agency to bring suit to enjoin violations of the act.

II. SECTION 7 AND CRITICAL HABITAT

Section 7 of the Endangered Species Act requires Federal agencies to insure that any action authorized, funded or carried out by them does not jeopardize the continued existence of listed species or destroy or modify the critical habitat of any endangered or threatened species. This one small section has developed into one of the most significant portions of the entire statute.

The mandate of section 7 applies once a species is listed or once "critical habitat" is designated for any listed species. The term "critical habitat" was not defined in the 1973 act, but regulations promulgated pursuant to the act have defined it to include "[a]ir, land or water areas . . . the loss of which would appreciably decrease the likelihood of the survival and recovery of a listed species or a distinct segment of its population. . . ."

The designation of critical habitat for listed species occurs in much the same manner as the initial listing of the species as endangered or threatened. Although the Departments did not originally designate critical habitat concurrently with the listing they are not attempting to do so. As of August 1978, critical habitats had been designated for 32 separate species. The species involved and the area of the habitat are described in tables 2 and 3. An additional 56 critical habitats have been formally proposed for designation.

TABLE 2.—CRITICAL HABITAT FINALIZED, MAPS, AND DESCRIPTIONS

Species	Date of Federal Register	Estimated total acres (10^3)	Number of areas	Notes	Map index location
Snail darter (no map available)	Apr. 1, 1976	1.3	1		1.

As the Act is currently written, critical habitat is determined solely on the basis of biological factors. The Secretary has no discretion to alter a critical habitat designation on the basis of the effect that such designation may have on the area. In many cases, the designation of critical habitat may have little or no impact on activities within the area of the habitat. Whether a specific action may violate section 7 depends on a biological analysis of the impact of the activity on the listed species or its habitat.

A. Tellico Dam and the snail darter—judicial interpretations of section 7

As we have seen in the celebrated snail darter case, section 7 can potentially have an enormous impact on Federal activities. In June of this year, the U.S. Supreme Court affirmed the lower court decision in the Tellico Dam case holding that the Tennessee Valley Authority facility could not be completed as planned because it would jeopardize the existence and destroy the critical habitat of the snail darter, a member of the perch family (*Tennessee Valley Authority* v. *Hill et al.*, No. 76-1701). In reaching this conclusion the Court indicated that the legislative history of the act revealed that Congress intended to halt and reverse the trend toward species extinction—whatever the cost. The Court indicated that the pointed omission of any type of qualifying language in the statute revealed congressional intent to give the continued existence of endangered species priority over the primary missions of Federal agencies. The Supreme Court also dismissed the arguments that section 7 should not apply to any Federal action which is at an advanced stage of construction at the time the species is listed. The Court argued that the plain meaning of the language of section 7, read against the stated policies of the act and its legislative history, indicated that Congress did not intend agencies to be able to escape the mandate of section 7 simply on the basis of the stage of completion of the affected project or activity.

The Tennessee Valley Authority (TVA) has not conducted any further work on the Tellico Project since the Sixth Circuit Court of Appeals decision in January. Through February 1977 TVA had obligated about $103 million on the Tellico project. The General Accounting Office has estimated that about $56.3 million of the $103 million invested in the Tellico project could provide some benefit if the project is not completed. The amount of benefit to be derived from the investment depends largely on the ultimate case, however, and probably will not be proportionate with the original cost.

In all, Section 7 has been interpreted by the courts on three occasions. In *Sierra Club* v. *Froehlke*, 534 F. 2d 1289 (8th Cir. 1976), the plaintiffs challenged the construction of the Corps of Engineers' Meramec Park Lake Dam in Missouri. The plaintiffs alleged that the construction of the dam would jeopardize the continued existence of the endangered Indiana bat by flooding caves in which the bats were located. The 8th Circuit Court of Appeals affirmed the District Court's finding that the existence of any adverse impact on the bats was insufficiently conclusive to preclude construction under section 7.

In *National Wildlife Federation* v. *Coleman*, 529 F. 2d 359 (5th Cir. 1976), the Fifth Circuit Court of Appeals considered a conflict between the Mississippi sandhill crane, a subspecies of sandhill crane, and a planned interchange for Interstate Highway 10. The Court of

Appeals enjoined the Department of Transportation from proceeding with the planned construction of the interchange until the Department could ensure that the development of adjoining lands would not be detrimental to the continued survival of the cranes and the preservation of their habitat. Subsequent to this ruling, the parties to the action agreed that the Interchange could be built if the Department would purchase the land adjacent to the interchange. The completion of the interchange has been stalled, however, as a result of the dispute between the Departments of the Interior and Transportation as to who would be responsible for acquiring the land around the interchange.

Both the Indiana bat and the sandhill crane cases illustrate the fact that there is some degree of flexibility in Section 7. In the sandhill crane case the plaintiffs did not seek, and the court did not enjoin the completion of the highway despite the fact that it bisected the sandhill crane's habitat. In the Indiana bat case the court found that the impact of the impoundment on the bats and their habitat was not sufficiently severe to amount to a violation of Section 7. The determination of whether a particular activity violates Section 7 depends on the type and degree of impact that the activity will have on the species or its habitat. These cases also make it clear, however, that the determination of whether a particular activity violates section 7 is made irrespective of the economic importance of the activity.

B. Section 7 and the consultation process

In addition to requiring Federal agencies to ensure that their actions do not adversely impact endangered species, the section also requires all federal agencies to consult with the Department of the Interior (Department of Commerce in the case of marine species) when any of their actions may affect endangered species. This consultation process is central to the resolution of conflicts under the Act.

Typically the consultation process will be initiated by a Federal agency when it discovers that it may be taking an action that will have an impact on an endangered species. The agency contacts the Fish and Wildlife Service or the National Marine Fisheries Service, depending on the species involved, and requests assistance to determine whether there is a potential violation of section 7. The Service initially conducts a threshold examination in an attempt to determine that nature of any impact on a listed species. At the conclusion of the threshold examination the Service issues a biological opinion indicating whether the action is likely to jeopardize the species or adversely modify the critical habitat, and suggesting possible modification which would avoid any adverse impact.

Although section 7 has been in effect since 1973, this consultation procedure was not formally instituted until January of this year. The administration has testified that some 4500 consultations have been conducted under Section 7 since 1973. Unfortunately, until recently the Department of the Interior did not attempt to make a formal record of these consultations and the Committee has been unable to substantiate the number of successful consultations under the Act. It is assumed that a large number of the consultations amounted to informal contacts between the Federal agency and the Fish and Wildlife Service. The Department of the Interior estimates that there may be as many as 20,000 consultations during Fiscal Year

1979. In the future the Department should keep accurate records on each consultation on file regardless of whether consultation amounts to only a single inquiry such as a telephone call.

The evidence presented to the Committee suggests that in many instances good faith consultation between the acting agency and the Fish and Wildlife Service can resolve many endangered species conflicts. As an example, consultation between the Service and the Corps of Engineers on the proposed Dickey-Lincoln project in Maine appears to have resolved any potential conflict between the reservoir and the endangered furbish lousewort. In that case the Service recommanded a conservation program to the Corps of Engineers which included acquisition and protection of existing habitats below the project impoundment area, acquisition of new habitats for relocated populations. and the development of a monitoring program capable of detecting any changes in the lousewort's biological status. The consultation involving the furbish lousewort was one of the most complex conducted by the Fish and Wildlife Service. Some consultations may amount to no more than a simple inquiry whether a listed species is present in a project area.

Any determination by the Fish and Wildlife Service that the activity may jeopardize the continued existence of listed species does not necessarily mandate any particular action by the acting agency. The section 7 regulations make it clear that it is the responsibility of the acting agency to determine whether to proceed with the activity or program as planned in light of its Section 7 obligations. The judicial decisions interpreting Section 7 indicate, however, that the biological opinion issued by the Fish and Wildlife Service will ordinarily be given great weight by the courts. Federal agencies proceeding with an action in the face of an adverse biological opinion will be doing so at their peril.

Although consultation can be a valuable tool for resolving conflicts between endangered species and Federally authorized activities, the committee is concerned that the volume of consultations expected under section 7 may ultimately overwhelm the Fish and Wildlife Service. The committee is especially alarmed that, because additional full-time personnel ceilings have not been provided by the Administration, many of these all-important consultations will be performed by part-time personnel. The efficient operation of the Department's consultation teams is vital if future conflicts between endangered species and Federal development projects are to be avoided. The committee does not believe that part-time personnel can adequately perform the difficult task of consulting with other Federal agencies on projects which may result in species or habitat degradation.

III. THE POTENTIAL FOR FUTURE ENDANGERED SPECIES CONFLICTS

Before determining the need for any amendment to the Endangered Species Act, the Subcommittee on Fisheries and Wildlife Conservation and the Environment conducted the most extensive set of oversight hearings ever held on the operation of the Endangered Species Act. These hearings attempted to determine the nature and extent of current conflicts under the act, and the likelihood of future conflicts between listed species and federally authorized activities.

The evidence developed at these hearings suggests that the consultation process can resolve many if not most of the conflicts that might develop under the Act. The committee believes that the popular press has grossly exaggerated the potential for conflict under the Act. It is clear, nevertheless, that there will continue to be some Federally authorized activities which cannot be modified in a manner which will avoid a conflict with a listed species. For example, the Tennessee Valley Authority Columbia Dam project appears to pose a serious threat to several listed species. The likelihood of future conflicts will increase as more species are added to the Endangered Species List and as more critical habitats are designated for listed species. As we have already mentioned, there are currently 137 animals and 1850 plants proposed for listing as endangered and threatened and 56 critical habitats proposed for designation. The Department of the Interior anticipates listing some 414 domestic species and designating 293 critical habitats before 1980.

Numbers alone, nevertheless, can never tell the entire endangered species story. Many of the plant species, for example, are located in isolated areas of California and Hawaii. It is very unlikely that the listing of these plant species will precipitate conflicts with Federal activities. If a conflict develops, it will be a simple matter to relocate populations of these species to avoid a violation of section 7. On the other hand, the amount of biological information about any particular endangered species can be very limited. And as a result, it may be quite difficult for the Fish and Wildlife Service to know with any certainty at the consultation stage whether an activity will "jeopardize the existence" of a particular species.

All of these facts, considered together, convinced the committee that some flexibility is needed in the act to allow consideration of those cases where a Federal action cannot be completed or its objectives cannot be met without directly conflicting with the requirements of Section 7. The committee believes that an amendment of the Act is further justified in light of allegations by the General Accounting Office that the Fish and Wildlife Service has deliberately refrained from listing two species of insects which appear to pose a serious conflict with the New Melones Dam in California. The Fish and Wildlife Service has allegedly omitted these species from the list for fear of provoking the Congress into major revisions of the Endangered Species Act.

The committee considers these allegations to be extremely serious. Those individuals charged with the administration of the act do not have the legal authority to weigh the political importance of an endangered species. The fact that the very administrators of the act have apparently determined that the act is insufficiently flexible is evidence itself of the necessity for amendment.

IV. H.R. 14140—GENERAL DISCUSSION

A. *Compromise*

The Endangered Species Act amendments were subjected to a vigorous debate in both the Subcommittee and full committee. At one point, no less than five separate amendment proposals were considered by the committee in its markup session. H.R. 14104 represents a compromise between these disparate points of view. The bill attempts to retain the basic integrity of the Endangered Species Act, while introducing some flexibility which will permit exemptions from the Act's stringent requirements. At the same time, the legislation aims to improve the listing process and the public notice process of proposed listing and designations. These improvements will insure that all listing and designations are made by the Department of the Interior only after a thorough survey of all of the available data, and only after notice to the local communities that will be most affected by any listing or designation. In addition, the compromise amendment contains provisions allowing for the enhancement of existing critical habitat of endangered and threatened species.

B. Exemption procedure

H.R. 14104 would establish a procedure through which Federal activities could be exempted from the requirements of section 7 of the act. The exemption procedure could be initiated once the Secretary issues a biological opinion indicating that the agency action may jeopardize the continued existence of a listed species or adversely modify its critical habitat. The application would initially be considered by a three member review board which would make recommendations to a six member cabinet level committee. The procedure outlined here is very similar to that regularly utilized by Federal agencies under the terms of the Administrative Procedure Act. In this case, the review board would be acting in much the same capacity as an administrative hearing examiner who makes recommendations to a Federal agency on a pending regulatory proposal.

The review board would be composed of an appointee of the Secretary of the Interior (the Secretary of Commerce in the case of marine species), an appointee of the Governor of the affected State, and an individual appointed by the two appointees.

Before proceeding to review the merits of granting an exemption for the agency action, the review board would be required to make an initial determination that the agency has made a good faith effort to consult with the Fish and Wildlife Service and attempt to resolve the conflict with the endangered species. This step is crucial in order to insure that all Federal agencies fully comply with the consultation requirements of section 7.

Once the review board determined that the agency had consulted in good faith, it could proceed to consider the merits of the application. The review board would determine, on the basis of the evidence presented at a formal adjudicatory hearing, whether—

A. There are no feasible and prudent alternatives to the agency action;

B. The benefits of the agency action clearly outweigh the benefits of alternative courses of action consistent with the conservation of the species; and

C. The action is of national or regional significance.

At the conclusion of the formal hearing the review board would forward its recommendation, including a recommendation of the necessary mitigation and enhancement measures to be taken, to the Endangered Species Committee composed of the following members:

1. The Secretary of Agriculture;
2. The Secretary of the Army;

3. The Secretary of the Interior;
4. The Administrator of the National Oceanic and Atmospheric Administration;
5. The Chairman of the Council on Environmental Quality; and
6. The Governor of the State in which the agency action will occur.

The Endangered Species Committee would review the recommendations of the review board and the evidence on which it is based and would decide whether or not to grant an exemption from section 7 of the act. Four out of the six committee members would have to vote for an exemption in order for an exemption to be granted. If such an exemption is granted, the committee would be required to establish the necessary mitigation and enhancement measures.

The Committee on Merchant Marine and Fisheries adopted the exemption procedure with the firm belief that it offers the best potential for fairly evaluating and balancing the benefits of the agency action against the benefits of alternatives which will insure the conservation of the species. The membership of the Endangered Species Committee has been deliberately structured to take advantage of a broad array of experience and expertise and to balance all possible points of view.

The committee would like to point out, in response to the additional views of several members of the Committee, that the review board does not duplicate the duties of the Endangered Species Committee. The review board merely makes recommendations to the Endangered Species Committee. In this sense, the review board will be acting as a hearing examiner for the committee. Even if the bill did not include a review board, the committee would undoubtedly have to hire a hearing examiner to conduct the Federal adjudicatory hearing. The exemption procedure provided in H.R. 14104 will assure that all of the evidence will be reviewed by highly competent and professional appointees of the Secretary and Governor.

Although the exemption procedures involve a two-step process, the bill includes specific timetables to insure that an exemption application will receive immediate consideration. The review board is required to complete its hearings and make its recommendation within 180 days. The committee in turn is required to decide whether to grant an exemption within 90 days of receiving the recommendation of the review board.

C. Amendments to the listing process

H.R. 14104 includes several amendments to the endangered species listing process. These amendments were added to the legislation in order to correct a number of deficiencies that were highlighted in the course of the oversight hearings. The committee discovered that, all too often, the listing of a species or the designation of critical habitat occurs in a regulatory vacuum. There has been little or no effort made to publicize the regulatory proposal in the affected area or give the people most directly impacted by the proposed regulation an opportunity to effectively comment on it. Under the existing Act an individual would have to spot the regulatory proposal in the Federal Register in order to be aware of any potential listing or designation of habitat in his area.

The committee believes that the listing of a species or the designation of critical habitat is important enough to require the administering agencies to expand their notice procedures. H.R. 14104 would alleviate this problem by requiring actual notice of regulatory proposals to general units of government. In addition, the bill requires that any proposed designation of critical habitat be published in a local newspaper in the affected area. Finally, the bill would require informal public meetings on proposed critical habitat designations in the area of the habitat and more formalized hearings in the State. Added together, these provisions will insure that the Department of the Interior is not listing species and designating critical habitat without consulting the views of the people of the affected area. In addition, these provisions will serve to alert the Fish and Wildlife Service to possible conflicts between listed spcies and human activities. The committee believes that it is in everybody's interest for conflicts between the presence of endangered species and development activities to be discovered and resolved at the earliest possible opportunity.

D. Evaluation of economic impact of the designation of critical habitat for invertebrates

The ultimate goal of the Endangered Species Act is the conservation of the ecosystem on which all species, whether endangered or not, depend for survival. For this reason the Endangered Species Act protects all endangered and threatened members of the animal kingdom, not merely the so-called higher forms of life. Nevertheless, the committee recognizes that the large number of species and subspecies within the 21 nonvertebrate phyla could ultimately present serious conflicts with many Federal activities. The committee adopted a provision, which while continuing full protection for all listed species, does give the Secretary the discretion to alter a critical habitat designation for an invertebrate species if he determines that the economic benefits of excluding a portion of the critical habitat outweigh the benefits of designating the area as part of the critical habitat.

This provision is not intended to downgrade the status of invertebrate species. Rather, it is intended to avoid conflicts between invertebrate species and Federal activities at an early stage, without having to resort to the full exemption procedure.

SECTION-BY-SECTION ANALYSIS

Section 1 of H.R. 14104 contains the short title and enacting clause.

Section 2 of H.R. 14104 contains amendments to section 4 of the Endangered Species Act of 1973 (16 U.S.C. 1533).

Section 4(a)(1) of the Endangered Species Act of 1973 requires that the listing of any species as threatened or endangered is to be carried out by regulation published in the Federal Register. Paragraph 1 of section 2 of the bill has the additional requirement that the Secretary "to the maximum extent prudent" specify critical habitat at the same time as he publishes a regulation listing a species. The phrase "to the maximum extent prudent" is intended to give the Secretary the discretion to decide not to designate critical habitat concurrently with the listing where it would not be in the best interests of the species to do so.

As an example, the designation of critical habitat for some endangered plants may only encourage individuals to collect these plants to the species ultimate detriment. The committee intends that in most situations the Secretary will, in fact, designate critical habitat at the same time that a species is listed as either endangered or threatened. It is only in rare circumstances where the specification of critical habitat concurrently with the listing would not be beneficial to the species.

Section 4(b) of the act is amended by the addition of a new paragraph which specifies the way in which the critical habitat of invertebrate animal species is to be determined by the Secretary. In the new paragraph, the Secretary is directed to consider the economic and other relevant impacts of the inclusion of areas within a proposed critical habitat. The Secretary may exclude any area from a proposed critical habitat if he determines that the benefits of such an exclusion outweight the benefits of specifying the area as part of the critical habitat.

Up until this time, the determination of critical habitat has been a purely biological question. With the addition of this new paragraph, the determination of critical habitat for invertebrate takes on significant added dimensions. Economics and any other relevant impact shall be considered by the Secretary in setting the limits of critical habitat for such a species. The Secretary is not required to give economics or any other "relevant impact" predominent consideration in his specification of critical habitat for invertebrates. The consideration and weight given to any particular impact is completely within the Secretary's discretion.

In directly addressing the question of the specification of critical habitat for invertebrates, the committee was motivated by its knowledge of the large number of species and subspecies of invertebrates, their usually high rate of reproduction, and their relatively small critical habitat requirements. The result of the committee's proposed amendment would be increased flexibility on the part of the Secretary in determining critical habitat for invertebrates. Factors of recognized or potential importance to human activities in an area will be considered by the Secretary in deciding whether or not all or part of that area should be included in the critical habitat of an invertebrate species. The committee expects that in some situations, the resultant critical habitat will be different from that which would have been established using solely biological criteria. In some situations, no critical habitat would be specified. In such situations, the act would still be in force to prevent any taking or other prohibited act described in 16 U.S.C. 1538. In addition, agencies would still be prohibited from taking an action which would jeopardize the existence of the invertebrate species.

The committee amended H.R. 14104 to require a review of the Endangered and Threatened Species List at least once every 5 years. On the basis of this review, the Secretary would determine whether to: (1) remove any species from the list; (2) change the status of any listed species from endangered to threatened or threatened to endangered. Any determinations made pursuant to this review must be made in accordance with the criteria described in section 4(a) of the act and pursuant to the listing procedure described in section 4(b). The committee anticipates that the Secretary may decide to conduct the required review in increments. Any failure to review all of the species on the list would not invalidate the listing of any species.

Section 2 of H.R. 14104 also amends section 4(c) (1) of the act which presently requires the Secretary to publish a list of endangered or threatened species which also specifies the portion of its range in which the species is endangered or threatened.

The committee bill would amend section 4(c) (1) to require the Secretary to include critical habitat designations on the Endangered and Threatened Species List. The term "range" is used in the general sense, and refers to the historical range of the species. The committee believes, nonetheless, that the Secretary should be exceedingly circumspect in the designation of critical habitat outside of the presently occupied area of the species.

H.R. 14104 amends section 4(f) (2) (A) of the act to expand present notice requirements and to require public meetings or hearings in connection with the listing of a species and the specification of its critical habitat.

Under the committee bill, notice of a proposed regulation (including a complete text of the regulation) would have to be published in the Federal Register 60 days before its effective date. Where critical habitat is specified, such notice must also be published in a newspaper of general circulation within or adjacent to such habitat. Actual notice of the regulation and any environmental assessment or environmental impact statement prepared on it is required to be given to all general local governments within or adjacent to the proposed critical habitat at least 60 days prior to its effective date. This provision does not require actual notice to special districts such as an irrigation or school district. The committee expects that the Secretary would utilize OMB Circular A-95 or some similar device for assuring effective notice to local governments.

Where critical habitat is specified in the proposed regulation, the Secretary must promptly hold a public meeting on the proposed regulation. The meeting must be held in the area in each State where such habitat would be found. The committee intends that the meetings held pursuant to this paragraph be of an informal variety that would permit a colloquy between representatives of the Department and local citizens. If a timely request is filed with the Secretary, a public hearing must be held in the State whose citizen filed the request. It is the intent of the committee that such hearings be held in accordance with appropriate sections of the Administrative Procedures Act and near or within the proposed critical habitat. The committee does not intend that either the meetings or hearings be full adversarial proceedings with all of its inherent expenses to the parties and delays in arriving at a final regulation.

In the rather rare instances where no critical habitat is proposed concurrently with the listing, a public meeting is to be held by the Secretary if a request therefore is filed within 45 days of the publication of general notice.

If, by chance, actual notice is not given to some unit of general local government, such an unintentional and unplanned failure of the notification system shall not invalidate the proposed regulation.

H.R. 14104 adds a new paragraph (5) to section 4(f) which would provide that any final regulation adding a species to the list must be published within 2 years after the notice of proposed rulemaking. Any proposed listings not finalized within 2 years must be withdrawn, and cannot again be proposed unless Secretary determines that new information is available which warrants such action. The paragraph provides that any listing which is proposed at the time of the enactment of these amendments would not have to be withdrawn until one year after the date of enactment.

The bill adds a new subsection (g) to section 4 which would require the Secretary to develop and implement recovery plans for listed species. Such plans would be designed to ensure the conservation or survival of each listed species. Recovery teams may be appointed by the Secretary, where appropriate, to aid in developing or implementing a recovery plan for a particular species. Such plans shall be as long and as detailed as is necessary and consonant with their purpose of providing a framework for actions directed at conserving or, at least, insuring the survival of the subject species. Although recovery plans are implicit in the Endangered Species Act, the Act does not specifically mandate recovery plans. As a result, recovery plans have been given a low priority within the Endangered Species Act budget.

The committee intends the Secretary to establish recovery teams to assist with: (1) the development of plans; (2) periodic amendment of plans; and (3) the implementation of the plans. The committee hopes that the Secretary will appoint full-time professionals to insure that planning and implementation proceed expeditiously.

Section 3 of H.R. 14104 contains extensive amendments to section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1536).

As under the present law, the Secretary is required to make sure that all the programs administered by him are in concert with the purposes of the Endangered Species Act. Each Federal agency is directed to consult with the Secretary and to use its authorities to further the purposes of the Endangered Species Act by carrying out conservation programs for listed species.

Under H.R. 14104, each Federal agency is required to insure that any action authorized, funded or carried out by it does not result in species or habitat degradation unless the action has been exempted under later provisions of the bill. In setting about to insure that its actions will not result in species or habitat degradation, each agency is expected to make use of all available expertise both within its own organization and by consulting with the Secretary, the Smithsonian Institution, the Marine Mammal Commission, or other qualified groups or individuals.

Section 7(c)(1) requires that Federal agencies insure that their actions do not result in: (1) jeopardy to the continued existence of an endangered or threatened species; or (2) the destruction or adverse modification of any critical habitat of any such species. It is the responsibility of each agency to review its activities or programs to identify any such activity or program that may affect listed species or their habitat. If a Federal agency determines that its activities or programs may affect listed species or their habitat, the agency should request assistance from the Secretary.

Section 7(c)(2) defines the consultation process. If the Federal action agency or the Secretary determines that a proposed action may affect a listed species or its habitat, immediate consultation shall be undertaken. The consultation will assist in the development of alternatives to the proposed action, and will result in a written biological opinion by the Secretary detailing whether the proposed action is likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of its critical habitat. The biological opinion will also discuss the alternatives and modifications to the proposed action which would avoid the impacts to the listed species or their habitats.

The search for alternatives in the consultation process should be limited to those that are "reasonable and prudent." The committee does not intend that the Secretary and the Federal agency should, at the consultation stage, be required to review all possible alternatives to the agency action including those inconsistent with the project's objectives and outside of the Federal agency's jurisdiction. It is the intent of the Committee that the consultation process be completed within 90 days or such time as is mutually agreed upon by the Secretary and the Federal agency.

The new Section 7(c)(3) is designed to stimulate the development of additional biological information to assist Federal agencies in complying with section 7.

It requires Federal agencies, with respect to actions for which no contract for construction has been entered into and no construction has begun on the date of enactment of this provision, to ask the Secretary whether any listed species is present in the area of any such proposed action. In responding, the Secretary is to rely on the best scientific and commercial data available. The end which this notification process is designed to accomplish is the early discovery of and elucidation of any conflicts between an agency action and a listed species.

After being notified that listed species may be present, the Federal agency is required to conduct a biological assessment. The assessment should concentrate on determining whether or not any listed species presence is likely to be adversely affected by the agency action. No contract for construction may be entered into nor may construction begin while the biological assessment process is under way. The assessment may be prepared in conjunction with the NEPA process. It is the intent of the committee that this review process take place well before the exercise of agency discretion which would result in contracts for construction, actual construction activities, or other potentially destructive activity.

The committee notes that some biological assessments may harass or harm listed species to the extent that a permit would be required to conduct the assessment. If that is the case, the Federal agency would be required to apply to the Secretary for a permit under the provisions of the Act.

The new section 7(c)(4) of the act would further strengthen the consultation process. It prohibits any Federal agency from making any irreversible or irretrievable commitment of resources once consultation has been initiated if such commitment would have the effect of foreclosing efforts to avoid the adverse impacts on the species or their critical habitat.

H.R. 14104 includes a new section 7(d) detailing the creation of a review board and setting forth the manner in which applications for a project exemption are to be processed.

The exemption process is begun by the filing of an application with the Secretary by either the Federal agency, the Governor of the State in which the agency action will occur, or an applicant for a permit or license required under Federal law. The reference to States in which the agency action will occur is intended to apply to those States where the project, species and critical habitat are located. It is not intended to include States whose only nexus to the agency action is the issuance of a Federal permit, license or grant. An application may only be filed if, after consultation, it is the Secretary's opinion that the agency action may result in species or habitat degradation. The application must be filed within 90 days after completion of the consultation process. The application must contain a statement detailing the reasons why the agency action is qualified for an exemption.

Upon receipt of the application for exemption, the Secretary must promptly notify the Governor or Governors of any State(s) in which the agency action is being carried out and request their appointment of a member of the review board. The committee intends the Secretary to have sole discretion to determine which States are affected by the Endangered Species Act conflict and which Governors should be notified under this provision.

The review board is to consist of three members. One is appointed by the Governor or Governors, one by the Secretary, and the third is selected by the first two within 15 days of the appointment of the second. If the two appointees are unable to agree on a third member, the Endangered Species Committee is directed to select the third member.

Within 60 days of receiving the application, the Secretary is to submit to the review board his written views on the matter and his recommendations as to the final disposition of the matter.

The review board is given 60 days after the appointment of its third member to make its initial determinations. A longer period of time may be taken if agreed to between the Secretary and the agency. The board acts by majority vote in determining whether the Federal agency has met three requirements which are preconditions to further action on the exemption application. First, there must be a determination that the agency has consulted with the Secretary in good faith and has made a reasonable and responsible effort to consider modifications or alternatives which would avoid species or habitat degradation. Secondly, the agency must have conducted a biological assessment if one is required under new section 7(c)(3). Thirdly, the agency must have made no irreversible or irretrievable commitment of resources as prohibited under section 7(c)(4).

If the review board makes a positive determination on these three matters, it may proceed to conduct a hearing and forward a recommendation on the matter of whether or not an exemption should be granted. A recommendation favoring an exemption may be made to the Endangered Species Committee if a majority of the review board finds, after conducting a formal adjudicatory hearing, that: (1) there are no "feasible and prudent" alternatives to the agency action; (2)

the benefits of the agency action clearly outweigh the benefits of alternative course of action consistent with conserving the species or its critical habitat, and that such action is in the public interest; and (3) the action is of national or regional significance.

The terms "feasible and prudent" alternatives are intended to insure that the review board evaluates a wide variety of alternatives to the agency action before recommending an exemption from the act. During the consultation process, the Secretary and the Federal agency are required to evaluate a narrower range of possible alternatives to the proposed action. The committee believes that the search for alternatives before the review board should be significantly larger than during the consultation stage. Section 7 consultation is intended to focus attention on the agency action, its objectives, and the aspects of the agency action which gave rise to the problem initially. The focus of a section 7 consultation should be on solving the problem in a way which is clearly within the jurisdiction and expertise of the consulting parties.

In contrast, the review board and the Endangered Species Committee should focus on a wider variety of alternatives. Their search should not be limited to original project objectives or the acting agency's jurisdiction. The Committee does intend that the review board should only consider alternatives which are both technically capable of being constructed and prudent to implement.

The second criteria considered by the review board involves an evaluation of the benefits of the agency action and an evaluation of the benefits associated with alternatives which would avoid an adverse impact on the species or its habitat.

In the context of this provision, the committee intends that the term "benefits" shall include, but not be limited to, ecological and economic considerations. Among the economic criteria which may be examined and considered by the review board and the Endangered Species Committee are those set forth in OMB Circular A-107 and in Executive Order 11949. These include:

(1) the cost impact on consumers, business markets, Federal, State, and local governments;

(2) the effect on productivity of wage earners, businesses and government;

(3) the effect on competition;

(4) the effect on supplies of important materials, products, and services;

(5) the effect on employment; and

(6) the effect on energy supply and demand.

The Committee does not intend, however, that the review board and Endangered Species Committee evaluation should be limited to these criteria. They should also consider the national interest, including actions authorized, funded or carried out by the Secretary of Defense; the esthetic, ecological, educational, historical, recreational and scientific value of any endangered or threatened species; and any other factors deemed relevant.

The committee notes that the amendment requires the review board and the committee to balance the benefits associated with the agency action against the benefits associated with alternative courses of action.

They should not balance the benefits of the action against the value associated with the listed species.

To be "in the public interest," an agency action must affect some interest, right or duty of the community at large in a way which they would perceive as positive.

The third finding required before the board may recommend that an exemption be granted is that the agency action be of "national or regional significance." The term "regional significance" is not intended ot refer merely to projects which affect more than one State. Rather, the committee believes that the review board and the Endangered Species Committee should evaluate the nature, as well as the scope of the project, in their determination of whether an action is nationally or regionally significant. As an example, the committee believes that an action affecting the Port of Sacramento, in California, would be regionally significant.

Unless otherwise agreed between the applicant and the Secretary, the review board has 180 days after the initiation of the hearing to submit its recommendation. The recommendation shall include the board's view on the propriety of granting an exemption as well as any reasonable mitigration and enhancement measures to be considered by the committee.

The record of the review board's proceedings is to be transmitted to the Endangered Species Committee along with the board's recommendation. The review board has the power to request on a nonreimbursable basis the assistance of agency personnel from the head of any Federal agency. This would include the power to request the services of an administrative law judge to assist in the conduct of the hearing. The review board should make maximum use of this procedure and should minimize reliance on personnel provided on a reimbursable basis by the GSA. Even if the review board procures the services of a hearing examiner, the committee intends the members of the review board to be physically present during the hearing. The committee believes that the presence of the review board during the formal hearing will assist in the development of a sound and comprehensive recommendation to the Endangered Species Committee.

The committee does not intend that either the review board or the Endangered Species Committee should be considered as Federal agencies except as provided for in the bill. The Federal Advisory Committee Act shall not be applicable to either the review boards or the Endangered Species Committee.

Section 7(e) establishes the Endangered Species Committee. The committee is to be composed of six members: The Secretary of Agriculture: the Secretary of the Army; the Secretary of the Interior; the Administrator of the National Oceanic and Atmospheric Administration; the Chairman of the Council on Environmental Quality; and the Governor or Governors of the State or States within which the agency action in question will occur.

The committee is to meet at the call of its Chairman, the Chairman of the Council on Environmental Quality. It has 90 days from the date it receives the review board's recommendation to decide whether or not to grant the agency action an exemption from new subsection 7(c)(1).

An exemption may only be granted by four of the committee's members, voting in person, and after a determination is made on the record. The committee may base its determination on the record developed by the review board, but has the power to itself receive testimony and evidence. The committee does not expect the Endangered Species Committee to conduct a second final adjudicatory hearing. The criteria the committee is to use in making its determination are identical to those considered by the review board in making its recommendation. If the committee grants an exemption, it must require reasonable mitigation and enhancement measures be taken by the successful applicant.

The phrase "reasonable mitigation and enhancement measures" is used in several places in the legislation to describe actions which shall be taken by an applicant which receives an exemption. The required actions must be "reasonable" in their cost, likelihood of protecting the listed species, and the availability of the technology required to make them effective, and other considerations deemed relevant by the Endangered Species Committee. The explanation of the phrase in new Section 7(f)(2) makes it clear that "reasonable mitigation and enhancement measures" are those actions by the applicant which are necessary and appropriate "to minimize the adverse effects of the agency action" on the species or habitat in question. Live propogation, transplantation, and habitat acquisition and improvement are mentioned as specific examples of actions a successful applicant might be required to take.

The Committee's final determination is subject to judicial review in the district court for any district where the agency action will be located. This refers to the location of the project where the project will be carried out, and not the district where a permit or license might be issued.

The Committee may not grant an exemption if the Secretary of State gives it written certification that the granting of the exemption and the resultant agency action would violate an international treaty or other international obligation of the United States. The certification must be made within 60 days after the Committee receives the application for exemption and must be published in the Federal Register. The phrase "other international obligation" should be understood to mean a formal, legal obligation of the United States Government. This provision would apply to the Agreement on the Conservation of Polar Bears, signed November 15, 1973; the U.S.-Japan Migratory Bird Convention; as well as the recently ratified U.S.-Russian Migratory Bird Treaty.

When the Committee formally issues its order exempting an agency action, any reasonable mitigation and enhancement measures must be spelled out in the document. New section 7(h) makes it clear that such measures are to be carried out and paid for by the party receiving the exemption. In the case of a Federal agency action, the mitigation and enhancement measures required under 7(f) must be authorized by the Congress prior to implementing the action. Such measures would also have to be funded by the Congress concurrently with all other project features. The reasonable mitigation and enhancement measures required under 7(f) must actually be funded and carried out for the exemption to be effective.

The costs of the mitigation and enhancement measures are to be considered project costs for all purposes except for the computation of benefit-cost or other ratios.

Agencies receiving an exemption are required to submit annual reports to the Council on Environmental Quality describing compliance with ordered mitigation and enhancement measures.

The bill adds a new section 7(j) which would allow the President to grant an exemption for replacement and repairs on public facilities necessary to prevent recurrence of a natural disaster which resulted in a Presidential declaration of a Federal disaster area.

H.R. 14104 adds a new Section 7(k)(1) which indicates that the granting of an exemption is not a major Federal action for the purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) if an environmental impact statement which discusses impacts on endangered or threatened species or their critical habitats has been prepared on the agency action.

The committee included section 7(k)(2) in recognition of the fact that even though a project might be exempted from the requirements of section 7, section 9 of the act would still prohibit the "taking" of any endangered animal species.

Section 4 of H.R. 14104 authorizes appropriations to the Departments of Interior and Commerce to carry out the purposes of the act through fiscal year 1981.

Section 5 of H.R. 14104 defines a number of terms used in the Endangered Species Act.

The term "critical habitat" is defined for the first time. The definition is modeled after that found in present Department of the Interior regulations. Under the present regulations, critical habitat includes air, land or water areas—the loss of which would appreciably decrease the likelihood of conserving a listed species. Under the present regulations, the Secretary could designate as critical habitat all areas, the loss of which would cause any decrease in the likelihood of conserving the species so long as that decrease would be capable of being perceived or measured.

In the committee's view, the existing regulatory definition could conceivably lead to the designation of virtually all of the habitat of a listed species as its critical habitat.

Under the definition of critical habitat included in H.R. 14104, air, land or water areas would be designated critical habitat only if their loss would significantly decrease the likelihood of conserving the species in question. The committee believes that this definition narrows the scope of the term as it is defined in the existing regulations.

Section 5(2) of H.R. 14104 redefines the term "species" as it is used in the act. The existing definition of "species" in the act includes subspecies of animals and plants, taxonomic categories below subspecies in the case of animals, as well as distinct populations of animal "species." The definition included within the committee bill would exclude taxonomic categories below subspecies from the definition as well as distinct populations of invertebrates.

Section 5(4) of H.R. 14104 defines "species or habitat degradation" to include of the following effects: (1) jeopardy to the continued existence of any endangered or threatened species and/or (2) the destruction or adverse modification of any critical habitat of such species.

By inserting this new phrase, the committee does not intend to modify the definitions of these terms as presently defined by the agencies or the Supreme Court in *Tennessee Valley Authority* v. *Hill et al.*

Section 7 of H.R. 14104 amends section 6(c) of the Act to allow the Secretary of the Interior to enter into cooperative agreements with the States for the management and conservation of listed species of plants. This amendment will permit States which develop an adequate and active program for the conservation of listed plants to receive Federal grant-in-aid in the same manner as States now receive funds for resident species of endangered and threatened fish and wildlife.

Section 8 of H.R. 14104 amends section 11 of the Act, the penalties and enforcement section. All changes to this section have been made after extensive consultation with the Department of Justice.

The amendment reduces the strict liability penalty for others than importers and exporters to $500, makes criminal violations of the act a general rather than a specific intent crime, and subjects importers and exporters of fish and wildlife and plants to strict liability penalties of up to $10,000.

By deleting from the civil penalty and criminal provisions of section 11 the phrase, "commits an act which violates," the committee intends only to make it clear that the act's civil and criminal sanctions apply to violations involving an omission or failure to act as well as to violations involving the commission of a prohibited act. The committee does not intend to make knowledge of the law an element of either civil penalty or criminal violations of the Act. In furtherance of this intent, the committee has reduced the standard for criminal violations from "willfully" to "knowingly".

Under the amendment provided in H.R. 14104 a tourist who unknowingly imports a listed species into the United States could not be fined more than $500. The committee assumes that in most cases, law enforcement officials will seek the forfeiture of the item rather than impose a civil penalty. The committee emphasizes that the strict liability provision which applies to persons engaged in the business an an importer or exporter of fish, wildlife or plants does not apply to commercial fishing operations which may import fish products into the United States for purposes of human or animal consumption as a part of their business.

Section 9 of H.R. 14104 provides the Secretary and the Secretary of Agriculture with the authority to acquire land for the conservation of listed species including plants. The current act limits this authority to the Secretary of the Interior.

Section 10 of H.R. 14104 provides an exemption from the prohibitions in the act for the raptors legally held in captivity or in a controlled environment on the date of enactment of the Endangered Species Act, as well as the progeny of such raptors. Prohibitions contained in the present law to prevent commerce in endangered species have impeded captive breeding efforts by responsible falconers, conservationists, and biologists.

Unless specified in other laws, H.R. 14104 would exempt raptors held prior to the enactment of the Endangered Species Act of 1973 from the provisions and prohibitions of that act. The domestic captive-produced progeny of any such legally held raptor, whether produced before, on, or after December 28, 1973, would also be exempted from the provisions and prohibitions of the Act.

In order to encourage breeding of raptors in captivity, the domestic captive-bred progeny of all raptors legally taken from the wild after December 28, 1973, shall be treated the same as those of raptors captured prior to enactment of the present law. This is designed to alleviate human pressures on wild raptor populations. It will also increase the genetic diversity of captive populations and further encourage domestic production of raptors for conservation, recreational, scientific and breeding purposes. When domestic captive-bred raptors are intentionally released and returned to a wild state for conservation and reintroduction purposes, such raptors are thereafter entitled to the full protection of the act.

The Secretary may require the owners of all exempted raptors to keep records and required bands or other permanent markings to distinguish them from wild birds. The records and inventories may be inspected by agents of the Secretary at reasonable times. These records, permanent markers and inventory procedures should not unnecessarily duplicate those now required under the Migratory Bird Treaty Act for special purpose permits and falconer permits. The Secretary may promulgate such reasonable regulations which allow for the use, exchange, movement, import or export of legally held raptors or their domestic captive-bred progeny.

Nothing in this amendment shall be construed as a diminution of the protection of wild populations of raptors under the act.

Section 11 of H.R. 14104 amends section 10 of the act by exempting certain antique articles other than scrimshaw from the application of sections 4(d) and 9(a) of the act. Such articles are exempt from those sections if they were made before 1830, are composed in whole or part of any listed species, have not been repaired or modified with any listed species part or product thereof prior to enactment of the Act (December 28, 1973), and enter the United States through a port specially designated by the Secretary of the Treasury.

The committee chose the 1830 date with the understanding that antique articles produced priod to this date can be readily distinguished from those made after 1830.

COST OF THE LEGISLATION

In the event the legislation is enacted into law, and the moneys authorized are fully appropriated, the committee estimates the maximum cost to the Federal Government—after comparing and analyzing the information supplied by the Government agencies and their representatives and the Congressional Budget Office—for the 3 year extension of the act would be $26 million for fiscal year 1979; and $28.5 million for fiscal year 1980; and $31 million for fiscal year 1981.

INFLATIONARY IMPACT STATEMENT

Pursuant to clause 2(1)(4) of Rule XI of the Rules of the House of Representatives, the committee estimates that the enactment of H.R. 14104 would have no significant inflationary impact on the prices and costs in the national economy.

Compliance With Clause 2(1)(3) of Rule XI

With respect to the requirements of clause 2(1)(3) of Rule XI of the Rules of the House of Representatives—

(A) The Subcommittee on Fisheries and Wildlife Conservation and the Environment held eight days of oversight hearings on the Endangered Species Act during the 95th Congress.

(B) The requirements of section 308(a) of the Congressional Budget Act of 1974 are not applicable to this legislation.

(C) The Committee on Government Operations has sent no report to the Committee on Merchant Marine and Fisheries pursuant to clause 2(b)(2) of Rule X.

(D) A letter was received from the Director of the Congressional Budget Office pursuant to section 403 of the Congressional Budget Act of 1974 in reference to H.R. 14104 and follows herewith.

U.S. Congress,
Congressional Budget Office,
Washington, D.C., September 22, 1978.

Hon. John M. Murphy,
Chairman, Committee on Merchant Marine and Fisheries,
U.S. House of Representatives,
Washington, D.C.

Dear Mr. Chairman: Pursuant to section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for H.R. 14104, the Endangered Species Act Amendments of 1978.

Should the committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

Robert A. Levine
(For Alice M. Rivlin, Director).

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

September 22, 1978.

1. Bill No.: H.R. 14104.
2. Bill title: Endangered Species Act Amendments of 1978.
3. Bill status: As ordered by the House Committee on Merchant Marine and Fisheries, September 19, 1978.
4. Bill purpose: The bill establishes an Endangered Species Committee and requires the formation of review boards to examine the decisions of the Secretary of the Interior as to whether an agency's action would be hazardous to endangered species and their critical habitat area. Such a determination by the Secretary would prohibit the agency's action. Except in special cases, such as cases relating to international treaty obligations as determined by the Secretary of State or cases pertaining to disaster are as declared by the President, the Endangered Species Committee would make the final governmental decision by either approving or disapproving the agency's action. If an agency exemption is granted for pertinent reasons, any person may obtain judicial review of the decision. This bill provides an authorization of $500,000 in each of the fiscal years 1979, 1980, and 1981 to cover the expenses of both the Committee and the review boards

In addition, the bill provides authorizations of $23 million for fiscal year 1979, $25 million for fiscal year 1980, and $27 million for fiscal year 1981 to the U.S. Fish and Wildlife Service (USFWS) to carry out its responsibilities under the Endangered Species Act. It also authorizes the appropriation of $2.5 million in fiscal year 1979, $3.0 million in fiscal year 1980, and $3.5 million in fiscal year 1981 to the Department of Commerce for the National Oceanic and Atmospheric Administration (NOAA).

5. Cost estimate:

[Fiscal years; in millions of dollars]

	Fiscal year—				
	1979	1980	1981	1982	1983
Authorization level	26.0	28.5	31.0		
Cost estimate	24.4	28.3	30.9	1.9	

Note: The costs of this bill fall within budget subfunction 303.

6. Basis of estimate: The authorization levels are those stated in the bill and are assumed to be fully appropriated. Costs are estimated by applying a 2-year outlay rate to the level of appropriation authorized for NOAA, USFWS, and the expenses of the review committees. Spendout rates for NOAA and USFWS were developed in consultation with agency staffs. It was estimated that the 2-year outlay rate for the appropriation provided for the review committees would be 60 percent the first year and 40 percent the second year.

7. Estimate comparison: None.

8. Previous CBO estimate: A cost estimate was prepared on March 22, 1978, for H.R. 10883, as ordered reported by the House Committee on Merchant Marine and Fisheries. This bill provided the same authorization as H.R. 14104 for the U.S. Fish and Wildlife Service and the National Oceanic and Atmospheric Administration. The only additional cost of H.R. 14104 is related to the higher authorization of $500,000 for the expenses of the review boards and the Endangered Species Committee.

CBO also prepared a cost estimate on May 12, 1978, for S. 2889, as ordered reported by the Senate Committee on Environment and Public Works. This bill provided higher authorizations for fiscal years 1979, 1980, and 1981. The bill also established an Endangered Species Committee.

9. Estimate prepared by James V. Manaro.

10. Estimate approved by: C. G. Nuckols for James L. Blum, Assistant Director for Budget Analysis.

DEPARTMENTAL REPORTS

H.R. 14104 was the subject of a report from the Department of Justice. This report follows:

DEPARTMENT OF JUSTICE,
Washington, D.C., September 22, 1978.

Hon. JOHN M. MURPHY,
Chairman, Committee on Merchant Marine and Fisheries,
House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: We would like to proffer the comments of the Department of Justice on H.R. 13807, the "Endangered Species Act

Amendments of 1978," as reported by the Committee on Merchant Marine and Fisheries on September 19, 1978.

This Department takes no position on the merits of this legislation, however, we would like to discuss those portions of Section 3 of the bill which provide for the establishment of a "Review Board" and an "Endangered Species Committee." In our opinion, the procedure for establishment of these bodies raises issues of a constitutional dimension. Under that section these new entities would review and act on applications for federal project exemptions under the Endangered Species Act. Specifically, in the case of an application for exemption, the Review Board, after making certain threshold determinations informally, would make findings on the record after a formal adjudicatory hearing under the Administrative Procedure Act; and these findings would serve as a basis for the board's recommendation on the exemption question. This recommendation would then be presented to the Endangered Species Committee which would make an independent determination on the exemption question in accordance with standards set forth in the amendment. The Committee's decision would be the final action in the administrative process and would be subject to judicial review. Attorneys designated by the Committee would represent the Committee in any review proceeding.

Under the bill, the adjudicatory and ancillary powers exercised by the Committee fall clearly within the category of functions which, under *Buckley* v. *Valeo*, 424 U.S. 1 (1976), may be exercised only by persons who have been appointed pursuant to Article II, § 2, cl. 2 of the Constitution. Five of the six members of the Committee are to be appointed in accordance with that clause, but the sixth (the Governor of the State in which the agency action in question will occur) will not be appointed in that way. Under *Buckley* v. *Valeo*, supra, the constitutionality of the Committee is in substantial doubt because of this infirmity in the appointment mechanism.

We have similar concerns with regard to the Review Board. Because the Board's ultimate powers are only recommendatory, it could be argued that its powers are "sufficiently removed from the administration and enforcement of public law to allow [them] to be performed by" persons not appointed pursuant to the Appointments Clause. *Id.* at 141. But under at least one interpretation of the bill, the Board would have effective power, in some cases, to take dispositive action with respect to applications, since it need not consider an application at all unless it determines that certain preliminary requirements have been met. See Subsection (d)(5). The Review Board must consider an application on the merits before the exemption question can reach the Committee. This apparent screening function plays a central role in the administrative scheme, and for this reason we believe it difficult to argue that the Review Board is not engaged in "administration and enforcement of public law." Accordingly, we think that the mechanism for appointing Board members should conform with the Appointments Clause. Under the bill, two members of the Board (the appointee of the Governor of the affected State, and the member appointed by that appointee and the appointee of the Secretary of the Interior) are not appointed in accordance with the Appointments Clause.

These infirmities could be corrected as follows:

A. Review Board

The Review Board would be constitutionally constituted were all of its members appointed pursuant to Art. II, § 2, cl. 2, i.e., either by the President or the Secretary.*

B. The Endangered Species Committee

If voting rights were denied to the Governors of the affected States, we think that they could otherwise participate in the Committee decisions without casting doubt on those decisions. Because they hold their position by virtue of their state office, we do not believe that the formality of a Presidential "appointment" of them to the Committee would solve the constitutional problem.

Department representatives have discussed the concerns noted above with the committee staff. We will be happy to continue to work with the staff in order to obviate the problems noted.

The Office of Management and Budget has advised that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

Patricia M. Wald,
Assistant Attorney General.

CHANGES IN EXISTING LAW

In compliance with clause 3 of Rule XIII of the Rules of the House of Representatives, as amended, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic: existing law in which no change is proposed is shown in roman):

ENDANGERED SPECIES ACT OF 1973, AS AMENDED

(16 U.S.C. 1531–1543; Pub. Law 93–205)

AN ACT To provide for the conservation of endangered and threatened species of fish, wildlife, and plants, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Endangered Species Act of 1973".

TABLE OF CONTENTS

Sec. 2. Findings, purposes, and policy.
Sec. 3. Definitions.
Sec. 4. Determination of endangered species and threatened species.
Sec. 5. Land acquisition.

Sec. 14. Repealer.
Sec. 15. Authorization of appropriations.
Sec. 16. Effective date.
Sec. 17. Marine Mammal Protection Act of 1972.

---

*While an appointment by the courts is technically permissible, we do not believe that would be appropriate here.

FINDINGS, PURPOSES, AND POLICY

SEC. 2. (a) FINDINGS.—The Congress finds and declares that—

(1) various species of fish, wildlife, and plants in the United States have been rendered extinct as a consequence of economic growth and development untempered by adequate concern and conservation;

(2) other species of fish, wildlife, and plants have been so depleted in numbers that they are in danger of or threatened with extinction;

(3) these species of fish, wildlife, and plants are of esthetic, ecological, educational, historical, recreational, and scientific value to the Nation and its people;

(4) the United States has pledged itself as a sovereign state in the international community to conserve to the extent practicable the various species of fish or wildlife and plants facing extinction, pursuant to—

(A) migratory bird treaties with Canada and Mexico;

(B) the Migratory and Endangered Bird Treaty with Japan;

(C) the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere;

(D) the International Convention for the Northwest Atlantic Fisheries;

(E) the International Convention for the High Seas Fisheries of the North Pacific Ocean;

(F) the Convention on International Trade in Endangered Species of Wild Fauna and Flora; and

(G) other international agreements.

(5) encouraging the States and other interested parties, through Federal financial assistance and a system of incentives, to develop and maintain conservation programs which meet national and international standards is a key to meeting the Nation's international commitments and to better safeguarding, for the benefit of all citizens, the Nation's heritage in fish and wildlife.

(b) PURPOSES.—The purposes of this Act are to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved, to provide a program for the conservation of such endangered species and threatened species, and to take such steps as may be appropriate to achieve the purposes of the treaties and conventions set forth in subsection (a) of this section.

(c) POLICY.—It is further declared to be the policy of Congress that all Federal departments and agencies shall seek to conserve endangered species and threatened species and shall utilize their authorities in furtherance of the purposes of this Act.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) The term "commercial activity" means all activities of industry and trade, including, but not limited to, the buying or selling of commodities and activities conducted for the purpose of facilitating such buying and selling: *Provided, however*, That

it does not include exhibition of commodities by museums or similar cultural or historical organizations.

(2) The terms "conserve", "conserving", and "conservation" mean to use and the use of all methods and procedures which are necessary to bring any endangered species or threatened species to the point at which the measures provided pursuant to this Act are no longer necessary. Such methods and procedures include, but are not limited to, all activities associated with scientific resources management such as research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation, and, in the extraordinary case where population pressures within a given ecosystem cannot be otherwise relieved, may include regulated taking.

(3) The term "Convention" means the Convention on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973, and the appendices thereto.

(4) The term "endangered species" means any species which is in danger of extinction throughout all or a significant portion of its range other than a species of the Class Insecta determined by the Secretary to constitute a pest whose protection under the provisions of this Act would present an overwhelming and overriding risk to man.

(5) The term "Federal agency" means any department, agency, or instrumentality of the United States.

(6) The term "critical habitat" for an endangered species or threatened species means any air, land, or water area (exclusive of those existing manmade structures or settlements which are not necessary to the survival and recovery of a listed species) and constituent elements thereof, the loss of which would significantly decrease the likelihood of conserving such species.

[(5)**]** *(7)* The term "fish or wildlife" means any member of the animal kingdom, including without limitation any mammal, fish, bird (including any migratory, nonmigratory, or endangered bird for which protection is also afforded by treaty or other international agreement), amphibian, reptile, mollusk, crustacean, arthropod or other invertebrate, and includes any part, product, egg, or offspring thereof, or the dead body or parts thereof.

[(6)**]** *(8)* The term "foreign commerce" includes, among other things, any transaction—

(A) between persons within one foreign country;

(B) between persons in two or more foreign countries;

(C) between a person within the United States and a person in a foreign country; or

(D) between persons within the United States, where the fish and wildlife in question are moving in any country or countries outside the United States.

[(7)**]** *(9)* The term "import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

[(8)](*10*) The term "person" means an individual, corporation, partnership, trust, association, or any other private entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

[(9)](*11*) The term "plant" means any member of the plant kingdom, including seeds, roots and other parts thereof.

[(10)](*12*) The term "Secretary" means, except as otherwise herein provided, the Secretary of the Interior or the Secretary of Commerce as program responsibilities are vested pursuant to the provisions of Reorganization Plan Numbered 4 of 1970; except that with respect to the enforcement of the provisions of this Act and the Convention which pertain to the importation or exportation of terrestrial plants, the term means the Secretary of Agriculture.

[(11) The term "species" includes any subspecies of fish or wildlife or plants and any other group of fish or wildlife of the same species or smaller taxa in common spatial arrangement that interbreed when mature.]

(13) The term 'species' includes any subspecies of fish or wildlife or plants, and any distinct segment of the population of any species of vertebrate fish or wildlife which interbreeds when mature.

[(12)](*14*) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

[(13) The term "State agency" means the State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish or wildlife resources within a State.]

(15) The term "State agency" means any State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish, plant, or wildlife resources within a State.

[(14)](*16*) The term "take" means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

[(15)](*17*) The term "threatened species" means any species which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

[(16)](*18*) The term "United States", when used in a geographical context, includes all States.

(19) The term "species or habitat degradation" means either or both of the following effects:

(A) The placing in jeopardy of the continued existence of any endangered species or threatened species listed pursuant to section 4.

(B) The destruction or adverse modification of any critical habitat of any endangered species or threatened species so listed.

(20) The term "permit or license applicant" means, when used with respect to an action of a Federal agency for which exemption is sought under section 7, any person whose application to such agency for a permit or license has been denied because of the application of section 7(c)(1) to such agency action.

DETERMINATION OF ENDANGERED SPECIES AND THREATENED SPECIES

SEC. 4. (a) GENERAL.—(1) The Secretary shall by regulation determine whether any species is an endangered species or a threatened species because of any of the following factors:

(1) the present or threatened destruction, modification, or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific, or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

At the time any such regulation is proposed, the Secretary shall also by regulation, to the maximum extent prudent, specify any habitat of such species which is then considered to be critical habitat. The requirement of the preceding sentence shall not apply with respect to any species which was listed prior to enactment of the Endangered Species Act Amendments of 1978.

(2) With respect to any species over which program responsibilities have been vested in the Secretary of Commerce pursuant to Reorganization Plan Numbered 4 of 1970—

(A) in any such case in which the Secretary of Commerce determines that such species should—

(i) be listed as an endangered species or a threatened species, or

(ii) be changed in status from a threatened species to an endangered species,

he shall so inform the Secretary of the Interior, who shall list such species in accordance with this section;

(B) in any case in which the Secretary of Commerce determines that such species should—

(i) be removed from any list published pursuant to subsection (c) of this section, or

(ii) be changed in status from an endangered species to a threatened species,

he shall recommend such action to the Secretary of the Interior, and the Secretary of the Interior, if he concurs in the recommendation, shall implement such action; and

(C) the Secretary of the Interior may not list or remove from any list any such species, and may not change the status of any such species which are listed, without a prior favorable determination made pursuant to this section by the Secretary of Commerce.

(b) BASIS FOR DETERMINATIONS.—(1) The Secretary shall make determinations required by subsection (a) of this section on the basis of the best scientific and commercial data available to him and after consultation, as appropriate, with the affected States, interested persons and organizations, other interested Federal agencies, and, in cooperation with the Secretary of State, with the country or countries in which the species concerned is normally found or whose citizens harvest such species on the high seas; except that in any case in which such determinations involve resident species of fish or wildlife, the Secretary of the Interior may not add such species to, or remove such species from, any list published pursuant to subsection (c) of this section, unless the Secretary has first—

(A) published notice in the Federal Register and notified the Governor of each State within which such species is then known to occur that such action is contemplated;

(B) allowed each such State 90 days after notification to submit its comments and recommendations, except to the extent that such period may be shortened by agreement between the Secretary and the Governor or Governors concerned; and

(C) published in the Federal Register a summary of all comments and recommendations received by him which relate to such proposed action.

(2) In determining whether or not any species is an endangered species or a threatened species, the Secretary shall take into consideration those efforts, if any, being made by any nation or any political subdivision of any nation to protect such species, whether by predator control, protection of habitat and food supply, or other conservation practices, within any area under the jurisdiction of any such nation or political subdivision, or on the high seas.

(3) Species which have been designated as requiring protection from unrestricted commerce by any foreign country, or pursuant to any international agreement, shall receive full consideration by the Secretary to determine whether each is an endangered species or a threatened species.

(4) *In determining the critical habitat of any endangered or threatened invertebrate animal species, the Secretary shall consider the economic impact, and any other relevant impacts, of specifying and particular area as critical habitat, and he may exclude any such area from the critical habitat if he determines that the benefits of such exclusion outweigh the benefits of specifying the area as part of the critical habitat.*

(c) LISTS.—(1) The Secretary of the Interior shall publish in the Federal Register, and from time to time he may be regulation revise, a list of all species determined by him or the Secretary of Commerce to be endangered species and a list of all species determined by him or the Secretary of Commerce to be threatened species. Each list shall refer to the species contained therein by scientific and common name or names, if any, [and shall] specify with respect to each such species over what portion of its range it is endangered or threatened, *and specify any critical habitat within such range.*

(2) The Secretary shall, upon the petition of an interested person under subsection 553(e) of title 5, United States Code, conduct a review of any listed or unlisted species proposed to be removed from or added to either or the lists published pursuant to paragraph (1) of this subsection, but only if he makes and publishes a finding that such

person has presented substantial evidence which in his judgment warrants such a review.

(3) Any list in effect on the day before the date of the enactment of this Act of species of fish or wildlife determined by the Secretary of the Interior, pursuant to the Endangered Species Conservation Act of 1969, to be threatened with extinction shall be republished to conform to the classification for endangered species or threatened species, as the case may be, provided for in this Act, but until such republication, any such species so listed shall be deemed an endangered species within the meaning of this Act. The republication of any species pursuant to this paragraph shall not require public hearing or comment under section 553 of title 5, United States Code.

(4) The Secretary shall—

(A) conduct, at least once every five years, a review of all species included in a list which is published pursuant to paragraph (1) and which is in effect at the time of such review; and

(B) determine on the basis of such review whether any such species should—

(i) be removed from such list;

(ii) be changed in status from an endangered species to a threatened species; or

(iii) be changed in status from a threatened species to an endangered species.

Each determination under subparagraph (B) shall be made in accordance with the provisions of subsections (a) and (b).

(d) Protective Regulations.—Whenever any species is listed as a threatened species pursuant to subsection (c) of this section, the Secretary shall issue such regulations as he deems necessary and advisable to provide for the conservation of such species. The Secretary may by regulation prohibit with respect to any threatened species any act prohibited under section 9(a)(1), in the case of fish or wildlife, or section 9(a)(2), in the case of plants, with respect to endangered species; except that with respect to the taking of resident species of fish or wildlife, such regulations shall apply in any State which has entered into a cooperative agreement pursuant to section 6(a) of this Act only to the extent that such regulations have also been adopted by such State.

(e) Similarity of Appearance Cases.—The Secretary may, by regulation, and to the extent he deems advisable, treat any species as an endangered species or threatened species even though it is not listed pursuant to section 4 of this Act if he finds that—

(A) such species so closely resembles in appearance, at the point in question, a species which has been listed pursuant to such section that enforcement personnel would have substantial difficulty in attempting to differentiate between the listed and unlisted species;

(B) the effect of this substantial difficulty is an additional threat to an endangered or threatened species; and

(C) such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of this Act.

(f) Regulations— (1) Except as provided in paragraphs (2) and (3) of this subsection and subsection (b) of this section the provisions of section 553 of title 5, United States Code (relating to rulemaking procedures), shall apply to any regulation promulgated to carry out the purposes of this Act.

[(2) (A) In the case of any regulation proposed by the Secretary to carry out the purposes of this Act—

[(i) the Secretary shall publish general notice of the proposed regulation (including the complete text of the regulation) in the Federal Register not less than 60 days before the effective date of the regulation; and

[(ii) if any person who feels that he may be adversely affected by the proposed regulation files (within 45 days after the date of publication of general notice) objections thereto and requests a public hearing thereon, the Secretary may grant such request, but shall if he denies such request, publish his reasons therefor in the Federal Register.]

(2)(A) *In the case of any regulation proposed by the Secretary to carry out the purposes of this section with respect to the determination and listing of endangered or threatened species and their critical habitats in any State (other than regulations to implement the Convention), the Secretary—*

(i) shall publish notice of the proposed regulation (including the complete text of the regulation), not less than 60 days before the effective date of the regulation—

(I) in the Federal Register, and

(II) if the proposed regulation specifies any critical habitat, in a newspaper of general circulation within or adjacent to such habitat; and

(ii) shall give actual notice of the proposed regulation (including the complete text of the regulation), and any environmental assessment or environmental impact statement prepared on the proposed regulation, not less than 60 days before the effective date of the regulation to all general local governments located within or adjacent to the proposed critical habitat;

(iii) shall—

(I) if the proposed regulation does not specify any critical habitat, promptly hold a public meeting on the proposed regulation, if request therefor is filed with the Secretary by any person within 45 days after the date of publication of general notice under clause (i)(I), and

(II) if the proposed regulation specifies any critical habitat, promptly hold a public meeting on the proposed regulation within the area in which such habitat is located in each State, and, if requested, hold a public hearing in each such State.

If a public meeting or hearing is held on any regulation, the regulation may not take effect before the 60th day after the date on which the meeting or hearing is concluded, and if more than one public meeting or hearing is held, before the 60th day after the date on which the last such meeting or hearing is concluded. Any accidental failure to provide actual notice under clause (ii) to all general local governments required to be given notice shall not invalidate the proposed regulation.

(B) Neither subparagraph (A) of this paragraph nor section 553 of title 5, United States Code, shall apply in the case of any of the following regulations and any such regulation shall, at the discretion of the Secretary, take effect immediately upon publication of the regulation in the Federal Register:

(i) Any regulation appropriate to carry out the purposes of this Act which was originally promulgated to carry out the Endangered Species Conservation Act of 1969.

(ii) Any regulation (including any regulation implementing section 6(g)(2)(B)(ii) of this Act) issued by the Secretary in regard to any emergency posing a significant risk to the well-being of any species of fish or wildlife, but only if (I) at the time of publication of the regulation in the Federal Register the Secretary publishes therein detailed reasons why such regulation is necessary, and (II) in the case such regulation applies to resident species of fish and wildlife, the requirements of subsection (b)(1)(A) of this section have been complied with. Any regulation promulgated under the authority of this clause (ii) shall cease to have force and effect at the close of the 120-day period following the date of publication unless, during such 120-day period, the rulemaking procedures which would apply to such regulation without regard to this subparagraph are complied with.

[(3) The publication in the Federal Register of any proposed or final regulation which is necessary or appropriate to carry out the purposes of this Act shall include a statement by the Secretary of the facts on which such regulation is based and the relationship of such facts to such regulation.]

(3) The publication in the Federal Register of any proposed or final regulation which is necessary or appropriate to carry out the purposes of this Act shall include a summary by the Secretary of the data on which such regulation is based and shall show the relationship of such data to such regulations.

(4) Any proposed or final regulation which specifies any critical habitat of any endangered species or threatened species shall be based on the best scientific data available, and the publication in the Federal Register of any such regulation shall, to the maximum extent practicable, be accompanied by a brief description and evaluation of those activities (whether public or private) which, in the opinion of the Secretary, if undertaken may adversely modify such habitat, or may be impacted by such designation.

(5) A final regulation adding a species to any list published pursuant to subsection (c) shall be published in the Federal Register not later than two years after the date of publication of notice of the regulation proposing such listing under paragraph (2)(A)(i). If a final regulation is not adopted within such two-year period, the Secretary shall withdraw the proposed regulation and shall publish notice of such withdrawal in the Federal Register not later than 30 days after the end of such period. The Secretary shall not propose a regulation adding to such a list any species for which a proposed regulation has been withdrawn under this paragraph unless he determines that sufficient new information is available to warrant the proposal of a regulation. No proposed regulation for the listing of any species published before the date of the enactment of the Endangered Species Act

Amendments of 1978 shall be withdrawn under this paragraph before the end of the one-year period beginning on such date of enactment.

(g) Recovery Plans.—The Secretary shall develop and implement plans (hereinafter in this subsection referred to as "recovery plans") for the conservation or survival of endangered species and threatened species listed pursuant to this section. The Secretary, in developing and implementing recovery plans, may procure the services of appropriate public and private agencies and institutions, and other qualified persons. Recovery teams appointed pursuant to this subsection shall not be subject to the Federal Advisory Committee Act.

LAND ACQUISITION

Sec. 5. [(a) Program.—The Secretary of the Interior shall establish and implement a program to conserve (A) fish or wildlife which are listed as endangered species or threatened species pursuant to section 4 of this Act; or (B) plants which are concluded in Appendices to the Convention. To carry out such program, he—]

(a) Program.—The Secretary, and the Secretary of Agriculture with respect to the National Forest System, shall establish and implement a program to conserve fish, wildlife, and plants including those which are listed as endangered species or threatened species pursuant to section 4 of this Act. To carry out such a program, the appropriate Secretary—

(1) shall utilize the land acquisition and other authority under the Fish and Wildlife Act of 1956, as amended, the Fish and Wildlife Coordination Act, as amended, and the Migratory Bird Conservation Act, as appropriate; and

(2) is authorized to acquire by purchase, donation, or otherwise, lands, waters, or interest therein, and such authority shall be in addition to any other land acquisition authority vested in him.

(b) Acquisitions.—Funds made available pursuant to the Land and Water Conservation Fund Act of 1965, as amended, may be used for the purpose of acquiring lands, waters, or interests therein under subsection (a) of this section.

COOPERATION WITH THE STATES

Sec. 6. (a) General.—In carrying out the program authorized by this Act, the Secretary shall cooperate to the maximum extent practicable with the States. Such cooperation shall include consultation with the States concerned before acquiring any land or water, or interest therein, for the purpose of conserving any endangered species or threatened species.

(b) Management Agreements.—The Secretary may enter into agreements with any State for the administration and management of any area established for the conservation of endangered species or threatened species. Any revenues derived from the administration of such areas under these agreements shall be subject to the provisions of section 401 of the Act of June 15, 1935 (49 Stat. 383; 16 U.S.C. 715s).

(c) Cooperative Agreements.—*(1)* In furtherance of the purposes of this Act, the Secretary is authorized to enter into a cooperative agreement in accordance with this section with any State which establishes and maintains an adequate and active program for the conservation of endangered species and threatened species. Within one hundred and twenty days after the Secretary receives a certified copy of such a proposed State program, he shall make a determination whether such program is in accordance with this Act. Unless he determines, pursuant to this [subsection,] *paragraph*, that the State program is not in accordance with this Act, he shall enter into a cooperative agreement with the State for the purpose of assisting in implementation of the State program. In order for a State program to be deemed an adequate and active program for the conservation of endangered species and threatened species, the Secretary must find, and annually thereafter reconfirm such finding, that under the State program—

[(1)](*A*) authority resides in the State agency to conserve resident species of fish or wildlife determined by the State agency or the Secretary to be endangered or threatened;

[(2)](*B*) the State agency has established acceptable conservation programs, consistent with the purposes and policies of this Act, for all resident species of fish or wildlife in the State which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary:

[(3)] (*C*) the State agency is authorized to conduct investigations to determine the status and requirements for survival of resident species of fish and wildlife;

[(4)] (*D*) the State agency is authorized to establish programs, including the acquisition of land or aquatic habitat or interests therein, for the conservation of resident [endangered species or threatened species;] *endangered or threatened species of fish or wildlife;* and

[(5)] (*E*) provision is made for public participation in designating resident species of fish or wildlife as endangered or threatened; or

that under the State program—

[(A)] (*i*) the requirements set forth in [paragraphs (3), (4), and (5) of this subsection] *subparagraphs* (*C*), (*D*), *and* (*E*) *of this paragraph* are complied with, and

[(B)] (*ii*) plans are included under which immediate attention will be given to those resident species of fish and wildlife which are determined by the Secretary or the State agency to be endangered or threatened and which the Secretary and the State agency agree are most urgently in need of conservation programs; except that a cooperative agreement entered into with a State whose program is deemed adequate and active pursuant to [subparagraph (A) and this subparagraph] *clause*(*i*) *and this clause* shall not affect the applicability of prohibitions set forth in or authorized pursuant to section 4(d) or section 9(a)(1) with respect to the taking of any resident endangered or threatened species.

(*2*) *In furtherance of the purposes of this Act, the Secretary is authorized to enter into a cooperative agreement in accordance with this section with any State which establishes and maintains* *an adequate and active program for the conservation of endangered species and threatened species of plants. Within one hundred and twenty days after the Secretary receives a certified copy of such a proposed State program, he shall make a determination whether such program is in accordance with this Act. Unless he determines, pursuant to this paragraph, that the State program is not in accordance with this Act, he shall enter into a cooperative agreement with the State for the purpose of assisting in implementation of the State program. In order for a State program to be deemed an adequate and active program for the conservation of endangered species of plants and threatened species of plants, the Secretary must find, and annually reconfirm such finding, that under the State program—*

(A) authority resides in the State agency to conserve resident species of plants determined by the State agency or the Secretary to be endangered or threatened;

(B) the State agency has established acceptable conservation programs, consistent with the purposes and policies of this Act, for all resident species of plants in the State which are deemed by the Secretary to be endangered or threatened, and has furnished a copy of such plan and program together with all pertinent details, information, and data requested to the Secretary;

(C) the State agency is authorized to conduct investigations to determine the status and requirements for survival of resident species of plants; and

(D) provision is made for public participation in designating resident species of plants as endangered or threatened; or

that under the State program—

(i) the requirements set forth in subparagraphs (C) and (D) of this paragraph are complied with, and

(ii) plans are included under which immediate attention will be given to those resident species of plants which are determined by the Secretary or the State agency to be endangered or threatened and which the Secretary and the State agency agree are most urgently in need of conservation programs; except that a cooperative agreement entered into with a State whose program is deemed adequate and active pursuant to clause (i) and this clause shall not affect the applicability of prohibitions set forth in or authorized pursuant to section 4(d) or section 9(a)(1) with respect to the taking of any resident endangered or threatened species.

(d) ALLOCATION OF FUNDS.—(1) The Secretary is authorized to provide financial assistance to any State, through its respective State agency, which has entered into a cooperative agreement pursuant to subsection (c) of this section to assist in development of programs for the conservation of endangered and threatened species. The Secretary shall make an allocation of appropriated funds to such States based on consideration of—

(A) the international commitments of the United States to protect endangered species or threatened species;

(B) the readiness of a State to proceed with a conservation program consistent with the objectives and purposes of this Act;

(C) the number of endangered species and threatened species within a State;

(D) the potential for restoring endangered species and threatened species within a State; and

(E) the relative urgency to initiate a program to restore and protect an endangered species or threatened species in terms of survival of the species.

So much of any appropriated funds allocated for obligation to any State for any fiscal year as remains unobligated at the close thereof is authorized to be made available to that State until the close of the succeeding fiscal year. Any amount allocated to any State which is unobligated at the end of the period during which it is available for expenditure is authorized to be made available for expenditure by the Secretary in conducting programs under this section.

(2) Such cooperative agreements shall provide for (A) the actions to be taken by the Secretary and the States; (B) the benefits that are expected to be derived in connection with the conservation of endangered or threatened species; (C) the estimated cost of these actions; and (D) the share of such costs to be borne by the Federal Government and by the States; except that—

(i) the Federal share of such program costs shall not exceed 66⅔ per centum of the estimated program cost stated in the agreement; and

(ii) the Federal share may be increased to 75 per centum whenever two or more States having a common interest in one or more endangered or threatened species, the conservation of which may be enhanced by cooperation of such States, enter jointly into an agreement with the Secretary.

The Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon in the cooperative agreement. For the purposes of this section, the non-Federal share may, in the discretion of the Secretary, be in the form of money or real property, the value of which will be determined by the Secretary, whose decision shall be final.

(e) REVIEW OF STATE PROGRAMS.—Any action taken by the Secretary under this section shall be subject to his periodic review at no greater than annual intervals.

(f) CONFLICTS BETWEEN FEDERAL AND STATE LAWS.—Any State law or regulation which applies with respect to the importation or exportation of, or interstate or foreign commerce in, endangered species or threatened species is void to the extent that it may effectively (1) permit what is prohibited by this Act or by any regulation which implements this Act, or (2) prohibit what is authorized pursuant to an exemption or permit provided for in this Act or in any regulation which implements this Act. This Act shall not otherwise be construed to void any State law or regulation which is intended to conserve migratory, resident, or introduced fish or wildlife, or to permit or prohibit sale of such fish or wildlife. Any State law or regulation respecting the taking of an endangered species or threatened species may be more restrictive than the exemptions or permits provided for in this Act or in any regulation which implements this Act but not less restrictive than the prohibitions so defined.

(g) TRANSITION.—(1) For purposes of this subsection, the term "establishment period" means, with respect to any State, the period beginning on the date of enactment of this Act and ending on whichever of the following dates first occurs: (A) the date of the close of the 120-day period following the adjournment of the first regular session of the legislature of such State which commences after such date of enactment, or (B) the date of the close of the 15-month period following such date of enactment.

(2) The prohibitions set forth in or authorized pursuant to sections 4(d) and 9(a)(1)(B) of this Act shall not apply with respect to the taking of any resident endangered species or threatened species (other than species listed in Appendix I to the Convention or otherwise specifically covered by any other treaty or Federal law) within any State—

(A) which is then a party to a cooperative agreement with the Secretary pursuant to section 6(c) of this Act (except to the extent that the taking of any such species is contrary to the law of such State); or

(B) except for any time within the establishment period when—

(i) the Secretary applies such prohibition to such species at the request of the State, or

(ii) the Secretary applies such prohibition after he finds, and publishes his finding, that an emergency exists posing a significant risk to the well-being of such species and that the prohibition must be applied to protect such species. The Secretary's finding and publication may be made without regard to the public hearing or comment provisions of section 553 of title 5, United States Code, or any other provision of this Act; but such prohibition shall expire 90 days after the date of its imposition unless the Secretary further extends such prohibition by publishing notice and a statement of justification of such extension.

(h) REGULATIONS.—The Secretary is authorized to promulgate such regulations as may be appropriate to carry out the provisions of this section relating to financial assistance to States.

(i) APPROPRIATIONS.—For the purposes of this section, there are authorized to be appropriated not to exceed the following sums:

(1) $10,000,000 through the period ending September 30, 1977.

(2) $16,000,000 for the period beginning October 1, 1977, and ending September 30, 1981.

[INTERAGENCY COOPERATION

[SEC. 7. The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.]

INTERAGENCY COOPERATION

SEC. 7. (a) REVIEW BY SECRETARY.—The Secretary shall review all other programs administered by him and utilize such programs in furtherance of the purposes of this Act.

(b) AGENCY CONSERVATION PROGRAMS.—Each Federal agency shall, after consultation with and with the assistance of the Secretary, utilize its authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4.

(c) AGENCY ACTION.—(1) Each Federal agency shall insure that any action authorized, funded, or carried out by the agency (hereinafter in this section referred to as an 'agency action') does not result in species or habitat degradation unless an exemption has been granted by the Endangered Species Committee under subsection (f) with respect to such agency action.

(2) If any Federal agency—

(A) considers that any agency action over which it has jurisdiction may result in species or habitat degradation; or

(B) is notified by the Secretary that the Secretary considers that such agency action may have such a result;

the Federal agency and the Secretary shall undertake immediate consultation with respect to the matter, including, but not limited to, consultation to determine if reasonable and prudent alternatives are available. Consultation under this paragraph with respect to any agency action shall be concluded within 90 days after the date on which initiated or within such other period of time as is mutually agreeable to the Federal agency and the Secretary: Promptly after the conclusion of consultation, the Secretary shall provide to the Federal agency concerned a written statement setting forth the Secretary's opinion, and a summary of the information on which the opinion is based, detailing whether the agency may result in species or habitat degradation and whether there are reasonable and prudent alternatives which would avoid species or habitat degradation which can be taken by the Federal agency in implementing the agency action.

(3) To facilitate compliance with the requirements of paragraph (1), each Federal agency shall, with respect to any action of such agency for which no contract for construction has been entered into and for which no construction has begun on the date of enactment of the Endangered Species Act Amendments of 1978, request of the Secretary information whether any listed species may be present in the area of such proposed action. If the Secretary advises, based on the best scientific and commercial data available, that such species may be present, such agency shall conduct a biological assessment for the purpose of identifying any endangered species or threatened species which is likely to be affected by such action. Such assessment shall be completed before any contract for construction is entered into and before construction is begun with respect to such action. Such assess-

ment may be undertaken as part of a Federal agency's compliance with the requirements of section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332).

(4) After initiation of consultation required under paragraph (2), the Federal agency shall not make any irreversible or irretrievable commitments of resources with respect to the agency action which has the effect of foreclosing the formulation or implementation of any reasonable and prudent alternative measures which would avoid species or habitat degradation.

(d) APPLICATION FOR EXEMPTION AND CONSIDERATION BY REVIEW BOARD.—(1) A Federal agency, the Governor of the State in which the Federal agency action will occur, or a permit or license applicant may apply to the Secretary for an exemption for an agency action of such agency if after consultation under subsection (c)(2) the Secretary's opinion indicates that the agency action may result in species or habitat degradation. An application for an exemption shall be considered initially by a review board in the manner provided in this subsection, and shall be considered by the Endangered Species Committee for a final determination under subsection (f) after a recommendation is made by the review board.

(2)(A) Any Federal agency, Governor, or permit or license applicant seeking an exemption under this subsection shall submit a written application to the Secretary, in a form prescribed by the Secretary, not later than 90 days after the completion of the consultation process. Such application shall set forth the reasons why the Federal agency, Governor, or permit or license applicant considers that the agency action meets the requirements for an exemption under this subsection.

(B) Upon receipt of the application for exemption referred to in paragraph (1), the Secretary shall promptly notify the Governor or Governors of the affected States, as determined by the Secretary, and request that they appoint a member of the review board to be established under paragraph (3) in accordance with the provisions of such paragraph.

(3)(A) A review board consisting of three members shall be established for purposes of considering an application for examination and making recommendations to the Endangered Species Committee under this subsection as follows:

(i) The Secretary and the Governor of the affected State shall each appoint one individual to the board not later than 15 days after a request is submitted pursuant to paragraph (2). If more than one State is affected by the agency action, the Governors of such States shall appoint one individual collectively.

(ii) The two individuals appointed under clause (i) shall appoint one individual not later than 15 days after both of them have been appointed. If no appointment is made within such 15-day period, the Endangered Species Committee shall appoint, by a vote of a majority of the members of the Committee, one individual not later than 30 days after the end of such 15-day period.

(B) Members of a review board who are full-time officers or employees of the United States shall receive no additional pay on account of their service on the board. All other members shall be entitled to

receive an amount not to exceed the daily equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day during which they are engaged in the actual performance of duties vested in the board. While away from their homes or regular places of business in the performance of services for a review board, members of the board shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

(4) The Secretary shall submit the application to the review board immediately after its appointment under paragraph (3), and the Secretary shall submit to the review board in writing, his views and recommendations with respect to the application within 60 days after receiving a copy of any application under paragraph (2).

(5) It shall be the duty of a review board appointed under paragraph (3) to make a full review of the consultation carried out under subsection (c)(2), and within 60 days after its appointment or within such longer time as is mutually agreed upon between the agency and the Secertary, to make a determination, by a majority vote, whether such agency has—

(A) carried out its consultation responsibilities in good faith and made a reasonable and responsible effort to develop and fairly consider modifications or reasonable and prudent alternatives to its proposed action which will avoid species or habitat degradation;

(B) conducted any biological assessment required of it by subsection (c)(3); and

(C) refrained from making any irreversible or irretrievable commitment of resources prohibited by subsection (c)(4).

Any determination by the review board that the agency has not met the requirements of subparagraph (A), (B), or (C) shall be considered final agency action for purposes of chapter 7 of title 5 of the United States Code.

(6) If the review board makes positive determinations under subparagraphs (A), (B), and (C) of paragraph (5), it shall proceed to consider the application for exemption. In considering any application for an exemption, a review board shall take into account the reasons for an exemption set forth in the application of the Federal agency, Governor, or permit or license applicant; the views of the Secretary submitted under paragraph (4), and the views of other Federal and State agencies and appropriate persons. The review board shall recommend an exemption from the requirements of subsection (c)(1) for any agency action if, by a majority vote, it determines on the record after an opportunity for a hearing held in accordance with sections 554, 555, and 556 (other than subsection (b)(3) of section 556) of title 5 of the United States Code, that—

(A) there are no feasible and prudent alternatives to the agency action;

(B) the benefits of such action clearly outweigh the benefits of alternative courses of action consistent with conserving the species or its critical habitat, and such action is in the public interest; and

(C) the action is of national or regional significance.

The review board shall recommend to the Endangered Species Committee whether or not to grant an exemption within 180 days after the hearing described in this paragraph is initiated, or within such other time as is mutually agreed upon by the applicant and a majority of the review board. If the review board recommends an exemption it shall include with its recommendation any reasonable mitigation and enhancement measures which should be considered by the Endangered Species Committee under subsection (f). The review board shall transmit the record of its proceedings and its recommendation to the Committee.

(7) In carrying out its duties under this subsection, a review board may, and any member of a review board if so authorized by the review board, may—

(A) sit and act at times and places, take such testimony, and receive such evidence, as the review board deems advisable;

(B) subject to the Privacy Act of 1974, request of any Federal agency information necessary to enable it to carry out such duties, and upon such request the head of such Federal agency shall furnish such information to the review board; and

(C) use the United States mails in the same manner and upon the same conditions as a Federal agency.

(8) Upon request of a review board, the head of any Federal agency is authorized to detail, on a nonreimbursable basis, any of the personnel of such agency to the review board to assist it in carrying out its duties under this section.

(9) The Administrator of the General Services shall provide to a review board, on a reimbursable basis, such administrative support services as the review board may request.

(10) All meetings and records of review boards shall be open to the public.

(e) ESTABLISHMENT OF COMMITTEE.—There is established a Committee to be known as the Endangered Species Committee (hereinafter in this section referred to as the "Committee").

(2) The Committee shall be composed of six members as follows:

(A) The Secretary of Agriculture.

(B) The Secretary of the Army.

(C) The Secretary of the Interior.

(D) The Administrator of the National Oceanic and Atmospheric Administration.

(E) The Chairman of the Council on Environmental Quality.

(F) The Governor of the State in which the Federal agency action for which an exemption is sought under this section will occur (or in the case of any agency action which will occur in more than one State, the Governors of all such States who shall cast collectively a single vote on the Committee).

(3) The Chairman of the Council on Environmental Quality shall be the Chairman of the Committee.

(4) Members of the Committee shall receive no additional pay on account of their service on the Committee; except that while away from their homes or regular places of business in the performance of

services for the Committee, members of the Committee shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in Government service are allowed expenses under section 5703 of title 5 of the United States Code.

(5) The Committee shall meet at the call of the Chairman or four of its members.

(6) All meetings and records of the Committee shall be open to the public.

(7) The Committee may for the purpose of carrying out its duties under this section hold such hearings, sit and act at such times and places, take such testimony and receive such evidence as the Committee deems desirable.

(f) EXEMPTION.—The Committee shall make a final determination whether or not to grant an exemption within 90 days of receiving the recommendation of the review board under subsection (d)(6). The Committee shall grant an exemption from the requirements of subsection (c)(1) for an agency action if, by a vote of not less than four of its members voting in person—

(1) it determines on the record, based on the recommendation and the record of the review board and on such other testimony or evidence as it may receive, that—

(A) there are no feasible and prudent alternatives to the agency action;

(B) the benefits of such action clearly outweigh the benefits of alternative courses of action consistent with conserving the species or its critical habitat, and such action is in the public interest; and

(C) the action is of regional or national significance; and

(2) it establishes such reasonable mitigation and enhancement measures, including, but not limited to, live propagation, transplantation, and habitat acquisition and improvement, as are necessary and appropriate to minimize the adverse effects of the agency action upon the endangered species, threatened species, or critical habitat concerned.

Any final determination by the Committee under this subsection shall be considered final agency action for purposes of chapter 7 of title 5 of the United States Code.

(g) REVIEW BY SECRETARY OF STATE.—Notwithstanding any other provision of this Act, the Committee shall be prohibited from considering for exemption any application made to it, if the Secretary of State, after a review of the proposed agency action and its potential implications, and after hearing, certifies, in writing, to the Committee within 60 days of any application made under this section that the granting of any such exemption and the carrying out of such action would be in violation of an international treaty obligation or other international obligation of the United States. The Secretary of State shall, at the time of such certification, publish a copy thereof in the Federal Register.

(h) COMMITTEE ORDERS.—(1) If the Committee determines under subsection (f) that an exemption should be granted with respect to any agency action, the Committee shall issue an order granting the exemp-

tion and specifying the mitigation and enhancement measures established pursuant to subsection (f) which shall be carried out and paid for by the Federal agency in implementing the agency action. All necessary mitigation and enhancement measures shall be authorized prior to the implementing of the agency action and funded concurrently with all other project features.
